(f) *Written assurance requirements.*—(1) *Requirement of written assurance for certain data, services, and materials.* No export of technical data of the kind described in § 379.4(f)(1)(i)(a) through (o) below, may be made under the provisions of this General License *GTDR* until the exporter has received written assurance from the importer that neither the technical data nor the direct product[7] thereof is intended to be shipped, either directly or indirectly, to Country Group Q, W,[8] Y, or Z, except as provided in § 379.4(f)(1)(ii) below. No export of technical data of the kind described in § 379.4(f)(1)(i)(p) below may be made under the provisions of this General License *GTDR* until the exporter has received written assurance from the importer that neither the technical data nor the direct product thereof is intended to be shipped, directly or indirectly, to the USSR, Estonia, Latvia or Lithuania, except as provided in § 379.4(f)(1)(ii) below. The required assurance may be in the form of a letter or other written communication from the importer evidencing such intention, or a licensing agreement that restricts disclosure of the technical data to use only in a country other than Country Group Q, W, Y or Z, and prohibits shipment of the direct product thereof by the licensee to Country Group Q, W, Y, or Z or, for data of the kind described in

[1] This restriction does not apply to data included in the foreign filing of a patent, provided such foreign filing of a patent application is in accordance with the regulations of the U.S. Patent Office.

[2] Data included in the foreign filing of a patent is also excluded from the restrictions set forth in § 379.4(d) if such foreign filing of a patent application is in accordance with the regulations of the U.S. Patent Office.

[3] Only the restrictions set forth in § 379.4(c) apply to exports of technical data for use in Canada. In all other cases, an export of technical data for use in Canada may be made without either a validated or a general license. For reexport provisions applicable to Canada and other countries, see §§ 379.8(b) and (c).

[4] This commodity is not listed on the Commodity Control List since it is under the export control jurisdiction of the U.S. Maritime Administration. However, technical data relating to this commodity is under the export control jurisdiction of the Office of Export Administration.

[5] Technical data relating to military or naval submersible watercraft are subject to the export licensing authority of the U.S. Department of State.

[6] The term "direct product," as used in this paragraph, is defined to mean the immediate product (including processes and services) produced directly by use of the technical data.

[7] The term "direct product," as used in this sentence and in this context only, is defined to mean the immediate product (including processes and services) produced directly by use of the technical data, except that petroleum or chemical products other than molecular sieves or catalysts are not included in this definition. The coverage of the term does not extend to the results of the use of such "direct product." An example of the direct product of technical data is reforming process equipment designed and constructed by use of the technical data exported, but the aromatics produced by the reforming process equipment are not immediate or direct products of these technical data. However, if the technical data are a formula for producing aromatics, the aromatics, although they are immediate products of the data, are not included in this definition of direct product, since they are petroleum products. Conversely, if the technical data are a formula for producing either molecular sieves or catalysts, the foreign-produced molecular sieves and catalysts are included in the definition of direct product.

[8] Effective April 26, 1971, Country Group W no longer includes Romania. For purposes of assurances executed prior to that date, however, all references to Country Group W continue to apply to Romania as well as to Poland, and all conditions and responsibilities undertaken with respect to Romania remain unchanged.

V 4 3 / 2 3 3 D E 4 7 8 UMI

§ 379.4(f)(1)(i)(p), to the USSR, Estonia, Latvia or Lithuania. An assurance included in a licensing agreement will be acceptable for all exports made during the life of the agreement. If such assurance is not received, this general license is not applicable and a validated export license is required. An application for such validated license shall include an explanatory statement setting forth the reasons why such assurance cannot be obtained. In addition, this general license is not applicable to any export of technical data of the kind described in § 379.4(f)(1)(i)(a) through (o) below if, at the time of export of the technical data from the United States, the exporter knows or has reason to believe that the direct product to be manufactured abroad by use of the technical data is intended to be exported or re-exported, directly or indirectly, to Country Group Q, W, Y, or Z, or, for data of the kind described in § 379.4(f)(1)(i)(p), to the USSR, Estonia, Latvia or Lithuania.

(i) Technical data relating to the following commodities:

(*a*) Other artificial graphite, and electrodes, electrical carbons, and other products made thereof, whether or not coated or composited with other materials to improve its performance at elevated temperatures or to reduce its permeability to gases, having an apparent relative density of 1.70 or greater when compared to water at 60°F (15.5°C), and with a particle grain size of less than 0.001 inch (1 mil);

(*b*) Electric furnaces specially designed for the production or processing of vapor deposited (pyrolytic) graphite or doped graphites whether as standing bodies, coatings, linings or substrates;

(c) Other gravity meters (gravimeters); and parts and accessories, n.e.s.;

(*d*) Other transonic, supersonic, hypersonic and hypervelocity wind tunnels and devices; and parts and accessories, n.e.s.;

(e) Watercraft of 65 feet and over in overall length, designed to include motors or engines of 600 horsepower or over and greater than 45 displacement tons;[9]

(*f*) Methyl methacrylate, cross-linked, hot stretched, clear, film, sheeting, or laminates;

(*g*) Doppler sonar navigation systems;

(*h*) Aerial camera film, sensitized and unexposed, as follows: (*1*) having spectral sensitivities at wavelengths greater than 7,200 Angstroms or at wavelengths less than 2,000 Angstroms; or (*2*) having resolving powers (using a Test-Object Contrast of 1,000:1) of 100 line pairs/mm or more or with a base thickness before coating of 0.004 inch or less;

(*i*) Continuous tone aerial duplicating film, sensitized and unexposed, having resolving powers (using a Test-Object Contrast of 1,000:1) of 300 line pairs/mm or more;

(*j*) Instrumentation and/or recording film, sensitized and unexposed, having photo-recording sensitivities (as based on the reciprocal of the tungsten exposure in meter-candle-seconds at an exposure time of 0.0001 second) of 125 or more and a resolving power (using a Test-Object Contrast of 1,000:1) of 55 line pairs/mm or more and with a base thickness before coating of 0.004 inch or less and capable of being processed in solutions with alkalinities of pH 10 or above at temperatures greater than 85° F;

(*k*) Maraging steels containing all of the following: 12 percent or more nickel, more than 3 percent molybdenum, more than 5 percent cobalt, and less than 0.5 percent carbon;

(*l*) Transformation Induced Plasticity (TRIP) steels or penta-alloy ausforming stainless steels of the following composition: 8 to 14 percent chromium, 6 to 10 percent nickel, 2 to 5 percent molybdenum, 1 to 3 percent silicon, 0.75 to 3 percent manganese, and 0.15 to 0.35 percent carbon;

(*m*) Other high speed continuous writing, rotating drum cameras capable of recording at rates in excess of 2,000 frames per second; and parts and accessories, n.e.s.;

(*n*) Other 16 mm high speed motion picture cameras capable of recording at rates in excess of 2,000 frames per second; and parts and accessories, n.e.s.;

(o) Single crystal sapphire substrates; and

(*p*) Machinery, equipment, instruments and other commodities utilized for the exploration or production of petroleum or natural gas.

(ii) The limitations set forth in this § 379.4(f)(1) do not apply to the export of:

(*a*) Technical data included in an application for the foreign filing of a patent, provided such foreign filing of a patent application is in accordance with the regulations of the U.S. Patent Office; and

(*b*) Technical data supporting a price quotation as described in § 379.4(b)(2) above.

(2) Requirement of written assurance for certain additional products and destinations.

(i) Except for technical data requiring a written assurance in accordance with the provisions of § 379.4(f)(1) above, and except as provided in § 379.4(f)(2)(v) below, no export of technical data relating to the commodities described below in this § 379.4(f)(2) may be made under the provisions of this General License *GTDR* until the U.S. exporter has received a written assurance from the foreign importer that, unless prior authorization is obtained from the Office of Export Administration, the importer will not knowingly:

(*a*) Reexport, directly or indirectly, to Country Group Q, W,[10] Y, or Z any technical data relating to commodities identified by the symbol "W" in the column of the Commodity Control List titled "Validated License Required;"

(*b*) Export, directly or indirectly, to Country Group Z any direct product [11] of the technical data if such direct product is identified by the symbol "W" in the column of the commodity Control List titled "Validated License Required;" or

(*c*) Export, directly or indirectly, to any destination in Country Group Q, W, or Y any direct product [11] of the technical data if such direct product is identified by the code letter "A" following the Export Control Commodity Number on the Commodity Control List.

(ii) If the direct product [12] of any technical data is a complete plant or any major component of a plant that is capable of producing a commodity identified by the symbol "W" in the column of the Commodity Control List titled "Validated License Required" or appears in the U.S. Munitions List, a written assurance by the person who is or will be in control of the distribution of the products of the plant (whether or not such person is the importer) shall be obtained by the U.S. exporter (via the foreign importer), stating that, unless prior authorization is obtained from the Office of Export Administration, such person will not knowingly:

(*a*) Reexport, directly or indirectly, to Country Group Q, W, Y, or Z the technical data relating to the plant or the major component of a plant;

(*b*) Export, directly or indirectly, to Country Group Z the plant or the major component of a plant (depending upon which is the direct product [12] of the technical data) or any product of such plant or of such major component if such product of the plant is identified by the symbol "W" in the column of the Commodity Control List titled "Validated License Required" or appears in the U.S. Munitions List; or

(c) Export, directly or indirectly, to Country Group Q, W, or Y the plant or the major component of a plant (depending upon which is the direct product of the technical data), or any product of such plant or of such major component, if such product is identified by the code letter "A" following the Export Control Commodity Number on the Commodity Control List, or appears in the U.S. Munitions List.

NOTE.—Effective April 1, 1964 §§ 379.4(f)-(2)(ii) (*b*) and (c) required certain written assurances relating to the disposition of the products of a complete plant or major component of a plant which is the direct product of unpublished technical data of U.S. origin exported under General License *GTDR*.

Except as to commodities identified by the code letter "A" following the Export Control Commodity Number on the Commodity Control List, and items on the U.S. Munitions List, the effective date of the written assurance requirements for plant products as a condition of using General License *GTDR* for export of this type of technical data is hereby deferred until further notice, subject to the following limitations:

1. The exporter shall, at least two weeks before the initial export of the technical data, notify the Office of Export Administration, by letter, of the facts required to be disclosed in an application for a validated export license covering such technical data; and

2. The exporter shall obtain from the person who is or will be in control of the distribution of the products of the plant (whether or not such person is the importer) a written commitment that he will notify the U.S. Government, directly or through the exporter, whenever he enters into negotiations to export any product of the plant to any destination covered by § 379.4(f)(2)(ii)(*b*) above, when such product is not identified by the code letter "A" following the Export Control Commodity Number on the Commodity Control List and requires a validated license for export to Country Group W by the information set forth in the column titled "Validated License Required." The notification should state the product, quantity, country of destination, and the estimated date of shipment.

Moreover, during the period of deferment, the remaining written assurance requirements of §§ 379.4(f)(2)(ii) (*b*) and (c) as to plant products that are identified by the code letter "A" following the Export Control Commodity Number on the Commodity Control List, or are on the U.S. Munitions List, will be waived if the plant is located in one of the following COCOM countries: Belgium, Canada, Denmark, the Federal Republic of Germany, France, Greece, Italy, Japan, Luxembourg, The Netherlands, Norway, Portugal, Turkey, and the United Kingdom. This deferment applies to exports of technical data pursuant to any type of contract or arrangement, including licensing agreements, regardless of whether entered into before or after April 1, 1964.

(iii) The required assurance may be in the form of a letter or other written communication from the importer or, if applicable, the person in control of the distribution of the products of a plant; or the assurance may be incorporated into a licensing agreement which restricts disclosure of the technical data to use only in authorized destinations, and prohibits shipment of the direct product [12] thereof by the licensee to any unauthorized destination. An assurance included in a licensing agreement will be acceptable for all exports made during the life of the agreement. If such assurance is not received, this general license is not applicable and a validated export license is required. An application for such validated license shall include an explanatory statement setting forth the reasons why such assurance cannot be obtained.

(iv) In addition, this general license is not applicable to any export of technical data of the kind described in this § 379.4(f)(2) if, at the time of export of the technical data from the United States, the exporter knows or has reason to believe that the direct product [13] to be manufactured abroad by use of the technical data is intended to be exported directly or indirectly to any unauthorized destination.

(v) The limitations set forth in this § 379.4(f)(2) do not apply to the export of:

(*a*) Technical data included in an application for the foreign filing of a patent provided such foreign filing of a patent application is in accordance with the regulations of the U.S. Patent Office;

(*b*) Technical data supporting a price quotation as described in § 379.4(b)(2) above; and

(c) Technical data relating to those commodities listed in a Supplement to Part 377 as being under short supply control.

NOTE.—A written assurance is not required for the export under this General License *GTDR* of any technical data which do not fall within the description set forth in §§ 379.4(f) (1) or (2) above.

(Sec. 4 Pub. L. 91-184, 83 Stat. 842 (50 U.S.C. App. 2403), as amended; E.O. 12002, 42 FR 35623 (1977); Department Organization Order 10-3, dated December 4, 1977, 42 FR 64721 (1977); and Industry and Trade Administration Organization and Function Order 45-1, dated December 4, 1977, 42 FR 64716 (1977).)

Dated: November 27, 1978.

STANLEY J. MARCUSS,
Deputy Assistant Secretary for Trade Regulation.

[FR Doc. 78-33778 Filed 12-1-78; 8:45 am]

[9] This commodity is not listed on the Commodity Control List since it is under the export control jurisdiction of the U.S. Maritime Administration. However, technical data relating to this commodity is under the export control jurisdiction of the Office of Export Admininstration.

[10] Effective April 26, 1971, Country Group W no longer includes Romania. For purposes of assurances executed prior to that date, however, all references to Country Group W continue to apply to Romania as well as to Poland, and all conditions and responsibilities undertaken with respect to Romania remain unchanged.

[11] The term "direct product," as used in this sentence and in this context only, is defined to mean the immediate product (including processes and services) produced directly by use of the technical data.

[12] The term "direct product," as used in this sentence and in this context only, is defined to mean the immediate product (including processes and services) produced directly by use of the technical data.

PART 386—EXPORT CLEARANCE

Corrections to Shipper's Export Declarations; Correction

AGENCY: Office of Export Administration, Department of Commerce.

ACTION: Correction to Final Rule.

SUMMARY: In FR Doc. 78-26834 appearing at page 43450 in the FEDERAL REGISTER of September 26, 1978, the citation "§ 386.3(o)(i)" in the fifth line from the bottom of paragraph 386.3(q)(1) is corrected to read "§ 386.3(o)(l)." In addition, the amendment to paragraph 386.3(q) is corrected to delete subparagraph 386.3(q)(3).

FOR FURTHER INFORMATION CONTACT:

Charles C. Swanson, Director, Operations Division Office of Export Administration, Department of Commerce, Washington, D.C. 20230, Telephone: 302-377-4196.

(Sec. 4 Pub. L. 91-184, 83 Stat. 842 (50 U.S.C. App. 2403), as amended; E. O. 12002, 42 FR 35623 (1977); Department Organization Order 10-3, dated December 4, 1977, 42 FR 64721 (1977); and Industry and Trade Administration Organization and Function Order 45-1, dated December 4, 1977, 42 FR 64716 (1977).)

Dated: November 27, 1978.

RAUER H. MEYER,
Acting Deputy Assistant Secretary for Trade Regulation.

Title 16—Commercial Practices

CHAPTER I—FEDERAL TRADE COMMISSION

[Docket No. C-2934]

PART 13—PROHIBITED TRADE PRACTICES, AND AFFIRMATIVE CORRECTIVE ACTIONS

Bede Aircraft, Inc., et al.

AGENCY: Federal Trade Commission.

ACTION: Final order.

SUMMARY: In settlement of alleged violations of Federal law prohibiting unfair acts and practices and unfair methods of competition, this consent

DATE: These charges are effective the

State libraries in New Jersey, New

charges. Until changed, the charge for

V 4 3 / 2 3 3
D E 4
7 8
UMI

agreement, among other things, requires a Washington, D.C. manufacturer and marketer of aircraft and related products, and its subsidiaries, to provide and administer as prescribed a redress fund of approximately $9,000,000 for consumers who purchased or made deposits on its products. The firm would be required to cease misrepresenting the availability, performance, reliability and safety of its aircraft: or using any other unfair or deceptive act or practice in the advertising and sale of its products. Additionally, until such time that existing obligations are satisfied, the order would require that all of the firm's stock be placed in the hands of an approved trustee who would oversee its operations and invoke the provisions of the Federal Bankruptcy Act, should it prove necessary.

DATES: Complaint and order issued October 26, 1978.[1]

FOR FURTHER INFORMATION CONTACT:

Paul C. Daw, Regional Director, 6R, Denver Regional Office, Federal Trade Commission, Suite 2900, 1405 Curtis St., Denver, Colo. 80202. (303) 837-2271.

SUPPLEMENTARY INFORMATION: On Monday, June 19, 1978, there was published in the FEDERAL REGISTER, 43 FR 26324, a proposed consent agreement with analysis In the Matter of Bede Aircraft, Inc., a corporation; Bede General Corporation, a corporation; Bede Wing, Inc., a corporation; and James R. Bede, individually and as an officer, director and stockholder of said corporations, for the purpose of soliciting public comment. Interested parties were given sixty (60) days in which to submit comments, suggestions, or objections regarding the proposed form of order.

No comments having been received, the Commission has ordered the issuance of the complaint in the form contemplated by the agreement, made its jurisdictional findings and entered its order to cease and desist, as set forth in the proposed consent agreement, in disposition of this proceeding.

The prohibited trade practices and/or corrective actions, as codified under 16 CFR Part 13, are as follows: Subpart-Advertising Falsely or Misleadingly: § 13.10 Advertising falsely or misleadingly; 13.10-1 Availability of merchandise and/or facilities; § 13.15 Business status, advantages or connection; 13.15-20 Business methods and policies; 13.15-30 Connection or arrangements with others; 13.15-35 Contracts and obligations; 13.15-65 Financial conditions; 13.15-100 History; 13.15-105 Identity; 13.15-195 Nature; 13.15-250 Qualifications and abilities; 13.15-255 Reputation, success, or standing; 13.15-275 Stock, product, or service; § 13.35 Condition of goods; § 13.40 Conditions of manufacture; 13.40-20 Law compliance; § 13.42 Connection of others with goods; § 13.73 Formal regulatory and statutory requirements; § 13.85 Government approval, action, connection or standards; 13.85-60 Standards, specifications, or source; § 13.90 History of product or offering; § 13.142 Operation; § 13.155 Prices; 13.155-5 Additional charges unmentioned; 13.155-55 Government requirements; 13.155-75 Product or quantity covered; 13.155-93 Special or test offers; 13.155-95 Terms and conditions; § 13.160 Promotional sales plans; § 13.170 Qualities or properties of product or service; § 13.175 Quality of product or service; § 13.180 Quantity; 13.180-30 In stock; § 13.185 Refunds, repairs, and replacements; § 13.190 Results; § 13.195 Safety; 13.195-60 Product; § 13.205 Scientific or other relevant facts; § 13.210 Scientific tests; § 13.245 Specifications or standards conformance; § 13.247 Statues and regulations; § 13.250 success, use or standing; § 13.260 Terms and conditions; § 13.275 Undertakings, in general. Subpart—Corrective Actions and/or Requirements: § 13.533 Corrective actions and/or requirements; 13.533-20 Disclosures; 13.533-35 Employment of independent agencies; 13.533-37 Formal regulatory and/or statutory requirements; 13.533-45 Maintain records; 13.533-55 Refunds, rebates, and/or credits. Title 18—Conservation of Power and Water Resources

CHAPTER III—DELAWARE RIVER BASIN COMMISSION

PART 420—BASIN REGULATIONS—WATER SUPPLY CHARGES

Delaware River Basin Reservoirs; Water Charges

AGENCY: Delaware River Basin Commission.

ACTION: Final rule.

SUMMARY: This rule changes the rates to be charged for water taken from the Delaware River Basin Reservoirs. The rates will be six cents per thousand gallons for consumptive use of water, and six-tenth of a mill per thousand gallons for noncomsumptive use of water. The water charges which are obtained provide funds for the annual repayment to the Federal Government.

DATE: These charges are effective the first day of the month following the date of deliberate impoundment of water supply in Blue Marsh Reservoir (estimated to be April, 1979).

FOR FURTHER INFORMATION CONTACT:

Robert L. Godell, Head, Operations Branch, Delaware River Basin Commission, P.O. Box 7360, West Trenton, N.J. 08628, phone: 609-883-9500.

SUPPLEMENTARY INFORMATION: In 1964 the Commission, acting on behalf of the four Delaware Basin States—New York, Pennsylvania, New Jersey and Delaware—assumed the obligation to repay the Federal Government the investment cost allocated to water supply in Federal reservoirs constructed in the Basin. This commitment was made in accordance with the Water Supply Act of 1958 requiring that non-Federal interests repay water supply costs at Federal reservoirs.

Subsequently, the Commission formulated a water charges program that applies throughout the Basin to new surface water users, and to existing surface water users whose taking is in excess of their legal entitlement. The charge was determined to be the weighted average unit cost of water supply stored in Federal reservoirs on behalf of the Commission, and was designed to be recomputed whenever new or additional storage having different unit costs was added to the system. The revenues thus obtained provide the funds for annual repayment to the Federal Government.

The initial charge, reflecting the costs of the first reservoir, Beltzville, was established in 1974 at 4 cents per thousand gallons for consumptive use and four-tenths of a mill for nonconsumptive use. The second reservoir, Blue Marsh, will become operational early in 1979 and will have unit water supply costs about twice that of Beltzville. Accordingly, on October 25, 1978 the Commission amended its Administrative Manual, Part III, Basin Regulations—Water Supply Charges (18 CFR Part 420) so as to provide that the charge for water shall be six cents per thousand gallons for consumptive use and six-tenths of a mill per thousand gallons for nonconsumptive use. Prior to taking these actions, the Commission held a public hearing on September 27, 1978 in Philadelphia, Pennsylvania. Notice of this hearing appeared at 43 FR 41420. No changes were made in the proposed amendments as a result of the public hearing.

The full text of the Commission's Basin Regulations—Water Supply Charges may be obtained from the Delaware River Basin Commission, P.O. Box 7360, West Trenton, New Jersey, 08628, and may be examined at State libraries in New Jersey, New York, Delaware and Pennsylvania.

The Commission's Administrative Manual, Part III, (and Part 420 of title 18 CFR) Basin Regulations—Water Supply Charges is amended as follows:

(1) Amend § 420.41 (a) and (b) so as to read:

§ 420.41 Schedule of water charges.

(a) Six cents per thousand gallons for consumptive use; and

(b) Six-tenths of a mill per thousand gallons for nonconsumptive use.

W. BRINTON WHITALL,
Secretary.

RESOLUTION No. 78-14

A resolution to amend the Administrative Manual, Part III, Basin Regulations—Water Supply Charges, relating to a schedule of water charges.

Whereas, in April 1971, by Resolution No. 71-4, the Commission duly adopted, after public hearing, an amendment to the Comprehensive Plan defining the means by which the Commission will contract for the sale of water and establish rates therefore; and

Whereas, Resolution No. 71-4 provided that the Commission will use the weighted-average unit cost of all water stored by or on behalf of the Commission and the unit cost of water will be determined by dividing all of the Commission's annual project cost by the net yield of the water supply in federal reservoirs constructed pursuant to the Commission's Comprehensive Plan; and

Whereas, Resolution No. 71-4 also provided that costs, rates and charges will be recomputed whenever new or additional storage is provided and as often as necessary to reflect relevant changes in any cost components associated with sustaining specified base flows; and

Whereas, in May 1974, by Resolution No. 74-6, the Commission, after public hearing, amended its Administrative Manual by the addition thereto of Basin Regulations—Water Supply Charges, establishing a system of water supply charges relating to the surface waters of the basin; and

Whereas, Resolution No. 74-6, provided that, until changed, the charge for water shall be four cents per thousand gallons for consumptive use and four-tenths of a mill per thousand gallons for non-consumptive use, such charge then being based on the cost of the water in Beltzville Reservoir; and

Whereas, Resolution No. 74-6, provided that the Commission will from time to time, after public notice and hearing, make, amend and revise a schedule of water charges; and

Whereas, the Blue Marsh Reservoir water supply storage is scheduled to be operational early in calendar year 1979 and the unit cost of water in Blue Marsh Reservoir will be about twice that of Beltzville Reservoir water; now therefore

Be it resolved by the Delaware River Basin Commission:

1. The Administrative Manual, Part III, Basin Regulations—Water Supply Charges, is hereby revised by amending Section 5-3.1 thereof to read as follows:

Section 5-3.1 *Schedule of water charges.* The Commission will from time to time, after public notice and hearing, make, amend and revise a schedule of water charges. Until changed, the charge for water shall be as follows:

(a) Six cents per thousand gallons for consumptive use; and

(b) Six-tenths of a mill per thousand gallons for non-consumptive use.

2. This Resolution shall take effect on the first day of the month following the date of deliberate impoundment of water supply in the Blue Marsh Reservoir.

Adopted: October 25, 1978.

SHERMAN W. TRIBBITT,
Chairman pro tem.

W. BRINTON WHITALL,
Secretary.

Title 19—Customs Duties

CHAPTER I—UNITED STATES CUSTOMS SERVICE, DEPARTMENT OF THE TREASURY

[T. D. 78-478]

PART 12—SPECIAL CLASSES OF MERCHANDISE

Importation of Motor Vehicles and Motor Vehicle Equipment

AGENCY: United States Customs Service, Department of the Treasury.

ACTION: Final Rule.

SUMMARY: This document amends the Customs Regulations relating to procedures for entry into the United States of motor vehicles and motor vehicle equipment subject to Federal motor vehicle safety standards prescribed by the Secretary of Transportation under the National Traffic and Motor Vehicle Safety Act of 1966, as amended. The most significant change is the requirement that the importer or consignee of each vehicle or equipment item imported into the United States must file a declaration concerning compliance with the motor vehicle safety standards. The requirement may be waived by the district director of Customs for United States, Canadian, or Mexican registered vehicles arriving via land borders which: (1) were manufactured before applicable safety standards were in force; (2) conform to applicable safety standards and bear the required certification label or tag; or (3) are intended solely for export. Other changes include an extension of the time which a nonconforming vehicle imported solely for purposes of test or experiment may be licensed for use on the public roads and an extension of the time allowed for the submission of a conformity statement, which will be forwarded to the National Highway Traffic Safety Administration (NHTSA) by Customs, for a nonconforming vehicle. Also, if Customs does not receive a bond-release letter from

vehicle or equipment item entered by

V 4 3 / 2 3 3

NHTSA for a nonconforming vehicle or equipment item within 180 days after entry, it will issue a Notice of Redelivery for the vehicle or equipment item.

EFFECTIVE DATE: January 3, 1979.

FOR FURTHER INFORMATION CONTACT:

John E. O'Rourke, Inspection and Control Division, U.S. Customs Service, 1301 Constitution Avenue, N.W., Washington, D.C. 20229 (202-566-5354).

SUPPLEMENTARY INFORMATION:

BACKGROUND

Section 12.80 of the Customs Regulations (19 CFR 12.80) prescribes procedures for the entry into the United States of motor vehicles ("vehicles") and motor vehicle equipment ("equipment items") subject to the Federal motor vehicle safety standards published by the Department of Transportation in 49 CFR Part 571 under the National Traffic and Motor Vehicle Safety Act of 1966, as amended (15 U.S.C. 1381, *et seq.*) ("the Act").

After carefully examining these procedures, the Customs Service ("Customs") and the National Highway Traffic Safety Administration ("NHTSA") determined that substantive changes should be made to aid in the effective administration and enforcement of the Act. Accordingly, on November 20, 1975, Customs published a notice of proposed rulemaking in the FEDERAL REGISTER (40 FR 54002). Interested persons were given until January 22, 1976, to submit relevant written data, views, or arguments. Several commenters, although agreeing in principle with the proposal, raised questions or made suggestions that have resulted in changes to the amendment as proposed.

DISCUSSION OF MAJOR COMMENTS

MUST A DECLARATION BE SUBMITTED FOR EACH VEHICLE OR EQUIPMENT ITEM?

Several commenters objected to the requirement in proposed § 12.80(b)(1) that a separate declaration be submitted for each vehicle or equipment item offered for importation into the United States. It was suggested that this requirement would result in a large paperwork increase for Customs, NHTSA, and the importer or consignee.

Customs now accepts a single declaration for all vehicles or equipment items on a single entry to which the same declaration relates if identifying information required for each vehicle or equipment item is furnished. Identifying information may be furnished as an attachment to the declaration if the Customs entry number appears on the attachment to clearly identify it as part of the declaration. A separate declaration is *not* required for each vehicle or equipment item. Section 12.80(c)(4) makes it clear that a declaration may relate to more than one vehicle or equipment item.

MUST A DECLARATION BE SUBMITTED FOR VEHICLES OR EQUIPMENT ITEMS WHICH CONFORM OR ARE TO BE EXPORTED?

Several commenters questioned the need for a declaration for—(1) A vehicle or equipment item which conforms to all applicable safety standards and has a certification label attached (proposed § 12.80(b)(1)(i)); and (2) A vehicle or equipment item intended solely for export and merely being shipped through the United States (proposed § 12.80(b)(1)(ii)).

A declaration is required for a vehicle or equipment item entered under these circumstances to relieve Customs officers from examining each vehicle or equipment item to determine if the appropriate label or tag has been affixed and to discourage the use of false labels or tags. This change to the present regulations will more closely align the declaration procedure used for the Federal motor vehicle safety standards with that used for the Federal motor vehicle emission standards in § 12.73 of the Customs Regulations (19 CFR 12.73).

COULD ONE DECLARATION BE USED FOR BOTH THE NHTSA SAFETY STANDARDS AND THE EPA EMISSION STANDARDS?

Inasmuch as the importer must now complete one declaration form for NHTSA and another for the Environmental Protection Agency (EPA), several commenters suggested that consideration should be given to the development of a combined form for use by both agencies.

These agencies have considered a combined form, and have concluded that it is not feasible at this time because of the many differences in the National Traffic and Motor Vehicle Safety Act of 1966, as amended, enforced by NHTSA, and the Clean Air Act, as amended, enforced by EPA, relating to imported vehicles and equipment items, and in the regulations of the two agencies implementing these Acts.

MUST A BOND BE REQUIRED FOR A VEHICLE OR EQUIPMENT ITEM WHICH WAS NOT MANUFACTURED IN CONFORMITY BUT WHICH HAS BEEN BROUGHT INTO CONFORMITY BEFORE ENTRY?

Two commenters stated that the requirement in proposed § 12.80(c)(1) for posting a bond for the entry, under proposed § 12.80(b)(1)(iv), of a conforming vehicle or equipment item not originally manufactured in conformity, but which has been put into conformity with applicable safety standards before entry is unwarranted. They noted that the importer is required to declare that the vehicle or equipment item will be brought into conformity with the safety standards prior to sale. Because a false declaration subjects the violator to a possible $10,000 fine, or imprisonment, or both, under 18 U.S.C. 1001, the commenters questioned the need for the bond.

This bond requirement, provided for in 15 U.S.C. 1397(b)(3), is essentially similar to the present bond requirement in § 12.80(c) for a vehicle or equipment item not conforming to applicable safety standards entered under present § 12.80(b)(2)(iii). Enforcement of the safety standards would be extremely difficult without the control given by the bonding procedure over the submission of false or inaccurate conformance information. Therefore, a bond is being required under §§ 12.80(e)(1) and 12.80(b)(1)(iii) for all vehicles or equipment items not originally manufactured to comply with the safety standards, and the bond requirement is being extended to include a vehicle or equipment item not manufactured in conformity with applicable safety standards but which has been brought into conformity before entry.

MUST A BOND BE REQUIRED FOR A VEHICLE NOT PROPERLY CERTIFIED?

One commenter objected to the deletion of present § 12.80(b)(2)(ix), which provides for the entry of a vehicle manufactured in conformity with applicable safety standards but which lacks the proper certification label. Such a vehicle may now be entered without bond if accompanied by a statement of the manufacturer as evidence of original compliance. The commenter contended that the manufacturer's statement of original compliance is as reliable as a certification label affixed to the vehicle.

Customs and NHTSA have reviewed the present procedure and have concluded that the proposed requirement that a bond be furnished for the entry of a conforming but uncertified vehicle, pending affixture of the required certification label, is necessary and aids the effective administration and enforcement of the Act. It has been determined that such a vehicle is to be entered under § 12.80(b)(1)(iii).

IS A BOND REQUIRED FOR A VEHICLE WHICH DOES NOT CONFORM BECAUSE READILY ATTACHABLE EQUIPMENT ITEMS HAVE NOT YET BEEN ATTACHED?

Several commenters were concerned that under proposed §§ 12.80(b)(1)(iv) and 12.80(c)(1), a bond would be required for the entry of a vehicle which does not conform to applicable safety standards because readily attachable equipment items necessary for compliance are not attached at the time of entry even though the vehicle would be brought into conformity before being sold at retail. Such a vehicle is entered without bond under present § 12.80(b)(2)(iv).

Customs and NHTSA have determined that requiring a bond for the entry of such a vehicle would serve no useful purpose. In the vast majority of cases, readily attachable equipment items are attached prior to sale at retail. Therefore, § 12.80(b)(1)(ii) makes it clear that such a vehicle may be entered without bond.

HOW LONG MAY A NONCONFORMING VEHICLE IMPORTED FOR TEST OR EXPERIMENT BE LICENSED FOR USE ON THE PUBLIC ROADS?

Several commenters contended that the time allowed for the use of a nonconforming vehicle on the public roads for test or experiment under proposed § 12.80(b)(1)(vii) is insufficient. The time proposed was 1 year, and, upon application to and approval by the Administrator, NHTSA, 1 additional year.

Customs and NHTSA agree with these commenters. Under item 864.30, Tariff Schedules of the United States (19 U.S.C. 1202), vehicles intended solely for testing, experimental, or review purposes may be entered duty free under bond for 1 year. This period may be extended for up to 2 additional years, upon annual application to and approval by the Administrator, NHTSA.

HOW MUCH TIME SHOULD THE IMPORTER BE GIVEN TO SUBMIT A CONFORMITY STATEMENT?

Several commenters objected to the length of time, provided under proposed § 12.80(c), in which the importer or consignee must produce evidence that a nonconforming vehicle or equipment item has been brought into conformity with applicable safety standards.

Presently, within 90 days, or longer if approved by the district director, the importer or consignee must furnish either a statement that the vehicle or equipment item has been brought into conformity, describing the work performed and identifying the person who did the work, or a statement from the manufacturer certifying original conformity. It had been proposed to increase this time to 120 days with additional time not to exceed 60 days if approved by NHTSA.

The 90 day period has proven to be too short. A vehicle or equipment item is rarely brought into conformity within this period, so requests for extensions of time are liberally granted. Therefore, § 12.80(b)(1)(iii) provides a 120 day period, or a longer period not to exceed 180 days after entry, if granted by the Administrator, NHTSA, for the importer or consignee to submit a conformity statement to the Administrator, NHTSA.

TO WHOM SHOULD THE IMPORTER SUBMIT THE CONFORMITY STATEMENT?

Comments were received concerning the requirement in proposed § 12.80(c) that the conformity statement be delivered to NHTSA rather than Customs. The commenters were concerned that this could delay the administrative process, increase documentation requirements, and unnecessarily disrupt the marketing of imported vehicles.

Section 12.80(c) now requires delivery of a copy of the conformity statement to *both* Customs and NHTSA. Requiring the importer or consignee to submit a copy of the conformity statement to Customs as well as NHTSA serves no useful purpose because the statement is reviewed by NHTSA. For the same reason, requiring the importer or consignee to submit the conformity statement to Customs, for transmittal to NHTSA, would merely delay processing. For clarity, however, the requirement that the importer or consignee submit the conformity statement to NHTSA has been placed in § 12.80(b)(1)(iii).

SHOULD CUSTOMS ISSUE A NOTICE OF REDELIVERY IF THE IMPORTER DOES NOT TIMELY SUBMIT A CONFORMITY STATEMENT?

One commenter favored proposed § 12.80(c)(3) which provides that upon the request of NHTSA, the district director shall issue a Notice of Redelivery for the vehicle or equipment item if the conformity statement is not timely delivered or is determined to be inaccurate or false in a material respect. The commenter correctly noted that this procedure would give the importer or consignee a final notice of his liability under the bond.

Another commenter opposed this change because he believed it would add to Customs' work burden and result in more labor and expense for Customs.

Customs and NHTSA have determined that this procedure will aid the effective administration and enforcement of the Act. However, rather than requiring the district director to issue the Notice of Redelivery upon the request of NHTSA, § 12.80(e)(2) has been revised so that the district director will issue the notice if he does not receive a bond release letter from NHTSA within 180 days after entry of the vehicle or equipment item.

SHOULD REFERENCE BE MADE TO THE PENALTY PROVISION OF 19 U.S.C. 1592?

Several commenters opposed proposed § 12.80(d) which provides that a vehicle or equipment item entered by means of a fraudulent or false entry declaration that is made without reasonable cause to believe the truth of the declaration is subject to forfeiture under section 592, Tariff Act of 1930, as amended (19 U.S.C. 1592).

Three commenters suggested that specific reference to 19 U.S.C. 1592 is unnecessary because it applies to *any* entry made by means of a fraudulent or false claim. Furthermore, any person who knowingly makes a false declaration is subject to a $10,000 fine, imprisonment, or both under 18 U.S.C. 1001. A warning to this effect is printed on the NHTSA declaration form.

One commenter stated that (1) if the conformity statement is not delivered, is inaccurate, or is false in a material respect, redelivery or exportation of the nonconforming vehicle or equipment item may be required under proposed § 12.80(c)(3); (2) if the importer or consignee fails to redeliver or export the vehicle or equipment item, liquidated damages are assessed under the bond; and (3) forfeiture of a vehicle or equipment item under 19 U.S.C. 1592 therefore should not be permitted.

Customs and NHTSA have determined that reference to 19 U.S.C. 1592 is proper because it alerts a person less experienced than a commercial importer that he *may* be subject to liability under the statute if he submits a declaration without reasonable cause to believe it is true. Furthermore, liquidated damages under a bond for failure to redeliver or export a nonconforming vehicle or equipment item cannot be assessed in all instances because a bond is not required for every vehicle and equipment item entered under this section.

Because of amendments made to 19 U.S.C. 1592 by Public Law 95-410, the "Customs Procedural Reform and Simplification Act of 1978," it was necessary to revise proposed § 12.80(d), which has been renumbered as § 12.80(g). Revised § 12.80(g) provides that any person who enters, introduces, attempts to enter or introduce, or aids or abets the entry, introduction, or attempted entry or introduction of a vehicle or equipment item by means of a fraudulent or false declaration may incur liabilities under 19 U.S.C. 1592. Proposed § 12.80(d) provided that a vehicle or equipment item introduced into the United States by means of a fraudulent or false declaration is subject to forfeiture under 19 U.S.C. 1592.

DISCUSSION OF OTHER CHANGES

VEHICLES ENTERING VIA LAND BORDERS

Under proposed § 12.80(b)(1), a written declaration would have been required for each vehicle or equipment item imported into United States,

D E 4 7 8 UMI

§ 12.80 Federal motor vehicle safety standards; importation of vehicles and equipment items.

tion ("Administrator, NHTSA"), the

defined in section 102 of the Act (15

V 4 3 / 2 3 3 D E 4 7 8 UMI

except as provided for in paragraphs (b)(1)(iii) and (b)(1)(v). The first exception gave Customs the option of accepting an oral declaration for vehicles of Canadian or Mexican registry entering at the Canadian or Mexican border which were manufactured on a date when no applicable safety standards were in force. The second exception provided that persons regularly entering the United States by a motor vehicle at the Canadian or Mexican border may apply to Customs for an appropriate means of identification to be affixed to the vehicle and used in place of the declaration.

However, because of the growing number of motor vehicles entering the United States, Customs has determined that enforcement of § 12.80(b)(1), as proposed, would be impracticable. In fiscal year 1976, more than 75,000,000 passenger vehicles entered the United States. The vast majority of these vehicles was manufactured after January 1, 1968, and therefore would not be entitled to entry under the oral declaration provision. Although some of these vehicles might be excepted from the declaration requirements under the nonresident identification tag exception, there would be no exception for returning U.S. residents whose cars were manufactured after January 1, 1968, nonresidents who are occasional border crossers, or nonresidents who, though frequent border crossers, have not applied for identification tags.

Customs and NHTSA have carefully reviewed this problem and have decided to delete the exceptions in proposed §§ 12.80(b)(1)(iii) and 12.8(b)(1)(v). Section 12.80(f) provides that the requirement that a declaration be filed under paragraphs (b)(1)(i), (b)(1)(ii), or (b)(1)(v) may be waived by the district director for a United States, Canadian, or Mexican registered vehicle arriving via land borders. This change will permit Customs to carry out its enforcement responsibilities with respect to the importation of vehicles and equipment items subject to the Federal motor vehicle safety standards without creating an unreasonable burden on the traveling public.

NONRESIDENTS OF THE UNITED STATES

Proposed § 12.80(b)(1)(v), would have required a nonresident of the United States importing a vehicle or equipment item primarily for personal use for a period of not more than 1 year from the date of entry to indicate his passport number and country of issue on the declaration. That section now requires the nonresident to state his passport number and country of issue only if he has a passport.

PROCESSING THE DECLARATION

A new § 12.80(d) has been added which provides that the district director will forward to NHTSA the original of each declaration submitted to him under § 12.80(b)(1) as soon as practicable.

PROCESSING THE CONFORMITY STATEMENT

Under proposed §§ 12.80(c)(2) and 12.80(c)(3), NHTSA would have advised the district director when the bond required for entry of a vehicle or equipment item under proposed § 12.80(b)(1)(iv) could be released. If the importer or consignee's conformity statement were not delivered to NHTSA within the specified time, or if the statement were inaccurate or false in a material respect, upon the request of NHTSA, the district director would have issued a Notice of Redelivery for the vehicle or equipment item.

This procedure has been changed. Under § 12.80(e)(1), if NHTSA approves the conformity statement, it will forward a notice of acceptance (bond release letter) to the district director. If the bond release letter is not received by the district director within 180 after entry, § 12.80(e)(2) provides that he shall issue a Notice of Redelivery for the vehicle or equipment item. These changes make the procedure for processing a conformity statement more logical and predictable and easier to administer.

FOREIGN AND INTERNATIONAL ORGANIZATION OFFICIALS

As proposed, § 12.80(b)(1)(vi) requires an importer or consignee of a vehicle or equipment item imported for purposes other than resale, who is included within one of the following classes of persons, to attach a copy of his official orders to the declaration—

(1) A member of the armed forces of a foreign country on assignment in the United States;

(2) A member of the Secretariat of a public international organization so designated under the International Organizations Immunities Act (22 U.S.C. 288), as listed in 19 CFR 148.87, on assignment in the United States; or

(3) A member of the personnel of a foreign government on assignment in the United States who is within the class of persons for whom free entry of vehicles has been authorized by the Department of State.

A person in the third class of importers or consignees may state on the declaration the name of the embassy to which he is accredited instead of attaching a copy of his official orders to the declaration.

These new requirements provide a greater degree of control over the importation of nonconforming vehicles and equipment items by these individuals.

VEHICLES OR EQUIPMENT ITEMS IMPORTED FOR SHOW, COMPETITION, REPAIR OR ALTERATION

The requirement under proposed § 12.80(b)(1)(vii) that the declaration for a vehicle or equipment item imported for show, competition, repair, or alteration contain a statement fully describing the use to be made of the vehicle or equipment item and its ultimate disposition is now in § 12.80(c)(2).

EDITORIAL CHANGES

Proposed § 12.80(b)(1) has been revised so that paragraphs (b)(1)(i) through (b)(1)(ix) consist only of what the importer or consignee actually declares or affirms.

For a more logical sequence, proposed § 12.80(b)(1)(i) has been renumbered § 12.80(b)(1)(ii), proposed § 12.80(b)(1)(ii) has been renumbered § 12.80(b)(1)(iv), proposed § 12.80(b)(1)(iii) has been renumbered § 12.80(b)(1)(i), and proposed § 12.80(b)(1)(iv) has been renumbered § 12.80(b)(1)(iii).

Proposed § 12.80(b)(2) has been revised and renumbered § 12.80(c)(1). It lists the contents required on each declaration. Section 12.80(b)(2) now contains the provision in proposed § 12.80(b)(1)(vii) for licensing a vehicle imported solely for the purpose of test or experiment for use on the public roads.

Sections 12.80 (c)(2) and (c)(3) contain certain additional requirements for a declaration filed for a vehicle imported for the purpose of show, competition, repair, or alteration, and test or experiment, respectively.

Numerous other editorial changes have been made to make the regulation more understandable.

DRAFTING INFORMATION

The principal author of this document was Paul G. Hegland, Regulations and Legal Publications Division, Office of Regulations and Rulings, U.S. Customs Service. However, personnel from other offices of the Customs Service and the National Highway Traffic Safety Administration participated in developing the document both on matters of substance and style.

AMENDMENT TO THE REGULATIONS

PART 12—SPECIAL CLASSES OF MERCHANDISE

Section 12.80 of the Customs Regulations (19 CFR 12.80) is revised to read as follows:

§ 12.80 Federal motor vehicle safety standards.

(a) *Standards prescribed by the Department of Transportation.* Motor vehicles and motor vehicle equipment manufactured on or after January 1, 1968, offered for sale, or introduction or delivery for introduction in interstate commerce, or importation into the United States are subject to Federal motor vehicle safety standards ("safety standards") prescribed by the Secretary of Transportation under sections 103 and 119 of the National Traffic and Motor Vehicle Safety Act of 1966, as amended (15 U.S.C. 1392, 1407) ("the Act"), and set forth in 49 CFR Part 571. A motor vehicle ("vehicle") or item of motor vehicle equipment ("equipment item"), manufactured on or after January 1, 1968, is not permitted entry into the Customs territory of the United States unless (with certain exceptions set forth in paragraph (b) of this section) it is in conformity with applicable safety standards in effect at the time the vehicle or equipment item was manufactured.

(b) *Requirements for entry and release.* (1) Unless the requirement for filing is waived by the district director as provided for in paragraph (f) of this section, each vehicle or equipment item offered for introduction into the Customs territory of the United States shall be denied entry unless the importer or consignee files with the entry a declaration, in duplicate, which declares or affirms one of the following:

(i) The vehicle or equipment item was manufactured on a date when no applicable safety standards were in effect.

(ii) The vehicle or equipment item conforms to all applicable safety standards (or, the vehicle does not conform solely because readily attachable equipment items which will be attached to the vehicle before it is offered for sale to the first purchaser for purposes other than resale are not attached) and bears a certification label or tag to that effect permanently affixed by the original manufacturer to the vehicle or to the equipment item, or to the outside of the container in which the equipment item is delivered, in accordance with regulations issued by the Secretary of Transportation (49 CFR Parts 555, 567, 568 and 571) under section 114 of the Act (15 U.S.C. 1403).

(iii) The vehicle or equipment item was not manufactured in conformity all applicable safety standards, but it has been or will be brought into conformity. Within 120 days after entry, or within a period not to exceed 180 days after entry, if additional time is granted by the Administrator, National Highway Traffic Safety Administration ("Administrator, NHTSA"), the importer or consignee will submit a true and complete statement to the Administrator, NHTSA, identifying the manufacturer, contractor, or other person who has brought the vehicle or equipment item into conformity, describing the exact nature and extent of the work performed, and certifying that the vehicle or equipment item has been brought into conformity, and that the vehicle or equipment item will not be sold or offered for sale until the Administrator, NHTSA, issues an approval letter to the district director stating that the conditions of the bond required by paragraph (e)(1) of this section have been satisfied.

(iv) The vehicle or equipment item is intended solely for export, and the vehicle or equipment item, and the outside of the container of the equipment item, if any, bears a label or tag to that effect.

(v) The importer or consignee is a nonresident of the United States, is importing the vehicle or equipment item primarily for personal use for a period not exceeding 1 year from the date of entry, will not sell it in the United States during that period, and has stated his passport number and country of issue, if he has a passport, on the declaration.

(vi) The importer or consignee is a member of the armed forces of a foreign country on assignment in the United States; a member of the Secretariat of a public international organization so designated under the International Organizations Immunities Act (22 U.S.C. 288), as listed in 19 CFR 148.87, on assignment in the United States; or a member of the personnel of a foreign government on assignment in the United States who is within the class of persons for whom free entry of vehicles has been authorized by the Department of State; is importing the vehicle or equipment item for purposes other than resale; and a copy of his official orders, if any, is attached to the declaration (or, if a qualifying member of the personnel of a foreign government on assignment in the United States, the name of the embassy to which he is accredited is stated on the declaration).

(vii) The vehicle or equipment item is imported solely for the purpose of show, test, experiment, competition (a vehicle the configuration of which at the time of entry is such that it cannot be licensed for use on the public roads is considered to be imported for the purpose of competition), repair or alteration, and the statement required by 19 CFR 12.80(c)(2) or (c)(3) is attached to the declaration.

(viii) The vehicle was not manufactured primarily for use on the public roads and is not a "motor vehicle" as defined in section 102 of the Act (15 U.S.C. 1391).

(ix) The vehicle is an "incomplete vehicle" as defined in 49 CFR Part 568.

(2) A vehicle imported solely for the purpose of test or experiment which is the subject of a declaration filed under paragraph (b)(1)(vii) of this section may be licensed for use on the public roads for a period not to exceed 1 year from the date of importation if use on the public roads is an integral part of the test or experiment. The vehicle may be licensed for use on the public roads for one or more further periods which, when added to the initial 1 year period, shall not exceed a total of 3 years, upon application to and approval by the Administrator, NHTSA.

(c) *Declaration; contents.* (1) Each declaration filed under paragraph (b)(1) of this section shall include the name and address in the United States of the importer or consignee, the date and the entry number (if applicable), the make, model, and engine and body serial numbers, or other identification number (if a vehicle), or a description of the item (if an equipment item), and shall be signed by the importer or consignee.

(2) Each declaration filed under paragraph (b)(1)(vii) of this section which relates to a vehicle or equipment item reported for the purpose of show, competition, repair, or alteration shall have attached a statement fully describing the use to be made of the vehicle or equipment item and its ultimate disposition.

(3) Each declaration filed under paragraph (b)(1)(vii) of this section which relates to a vehicle imported solely for the purpose of test or experiment shall have attached a statement fully describing the test or experiment, the estimated period of time necessary to use the vehicle on the public roads, and the disposition to be made of the vehicle after completion of the test or experiment.

(4) Any declaration filed under paragraph (b)(1) of this section may, if appropriate, relate to more than one vehicle or equipment item imported on the same entry.

(d) *Declaration; disposition.* The district director shall forward the original of each declaration submitted to him under paragraph (b)(1) of this section as soon as practicable to the Director, Office of Vehicle Safety Compliance, National Highway Traffic Safety Administration, Washington, D.C. 20590.

(e) *Release under bond.* (1) If a declaration is filed under paragraph (b)(1)(iii) of this section, the entry shall be accepted only if the importer or consignee gives a bond on Customs Form 7551, 7553, or 7595 in the

SUPPLEMENTARY INFORMATION:

sion which may include restrictions to

V 4 3 / 2 3 3

D E 4

7 8

UMI

amount required by section 113.14 of this chapter. A condition of the bond shall be the production of an approval (bond release) letter from the Administrator, NHTSA, stating that the vehicle or equipment item described in the declaration has been brought into conformity with all applicable safety standards. The bond release letter shall be issued upon approval by the Administrator, NHTSA, of the conformity statement submitted by the importer or consignee as provided for in paragraph (b)(1)(iii) of this section. The bond release letter shall be forwarded by the Administrator, NHTSA, to the district director with a copy to the importer or consignee.

(2) If the bond release letter is not received by the district director within 180 days after entry, the district director shall issue a Notice of Redelivery, Customs Form 4647, requiring the redelivery to Customs custody of the vehicle or equipment item. If the vehicle or equipment item is not redelivered to Customs custody or exported under Customs supervision within the period allowed by the district director in the Notice of Redelivery, liquidated damages shall be assessed in the full amount of a bond given on Customs Form 7551. If the transaction has been charged against a bond given on Customs Form 7553 or 7595, liquidated damages shall be assessed in the amount that would have been assessed against a bond given on Customs Form 7551.

(f) *Waiver of declaration requirements.* The requirement that a declaration be filed under paragraph (b)(1)(i), (b)(1)(ii), or (b)(1)(v) of this section as a condition to the introduction of a vehicle or equipment item into the Customs territory of the United States may be waived by the district director for a United States, Canadian, or Mexican registered vehicle arriving via land borders.

(g) *Vehicle or equipment item introduced by means of a fraudulent or false declaration.* Any person who enters, introduces, attempts to enter or introduce, or aids or abets the entry, introduction, or attempted entry or introduction, of a vehicle or equipment item into the Customs territory of the United States by means of a fraudulent entry declaration, or by means of a false entry declaration made without reasonable cause to believe the truth of the declaration, may incur liabilities under section 592, Tariff Act of 1930, as amended (19 U.S.C. 1592).

(h) *Vehicle or equipment item denied entry.* If a vehicle or equipment item is denied entry under the provisions of paragraph (b) of this section, the district director shall refuse to release the vehicle or equipment item for entry into the Customs territory of the United States and shall issue a notice of that refusal to the importer or consignee.

(i) *Disposition of vehicle or equipment item denied entry; redelivery.* A vehicle or equipment item denied entry under paragraph (b) of this section, or redelivered to Customs custody under paragraph (e) of this section, which is not exported under Customs supervision within 90 days from the date of the notice of denial of entry or date of redelivery, shall be disposed of under appplicable Customs laws and regulations, except that disposition shall not result in the introduction of the vehicle or equipment item into the Customs territory of the United States in violation of the Act.

(R.S. 251, as amended, secs. 592, 623, 624, 46 Stat. 750, as amended, 759, as amended, sec. 108, 80 Stat. 722, as amended (19 U.S.C. 66, 1592, 1623, 1624; 15 U.S.C. 1397).)

ROBERT E. CHASEN,
Commissioner of Customs.

Approved: November 6, 1978.

RICHARD J. DAVIS,
Assistant Secretary, Enforcement and Operations.

JOAN CLAYBROOK,
Administrator, National Highway Traffic Safety Administration.

Title 23—Highways

CHAPTER I—FEDERAL HIGHWAY ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

SUBCHAPTER G—ENGINEERING AND TRAFFIC OPERATIONS

[FHWA Docket No. 78-30]

PART 625—DESIGN STANDARDS FOR HIGHWAYS

Revision to Update Publications

AGENCY: Federal Highway Administration. DOT.

ACTION: Final rule.

SUMMARY: This document amends the section of regulations dealing with design standards for highways in order to include the new editions of Standard Specifications for (1) Highway Bridges and (2) Transportation Materials and Methods of Sampling and Testing.

DATES: Comments must be received on or before March 5, 1978.

EFFECTIVE DATE: November 29, 1978.

ADDRESS: Submit comments, preferably in triplicate, to FHWA Docket No. 78-30, Federal Highway Administration, Room 4205, HCC-10, 400 Seventh Street SW., Washington, D.C. 20590. All comments and suggestions received will be available for examination at the above address between 7:45 a.m. and 4:15 p.m. ET, Monday through Friday.

FOR FURTHER INFORMATION CONTACT:

Frank D. Sears, Office of Engineering (Bridge Standards), 202-426-7680; John J. Carroll, Office of Highway Operations (Materials Standards), 202-426-0420; or Virginia Cherwek, Office of the Chief Counsel, 202-426-0786, Federal Highway Administration, 400 Seventh Street SW., Washington, D.C. 20590.

SUPPLEMENTARY INFORMATION: The Federal Highway Administration incorporates by reference into Part 625, 23 CFR, the most recent edition of the Standard Specifications for Highway Bridges and that of Standard Specifications for Transportation Materials and Methods of Sampling and Testing which are published by the American Association of State Highway and Transportation Officials (AASHTO). These editions include all of the material contained in the previous editions, as well as all of the official annual revisions.

The minimal impact of this revision on the public precludes the necessity for preparation of an evaluation report by the Federal Highway Administration.

Anyone wishing to submit written comments related to this revision is advised to submit them to FHWA Docket No. 78-30. These comments will be considered in processing future revisions to this regulation.

In consideration of the foregoing, the Federal Highway Administration hereby amends Chapter I of Title 23, Code of Federal Regulations, Part 625 as follows:

1. Revising paragraphs (b)(1) and (d)(2) of § 625.3 to read as follows:

§ 625.3 Standards, specifications, policies, guides, and references.

. . . . . .

(b)(1) *Standard Specifications for Highway Bridges*, Twelfth Edition, AASHTO 1977, and *Interim Specifications, Bridges*, AASHTO 1978 [2].

. . . . . .

(d) * * *

(2) *Standard Specifications for Transportation Materials and Methods of Sampling and Testing*, AASHTO 1978, Part I and Part II [2].

2. Amend the incorporation by reference note at the end of § 625.3 to read as follows:

NOTE.—Incorporation by reference provisions approved by the Director of the Federal Register on November 17, 1975, October 27, 1976, September 27, 1977, October 13, 1977, January 9, 1978, and September 29, 1978. These documents are on file in the Federal Register Library.

NOTE.—The Federal Highway Administration has determined that this document does not contain a significant proposal according to the criteria established by the Department of Transportation pursuant to E. O. 12044.

(23 U.S.C. 109, 315; 49 CFR 1.48(b)).

Issued on: November 16, 1978.

KARL S. BOWERS,
Federal Highway Administrator.

[3710-08-M]

Title 32—National Defense

CHAPTER V—DEPARTMENT OF THE ARMY

PART 553—ARMY NATIONAL CEMETERIES

Bicyclist Restrictions

AGENCY: Department of the Army, DOD.

ACTION: Final rule.

SUMMARY: This document amends the cemetery regulations to restrict bicycle traffic within Arlington National Cemetery to Meigs Drive, Sherman Drive, and Schley Drive. Restricting bicyclists to the established route will afford commuters the most direct route through the cemetery, away from the heaviest traveled areas in the interest of both safety and minimal conflict with cemetery operations. With the exception of the bicycle throughfare, the new rule will extend regulatory criteria equally to all vehicular traffic. Bicyclists visiting the cemetery may use the bicycle racks provided at the Visitors' Center and may choose the convenience of tour-mobiles with attendant tour guides or they may walk through the cemetery grounds.

EFECTIVE DATE: This amendment is effective on November 17, 1978.

FOR FURTHER INFORMATION CONTACT:

Lieutenant Colonel Ellsworth S. Clarke (Area Code 202-693-0882).

SUPPLEMENTARY INFORMATION: Proposed rule restricting bicyclists to specific roads within the cemetery was published in the FEDERAL REGISTER on July 13, 1978 (43 FR 30075). Interested parties were given an opportunity to submit comments to the Department of the Army concerning the proposed restriction until August 15, 1978. A discussion of comments received is contained in the following paragraphs:

DISCUSSION OF MAJOR COMMENTS

1. Nineteen comments were received objecting to the proposed restrictions. The principal objections came from bicycle commuters who were of the opinion that they were being penalized by the actions of a few. A few comments suggested alternate routes to serve a growing number of commuters. There were other comments which recommended the enforcement of ordinances/regulations to apprehend and punish violators and control antisocial behavior.

2. One comment requested that letters of complaint be made available for public examination under the Freedom of Information Act. Copies of letters concerning bicyclists in the cemetery were furnished the respondent. Names and other identifying data of private citizens were withheld in accordance with the Privacy Act.

3. In response to a request from the Environmental Protection Agency (EPA), a meeting was held with representatives of other interested government agencies on September 21, 1978 to discuss the proposed rule. A general overview of the proposal and route was presented by Army respresentatives. Data substantiating that the proposed route is safe and is utilized by the majority of bicyclists entering the cemetery was provided. One agency representative suggested that the gate at Patton Drive and Eisenhower Drive be made accessible to commuting bicyclists. This suggestion was not adopted as that gate is directly adjacent to the service complex where heavy equipment traffic negotiating this confined area would present safety problems. Another agency representative requested that consideration be given to allow groups of organized bicyclists to tour the cemetery grounds. This request was considered and is found to be reasonable. However, prior written application to the Cemetery Superintendent is required. Requests must indicate the nature/sponsor of the cycling group, identification of the individual in charge, approximate number of cyclists in the group, and the proposed itinerary. Groups will be granted written permission which may include restrictions to the proposed itinerary as are necessary to assure that conflict with cemetery operations will not occur.

4. Comments favoring adoption of the proposed rule were received from various national veterans organizations as well as private citizens. The majority of comments advocated closure of the cemetery to all bicycle riding to preserve privacy and maintain the dignity and honor of the cemetery.

5. In evaluating the proposed rule to restrict bicycle traffic to certain routes within Arlington National Cemetery, an environmental impact assessment was made. Since access to the cemetery is not restricted, and since a thoroughfare for serious commuters continues to be allowed, it was determined that no significant environmental impact would result from adoption of the rule, nor would its implementation be environmentally controversial.

In consideration of the foregoing, 32 CFR § 553.22 is amended by adding a reference to paragraph (h) in the 14th line of § 553.22(b) and by adding a new paragraph (h) to the section as follows:

§ 553.22 Visitors' rules for the Arlington National Cemetery.

(a) * * *

(b) Scope * * * in paragraphs (c), (d), (e), (f), (g), and (h) of * * *.

. . . . . .

(h) Bicycle traffic will be restricted within the cemetery to Meigs Drive, Sherman Drive, and Schley Drive. All other bicycle traffic will be directed to the Visitors' Center where bicycle racks are provided. Exceptions for bicycle touring groups may be authorized in advance and in writing by the Superintendent. An individual visiting a relative's gravesite will be issued a temporary pass which will permit the bicyclists to proceed to the gravesite.

. . . . . .

By authority of the Secretary of the Army.

Dated: November 30, 1978.

ANN B. SMITH,
Colonel, U.S. Army, Director, Personal Affairs, TAGCEN.

Title 40—Protection of Environment

CHAPTER I—ENVIRONMENTAL PROTECTION AGENCY

SUBCHAPTER C—AIR PROGRAMS

[FRL 1017-6]

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

Approval and Revision of District of Columbia Implementation Plan

AGENCY: Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: This notice announces the Administrator's approval of an amendment to the District of Columbia's air pollution control regulations as a revision of the District's Implementation Plan (SIP). The amendment revises the requirement for "no visible emissions" at any time to a requirement that would not permit any visible emissions except for up to 40% opacity for a period of two minutes in any 60 minute period and for an aggregate of 12 minutes in any 24-hour period during "start-up", cleaning, soot blowing, adjustment of combustion controls of boilers and/or unavoidable malfunction of equipment. (The current federal regulation prohibits visible emissions at any time.)

EFFECTIVE DATE: December 4, 1978.

ADDRESSES: Copies of the revision and accompanying support material are available for public inspection during normal business hours at the following locations:

U.S. Environmental Protection Agency, Region III, Air Programs Branch, Curtis Building, Tenth Floor, Sixth & Walnut Streets, Philadelphia, Pennsylvania 19106, ATTN: Mr. Harold A. Frankford (3AH12).

District of Columbia Department of Environmental Services, Bureau of Air and Water Quality, 5010 Overlook Avenue, S.W., Washington, D.C. 20032, ATTN: Mr. John V. Brink.

Public Information Reference Unit, Room 2922 EPA Library, U.S. Environmental Protection Agency, 401 M street, S.W., Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT:

Mr. Harold A. Frankford (3AH12) Air Programs Branch, U.S. Environmental Protection Agency, Curtis Building, Tenth Floor, Sixth & Walnut Streets, Philadelphia, Pennsylvania 19106; telephone: (215) 597-8392.

SUPPLEMENTARY INFORMATION:

I. BACKGROUND

On March 3, 1977, the District of Columbia submitted to the Regional Administrator, EPA Region III, an amendment to the District's Air Quality Control Regulations and requested that it be reviewed and processed as a revision of the District of Columbia's Implementation Plan (SIP). In accordance with 40 CFR 51.4, the District certified that a public hearing had been held on May 25, 1976.

The amendment consists of changes to § 8-2:713 (Visible Emissions) of the District's regulations. This amended regulation is applicable to all stationary sources located within the District and, in part, reads as follows:

"• • • no person shall cause, suffer, or allow to be emitted into the outdoor atmosphere, visible emissions from stationary sources: *Provided*, That discharges not exceeding 40% opacity (or No. 2 on the Ringelmann Smoke Chart) shall be permitted for 2 minutes in any 60-minute period and for an aggregate of 12 minutes in any 24-hour period. These discharges shall be allowed only for start-up, cleaning, soot blowing, adjustment of combustion controls of boilers, and/or unavoidable malfunction of equipment• • •"

The original Section 8-2:713, as approved by the Administrator, permitted discharges for "start-up", cleaning, soot blowing, and/or adjusting combustion controls of boilers not exceeding 40% opacity (No. 2 on the Ringelmann Chart) for 4 minutes in any 60-minute period and for an aggregate of 24 minutes in any 24-hour period, until August 31, 1973. After that date, no visible discharges are permitted at any time.

The March 3, 1977 amendment supersedes a prior amendment to Section 8-2:713 which had been submitted by the District on May 24, 1974 and proposed as a revision of the District's Implementation Plan on July 11, 1974 (39 FR 25502). Following a prolonged period of discussion between EPA and the District of Columbia concerning the approvability of the amendments of SIP revisions, the District of Columbia agreed to withdraw its prior amendment.

On August 8, 1978 (43 FR 35072), the Administrator simultaneously withdrew the May 24, 1974 amendment to Section 8-2:713 from further consideration as a plan revision and proposed instead, the March 3, 1977 amendment to Section 8-2:713 as a revision of the District's SIP. A 30-day public comment period was provided, during which time no public comments were received.

II. APPROVABILITY OF THE PROPOSED REVISION

A request for a revison of a SIP must be approved by the Administrator if the revision meets the requirements of Section 110 of the Clean Air Act and EPA's regulations, 40 CFR Part 51. In this case, the mass emisslon limitation contained in the plan is not being changed. Instead, the District has only requested that the SIP's visible emission requirements be modified to allow for periodic short-term visible emissions during "start-up", cleaning, soot blowing, adjustment of combustion controls of boilers, and/or unavoidable malfunction of equipment. Such emissions are a part of normal operation and maintenance functions of combustion sources. The basic substantive requirement for approval of this revision is that the revision will not interfere with attainment or maintenance of the national ambient air quality standards.

Where emissions from a flue are addressed by a mass emissions limitation and a visible emissions requirement, the mass emissions limitation is controlling in any air quality demonstration that may be needed to insure attainment and maintenance of the national standards. Where both visible and mass emissions limitations are approved by the Administrator, both are properly a part of the SIP. At present, the District of Columbia SIP requires that a source may never have any visible emissions. However, the mass emissions limitation contained in the SIP (Section 8-2:708) does not impose an absolute ban on the discharge of particulate matter. Instead, a finite quantity of particulate matter emissions is permissible under the applicable mass emissions limitations. The Agency believes that the quantity of emissions permitted by the amendment to the District's regulations does not exceed those mass emissions limitations, and therefore the "no visible emissions" requirement is more restrictive than necessary to accomplish the objectives of Sections 110(a)(2) and (a)(3) of the Clean Air Act.

Consequently, the Agency believes that the amendment to the District's regulations submitted on March 3, 1977 does not interfere with attainment or maintenance of the national ambient air quality standards for particulate matter. Therefore, the Administrator approves the amendment to Section 8-2:713 submitted by the District on March 3, 1977 as a revision of the District's Implementation Plan, effective immediately. Concurrently, the Administrator amends 40 CFR 52.470 (Identification of Plan) of Subpart J (District of Columbia) to incorporate this plan revision into the District's SIP.

42 U.S.C. 7401

Dated: November 27, 1978.

DOUGLAS M. COSTLE,
Administrator.

Part 52 of Title 40, Code of Federal Regulations is amended by revising § 52.470 (c)(11) to read as follows:

Subpart J—District of Columbia

§ 52.470 Identification of Plan.

• • • • •

(c) The plan revisions listed below were submitted on the dates specified • • •

(11) Amendments to Sections 8-2:704 (Use of Certain Fuel Oils Forbidden), 8-2:705 (Use of Certain Coal Forbidden), and 8-2:713 (Visible Emissions) of the District of Columbia Air Quality Control Regulations submitted on March 3, 1977 by the Mayor.

SUBCHAPTER R—TOXIC SUBSTANCES CONTROL

[FRL 1008-4]

PART 730—HEALTH AND SAFETY STUDY REPORTING REGULATIONS

Final Rule; Corrections

AGENCY: Environmental Protection Agency.

ACTION: Typographical corrections to preamble of final rule.

SUMMARY: In its citizens' petition of September 12, 1978, referenced elsewhere in today's edition of the FEDERAL REGISTER, the Manufacturing Chemists Association (MCA) noted one minor typographical error in the preamble to the final regulations promulgated in the July 18, 1978 FEDERAL REGISTER (43 FR 30984) under section 8(d) of the Toxic Substances Control Act (TSCA) 15 U.S.C. 2620. These regulations concerned health and safety study reporting requirements under the TSCA. MCA also noted a minor typographical error in the rule correction of August 16, 1978 (43 FR 36249). These errors are corrected herein.

In the section on confidential claims procedures on page 30986 of the July 18, 1978 FEDERAL REGISTER the reference in the first column, second paragraph, fourth line should read "§ 730.8" instead of "§ 730.7."

On page 36249 of the August 16, 1978 FEDERAL REGISTER the second sentence in the quoted material—"Mixtures which contain only very small amounts of a substance whose effects are masked need not be submitted"—should contain the words "Studies of" before the first word.

FOR FURTHER INFORMATION CONTACTOR:

John B. Ritch, Industry Assistance Office, Office of Toxic Substances (TS-799), Environmental Protection Agency, 401 M Street, SW., Washington, D.C. 20460, 800-424-9065.

Dated: November 22, 1978.

DOUGLAS M. COSTLE,
Administrator.

Title 46—Shipping

CHAPTER II—MARITIME ADMINISTRATION, DEPARTMENT OF COMMERCE

SUBCHAPTER H—TRAINING

PART 310—MERCHANT MARINE TRAINING

Subpart C—Admission and Training of Midshipmen at the United States Merchant Marine Academy

PAY INCREASE

AGENCY: Maritime Administration, Commerce.

ACTION: Final rule.

SUMMARY: The Maritime Administration amends its regulations relating to merchant marine training to increase the pay that midshipmen of the United States Merchant Marine Academy receive while assigned to merchant vessels for sea year training. The purpose of this amendment is to implement the Maritime Administration policy that midshipmen shall receive the same rate of pay from their steamship company employers for the sea year training as cadets receive at the Federal academies.

EFFECTIVE DATE: January 20, 1979.

FOR FURTHER INFORMATION CONTACT:

Arthur Friedberg, Director, Office of Maritime Manpower (202) 377-3018.

SUPPLEMENTARY INFORMATION: Part 310 of Title 46 of the Code of Federal Regulations is hereby amended. This amendment increases the pay that midshipmen of the United States Merchant Marine Academy receive while assigned to merchant vessels for sea year training.

The purpose of this amendment is to implement the Maritime Administration policy that midshipmen shall receive the same rate of pay from their steamship company employers for the sea year training as cadets receive at the Federal academies.

The rate of pay received by midshipmen while assigned to subsidized merchant vessels is a matter of public contract with the owners of such vessels. Also, this amendment has been determined not to be a significant regulation within the scope of E.O. 12044, "Improving Government Regulations" (43 FR 12661, March 24, 1978), as implemented by criteria in Appendix F of a Notice in the FEDERAL REGISTER of May 30, 1978, (43 FR 23184), as amended. Therefore, this amendment to the Merchant Marine Training regulations is adopted without notice of proposed rulemaking.

Part 310 of Title 46 of the Code of Federal Regulations is amended by revising the first sentence of paragraph (c) of § 310.58 to read as follows:

§ 310.58 Training on subsidized vessels.

• • • • •

(c) *Pay*—Midshipmen shall receive pay, while attached to merchant vessels, at the rate of $351.00 per month from their steamship company employers.

• • • • •

Effective date. This amendment shall become effective January 20, 1979.

(Section 204A(b), Merchant Marine Act, 1936, as amended (49 Stat. 1987, 46 U.S.C. 1114), Reorganization Plans No. 21 of 1950 (64 Stat. 1273) and No. 7 of 1961 (75 Stat. 842) as amended by Pub. L. 91-469 (84 Stat. 1036), Department of Commerce Order 10-8 (38 FR 19707, July 23, 1973).)

Catalog of Federal Domestic Assistance Program No. 11-507 U.S. Merchant Marine Academy (Kings Point).

NOTE.—It is hereby certified that the economic and inflationary impacts of this regulation have been carefully evaluated in accordance with OMB Circular A-107.

Dated: November 27, 1978.

By order of the Assistant Secretary of Commerce for Maritime Affairs.

JAMES S. DAWSON, Jr.,
Secretary.

Title 49—Transportation

CHAPTER I—RESEARCH AND SPECIAL PROGRAMS ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

[Docket No. HM-160; Amdt. Nos. 172-47, 173-123, 174-33, 175-7, 176-6, 177-44]

TRANSPORTATION OF ASBESTOS

Miscellaneous Amendment

AGENCY: Materials Transportation Bureau, Research and Special Programs Administration, DOT.

ACTION: Final Rule.

SUMMARY: These amendments require shipments of commercial asbestos fibers to be packaged in rigid, airtight or dust and sift proof packagings. Except when the shipment is by private carrier, non-rigid packages, such as bags, must be palletized and unitized using shrink-wrapping or strapped fiberboard wrapping. These amendments represent minimum safety requirements and are intended to reduce the risks to the public health associated with the generation of airborne concentrations of asbestos that may result from the packaging and handling of asbestos fiber shipments in commercial transportation.

EFFECTIVE DATE: These regulations are effective April 30, 1979.

ADDRESS: All written comments received in this rulemaking action are available for examination during regular business hours in the Dockets Branch, Room 6500, Trans Point Building, 2100 Second Street SW., Washington, D.C.

FOR FURTHER INFORMATION CONTACT:

Douglas A. Crockett, Standards Division, Materials Transportation Bureau, Research and Special Programs Administration, 2100 Second Street SW., Washington, D.C. 20590, phone 202-426-2075.

SUPPLEMENTARY INFORMATION: On March 2, 1978, a notice of proposed rulemaking (HM-160; Notice 78-3) was published in the FEDERAL REGISTER (43 FR 8562) stating that the MTB was planning to exercise regulatory control over the transportation of asbestos. Specific regulatory requirements were proposed for the control of certain forms of asbestos (e.g., milled or crude asbestos fibers). No requirements were proposed for asbestos fibers which are immersed or fixed in a natural or artificial binder material, or for manufactured products containing asbestos. Interested persons were invited to participate in the rulemaking proceeding through submission of written comments on the proposal to the MTB. All submissions, including late submissions, that were received on the proposal were fully considered by the MTB in the development of this final rule.

NEED TO REGULATE THE TRANSPORTATION OF ASBESTOS

Several commenters felt that the MTB had failed to establish a need to regulate the transportation of asbestos. One of the commenters suggested that there was no need for the proposed regulatory control of asbestos in transportation because the "methods and procedures now in use for the packaging and transport of asbestos meet the requirements of Part 173. 24(A)(sic) of the Transportation Act, that is 'under conditions normally incident to transportation there will be no significant release of the hazardous materials to the environment' and 'the effectiveness of the packaging will not be substantially reduced * * *' (t)he proposal contains no documentation to justify additional regulation." This commenter, while apparently believing that asbestos is a hazardous material, was incorrect in suggesting that asbestos is currently regulated by the MTB; or in suggesting that the purpose of Notice 78-3 was to justify the additional regulation by the MTB of asbestos in transportation. The transportation of asbestos is not now regulated by the MTB. It was precisely the purpose of Notice 78-3 that it should be. If, as the commenter suggests, the transportation of asbestos is now "in compliance with pertinent provisions of the Transportation Act," this rulemaking action will formalize and insure in a uniform and systematic manner that this is the case.

Another commenter stated that Notice 73-8 did "not establish a foundation for regulation, in that it does not document, or even allege for that matter, the actual release of fiber during the transportation of asbestos." As was pointed out in Notice 78-3, the MTB has "no detailed information on the amount of asbestos fibers released during transportation." The MTB does not now regulate asbestos, and has not therefore systematically collected accident data on the amounts of asbestos released in transportation or data on the frequency of such accidents. Most asbestos fiber, however, is currently shipped in bags, and it is undeniable that these bags can and do break, or can be and are being torn or punctured, with a consequent release of some or all of the bag contents. It can be speculated, moreover, that if all of the 750,000 tons of asbestos annually shipped in the United States were packaged in, as one commenter states, the "standard package" of a 100-pound bag; and if as little as one-tenth of one percent of these bags were damaged in transportation during the year (one out of a thousand) and if on the average 1 percent of the contents of the bags so damaged were released, the total amount of asbestos released per year would equal about 7.5 tons. These calculations give a general idea of the magnitude of asbestos fiber that would be released, given a 99.9 percent efficiency factor for "bag integrity" in transportation, and a 99.0 percent efficiency factor in minimizing the amount of asbestos released given a tear in the bag. The rather evident fact that asbestos has been accidentally released during transportation has not been contradicted by anything submitted to the public docket on this rulemaking action. One commenter, for example, in discussing the use of open-bed trailers with side racks and tarpaulins to transport asbestos stated that there is no evidence that the use of such trailers "has contributed to bag breakage and the release of airborne concentrations of asbestos fiber." The Asbestos Information Association, an incorporated nonprofit organization representing 51 firms in the United States and Canada engaged in the manufacture or processing of asbestos-containing products and the mining/milling of asbestos fibers, stated that with "the very large volume of asbestos shipped, occasional container damage may occur."

Although several commenters who discussed this matter do not contend that asbestos has not been released in transportation, they generally are of the view that the amounts that are being released are not significant or of a sufficient amount to pose an unreasonable risk to public health. The MTB does not agree; it believes that the amounts of asbestos fibers that are being released now, or would be released in the future, in the absence of these amendments, *may* pose an unreasonable risk to health.

Several commenters were concerned with the statement appearing in Notice 78-3 that "asbestos in its several commercial forms, poses serious health hazards to individuals subject to long term exposure to airborne asbestos concentrations." One commenter stated that "not all long-term exposures to airborne concentrations pose any health hazards * * *." Another commenter suggested that the statement needed "more explicit definition" and that "reference should have been made to unanswered questions within the scientific community concerning mineral type, fiber size and smoking in the asbestos-cancer relationship." One commenter stated that there is a dose-response relationship between exposure to asbestos and disease causation, and that this conclusion is supported by an OSHA statement from its June 7, 1972 preamble

to its standard for exposure to asbestos dust (37 FR 11318). The OSHA statement is that: "No one has disputed that exposure to asbestos of high enough *intensity and long enough* duration is causally related to asbestosis and cancers" (emphasis added). Although the MTB had also quoted this statement in Notice 78-3, the words underlined for emphasis had been inadvertently omitted. Under these circumstances, some commenters apparently felt that the MTB was asserting the view that because, according to some commenters, asbestos is ubiquitous, long term exposure to ambient levels of asbestos fibers poses serious health hazards to all people, without regard to their occupational or paraoccupational status. It was not the intention of the MTB to assert this view. That there are or can be "undisputed grave consequences from exposure to asbestos" (37 FR 11318) does not depend on the questioned conclusiveness of the evidence reported by OSHA (40 FR 47652) regarding the potential health hazards posed by low-level, brief or intermittent exposure to asbestos. The MTB relies on the foregoing FEDERAL REGISTER references for the general view that exposure to asbestos may pose an unreasonable risk to the public.

SECTION 173.1090(a) AND (b)

Several commenters stated that there are certain mineral ores, ore concentrates and milled mineral products which may have trace amounts of asbestos, or minor amounts of asbestos occurring as contaminants. They suggested that these materials presented no risk to property and little, if any, risk to public health and safety in transportation. Moreover, since the packaging requirements proposed in Notice 78-3 applied to only certain kinds of asbestos, namely milled or crude asbestos fibers produced by an asbestos mill, they further suggested that only "commercial asbestos fibers" be defined as a hazardous material.

The MTB recognizes that there are certain mineral ores, ore concentrates and milled mineral products, as well as other products, that contain certain amounts of asbestos, and that the commercial value of these minerals or products is not dependent on their asbestos content. The specific requirements in these amendments for the control of asbestos fibers in transportation do not apply to such materials or products, nor do they apply to asbestos as a waste product [1] or as a contaminating trace element. The amendments apply only to asbestos *in its several commercial forms* since it is those forms of asbestos that have been firmly established as posing serious health hazards to individuals. A new paragraph has been added which would define commercial asbestos as any material or product containing asbestos that has commercial value because of its asbestos content, and appropriate modifications have been made in the amendments to reflect this clarification. This new paragraph is identified in this amendment as paragraph (b) (paragraphs (b) and (c) in the notice are now paragraphs (c) and (d), respectively).

One commenter recommended that the scope of Notice 78-3 be amended to include, in addition to asbestos fibers, "all mineral and man-made (fibers) which have been identified by U.S. Government agencies as being carcinogenic and which may pose serious health risk." On December 9, 1976, the MTB published an Advance Notice of Proposed Rulemaking (41 FR 53824) in Docket No. HM-145 entitled "Environmental and Health Effects Materials." In that Notice, the MTB announced that it was considering whether new or additional transportation controls are necessary for certain classes of materials which are not generally subject to the existing Hazardous Materials Regulations. The question of whether all mineral and man-made fibers, which have been identified by U.S. Government agencies as being carcinogenic and which pose an unreasonable risk to public health, should be controlled in transportation will be considered in terms of the further development and resolution of the issues associated with Docket HM-145. Notice 78-3 however, pointed out that a large number of comments were received in Docket HM-145, and that a considerable amount of staff evaluation of these comments was still required before it would be possible to issue a notice or notices of proposed rulemaking for environmental and health effects materials, either on a comprehensive or on a selective basis.

SECTION 173.1090(c)(1)

Several commenters objected to the reference made to metal or fiber drums to illustrate the rigid packaging alternative for asbestos fibers. These commenters stated that the asbestos industry has not developed the technology to use this type of packaging alternative; that available technology is not transferable to the use of metal or fiber drums; and that, among other things, the use of this alternative could generate far greater airborne concentrations of asbestos than packaging and shipping practices currently in effect. As one commenter pointed out:

> Commercial asbestos is fluffy. It is difficult to pack this material in a rigid container, and, because the fiber would gradually compact during shipment, it would be difficult to remove it for introduction into the manufacturing process. It would also be extremely cumbersome, if not impossible, to empty rigid containers effectively and rapidly into hoods designed for bags. Spillage would no doubt occur and workers would be unnecessarily exposed to fibers.

Another commenter recommended that a DOT Specification 56 portable tank be included in the amended rule as an acceptable package "for the transportation of asbestos-type products." This commenter stated that "with the use of equipment designed for the purpose, the D.O.T. 56 package can be readily filled or emptied without release of any product dust to the atmosphere or contact with the product by the operator." Another commenter insisted that only metal drums and not fiber drums were acceptable for the transportation of asbestos fibers. These commenters apparently lost sight of the fact that proposed § 173.1090(c)(1) does not "mandate," as one commenter suggested, or even encourage the use of rigid, airtight packaging such as metal or fiber drums or even portable tanks. It provides an alternative method of shipping commercial asbestos fibers. As was indicated in Notice 78-3, the MTB believes that its proposed non-specification packaging standards as applied to the transportation of commercial asbestos is an effective and efficient means of precluding potential problems associated with asbestos airborne emissions occurring during transportation; and that they are consistent with the standards of the EPA and the OSHA. Some of the commenters however were also apparently unaware that the transportation standards for the control of asbestos are designed to be comprehensive in nature such that, once the standards are promulgated, commercial asbestos cannot be packaged and transported in any matter not specified in the amendments. If under more advanced technology the use of rigid, airtight packaging would lessen the likelihood of airborne asbestos emissions associated with bag breakages under current industry wide non-uniform non-standardized packaging practices, then it is necessary that alternative transportation standards be available so as not to preclude the development and utilization of such technology. Although the public record on Notice 78-3 contains statements that the asbestos industry is seeking to improve the technology involved in the shipment and handling of commercial asbestos so as to minimize the possibility for the accidental release of such asbestos incident to

[1] Under Docket HM-145A (43 FR 22626, May 25, 1978), new standards and procedures were proposed for the transportation of hazardous waste materials. That proposal would include waste asbestos if so identified by EPA under Section 3001 of the Solid Waste Disposal Act as amended by the Resource Conservation and Recovery Act (Pub. L. 94-580).

V 4 3 / 2 3 3

D E 4

7 8

UMI

transportation, it is by no means certain that the pace of such technological improvements is rapid enough or that the best, economically feasible technology is being considered. However, the classification of asbestos as an ORM-C will, for the first time, require the submission of incident reports to the MTB by carriers of any unintentional release of asbestos during transportation, and enable the MTB to monitor the safety performance record associated not only with the transportation alternatives available under current technology as provided for by these amendments, but also with any improvements in that technology.

For these reasons, the substance of proposed § 173.1090(c)(1) is being retained but modified to reflect an even broader range of permissible rigid, airtight packaging alternatives. This section now is identified in this amendment as § 173.1090(d)(1) because of the addition of new paragraph (b).

Section 173.1090(c)(2)

Proposed paragraph (c)(2) of Notice 78-3 covered the transportation alternative of shipping commercial asbestos in bags when in closed freight containers, motor vehicles, or rail cars that were loaded by the consignor and unloaded by the consignee. Several commenters noted that, unless reliance was placed on using the rigid, airtight packaging alternative provided in the proposal, this alternative would preclude the shipment of asbestos fibers by open-bed trailers. One commenter noted that there is "no evidence to indicate that the use of open-bed trailers with side racks and tarpaulins has contributed to bag breakage and the release of airborne concentrations of asbestos fiber." Another commenter noted that the type of bag permitted by proposed paragraph (c)(2) was not specified, and that the shipper could package asbestos in burlap bags, or very thin paper or polyethylene bags which could permit asbestos fibers to be easily released into the air during transit. Another commenter was concerned with "small volume users of asbestos and customers who, from time to time, require sample shipments for trial production runs of a few hundred pounds," and who under § 173.1090(c)(2) would be forced to acquire the exclusive use of a railcar or highway trailer, or rely on the alternative provided by § 173.1090(c)(1).

Given the lack of detailed data on the amount of asbestos fibers released in transportation and the circumstances and causes for such release, the MTB is in general agreement with the thrust of these comments; accordingly, a new paragraph (d)(2) recognizes less restrictive handling of bagged asbestos than was proposed.

Sections 174.840, 175.640, 176.906, 177.844

In these Sections, Notice 78-3 had proposed that, incident to its transportation, asbestos must be loaded, handled, and any asbestos contamination removed, in a manner that will *prevent* occupational exposure to airborne asbestos particles (emphasis added).

Some commenters objected to the word "prevent," believing that this word was intended to mean completely precluding the possibility of an accident occurring in which asbestos fibers would be released; or completely isolating people involved in the transportation, loading and unloading of asbestos from exposure to asbestos fibers from whatever source such fibers were generated. One commenter pointed out that with "the very large volume of asbestos shipped, occasional container damage may occur." Another commenter pointed out, although in a somewhat contradictory fashion, that since "asbestos is ubiquitous," therefore "airborne levels of asbestos fibers *can* be present in any place of employment, regardless of whether or not asbestos or products containing known quantities of asbestos are handled" (emphasis added). The Asbestos Information Association in its comments stated that "asbestos is ubiquitous, and there are *no workplaces where there is zero occupational exposure to asbestos*" (original emphasis). If Notice 78-3 was not as clear as it might have been on this point, it is only necessary to say that the basic purpose of these amendments is to minimize the exposure to airborne asbestos particles accidentally released during or incident to transportation; and appropriate changes to Parts 174, 175, 176, and 177 have been made to reflect this purpose.

ORM-C Classification

Notice 78-3 proposed that the classification for "asbestos" would be as an ORM-C, (Other Regulated Material, Group C). Several commenters were uncertain and concerned about the marking requirements associated with ORM-C classifications. One commenter noted that the designation ORM-C would "carry no meaningful warning to the person handling or opening the package." Another noted that the present regulations of the Occupational Safety and Health Administration (OSHA) on labeling requirements for asbestos convey much more information than an ORM-C marking requirement. These commenters were apparently not completely familiar with the marking requirements associated with ORM-C designated materials. The ORM-C marking not only warns when a package contains hazardous material, but it is also a certification by the person offering the package for transportation that the material is properly described, classed, packaged, marked, and labeled (when appropriate) and in proper condition for transportation according to applicable regulations of the Department. Neither function precludes or preempts OSHA labeling requirements or creates "contradictory regulatory requirements for labeling" as one commenter suggested. For these reasons, no changes have been made with respect to any marking requirements for asbestos packages.

Economic/Inflationary Impact

In reviewing the potential economic and inflationary impacts associated with the final rule, the MTB has determined that such impacts will be minimal. Based on the comments received, and the consequent modification of Notice 78-3, the only economic costs associated with final amendment pertain to the reporting requirements to be submitted to MTB on the accidental releases of commercial asbestos fibers during or incident to transportation. The absolute annual magnitude of these costs will be, of course, a function of the total number of incident reports that are submitted on accidental releases of asbestos fibers; but in view of the undisputed grave consequences from exposure to asbestos fibers, these reporting requirements will not impose an unnecessary burden on the economy, on individuals, or on public and private organizations.

In consideration of the foregoing, Title 49, Code of Federal Regulations, Parts 172, 173, 174, 175, 176, and 177 are amended as follows:

PART 172—HAZARDOUS MATERIALS TABLE AND HAZARDOUS MATERIALS COMMUNICATIONS REGULATIONS

1. In § 172.101 the Hazardous Materials Table is amended by adding a new entry, immediately following "Arsine," to read as follows:

[4910-60-C]

§ 172.101 Hazardous materials table.

(1)	(2)	(3)	(4)	(5)		(7)				
				Packaging		Maximum net quantity in one package			Water shipments	
				(a)	(b)	(a)	(b)		(a)	(b)	(c)
*/W/A	Hazardous materials descriptions and proper shipping names	Hazard class	Labels(a) required (if not excepted)	Exceptions	Specific requirements	Passenger carrying aircraft or railcar	Cargo only aircraft		Cargo vessel	Passenger vessel	Other requirement
*	(Add) Asbestos	ORM-C	None	173.1090 (c)	173.1090 (d)	No Limit	No Limit		1, 2	1, 2	Stow and handle to avoid airborne particles.

(a) Labels are required for each package containing asbestos, unless the package is excepted from labeling by § 173.1090(c).

* * *

2. In § 172.203 paragraph (k) is amended by adding a new paragraph (k)(3) to read as follows:

§ 172.203 Additional description requirements.

* * *

(k) * * *

(3) *Asbestos.* The word "asbestos" must be entered in association with the proper shipping name.

* * *

3. In § 172.504 paragraph (e)(2) is amended by adding a new sentence at the end of the paragraph to read as follows:

§ 172.504 General placarding requirements.

* * *

(e) * * *

(2) * * * Placards are not required for asbestos when transported by motor vehicle, rail car, or aircraft.

* * *

4. In § 172.519 paragraph (c)(1) is amended by adding a new sentence at the end of the paragraph to read as follows:

§ 172.519 Commodity specific placarding requirements.

* * *

(c) * * *

(1) * * * Placards are not required for asbestos when transported by motor vehicle, rail car, or aircraft.

* * *

5. In § 172.544 paragraph (c) is amended by adding a new sentence at the end of the paragraph to read as follows:

§ 172.544 Poisonous materials placards.

* * *

(c) * * * Placards are not required for asbestos when transported by motor vehicle, rail car, or aircraft.

* * *

6. In § 172.600 paragraph (c)(1) is amended by adding a new sentence at the end of the paragraph to read as follows:

§ 172.600 Applicability.

* * *

(c) * * *

(1) * * * Placards are not required for asbestos when transported by motor vehicle, rail car, or aircraft.

* * *

Standard No. 109 meet these criteria. Accordingly, the Michelin and the

V 43/233 DEC 78 UMI

PART 173—SHIPPERS—GENERAL REQUIREMENTS FOR SHIPMENTS AND PACKAGINGS

2. Section 173.1090 is added preceding Subpart N to read as follows:

§ 173.1090 Asbestos.

(a) Asbestos includes any of the following hydrated mineral silicates: chrysotile, crocidolite, amosite, anthophyllite asbestos, tremolite asbestos, actinolite asbestos, and every product containing any of these minerals.

(b) Commercial asbestos is any material or product containing asbestos that has commercial value because of its asbestos content.

(c) Asbestos which is immersed or fixed in a natural or artificial binder material (such as cement, plastic, asphalt, resins or mineral ore) and manufactured products containing asbestos or any materials or products whose commercial value is not dependent on their asbestos content, are not subject to the requirements of this subchapter.

(d) Commercial asbestos must be offered for transportation and transported in—

(1) Rigid, airtight packagings such as metal or fiber drums, portable tanks, or

(2) Bags and other non-rigid packagings that are dust and sift proof. When transported by other than a private carrier by highway, bags and other non-rigid packagings containing asbestos must be palletized and unitized by methods such as shrink-wrapping in plastic film or wrapping in fiberboard secured by strapping.

PART 174—CARRIAGE BY RAIL

3. A Subpart M Heading is added immediately following § 174.812 to read as follows:

Subpart M—Detailed Requirements for Other Regulated Materials

4. Section 174.840 is added to read as follows:

§ 174.840 Special loading and handling requirements for asbestos.

Asbestos must be loaded, handled, and unloaded, and any asbestos contamination of rail cars removed, in a manner that will minimize occupational exposure to airborne asbestos particles released incident to transportation. (See § 173.1090 of this subchapter.)

PART 175—CARRIAGE BY AIRCRAFT

5. Section 175.640 is added to read as follows:

§ 175.640 Special requirements for other regulated materials.

Asbestos must be loaded, handled, and unloaded, and any asbestos contamination of aircraft removed, in a manner that will minimize occupational exposure to airborne asbestos particles released incident to transportation. (See § 173.1090 of this subchapter.)

PART 176—CARRIAGE BY VESSEL

6. Section 176.906 is added to read as follows:

§ 176.906 Stowage and handling of asbestos.

Asbestos must be stowed, handled, and unloaded, and any asbestos contamination of vessels removed, in a manner that will minimize occupational exposure to airborne asbestos particles released incident to transportation. (See § 173.1090 of this subchapter.)

PART 177—CARRIAGE BY PUBLIC HIGHWAY

7. Section 177.844 is added to read as follows:

§ 177.844 Other regulated materials.

Asbestos must be loaded, handled, and unloaded, and any asbestos contamination of transport vehicles removed, in a manner that will minimize occupational exposure to airborne asbestos particles released incident to transportation. (See § 173.1090 of this subchapter.)

(49 U.S.C. 1803, 1804, 1808; 49 CFR 1.53(e).)

NOTE.—The Materials Transportation Bureau has determined that these amendments do not require a regulatory analysis under the items of Executive Order 12044 and DOT implementing procedures (43 FR 9582). A regulatory evaluation is available for review in the docket.

Issued in Washington, D.C., on November 27, 1978.

L. D. SANTMAN,
Director, Materials Transportation Bureau.

[4910-59-M]

CHAPTER V—NATIONAL HIGHWAY TRAFFIC SAFETY ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

[Docket No. 78-17; Notice 1]

PART 571—FEDERAL MOTOR VEHICLE SAFETY STANDARDS

New Pneumatic Tires—Passenger Cars

AGENCY: National Highway Traffic Safety Administration (NHTSA), Department of Transportation.

ACTION: Final rule.

SUMMARY: Pursuant to petitions by the Michelin Tire Corporation (Michelin) and by the Rubber Manufacturers Association (RMA), this notice amends Federal Motor Vehicle Safety Standard No. 109, *New Pneumatic Tires—Passenger Cars*, by adding four new tire size designations to Table I of Appendix A of the standard. The amendment permits the introduction into interstate commerce of the new tire sizes.

EFFECTIVE DATE: January 3, 1979, if objections are not received prior to that date.

ADDRESS: Comments should refer to the docket number and be submitted to Room 5108, Nassif Building, 400 Seventh Street SW., Washington, D.C. 20590.

FOR FURTHER INFORMATION CONTACT:

John Diehl, Office of Vehicle Safety Standards, National Highway Traffic Safety Administration, 400 Seventh Street SW., Washington, D.C. 20590 (202-426-1714).

SUPPLEMENTARY INFORMATION: According to agency practice, the National Highway Traffic Safety Administration responds to petitions for adding new tire sizes to Table I of Appendix A of Standard No. 109 by quarterly issuing final rules under an abbreviated rulemaking procedure for expediting such routine amendments.

On July 13, 1978, Michelin petitioned for the addition of two new tire size designations requested to be located in a new table, I-QQ within Appendix A of Standard No. 109. On July 18, 1978, and August 3, 1978, the RMA petitioned for the addition of two new tire size designations to existing tables within Table I of Appendix A of the standard. The bases for accepting or denying requests to add new tire size designations are set forth in introductory guidelines to the appendix (October 5, 1968, 33 FR 14964, as amended May 4, 1971, 36 FR 8298; July 22, 1971, 36 FR 13601; and August 13, 1974, 39 FR 28980). The four new tire size designations requested to be added to

Standard No. 109 meet these criteria. Accordingly, the Michelin and the RMA petitions are granted, and these new tire size designations are added to Table I of Appendix A of the standard pursuant to the abbreviated rulemaking procedure.

In accordance with the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(c)) and Executive Order 12044, the NHTSA has reviewed the environmental and economic impacts of these amendments. There should be no negative environmental impacts. Further, since these are minor technical amendments of the standard which will permit the production of four new tire sizes, there should be no costs associated with their implementation. The agency has further concluded that this is not a significant regulation within the meaning of the Executive order.

In consideration of the foregoing, Title 49 of the Code of Federal Regulations (Part 571.109 (Standard No. 109, *New Pneumatic Tires—Passenger Cars*)) is amended as specified below, subject to the 30 day comment provision discussed above.

§ 571.109 [Appendix amended]

In Tables I-HH, I-JJ, and I-QQ, the following new tire size designations and corresponding values are added:

All comments must be limited not to exceed 15 pages in length. Necessary attachments may be appended to these submissions without regard to the 15 page limit. This limitation is intended to encourage commenters to detail their primary arguments in a succinct and concise fashion. It is requested but not required that 10 copies of comments be submitted.

If a commenter wishes to submit certain information under a claim of confidentiality, three copies of the complete submission, including purportedly confidential information, should be submitted to the Chief Counsel, NHTSA, at the address given above, and seven copies from which the purportedly confidential information has been deleted should be submitted to the Docket Section. Any claim of confidentiality must be supported by a statement demonstrating that the information falls within 5 U.S.C. section 552(b)(4), and that disclosure of the information is likely to result in substantial competitive damage; specifying the period during which the information must be withheld to avoid that damage; and showing that earlier disclosure would result in that damage. In addition, the commenter or, in the case of a corporation, a responsible corporate official authorized to speak for the corporation must certify in writing that each item for which confidential treatment is requested is in fact confidential within the meaning of section 552(b)(4) and that a diligent search has been conducted by the commenter or its employees to assure that none of the specified items has previously been released to the public.

All comments received before the close of business on the comment closing date indicated above will be considered; and will be available for examination in the docket at the above address both before and after that date.

The principal authors of this notice are John Diehl of the Office of Vehicle Safety Standards and Nancy Eager of the Office of Chief Counsel.

CHAPTER X—INTERSTATE COMMERCE COMMISSION

SUBCHAPTER A—GENERAL RULES AND REGULATIONS

[S.O. 1289; Amdt. 2]

PART 1033—CAR SERVICE

Burlington Northern Inc. Authorized To Operate Over Tracks of Union Pacific Railroad Co. at Sterling, Colo.

AGENCY: Interstate Commerce Commission.

ACTION: Emergency Order (Amendment No. 2 to Service Order No. 1289).

SUMMARY: The Burlington Northern (BN) between Bridgeport, Nebraska, and Brush, Colorado, formerly a light density line, has become a major north-south route traversed by numerous daily coal trains. Between Sterling, Colorado, and Union, Colorado, trains over this line operate over tracks of the Union Pacific (UP). The connection between the BN and the UP at Sterling includes a 13 degree curve which imposes severe speed restrictions, reduced train size, excessive fuel consumption and excessive rail and tie wear on the BN. The UP and the BN have agreed to move the point of entry of BN trains to a point on the UP 2,892 feet east of the existing point, thereby enabling BN trains to avoid excessive curvature on the existing route. Service Order No. 1289 authorizes the BN to operate over the additional UP trackage pending dispositing of its application seeking permanent authority. Service Order No. 1289 is printed in full in volume 42 of the FEDERAL REGISTER at page 63423. Amendment No. 2 extends Service Order No. 1289 for an additional period of 6 months.

DATES: Effective 11:59 p.m., November 30, 1978. Expires 11:59 p.m., May 31, 1979.

FOR FURTHER INFORMATION CONTACT:

C. C. Robinson, Chief, Utilization and Distribution Branch, Interstate Commerce Commission, Washington, D.C. 20423, Telephone (202) 275-7840, Telex 89-2742.

SUPPLEMENTARY INFORMATION: Decided November 27, 1978.

Upon further consideration of Service Order No. 1289 (42 FR 63423 and 43 FR 24694), and good cause appearing therefor:

It is ordered, That:

§ 1033.1289 Service Order 1289 Burlington Northern Inc. authorized to operate over tracks of Union Pacific Railroad Company at Sterling, Colorado is amended by substituting the following paragraph (f) for paragraph (f) thereof:

(f) *Expiration date.* The provisions of this order shall expire at 11:59 p.m., May 31, 1979, unless otherwise modified, changed, or suspended by order of this Commission.

Effective date. This amendment shall become effective at 11:59 p.m., November 30, 1978.

(49 U.S.C. 1(10-17).)

This amendment shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association. Notice of this amendment shall be given to the general public by depositing a copy in the Office of the Secretary of the Commission at Washington, D.C., and by filing a copy with the Director, Office of the FEDERAL REGISTER.

By the Commission, Railroad Service Board, members Joel E. Burns, Robert S. Turkington and John R. Michael.

H. G. HOMME, Jr.,
Secretary.

[S.O. 1285; Amdt. 2]

PART 1033—CAR SERVICE

Chicago and North Western Transportation Co. Authorized to Operate Over Tracks of Chicago, Milwaukee, St. Paul and Pacific Railroad Co.

AGENCY: Interstate Commerce Commission.

ACTION: Emergency Order (Amendment No. 2 to Service Order No. 1285).

SUMMARY: To facilitate highway reconstruction and to avoid the necessity of building a duplicate railroad bridge over an intersecting highway, the Chicago and North Western and the Chicago, Milwaukee, St. Paul and Pacific Railroad have agreed to joint use of the 1.35 miles of the latter company's line between Rothschild, Wisconsin and Schofield, Wisconsin. Service Order No. 1285 authorizes the Chicago and North Western to operate over these lines of the Chicago, Milwaukee, St. Paul and Pacific Railroad Company. Service Order No. 1285 is printed in full in FEDERAL REGISTER,

lished in full in volume 43 of the FED-

V 43/233 DEC 78 UMI

Volume 42, at page 59278. Amendment No. 2 extends this order for an additional six month period.

DATES: Effective 11:59 p.m., November 30, 1978. Expires 11:59 p.m., May 31, 1979.

FOR FURTHER INFORMATION CONTACT:

C. C. Robinson, Chief, Utilization and Distribution Branch, Interstate Commerce Commission, Washington, D.C. 20423, Telephone (202) 275-7840, Telex 89-2742.

SUPPLEMENTARY INFORMATION:

Decided: November 27, 1978.

Upon further consideration of Service Order No. 1285 (42 FR 59278 and 43 FR 24535), and good cause appearing therefor:

It is ordered, That:

§ 1033.1285 Service Order 1285, Chicago, and North Western Transportation Company authorized to operate over tracks of Chicago, Milwaukee, St. Paul and Pacific Railroad Company, is hereby amended by substituting the following paragraph (f) for paragraph (f) thereof:

(f) *Expiration date.* The provisions of this order shall expire at 11:59 p.m., May 31, 1979, unless otherwise modified, changed, or suspended by order of this Commission.

Effective date. This amendment shall become effective at 11:59 p.m., November 30, 1978.

(49 U.S.C. 1(10-17).)

This amendment shall be served upon the Association of American Railroads, Car Service Division, as the agent of all railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association. Notice of this amendment shall be given to the general public by depositing a copy in the Office of the Secretary of the Commission at Washington, D.C., and by filing a copy with the Director, Office of the Federal Register.

By the Commission, Railroad Service Board, members Joel E. Burns, Robert S. Turkington and John R. Michael.

H. G. Homme, Jr.,
Secretary.

PART 1033—CAR SERVICE

Demurrage and Free Time on Freight Cars

AGENCY: Interstate Commerce Commission.

ACTION: Emergency Order, Amendment No. 1 to Second Revised Service Order No. 1315.

SUMMARY: Second Revised Service Order No. 1315 establishes minimum periods for the detention of cars by shippers and receivers free of demurrage and increases demurrage charges for cars held beyond the free time. Amendment No. 1 extends this order an additional two months. Second Revised Service Order No. 1315 is published in full in volume 43 of the Federal Register at page 45866.

DATES: Effective 6:59 a.m., December 1, 1978. Expires 6:59 a.m., February 1, 1979.

FOR FURTHER INFORMATION CONTACT:

Charles C. Robinson, Chief, Utilization and Distribution Branch, Interstate Commerce Commission, Washington, D.C. 20423, telephone 202-275-7840, Telex 89-2742.

SUPPLEMENTARY INFORMATION:

Decided: November 27, 1978.

Upon further consideration of Second Revised Service Order No. 1315 (43 FR 45866), and good cause appearing therefor:

It is ordered, That:

Section 1033.1315 Second Revised Service Order No. 1315, Demurrage and free time on freight cars is amended by substituting the following paragraph (e) for paragraph (e) thereof:

(e) *Expiration date.* The provisions of this order shall expire at 6:59 a.m., February 1, 1979, unless otherwise modified, changed, or suspended by order of this Commission.

Effective date. This amendment shall become effective at 6:59 a.m., December 1, 1978.

(49 U.S.C. 1(10-17).)

This amendment shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association. Notice of this amendment shall be given to the general public by depositing a copy in the Office of the Secretary of the Commission at Washington, D.C., and by filing a copy with the Director, Office of the Federal Register.

By the Commission, Railroad Service Board, members Joel E. Burns, Robert S. Turkington and John R. Michael.

PART 1033—CAR SERVICE

Distribution of Grain Cars

AGENCY: Interstate Commerce Commission.

ACTION: Emergency Order (Amendment No. 4 to Revised Service Order No. 1301).

SUMMARY: There are serious shortages of 40-ft., narrow-door plain boxcars and of covered hoppers on the lines of the Burlington Northern and of the Chicago and North Western. Revised Service Order No. 1301 requires return of narrow-door, 40-ft., plain boxcars and of covered hoppers owned by these two railroads. Loading to stations on the lines of the car owners is permitted. Amendment No. 4 extends Revised Service Order No. 1301 for an additional five months. Revised Service Order No. 1301 is printed in full in the Federal Register Volume 43 at page 12326.

DATES: Effective 11:59 p.m., November 30, 1978. Expires 11:59 p.m., April 30, 1979.

FOR FURTHER INFORMATION CONTACT:

C. C. Robinson, Chief, Utilization and Distribution Branch, Interstate Commerce Commission, Washington, D.C. 20423, telephone 202-275-7840, Telex 89-2742.

SUPPLEMENTARY INFORMATION:

Decided: November 27, 1978.

Upon further consideration of Revised Service Order No. 1301 (43 FR 12326, 14475, 19048 and 29008), and good cause appearing therefor:

It is ordered, That:

Section 1033.1301 Revised Service Order No. 1301, Distribution of grain cars, is amended by substituting the following paragraph (e) for paragraph (e) thereof:

(e) *Expiration date.* The provisions of this order shall expire at 11:59 p.m., April 30, 1979, unless otherwise modified, changed, or suspended by order of this Commission.

Effective date. This amendment shall become effective at 11:59 p.m., November 30, 1978.

(49 U.S.C. 1(10-17).)

This amendment shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association. Notice of this amendment shall be given to the general public by depositing a copy in the Office of the Secretary of the Commission at Washington, D.C., and by filing a copy with the Director, Office of the Federal Register.

PART 1033—CAR SERVICE

Chicago & North Western Transportation Co. Authorized To Operate Over Tracks of Chicago, Milwaukee, St. Paul & Pacific Railroad Co. at Dekalb, Ill.

AGENCY: Interstate Commerce Commission.

ACTION: Emergency Order (Amendment No. 2 to Service Order No. 1288).

SUMMARY: The line of the Chicago, Milwaukee, St. Paul and Pacific Railroad (MILW) serving Dekalb, Illinois is unservicecable because of deteriorated track, leaving numerous shippers served by this railroad at Dekalb without essential railroad service. Service Order No. 1288 authorizes the Chicago and North Western Transportation Company (CNW) to operate over tracks of the MILW in Dekalb for the purpose of providing continued rail service to those shippers. Amendment No. 2 extends this order for an additional six-month period. Service Order No. 1288 is printed in full in volume 42 of the Federal Register at page 62925.

DATES: Effective 11:59 p.m., November 30, 1978. Expires 11:59 p.m., May 31, 1979.

FOR FURTHER INFORMATION CONTACT:

C. C. Robinson, Chief, Utilization and Distribution Branch, Interstate Commerce Commission, Washington, D.C. 20423, telephone 202-275-7840, Telex 89-2742.

SUPPLEMENTARY INFORMATION:

Decided: November 27, 1978.

Upon further consideration of Service Order No. 1288 (42 FR 62925 and 43 FR 24539), and good cause appearing therefor:

It is ordered, That:

Section 1033.1288 *Service Order No. 1288*, Chicago and North Western Transportation Company authorized to operate over tracks of Chicago, Milwaukee, St. Paul and Pacific Railroad Company at Dekalb, Illinois, is amended by substituting the following paragraph (e) for paragraph (e) thereof:

(e) *Expiration date.* The provisions of this order shall expire at 11:59 p.m., May 31, 1979, unless otherwise modified, changed, or suspended by order of this Commission.

Effective date. This amendment shall become effective at 11:59 p.m., November 30, 1978.

(49 U.S.C. 1(10-17).)

This amendment shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association. Notice of this amendment shall be given to the general public by depositing a copy in the Office of the Secretary of the Commission at Washington, D.C., and by filing a copy with the Director, Office of the Federal Register.

By the Commission, Railroad Service Board, members Joel E. Burns, Robert S. Turkington and John R. Michael.

[14th Rev. S.O. 1234; Amdt. 1]

PART 1033—CAR SERVICE

Distribution of Freight Cars

AGENCY: Interstate Commerce Commission.

ACTION: Emergency Order, Amendment No. 1 to Fourteenth Revised Service Order No. 1234.

SUMMARY: Because of a severe shortage of freight cars, railroads are unable to furnish cars of the size required to transport the minimum quantities of freight specified by the tariffs without excessive delay to the intended shipment. Fourteenth Revised Service Order No. 1234 authorizes the railroad to substitute sufficient smaller cars to transport all of the freight required to be shipped. Amendment No. 1 extends this order until April 15, 1979. Fourteenth Revised Service Order No. 1234 is published in full in volume 43 of the Federal Register at page 37692.

DATES: Effective 11:59 p.m., November 30, 1978. Expires 11:59 p.m., April 15, 1979.

FOR FURTHER INFORMATION CONTACT:

Charles C. Robinson, Chief, Utilization and Distribution Branch, Interstate Commerce Commission, Washington, D.C. 20423, telephone 202-275-7840, Telex 89-2742.

SUPPLEMENTARY INFORMATION:

Decided: November 27, 1978.

Upon further consideration of Fourteenth Revised Service Order No. 1234 (43 FR 37692), and good cause appearing therefor:

It is ordered, That:

Section 1033.1234 *Fourteenth Revised Service Order No. 1234*, Distribution of freight cars, is amended by substituting the following paragraph (k) for paragraph (k) thereof:

(k) *Expiration date.* This order shall expire at 11:59 p.m., April 15, 1979, unless otherwise modified, changed or suspended by order of this Commission.

Effective date. This amendment shall become effective at 11:59 p.m., November 30, 1978.

(49 U.S.C. 1(10-17).)

This amendment shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association. Notice of this amendment shall be given to the general public by depositing a copy in the Office of the Secretary of the Commission, at Washington, D.C., and by filing a copy with the Director, Office of the Federal Register.

By the Commission, Railroad Service Board, members Joel E. Burns, Robert S. Turkington and John R. Michael.

PART 1033—CAR SERVICE

North Stratford Railroad Corp. Authorized To Operate Over Certain Tracks Owned by the State of New Hampshire

AGENCY: Interstate Commerce Commission.

V 4 3 / 2 3 3

D E 4

7 8

UMI

ACTION: Emergency Order, Amendment No. 5 to Service Order No. 1262.

SUMMARY: Service Order No. 1262 authorizes the North Stratford Railroad Corporation to operate a line of railroad between North Stratford, New Hampshire, and Beecher Falls, Vermont, owned by the State of New Hampshire. Resumption of operation over this line restores rail service to shippers affected by its abandonment by the Maine Central, its former owner. Amendment No. 5 to Service Order No. 1262 extends for two months the emergency authority granted to the North Stratford Railroad for operation of this line. Service Order No. 1262 is published in full in volume 42 of the FEDERAL REGISTER at page 16780.

DATES: Effective 11:59 p.m., November 30, 1978. Expires 11:59 p.m., January 31, 1979.

FOR FURTHER INFORMATION CONTACT:

Charles C. Robinson, Chief, Utilization and Distribution Branch, Interstate Commerce Commission, Washington, D.C. 20423, telephone 202-275-7840, Telex 89-2742.

SUPPLEMENTARY INFORMATION:

Decided: November 27, 1978.

Upon further consideration of Service Order No. 1262 (42 FR 16780, 43637, 57317; 43 FR 19047 and 50907), and good cause appearing therefor:

It is ordered,

Section 1033.1262 *North Stratford Railroad Corporation authorized to operate over certain tracks owned by the State of New Hampshire.*

Service Order No. 1262 is amended by substituting the following paragraph (f) for paragraph (f) thereof:

(f) *Expiration date.* The provisions of this order shall expire at 11:59 p.m., January 31, 1979, unless otherwise modified, changed or suspended by order of this Commission.

Effective date. This amendment shall become effective at 11:59 p.m., November 30, 1978.

(49 U.S.C. 1(10-17).)

This amendment shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association. Notice of this amendment shall be given to the general public by depositing a copy in the Office of the Secretary of the Commission, at Washington, D.C., and by filing a copy with the Director, Office of the Federal Register.

By the Commission, Railroad Service Board, members Joel E. Burns, Robert S. Turkington and John R. Michael.

[2d Rev. S.O. 1332; Amdt. 1]

PART 1033—CAR SERVICE

Railroad Operating Regulations for Freight Car Movement

AGENCY: Interstate Commerce Commission.

ACTION: Emergency Order, Amendment No. 1 to Second Revised Service Order No. 1332.

SUMMARY: There are severe shortages of freight cars throughout the country. Second Revised Service Order No. 1332 requires all railroads to place, remove, forward, weigh, clean or repair cars within 60-hours in order to expedite the handling of freight cars and to increase their availability for reloading. Boxcars, hopper cars and covered hopper cars are covered by this order. Amendment No. 1 extends the order until January 31, 1979. The order is published in full in Volume 43 of the FEDERAL REGISTER at page 45863.

DATES: Effective 11:59 p.m., November 30, 1978. Expires 11:59 p.m., January 31, 1979.

FOR FURTHER INFORMATION CONTACT:

Charles C. Robinson, Chief, Utilization and Distribution Branch, Interstate Commerce Commission, Washington, D.C. 20423, telephone 202-275-7840, Telex 89-2742.

SUPPLEMENTARY INFORMATION:

Decided: November 27, 1978.

Upon further consideration of Second Revised Service Order No. 1332 (43 FR 45863), and good cause appearing therefore:

It is ordered, That:

Section 1033.1332 Second Revised Service Order No. 1332, Railroad operating regulations for freight car movement, is hereby amended by substituting the following paragraph (g) for paragraph (g) thereof:

(g) *Expiration date.* The provisions of this order shall expire at 11:59 p.m., January 31, 1979, unless otherwise modified, changed or suspended by order of this Commission.

Effective date. This amendment shall become effective at 11:59 p.m., November 30, 1978.

(49 U.S.C. 1(10-17).)

This amendment shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association. Notice of this amendment shall be given to the general public by depositing a copy in the Office of the Secretary of the Commission, at Washington, D.C., and by filing a copy with the Director, Office of the Federal Register.

By the Commission, Chairman O'Neal, Vice Chairman Christian, Commissioners Brown, Stafford and Gresham. (Commissioner Clapp absent and not participating.)

H. G. HOMME, Jr.,
Secretary.

[Rev. S.O. 1313; Amdt. 2]

PART 1033—CAR SERVICE

Railroads Authorized to Forward Portions of Certain Multiple-Car Shipments Transporting Less Than Minimum Quantities Specified by Tariffs

AGENCY: Interstate Commerce Commission.

ACTION: Emergency Order (Amendment No. 2 to Revised Service Order No. 1313).

SUMMARY: Many railroad tariffs require the tender of from two to twenty-four cars at one time. Because of severe car shortages the railroads are unable to furnish, at one time, all of the cars required to transport the shipment. Serious delays to cars occur while the shipper awaits receipt of the remaining cars required. Service Order No. 1313 requires railroads to accept and forward partial shipments without delay when the carrier is unable to furnish, at one time, all of the cars required to transport the minimum quantities specified by the tariffs. The shipper tendering such partial shipment is required to complete the multiple-car shipment before tendering additional shipments in the same kind of car. Amendment No. 2 extends this order for an additional five months. Revised Service Order No. 1313 is published in full in volume 43 of the FEDERAL REGISTER at page 21893.

DATES: Effective 11:59 p.m., November 30, 1978. Expires 11:59 p.m., April 30, 1979.

FOR FURTHER INFORMATION CONTACT:

C. C. Robinson, Chief, Utilization and Distribution Branch, Interstate Commerce Commission, Washington, D.C. 20423, telephone 202-275-7840, Telex 89-2742.

SUPPLEMENTARY INFORMATION:

Decided: November 27, 1978.

Upon further consideration of Revised Service Order No. 1313 (43 FR 21893 and 29126), and good cause appearing therefor:

It is ordered, That:

Section 1033.1313 *Revised Service Order No. 1313.* Railroads authorized to forward portions of certain multiple-car shipments transporting less than minimum quantities specified by tariffs, is amended by substituting the following paragraph (g) for paragraph (g) thereof:

(g) *Expiration date.* The provisions of this order shall expire at 11:59 p.m., April 30, 1979, unless otherwise modified, changed or suspended by order of this Commission.

Effective date. This amendment shall become effective at 11:59 p.m., November 30, 1978.

(49 U.S.C. 1(10-17).)

This amendment shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association. Notice of this amendment shall be given to the general public by depositing a copy in the Office of the Secretary of the Commission at Washington, D.C., and by filing a copy with the Director, Office of the Federal Register.

By the Commission, Railroad Service Board, members Joel E. Burns, Robert S. Turkington and John R. Michael.

PART 1033—CAR SERVICE

Railroads Authorized To Transport Unit-Grain-Trains of Less Than Number of Cars Required by Tariffs

AGENCY: Interstate Commerce Commission.

ACTION: Emergency Order (Amendment No. 3 to Service Order No. 1312).

SUMMARY: Because of a severe shortage of covered hopper cars, railroads are unable promptly to substitute other cars for cars which must be removed from unit-grain-trains because of mechanical defects resulting in delays to the remainder of the cars used in the unit-grain-trains awaiting the reassembly of sufficient cars to fulfill tariff requirements. Service Order No. 1312 authorizes the carriers to transport unit-grain-trains with fewer cars than the number required by the applicable tariffs, subject to specified restrictions. Service Order No. 1312 is published in full in volume 43 of the FEDERAL REGISTER at page 13064. Amendment No. 3 extends this order for four months.

DATES: Effective 11:59 p.m., November 30, 1978. Expires 11:59 p.m., March 31, 1979.

FOR FURTHER INFORMATION CONTACT:

C. C. Robinson, Chief, Utilization and Distribution Branch, Interstate Commerce Commission, Washington, D.C. 20423, telephone 202-275-7840, Telex 89-2742.

SUPPLEMENTARY INFORMATION:

Decided: November 27, 1978.

Upon further consideration of Service Order No. 1312 (43 F.R. 13064, 24695 and 34149), and good cause appearing therefor:

It is ordered, That:

Section 1033.1312 *Service Order No. 1312, Railroads authorized to transport unit-grain-trains of less than number of cars required by tariffs,* is amended by substituting the following paragraph (i) for paragraph (i) thereof:

(i) *Expiration date.* The provisions of this order shall expire at 11:59 p.m., March 31, 1979, unless otherwise modified, changed, or suspended by order of this Commission.

Effective date. This amendment shall become effective at 11:59 p.m., November 30, 1978.

(49 U.S.C. 1(10-17).)

This amendment shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association. Notice of this amendment shall be given to the general public by depositing a copy in the Office of the Secretary of the Commission at Washington, D.C., and by filing a copy with the Director, Office of the Federal Register.

PART 1033—CAR SERVICE

Substitution of Hopper Cars for Covered Hopper Cars or Boxcars

AGENCY: Interstate Commerce Commission.

ACTION: Emergency Order, Amendment No. 2 to Revised Service Order No. 1280.

SUMMARY: Because of severe shortages of cars certain railroads are unable to furnish sufficient covered hopper cars and boxcars required for loading grain and grain products. Some railroads have available supplies of open hopper cars which can be substituted for boxcars or covered hopper cars for transporting these shipments. Revised Service Order No. 1280 authorizes railroads to substitute open hopper cars for covered hopper cars or boxcars for transporting shipments of grain or grain products. The consent of the shipper is required. Amendment No. 2 extends Revised Service Order No. 1280 for an additional six months. Revised Service Order No. 1280 is printed in full in the FEDERAL REGISTER, volume 42, at page 59386.

DATES: Effective 11:59 p.m., November 30, 1978. Expires 11:59 p.m., May 31, 1979.

FOR FURTHER INFORMATION CONTACT:

Charles C. Robinson, Chief, Utilization and Distribution Branch, Interstate Commerce Commission, Washington, D.C. 20423, telephone 202-275-7840, Telex 89-2742.

SUPPLEMENTARY INFORMATION:

Decided November 27, 1978.

Upon further consideration of Revised Service Order No. 1280 (42 FR 59386 and 43 FR 23723), and good cause appearing therefor:

It is ordered, That:

Section 1033.1280 *Revised Service Order No. 1280, Substitution of hopper cars for covered hopper cars or boxcars,* is amended by substituting the following paragraph (e) for paragraph (e) thereof:

(e) *Expiration date.* The provisions of this order shall expire at 11:59 p.m., May 31, 1979, unless otherwise modified, changed or suspended by order of this Commission.

Effective date. This amendment shall become effective at 11:59 p.m., November 30, 1978.

(49 U.S.C. 1(10-17).)

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

[7590-01-M]

NUCLEAR REGULATORY COMMISSION

[10 CFR Part 20]

STANDARDS FOR PROTECTION AGAINST RADIATION

Burial of Small Quantities of Radionuclides

AGENCY: U.S. Nuclear Regulatory Commission.

ACTION: Proposed rule.

SUMMARY: The Nuclear Regulatory Commission (NRC) is considering amending its regulations to require NRC licensees to obtain Commission approval prior to burial of small quantities of radionuclides. The proposed amendments would contribute to the protection of the public health by encouraging the shipment of small quantities of radioactive waste to licensed burial grounds and by improving the NRC's available data regarding amounts and locations of radioactive materials buried elsewhere. The amendments would not affect material already buried, or generally licensed and exempt material.

DATES: Comment period expires February 2, 1979.

ADDRESSES: Written comments should be submitted to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Branch.

FOR FURTHER INFORMATION CONTACT:

Mr. John W. Hickey, Office of Standards Development, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555 (phone: 310-443-5966).

SUPPLEMENTARY INFORMATION: Notice is hereby given that the Nuclear Regulatory Commission proposes to amend the regulations in 10 CFR Part 20, "Standards for Protection Against Radiation," to revise the provisions for disposal of small quantities of licensed radioactive material by burial in soil.

Section 20.304, 10 CFR Part 20, currently provides that no licensee shall dispose of licensed material by burial in soil unless: (a) the total quantity of licensed and other radioactive materials buried at any one location and time does not exceed, at the time of burial, 1,000 times the amount specified in Appendix C of Part 20; (b) burial is at a minimum depth of four feet; and (c) successive burials are separated by distances of at least six feet and not more than 12 burials are made in any year. Section 20.302 of 10 CFR Part 20 specifies the method for obtaining approval of proposed burials other than those allowed by § 20.304

Section 20.304 has not been amended since its adoption in 1957, although there have been amendments to Appendix C of 10 CFR Part 20, which is referenced in § 20.304. The proposed amendment discussed below was developed as part of an ongoing Commission effort to review existing regulations on disposal of low-level radioactive waste.

Because burials under § 20.304 may be performed without specific NRC approval, the Commission does not have exact data on such burials. However, based on informal discussions with NRC inspectors and State officials, the Commission staff has estimated that relatively few licensees (less than 100 out of several thousand NRC and Agreement State licensees) have performed burials under § 20.304 over the last few years. Examples of licensees performing burials include materials licensees (such as some universities) who possess relatively small quantities of radionuclides.

Representatives of several State agencies have expressed concern to the Commission over the practice of allowing licensees to bury small quantities of radionuclides without notification or prior approval of the Commission or its Agreement States. These State representatives suggest that the risk of allowing such burials may be unacceptable.

The Commission agrees that the existing practice should be revised, and would like to obtain public comments before making a decision on whether to allow continued disposal of radioactive material under § 20.304 without prior regulatory review. The proposed amendments would limit burials to two circumstances: (1) where the licensee has obtained prior Commission approval as provided in 10 CFR § 20.302, or (2) where the licensee transfers such material to authorized recipients (e.g., licensed burial grounds). The effect of the proposed amendments may be to contribute to the protection of public health by encouraging the shipment of even small quantities of waste to licensed burial grounds and by improving the NRC's available data regarding amounts and locations of radioactive materials buried elsewhere.

Examples of public comments which would be particularly helpful to the Commission are: information on the numbers of burials currently being conducted pursuant to § 20.304, the quantities and types of radionuclides buried, estimates of the potential risk to the public health from such burials, and estimates of the costs to licensees if § 20.304 were deleted.

If, after consideration of the factors relating to this matter including comments or suggestions submitted in response to this notice of proposed rule making, the Commission decides to promulgate the rule in effective form, a period of three (3) months would be provided for licensees currently conducting disposal by burial in soil pursuant to § 20.304 to make alternative disposal arrangements or to comply with the provisions of § 20.302.

These amendments would not require any action concerning material already buried under the present provisions of § 20.304.

It is not the intent of the proposed amendments to change procedures regarding the disposal of materials or products transferred to persons exempt or generally licensed.

The proposed amendments constitute a procedural change which is not likely to have a substantial impact on the method or number of burials of radionuclides. Information available to the Commission indicates that only a few licensees would be affected by the amendments. However, it is possible that as a result of Commission review of individual burial proposals or as a result of increased shipments to licensed burial grounds, the potential environmental impact will be reduced. Therefore, the Commission has determined that an environmental impact statement pursuant to the National Environmental Policy Act of 1969 need not be prepared in connection with the promulgation of these amendments, because their adoption will not significantly affect the quality of the human environment.

Pursuant to the Atomic Energy Act of 1954, as amended, the Energy Reorganization Act of 1974, as amended, and section 553 of title 5 of the United States Code, notice is hereby given that adoption of the following amendments to 10 CFR Part 20 is contem-

3. Rescind a segment of V-201 from

V 4 3 / 2 3 3 DEC 78 UMI

plated. All interested persons who desire to submit written comments or suggestions for consideration in connection with the proposed rule should send them to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Branch, by *February 2, 1979.*

§ 20.304 [Deleted]

1. Section 20.304, *Disposal by burial in soil,* is deleted.

2. Section 20.301(c) is revised to read as follows:

§ 20.301 General requirement.

. . . . . .

(c) As provided in § 20.303, applicable to the disposal of licensed material by release into sanitary sewerage systems, or in § 20.106 (Radioactivity in effluents to unrestricted areas).

3. Section 20.401(b) and subparagraph (3) of paragraph (c) are amended to read as follows:

§ 20.401 Records of surveys, radiation monitoring, and disposal.

. . . . . .

(b) Each licensee shall maintain records in the same units used in this part, showing the results of surveys required by § 20.201(b), monitoring required by §§ 20.205(b) and 20.205(c), and disposals made under §§ 20.302, 20.303, and deleted 20.304.[1]

(c) . . .

. . . . . .

(3) Records of disposal of licensed material made pursuant to §§ 20.302, 20.303, and deleted 20.304 [1] shall be maintained until the Commission authorizes their disposition.

4. A footnote is added to section 20.401 to read as follows:

[1]Section 20.304 provided for burial of small quantities of licensed materials in soil. Notice of its deletion appears in (Federal Register page and date to be inserted).

5. The note following Appendix C of 10 CFR Part 20 is amended to read as follows:

APPENDIX C

. . . . . .

NOTE.—For purposes of § 20.203, where there is involved a combination of isotopes in known amounts, the limit for the combination should be derived as follows: Determine, for each isotope in the combination, the ratio between the quantity present in the combination and the limit otherwise established for the specific isotope when not in combination. The sum of such ratios for all the isotopes in the combination may not exceed "1" (i.e., "unity").

(Section 161, b. and i., Pub. L. 83-703, 68 Stat. 948; Sec. 201, Pub. L. 93-438, 88 Stat. 1243, (42 U.S.C. 2201, 5841).)

Dated at Washington, D.C. this 28th day of November 1978.

For the Nuclear Regulatory Commission.

SAMUEL J. CHILK,
Secretary of the Commission.

[4910-13-M]

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

[14 CFR Part 71]

[Airspace Docket No. 78-GL-16]

TRANSITION AREA

Proposed Designation

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of Proposed Rulemaking.

SUMMARY: The nature of this federal action is to designate additional controlled airspace near Springfield, Minnesota to accommodate a new VOR/DME instrument approach procedure into the Springfield Municipal Airport established pursuant to a request from the Springfield Municipal Airport officials to provide that facility with instrument approach capability. The intended effect of this action is to insure segregation of the aircraft using this approach procedure in instrument weather conditions, and other aircarft operating under visual conditions.

DATES: Comments must be received on or before January 2, 1979.

ADDRESSES: Send comments on the proposal to FAA Office of Regional Counsel, AGL-7, Attention: Rules Docket Clerk, Docket No. 78-GL-16, 2300 East Devon Avenue, Des Plaines, Illinois 60018. A public docket will be available for examination by interested persons in the Office of the Regional Counsel, Federal Aviation Administration, 2300 East Devon Avenue, Des Plaines, Illinois 60018.

FOR FURTHER INFORMATION CONTACT:

Clair M. Billington, Airspace and Procedures Branch, Air Traffic Division, AGL-530, FAA, Great Lakes Region, 2300 East Devon Avenue, Des Plaines, Illinois 60018, Telephone 312-694-4500, Extension 456.

SUPPLEMENTARY INFORMATION: The floor of the controlled airspace in this area will be lowered from 1200' above ground to 700' above ground. The development of the proposed instrument procedures necessitates the FAA to lower the floor of the controlled airspace. The minimum descent altitude for this procedure may be established below the floor of the 700 foot controlled airspace. In addition, aeronautical maps and charts will reflect the area of the instrument procedure which will enable other aircraft to circumnavigate the area in order to comply with applicable visual flight rule requirements.

COMMENTS INVITED

Interested persons may participate in the proposed rulemaking by submitting such written data, views or arguments as they may desire. Communications should be submitted in triplicate to Regional Counsel, AGL-7, Great Lakes Region, Rules Docket No. 78-GL-16, Federal Aviation Administration, 2300 East Devon Avenue, Des Plaines, Illinois 60018. All communications received on or before January 2, 1979, will be considered before action is taken on the proposed amendment. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons.

AVAILABILITY OF NPRM

Any person may obtain a copy of this notice of proposed rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Information Center, APA-430, 800 Independence Avenue SW., Washington, D.C. 20591, or by calling 202-426-8058. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRMs should also request a copy of Advisory Circular No. 11-2 which describes the application procedures.

THE PROPOSAL

The FAA is considering an amendment to Subpart G of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to establish a 700 foot controlled airspace transition area near Springfield, Minnesota. Subpart G of Part 71 was republished in the FEDERAL REGISTER on January 3, 1978 (43 FR 440).

THE PROPOSED AMENDMENT

Accordingly, the FAA proposes to amend § 71.181 of Part 71 of the Federal Aviation Regulations as follows:

In § 71.181 (43 FR 440), the following transition area is added:

SPRINGFIELD, MINN.

That airspace extending upward from 700 feet above the surface within a 5 mile radius of the Springfield Municipal Airport (Latitude 44°13'53" N, Longitude 94°54'54" W) and within 2 statute miles each side of the 158° radial of the Redwood Falls VORTAC, extending from the 5 mile radius to 6 miles northwest of the airport, excluding that portion within the Windom Municipal Airport transition area.

This amendment is proposed under the authority of Section 307(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a)); section 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); section 11.61 of the Federal Aviation Regulations (14 (CFR 11.61).

The Federal Aviation Administration has determined that this document involves a proposed regulation which is not considered to be significant under the procedures and criteria prescribed by Executive Order 12044 and as implemented by interim Department of Transportation guidelines (43 FR 9582; March 8, 1978).

Issued in Des Plaines, Ill., on November 20, 1978.

WM. S. DALTON,
Acting Director
Great Lakes Region.

[Airspace Docket No. 78-WE-13]

VOR AIRWAYS

Proposed Alteration and Rescission

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to realign a segment of V-21 and rescind segments of V-25E, V-201 and V-208 airways south and southeast of Los Angeles, Calif. This action would eliminate unused route segments and realign a segment of V-21 to a route that is presently used as a vector route. Chart clutter would be reduced and traffic flow would be improved in this area.

DATES: Comments must be received on or before January 3, 1979.

ADDRESSES: Send comments on the proposal in triplicate to: Director, FAA Western Region, Attention: Chief, Air Traffic Division, Docket No. 78-WE-13, Federal Aviation Administration, 15000 Aviation Boulevard, P.O. Box 92007, Worldway Postal Center, Los Angeles, Calif. 90009.

The official docket may be examined at the following location: FAA Office of the Chief Counsel, Rules Docket, (AGC-24), Room 916, 800 Independence Avenue, SW., Washington, D.C. 20591.

An informal docket may be examined at the office of the Regional Air Traffic Division.

FOR FURTHER INFORMATION CONTACT:

Mr. Everett L. McKisson, Airspace Regulations Branch (ATT-230), Airspace and Air Traffic Rules Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591; telephone: (202) 426-3715.

SUPPLEMENTARY INFORMATION:

COMMENTS INVITED

Interested persons may participate in the proposed rulemaking by submitting such written data, views or arguments as they may desire. Communications should identify the airspace docket number and be submitted in triplicate to the Director, Western Region, Attention: Chief, Air Traffic Division, Federal Aviation Administration, 15000 Aviation Boulevard, P.O. Box 92007, Worldway Postal Center, Los Angeles, Calif. 90009. All Communications received on or before January 3, 1979, will be considered before action is taken on the proposed amendment. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons.

AVAILABILITY OF NPRM

Any person may obtain a copy of this notice of proposed rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Information Center, APA-430, 800 Independence Avenue, SW., Washington, D.C. 20591, or by calling (202) 426-8058. Communications must identify the docket number of this NPRM. Persons interested in being placed on a mailing list for future NPRMs should also request a copy of Advisory Circular No. 11-2 which describes the application procedures.

THE PROPOSAL

The FAA is considering an amendment to Part 71 of the Federal Aviation Regulations (14 CFR Part 71) that would make the following changes:

1. Realign a segment of V-21 from Seal Beach, Calif., to Santa Catalina, Calif., rather than to the CARP INT.

2. Rescind segments of V-25E from Seal Beach to the ALBACORE INT and from Seal Beach to the HERMO INT.

3. Rescind a segment of V-201 from Los Angeles, Calif., to the CARP INT.

4. Rescind a segment of V-208 from Los Angeles to Santa Catalina.

The route from Seal Beach to Santa Catalina is presently used as a vector/direct route. Designation of this route as an airway (V-21) would reduce flight planning and communication time. The airway segments that are proposed to be rescinded are not presently used sufficiently to warrant their retention as airways or else they are dually designated with another airway which would remain designated.

ICAO CONSIDERATIONS

As part of this proposal relates to the navigable airspace outside the United States, this notice is submitted in consonance with the International Civil Aviation Organization (ICAO) International Standards and Recommended Practices.

Applicability of International Standards and Recommended Practices by the Air Traffic Service, FAA, in areas outside domestic airspace of the United States is governed by Article 12 of and Annex 11 to the Convention on International Civil Aviation, which pertains to the establishment of air navigation facilities and services necessary to promoting the safe, orderly, and expeditious flow of civil air traffic. Their purpose is to insure that civil flying on international air routes is carried out under uniform conditions designed to improve the safety and efficiency of air operations.

The International Standards and Recommended Practices in Annex 11 apply in those parts of the airspace under the jurisdiction of a contracting state, derived from ICAO, wherein air traffic services are provided and also whenever a contracting state accepts the responsibility of providing air traffic services over high seas or in airspace of undetermined sovereignty. A contracting state accepting such responsibility may apply the International Standards and Recommended Practices to civil aircraft in a manner consistent with that adopted for airspace under its domestic jurisdiction.

In accordance with Article 3 of the Convention on International Civil Aviation, Chicago, 1944, state aircraft are exempt from the provisions of Annex 11 and its Standards and Recommended Practices. As a contracting state, the United States agreed by Article 3(d) that its state aircraft will be operated in international airspace with due regard for the safety of civil aircraft.

Since this action involves, in part, the designation of navigable airspace outside the United States, the Administrator has consulted with the Secretary of State and the Secretary of De-

(AGC-24), Room 916, 800 Indepen- (Commanding General, Fort Dix, N.J.)

SUMMARY: The proposed rule would

V 4 3 / 2 3 3

D E 4

7 8

UMI

fense in accordance with the provisions of Executive Order 10854.

THE PROPOSED AMENDMENT

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend § 71.123 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as republished (43 FR 307, 3545) as follows:

Under V-21, all before "Ontario, Calif.;" is deleted and "From Santa Catalina, Calif., via Seal Beach, Calif.;" is substituted therefor.

Under V-25, all before "INT Los Angeles 261°" is deleted and "From Mission Bay, Calif., via Los Angeles, Calif.;" is substituted therefor.

Under V-201, all before "Palmdale, Calif." is deleted and "From Los Angeles, Calif., to" is substituted therefor.

Under V-208, all before "Oceanside, Calif.;" is deleted and "From Santa Catalina, Calif., via" is substituted therefor.

(Secs. 307(a), 313(a), 1110, Federal Aviation Act of 1958 (49 U.S.C. 1348(a), 1354(a) and 1510); Executive Order 10854 (24 FR 9565); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.65.)

NOTE.—The FAA has determined that this document involves a proposed regulation which is not considered to be significant under the procedures and criteria prescribed by Executive Order 12044 and as implemented by interim Department of Transportation guidelines (43 FR 9582; March 8, 1978).

Issued in Washington, D.C., on November 22, 1978.

WILLIAM E. BROADWATER,
Chief, Airspace and Air Traffic Rules Division.

[14 CFR Part 71]

[Docket No. 78-SO-68]

DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Proposed Designation of Transition Area, Cairo, Ga.

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of Proposed Rulemaking.

SUMMARY: This proposed rule will designate Cairo, Georgia, Transition Area and will lower the base of controlled airspace in the vicinity of the Cairo-Grady County Airport from 1200 to 700 feet AGL to accommodate Instrument Flight Rule (IFR) operations. A public use instrument approach procedure has been developed for the Cairo-Grady County Airport, and the additional controlled airspace is required to protect aircraft conducting Instrument Flight Rule (IFR) operations.

DATES: Comments must be received on or before: December 31, 1978.

ADDRESS: Send comments on the proposal to: Federal Aviation Administration, Chief, Air Traffic Division, P. O. Box 20636, Atlanta, Georgia 30320.

FOR FURTHER INFORMATION CONTACT:

Harlen D. Phillips, Airspace and Procedures Branch, Federal Aviation Administration, P.O. Box 20636, Atlanta, Georgia 30320; telephone: 404-763-7646.

SUPPLEMENTARY INFORMATION:

COMMENTS INVITED

Interested persons may participate in the proposed rulemaking by submitting such written data, views or arguments as they may desire. Communications should identify the airspace docket number and be submitted in triplicate to the Director, Southern Region, Federal Aviation Administration, Attention: Chief, Air Traffic Division, P. O. Box 20636, Atlanta, Georgia 30320. All communications received on or before December 31, 1978, will be considered before action is taken on the proposed amendment. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each public contact with FAA personnel concerned with this rulemaking will be filed in the public, regulatory docket.

AVAILABILITY OF NPRM

Any person may obtain a copy of this notice of proposed rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Information Center, APA-430, 800 Independence Avenue, SW., Washington, D.C. 20591, or by calling (202) 426-8058. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRMs should also request a copy of Advisory Circular No. 11-2 which describes the application procedures.

THE PROPOSAL

The proposed designation is required to provide controlled airspace protection for IFR operations at Cairo-Grady County Airport. The NDB Runway 12 standard instrument approach procedure utilizing the Caidy (nonfederal) nondirectional radio beacon is proposed in conjunction with the designation of this transition area.

THE PROPOSED AMENDMENT

Accordingly, the Federal Aviation Administration proposes to amend Subpart G, § 71.181 (43 FR 440) of Part 71 of the Federal Aviation Administration Regulations (14 CFR Part 71) by adding the following:

CAIRO, GA.

That airspace extending upward from 700 feet above the surface within a 8.5 mile radius of Cairo-Grady County Airport (latitude 30°53'19" N. longitude 84°09'22" W.); within 3 miles each side of the 137° bearing from the Caidy RBN (latitude 30°53'17" N., longitude 84°09'34" W.), extending from the 6.5 mile radius area to 8.5 miles northwest of the RBN.

(Sec. 307(a), Federal Aviation Act of 1958, as amended (49 U.S.C. 1348(a), sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)).)

NOTE.—The Federal Aviation Administration has determined that this document involves a proposed regulation which is not considered to be significant under the procedures and criteria prescribed by Executive Order 12044 and as implemented by interim Department of Transportation guidelines (43 FR 9582; March 8, 1978).

Issued in East Point, Georgia, on November 22, 1978.

PHILLIP M. SWATEK,
Director, Southern Region.

[14 CFR Part 73]

[Airspace Docket No. 78-EA-35]

RESTRICTED AREA

Proposed Alteration

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to alter the Fort Dix, N.J., Restricted Area, R-5001A and R-5001B, by expanding the area approximately one square mile to the southeast. This action would permit the U.S. Army to use three new artillery firing ranges recently established.

DATES: Comments must be received on or before January 3, 1979.

ADDRESSES: Send comments on the proposal in triplicate to: Director, FAA Eastern Region, Attention: Chief, Air Traffic Division, Docket No. 78-EA-35, Federal Aviation Administration, Federal Building, John F. Kennedy International Airport, Jamaica, N.Y. 11430.

The official docket may be examined at the following location: FAA Office of the Chief Counsel, Rules Docket (AGC-24), Room 916, 800 Independence Avenue SW., Washington, D.C. 20591.

An informal docket may be examined at the office of the Regional Air Traffic Division.

FOR FURTHER INFORMATION CONTACT:

Mr. Lewis W. Still, Airspace Regulations Branch (AAT-230), Airspace and Air Traffic Rules Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue SW., Washington, D.C. 20591, telephone 202-426-8525.

SUPPLEMENTARY INFORMATION:

COMMENTS INVITED

Interested persons may participate in the proposed rulemaking by submitting such written data, views or arguments as they may desire. Communications should identify the airspace docket number and be submitted in triplicate to the Director, Eastern Region, Attention: Chief, Air Traffic Division, Federal Aviation Administration, Federal Building, John F. Kennedy International Airport, Jamaica, N.Y. 11430. All communications received on or before January 3, 1979 will be considered before action is taken on the proposed amendment. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons.

AVAILABILITY OF NPRM

Any person may obtain a copy of this notice of proposed rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Information Center, APA-430, 800 Independence Avenue SW., Washington, D.C. 20591, or by calling 202-426-8058. Communications must identify the docket number of this NPRM. Persons interested in being placed on a mailing list for future NPRMs should also request a copy of Advisory Circular No. 11-2 which describes the application procedures.

THE PROPOSAL

The FAA is considering an amendment to Part 73 of the Federal Aviation Regulations (14 CFR Part 73) that would alter Restricted Area R-5001A and R-5001B by expanding the area to the southeast approximately one square mile. The additional airspace would provide the airspace required by the U.S. Army to establish three new artillery ranges. The current designated altitudes would remain the same. The using agency (Commanding General, Fort Dix, N.J.) will serve as lead agency for purposes of compliance with the National Environmental Policy Act. Comments on any land use problems can be addressed to LTC Barry T. Balint, Regional Representative, Department of the Army, Federal Building, John F. Kennedy International Airport, Jamaica, N.Y. 11430. Subpart B of Part 73 was republished in the FEDERAL REGISTER on January 3, 1978 (43 FR 692).

THE PROPOSED AMENDMENT

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend § 73.50 of Part 73 of the Federal Aviation Regulations (14 CFR Part 73) as republished (43 FR 692) as follows:

UNDER R-5001 FORT DIX, N.J.

Subarea A Boundaries. "to Lat. 39°58'00" N., Long. 74°25'00" W.; to Lat. 39°58'45" N., Long. 74°28'00" W.;" would be deleted and "to Lat. 39°58'00" N., Long. 74°25'00" W.; to Lat. 39°57'30" N., Long. 74°25'17" W.; to Lat. 39°57'23" N., Long. 74°25'50" W.; to Lat. 39°58'45" N., Long. 74°28'00" W.;" would be substituted therefor.

Subarea B Boundaries. "to Lat. 39°58'00" N., Long. 74°25'00" W.; to Lat. 39°58'45" N., Long. 74°28'00" W.;" would be deleted and "to Lat. 39°58'00" N., Long. 74°25'00" W.; to Lat. 39°57'30" N., Long. 74°25'17" W.; to Lat. 39°57'23" N., Long. 74°25'50" W.; to Lat. 39°58'45" N., Long. 74°28'00" W.;" would be substituted therefor.

(Secs. 307(a), 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.65.)

NOTE.—The FAA has determined that this document involves a proposed regulation which is not significant under the procedures and criteria prescribed by Executive Order 12044 and implemented by interim Department of Transportation guidelines (43 FR 9582; March 8, 1978).

Issued in Washington, D.C., on November 22, 1978.

WILLIAM E. BROADWATER,
Chief, Airspace and Air Traffic Rules Division.

[4410-01-M]

DEPARTMENT OF JUSTICE

Parole Commission

[28 CFR Part 2]

PAROLE, RELEASE, SUPERVISION, AND RECOMMITMENT OF PRISONERS, YOUTH OFFENDERS AND JUVENILE DELINQUENTS

AGENCY: United States Parole Commission.

ACTION: Proposed rule.

SUMMARY: The proposed rule would expand the coverage of the decision-making guidelines applicable to prisoners sentenced under the Youth Corrections Act, to include any prisoner who was under the age of 22 at the time of conviction. This proposed procedure is designed to ensure equitable treatment among all prisoners in the same age group, by requiring the Commission to justify differences in parole decisions on the basis of specific facts in each case, rather than sentence type alone. In addition, the procedure would permit judges the option of imposing a short adult sentence in the case of a youthful prisoner as a measure of leniency, without entailing the collateral effect of requiring the offender to be considered for parole under adult guidelines.

DATE: Comments must be received by February 1, 1979.

ADDRESS: Send comments to the United States Parole Commission, 320 First Street, Northwest, Washington, D.C. 20537; Attention: Office of the General Counsel.

FOR FURTHER INFORMATION CONTACT:

Michael A. Stover, Office of the General Counsel, telephone 202-724 3143.

SUPPLEMENTARY INFORMATION: At present, sentencing judges must make a "no benefit" finding under 18 U.S.C. § 5010(d) in order to use adult sentencing options in the case of an offender under the age of 22 at the time of conviction. The Commission believes that such a finding does not, by itself, require that each youth offender sentenced as an adult must be considered for parole *as if he were an adult*, or that he should necessarily serve longer in confinement than offenders who receive Youth Act sentences. However, if there are aggravating factors in the case that prompted the sentencing judge to impose an adult sentence, these factors will still enter into the Parole Commission's decision. In that event, the parole decision is likely to be above the guidelines on the basis of the same aggravating factors. Therefore, this proposal would not be likely to produce any significant shift toward leniency with regard to the parole of serious offenders.

On the other hand, the Commission is aware that a number of judges are dissatisfied with the six year maximum requirement under the Youth Corrections Act, and may wish to impose a short adult sentence rather than a Youth Act sentence, but are deterred from imposing the shorter sentence because they do not wish the defendent to be considered under the Adult parole guidelines. This change

V 4 3 / 2 3 3

would permit the imposition of a short adult sentence, without depriving the prisoner of parole consideration on the same basis as other youthful offenders.

For these reasons, the Commission proposes to add to its Youth/NARA guidelines at 28 CFR § 2.20 a footnote explaining the term "Youth" as meaning (1) any offender sentenced under the Youth Corrections Act, and (2) any offender who was under the age of 22 years at the time of conviction.

Dated: November 29, 1978.

CECIL C. MCCALL,
Chairman,
U.S. Parole Commission.

FEDERAL MINE SAFETY AND HEALTH REVIEW COMMISSION

[29 CFR Part 2700]

PROCEDURAL RULES

Extension of Comment Period on Proposed Rules of Procedure

AGENCY: Federal Mine Safety and Health Review Commission.

ACTION: Extension of comment period.

SUMMARY: On October 21, 1978, the Federal Mine Safety and Health Review Commission proposed the amendment of its rules of procedure. The Commission invited the comments of interested persons and permitted the filing of written views and data until November 30, 1978, 43 FR 50712. On November 15, 1978, the Commission announced that a public hearing on its proposal will be held on December 5, 1978, 43 FR 53045.

To accord interested persons a fuller opportunity to comment upon the Commission's proposed rules of procedure, the Commission extends the time for the submission of written comments and data and requests to appear to make oral presentations on the proposed rules to 10:00 a.m., December 5, 1978.

DATE: Written comments, data, and requests to appear to make oral presentations are due by 10:00 a.m., December 5, 1978.

FOR FURTHER INFORMATION CONTACT:

Donald Terry, Executive Director (202) 653-5644.

Signed at Washington, D.C., this 30th day of November 1978.

JEROME R. WALDIE,
Chairman.

DEPARTMENT OF TRANSPORTATION

Office of the Secretary

[49 CFR Part 10]

[OST Docket No. 39; Notice 78-16]

MAINTENANCE OF AND ACCESS TO RECORDS PERTAINING TO INDIVIDUALS

Proposed Revision

AGENCY: Department of Transportation (DOT).

ACTION: Notice of proposed rulemaking.

SUMMARY: DOT proposes a revision of its regulations implementing the Privacy Act, principally to change the special procedures regarding medical records and to add two exemptions. Public comment is invited.

DATE: Comment closing date: January 18, 1979.

ADDRESSES: Send written comments to Docket Clerk, OST Docket No. 39, Office of the General Counsel, Department of Transportation, Washington, D.C. 20590. Comments will be available for public inspection and copying in the Office of the Assistant General Counsel for Regulation and Enforcement, Room 10421, Department of Transportation Headquarters (Nassif) Building, 400 Seventh Street, SW, Washington, D.C. from 9:00 AM to 5:30 PM eastern time, Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT:

John J. Windsor, Privacy Act Coordinator, M-30, Department of Transportation, Washington, D.C. 20590 (202) 426-1887.

SUPPLEMENTARY INFORMATION: This proposed revision would make the following substantive changes in DOT's Privacy Act regulations:

1. All pronouns would be gender neutral.

2. Research and Special Programs Administration (RSPA) would be identified as an operating administration in lieu of Materials Transportation Bureau, which is now part of RSPA.

3. The special procedures regarding medical records would be changed to provide greater flexibility to DOT in deciding whether to release this information directly to the subject. The existing procedures deny DOT the opportunity to disclose the information directly to the subject if competent medical authority believes it may be harmful to the subject to do so. It may be useful to have the flexibility to disclose directly to the subject in extraordinary situations, as where, for example, the subject's religious beliefs preclude referral to a physician.

4. Two exemptions are proposed in addition to those already in effect. One is for Federal Aviation Administration (FAA) and one for National Highway Traffic Safety Administration (NHTSA). The FAA proposal would exempt all criminal investigatory information maintained by Headquarters and field security offices from a number of Privacy Act requirements, principally to tell persons that FAA has such information on them and to grant them access to it and the opportunity to seek its amendment. Similar exemptions already exist for the corresponding offices within the Office of the Secretary (OST) and the Coast Guard.

The NHTSA proposal would exempt the files which it maintains on people's suitability for employment with NHTSA from a number of Privacy Act requirements, again principally to tell persons that NHTSA has such information on them and to grant them access and the opportunity to seek amendment. This would protect the identities of confidential sources and also preserve these records as impartial measurement standards for appointment and promotion in the Federal service. Exemptions already exist for similar files in OST, Coast Guard, FAA, and Federal Railroad Administration.

As with all exemptions invoked by DOT, persons who request access to information covered by these exemptions would be granted access unless significant harm to a valid public interest would likely result from such access.

5. Finally, one exemption would be deleted. Coast Guard's Marine Pollution Case Files (DOT/CG 583) would no longer be listed among the systems of records specifically exempt pursuant to 5 USC 552a(k), since it has been determined that it is not a system of records as that term is used in the Privacy Act and is therefore not subject to the Privacy Act. It has previously been removed from DOT's listings of systems of records.

Public comment is invited on this proposed revision. Comments should be sent to the Docket Clerk at the address, and by the comment closing date, specified.

In consideration of the foregoing, the Department of Transportation proposes to revise Part 10 to Title 49 of the Code of Federal Regulations to read as appears below.

Issued in Washington, D.C., on November 20, 1978.

BROCK ADAMS,
Secretary of Transportation.

PART 10—MAINTENANCE OF AND ACCESS TO RECORDS PERTAINING TO INDIVIDUALS

Subpart A—Applicability and Policy

Sec.
10.1 Applicability.
10.3 Policy.
10.5 Definitions.

Subpart B—General

Appendix C—United States Coast Guard.
Appendix D—Federal Aviation Administration.
Appendix E—Federal Highway Administration.
Appendix F—Federal Railroad Administration.
Appendix G—National Highway Traffic Safety Administration.
Appendix H—Urban Mass Transportation Administration.
Appendix I—Saint Lawrence Seaway Development Corporation.
Appendix J—Research and Special Programs Administration.

AUTHORITY: Pub. L. 93-579, sec. 9. Department of Transportation Act, Pub. L. 89-670; 49 U.S.C. 1657.

Subpart A—Applicability and Policy

§ 10.1 Applicability.

(a) This part implements section 552a of Title 5, United States Code, as well as other provisions of the Privacy Act of 1974, and prescribes rules governing the availability of those records of the Department of Transportation which relate to citizens of the United States and aliens lawfully admitted for permanent residence.

(b) Appendices B through J to this part:

(1) Describe the places and times at which records are available for inspection and copying;

(2) Indicate the systems of records located at each facility;

(3) Identify the officials having authority to deny requests for disclosure of records under this part;

(4) Describe the procedures to be followed in requesting correction of a record in accordance with § 10.41; and

(5) List additional personal identification requirements in accordance with § 10.37.

(c) The Assistant Secretary for Administration may amend Appendix B to this part to reflect any changes in the items covered by that appendix, relating to the Office of the Secretary of Transportation. The Administrator concerned may amend the appendix applicable to that administration to reflect any changes in the terms covered by that appendix.

(d) Appendix A to this part identifies systems of records which are exempt from some of the requirements of this part, in accordance with Subpart G and 5 U.S.C. 552a(j) and (k). Appendix A may be amended by the General Counsel upon the request of the Assistant Secretary for Administration in the case of a system of records maintained by the Office of the Secretary or the Administrator concerned in the case of a system of Records maintained by an operating administration.

§ 10.3 Policy.

It is the policy of the Department of Transportation to comply with the letter and the spirit of the Privacy Act (the Act). Therefore, personal data contained in each system of records is afforded adequate protection against unauthorized access, is as accurate as is feasible, and is limited to that necessary to accomplish the stated use or uses of the system. Further, no system of records is exempted from the requirements of the Act unless it is determined that to do so is in the best interest of the government with due concern for individual rights.

§ 10.5 Definitions.

Unless the context requires otherwise, the following definitions apply in this part:

"Administrator" means the head of an operating administration and includes the Commandant of the Coast Guard.

"Department" means the Department of Transportation, including the Office of the Secretary and the following operating administrations:

(a) The United States Coast Guard.
(b) The Federal Aviation Administration.
(c) The Federal Highway Administration.
(d) The Federal Railroad Administration.
(e) The National Highway Traffic Safety Administration.
(f) The Urban Mass Transportation Administration.
(g) The St. Lawrence Seaway Development Corporation.
(h) The Research and Special Programs Administration.

"Includes" means "includes but is not limited to;"

"May" is used in a permissive sense to state authority or permission to do the act prescribed;

"Secretary" means the Secretary of Transportation or any person to whom has been delegated authority in the matter concerned;

"Individual" means a citizen of the United States or an alien lawfully admitted;

"Maintain" includes maintain, collect, use, or disseminate;

"Record" means any item, collection, or grouping of information about an individual that is maintained by the Department including, but not limited to, education, financial transactions, medical history, and criminal or employment history and that contains the name of, or an identifying number, symbol, or other identifying particular assigned to, the individual, such as a finger or voice print or a photograph;

"System of records" means a group of any records under the control of the Department from which information is retrived by the name of the individual or by some identifying number, symbol, or other identifying particular assigned to the individual;

"Statistical record" means a group of any records maintained for statistical research or reporting purposes only and not in whole or in part in making any determinaton about an identifiable individual, expect as provided by section 8 of Title 13, United States Code; and

"Routine use" means, with respect to the disclosure of a record, the use of such record for a purpose which is compatible with the purpose for which it was collected.

D E 4 7 8 UMI

(6) To the National Archives of the

V 43/233 DEC 4 78 UMI

Subpart B—General

§ 10.11 Administration of part.

Except as provided in Subpart F of this part, authority to administer this part in connection with the records of the Office of the Secretary is delegated to the Assistant Secretary for Administration. Authority to administer this part in connection with records in each operating administration is delegated to the Administrator concerned. An Administrator may redelegate to officers of that administration the authority to administer this part in connection with defined systems of records. An Administrator, however, may redelegate his or her duties under Subparts F and G of this part only to his or her deputy and to not more than one other officer who reports directly to the Administrator and who is located at the headquarters of that administration or at the same location as the majority of that administration's systems of records.

§ 10.13 Privacy Act Officer.

(a) To assist in the oversight of the implementation and continuing administration and in evaluating the effectiveness of compliance with the Act, the Assistant Secretary for Administration appoints a principal coordinating official with the title Privacy Act Officer, and one Privacy Act Coordinator from his staff. The Director of Automated Systems Policy is designated the Privacy Act Officer and has designated an appropriate staff member as his Privacy Act Coordinator.

(b) Inquiries concerning Privacy Act matters, or requests for assistance, may be addressed to the Privacy Act Officer (M-30), Department of Transportation, 400 Seventh Street, SW., Washington, D.C. 20590.

(c) Administrators may designate Privacy Act Officers or Coordinators to act as central coordinators within their administrations to assist them in administering the Act.

§ 10.15 Protection of records.

(a) No person may, without permission, remove any record made available for inspection or copying under this part from the place where it is made available. In addition, no person may steal, alter, multilate, obliterate, or destroy, in whole or in part, such a record.

(b) Section 641 of Title 18 of the United States Code provides, in pertinent part, as follows:

> Whoever • • • steals, purloins, or knowingly converts to his use or the use of another, or without authority, sells, conveys or disposes of any record • • • or thing of value of the United States or of any department or agency thereof • • • shall be fined not more than $10,000 or imprisoned not more than 10 years or both; but if the value of such property does not exceed the sum of $100, he shall be fined not more than $1,000 or imprisoned not more than one year or both • • •.

(c) Section 2071 of Title 18 of the United States Code provides, in pertinent part, as follows:

> Whoever willfully and unlawfully conceals, removes, mutilates, obliterates, or destroys, or attempts to do so, or with intent to do so takes and carries away any record, proceeding, map, book, paper, document, or other thing, filed or deposited • • • in any public office, or with any • • • public officer of the United States, shall be fined not more than $2,000 or imprisoned not more than 3 years, or both.

Subpart C—Maintenance of Records

§ 10.21 General.

Except to the extent that a system of records is exempt in accordance with Subpart G of this part, the Department, with respect to each system of records:

(a) Maintains in its records only such information about an individual as is relevant and necessary to accomplish a purpose of the Department required to be accomplished by statute or by executive order of the President;

(b) Collects information to the greatest extent practicable directly from the subject individual when the information may result in adverse determinations about an individual's rights, benefits, or privileges under Federal programs;

(c) Informs each individual whom it asks to supply information, on the form which it uses to collect the information or on a separate form that can be retained by the individual of:

(1) The authority (whether granted by statute, or by executive order of the President) which authorizes the solicitation of the information and whether disclosure of such information is mandatory or voluntary;

(2) The principal purpose or purposes for which the information is intended to be used;

(3) The routine uses, as published pursuant to paragraph (d) (4) of this section, which may be made of the information; and

(4) The effects, if any, on the individual of not providing all or any part of the requested information;

(d) Publishes in the FEDERAL REGISTER at least annually a notice of the existence and character of the system of records, including:

(1) The name and location of the system;

(2) The categories of individuals on whom records are manitained in the system;

(3) The categories of records maintained in the system;

(4) Each routine use of the records contained in the system, including the categories of users and the purpose of such use;

(5) The policies and practices regarding storage, retrievability, access controls, retention, and disposal of the records;

(6) The title and business address of the official responsible for the system of records;

(7) The procedures whereby an individual can be notified upon request if the system of records contains a record pertaining to that individual;

(8) The procedures whereby an individual can be notified upon request how to gain access to any record pertaining to that individual contained in the system of records, and how to contest its content; and

(9) The categories of sources of records in the system;

(e) Maintains all records which are used in making any determination about any individual with such accuracy, relevancy, timeliness, and completeness as is reasonably necessary to assure fairness to the individual in the determinations;

(f) Prior to dissemination any record about an individual to any person other than an agency, unless the dissemination is made pursuant to § 10.35(a)(2), makes reasonable efforts to assure that such records are accurate, complete, timely, and relevant for the Department's purposes;

(g) Maintains no record describing how any individual exercises rights guaranteed by the First Amendment unless——

(1) Expressly authorized by the General Counsel; and

(2) Expressly authorized by statute or by the individual about whom the record is maintained or unless pertinent to and within the scope of an authorized law enforcement activity;

(h) Makes reasonable efforts to serve notice on an individual when any record on such individual is made available to any person under compulsory legal process when such process becomes a matter of public record.

§ 10.23 Accounting of disclosures.

Each operation administration and the Office of the Secretary, with respect to each system of records under its control:

(a) Except for disclosures made under § 10.35(a) (1) or (2), keep an accurate accounting of:

(1) The date, nature, and purpose of each disclosure of a record to any person or to another agency made under § 10.33; and

(2) The name and address of the person or agency to whom the disclosure is made;

(b) Retains the accounting made under paragraph (a) of this section for at least five years or the life of the record, whichever is longer, after the

disclosure for which the accounting is made;

(c) Except for disclosures made under § 10.33(a)(7), makes the accounting made under paragraph (a)(1) of this section available to the individual named in the record at his request; and

(d) Informs any person or other agency about any correcton or notation of dispute made by the agency in accordance with § 10.45 of any record that has been disclosed to the person or agency if an accounting of the disclosure was made.

§ 10.25 Mailing lists.

An individual's name and address is not sold or rented unless such action is specifically authorized by law. This provision shall not be construed to require the withholding of names and addresses otherwise permitted to be made public.

§ 10.27 Government contractors.

When the Department provides by a contract for the operation by or on behalf of the Department of a system of records to accomplish a function of the Department, the requirements of this part are applied to such system. For purposes of Subpart I, CRIMINAL PENALTIES, any such contractor and any employee of the contractor are considered, in accordance with section 3(m) of the Privacy Act, to be employees of the Department.

§ 10.29 Social Security numbers.

(a) No individual is denied any right, benefit, or privilege provided by law because of such individual's refusal to disclose his Social Security account number.

(b) The provisions of paragraph (a) of this section do not apply to:

(1) Any disclosure which is required by Federal statute; or

(2) The disclosure of a Social Security number when such disclosure was required under statute or regulation adopted prior to January 1, 1975, to verify the identity of any individual.

(c) When an individual is requested to disclose his or her Social Security account number, that individual is informed whether that disclosure is mandatory or voluntary, by what statutory or other authority such number is solicited, what uses are made of it, and what detriments, including delay in the location of records, are incurred if the number is not provided.

Subpart D—Availability of Records

§ 10.31 Requests for records.

(a) Ordinarily, each person desiring to determine whether a record pertaining to him or her is contained in a system of records covered by this part or desiring access to a record covered by this part, or to obtain a copy of such a record, shall make a request in writing as provided in the pertinent appendix to this part. In exceptional cases oral requests are accepted.

(b) Each request shall specify the name of the requesting individual and the system of records in which the subject record is located or thought to be located. If assistance is required to determine the system of records identification number assigned in the systems notices, such assistance may be obtained from the appropriate Privacy Act Officer or his Assistant. Refer to § 10.13 for procedures for requesting assistance.

§ 10.33 Acknowledgement and access.

(a) Requests by an individual to determine whether he or she is the subject of a record in a system of records, or requesting access to a record in a system of records, should be acknowledged within 10 working days, where the request is by mail. For requests in person, an immediate response is given, either granting access or informing such individual when notification or access may be expected.

(b) If the response granting access or copies of the record is made within 10 working days, separate acknowledgement is not required.

(c) Although requests for access to a record are normally in writing, *e.g.*, by filing a written form or letter, it is the option of the individual to mail or present the request form in person.

§ 10.35 Conditions of disclosure.

(a) No record which is contained within a system of records within the Department is disclosed by any means of communication to any person, or to another agency, except pursuant to a written request by, or with the prior written consent of, the individual to whom the record pertains, unless disclosure of the record would be:

(1) To those officers and employees of the Department who have a need for the record in the performance of their duties;

(2) Required under Part 7 of this title which implements the Freedom of Information Act;

(3) For a routine use as defined in § 10.5 and described pursuant to § 10.21 (d)(4);

(4) To the Bureau of the Census for purposes of planning or carrying out a census or survey or related activity pursuant to the provisions of Title 13, United States Code;

(5) To a recipient who has provided the Department with advance adequate written assurance that the record will be used solely as a statistical research or reporting record, and the record is to be transferred in a form that is not individually identifiable;

(6) To the National Archives of the United States as a record which has sufficient historical or other value to warrant its continued preservation by the United States Government, or for evaluation by the Administrator of General Services or his designee to determine whether the record has such value;

(7) To another agency or to an instrumentality of any governmental jurisdiction within or under the control of the United States for a civil or criminal law enforcement activity if the activity is authorized by law, and if the head of the agency or instrumentality has made a written request to the agency which maintains the record specifying the particular portion desired and the law enforcement activity for which the record is sought;

(8) To a person pursuant to a showing of compelling circumstances affecting the health or safety of an individual if upon such disclosure notification is transmitted to the last known address of such individual;

(9) To either House of the Congress, or to the extent of matters within its jurisdiction, any committee or subcommittee thereof, any joint committee of the Congress or subcommittee of any such joint committee;

(10) To the Comptroller General, or any authorized representatives, in the course of the performance of the duties of the General Accounting Office; or

(11) Pursuant to the order of a court of competent jurisdiction.

(b) Any individual requesting access to his or her record or to any information pertaining to that individual which is contained within a system of records within the Department has access to that record or information unless the system of records within which the record or information is contained is exempted from disclosure in accordance with Subpart G, *Provided, however,* That nothing in this part is deemed to require that an individual be given access to any information compiled in reasonable anticipation of a civil action or proceeding. No exemption contained in Subpart G of Part 7 of the Regulations of the Office of the Secretary is relied upon to withhold from an individual any record which is otherwise accessible to such individual under the provisions of this part. Any individual who is given access to a record or information pertaining to him is permitted to have a person of his or her own choosing accompany him and to have a copy made of all or any portion of the record or information in a form comprehensible to the individual. When deemed appropriate, the individual may be required to furnish a written statement authorizing discussion of his record in the accompanying person's presence.

V 43/233 DEC 78 UMI

(c) Medical records—Where requests are for access to medical records, including psychological records and information, such records are released directly to the individual unless a medical practitioner has disapproved the release on the basis that it will do harm to the dividual requesting access. Final approval for release of medical records to an individual rest with the General Counsel. Normally, medical records whose direct release to an individual may do him or her harm, are released to the individual through a medical practitioner designated by the individual.

(d) Any person requesting access to records or to any information pertaining to other individuals is not granted such access unless that person can show that he or she has obtained permission for such access from the individual to whom the record pertains, unless the request comes within one of the exceptions of § 10.35(a).

§ 10.37 Identification of individual making request.

No record or information contained in a system of records is disclosed to an individual nor is any correction of a record in accordance with Subpart E be made at the request of an individual unless that individual demonstrates that he or she is who he or she claims to be. Normally, identity can be proven for individuals who appear in person by the presentation of an identifying document issued by a recognized organization (*e.g.*, a driver's license or a credit card and which contains a means of verification such as a photograph or a signature. For requests by mail, the unique identifier used in the system should be included if known. Responses to mail requests are normally sent only to the name and address listed in the system of records. In the case of particularly sensitive records, additional identification requirements may be imposed. In such cases, these additional requirements are listed in the public notice for the system and in the appropriate appendix to this part.

§ 10.39 Location of records.

Each record made avaiable under this subpart is available for inspection and copying during regular working hours at the place where it is located or, upon reasonable notice, at the document inspection facilities of the Office of the Secretary or each administration as set forth in the appendix applicable to that office or administration. Original records may be copied but may not be released from custody. Upon payment of the appropriate fee, copies are mailed to the requester.

Subpart E—Correction of Records

§ 10.41 Requests for correction of records.

Any person who desires to have a record pertaining to that person corrected shall submit a written request detailing the correction and the reasons the record should be so corrected. Requests for correction of records shall be submitted in accordance with the procedures of the organization set forth in Appendices B through J to this part for the appropriate operating element of the Department.

§ 10.43 Time limits.

Within ten days (excluding Saturday, Sunday, and legal holidays) of the receipt in accordance with § 10.41 of a request by an individual to amend a record pertaining to him, the receipt of the request is acknowledged in writing. If a determination is made to correct the record as requested, the correction is promptly made. If a determination is made not to correct a record the individual is informed promptly of the right to appeal in accordance with Subpart F of this part. If an appeal of a refusal to correct a record is in accordance with Subpart F of this part, a determination whether to correct the record is made within thirty days (excluding Saturday, Sunday and legal holidays) of the receipt of the appeal unless, for good cause shown, the Administrator concerned, or in the case of the Office of the Secretary, the General Counsel, extends such period. Where an extension is taken, the party taking the appeal is promptly notified of such fact.

§ 10.45 Statement of disagreement.

If a determination is made not to amend a record, the requester is informed of the right to file a concise statement setting forth the reasons for disagreement with the refusal to amend. In any disclosure containing information about which an individual has filed such a statement of disagreement, the portions of the record which are disputed are noted clearly and copies of the statement of disagreement provided. If the Administrator concerned or his or her delegee, or in the case of the Office of the Secretary, the General Counsel or his or her delegee, deems it appropriate, copies of a concise statement of the reasons for not making the amendments requested may be provided along with the statement of disagreement.

Subpart F—Procedures for Reconsidering Decisions Not To Disclose or Amend Records

§ 10.51 General.

(a) Each officer or employee of the Department who, upon a request by a member of the public for a record under this part, makes a determination that access is not to be granted or who determines not to amend a record in a requested manner, gives a written statement of the reasons for that determination to the person making the request and indicates the name and title or position of each person responsible for the denial of such request and the procedure for appeal within the Department.

(b) Any person:

(1) Who has been given a determination pursuant to paragraph (a) of this section, that access will not be granted; or

(2) Who has been informed that an amendment to a requested record will not be made;

may apply to the Administrator concerned, or in the case of the Office of the Secretary, to the General Counsel of the Department, for review of that decision. A determination that access will not be granted or a record amended is not administratively final for the purposes of judicial review unless it was made by the Administrator concerned or his or her delegee, or the General Counsel or his or her delegee, as the case may be. Upon a determination that an appeal will be denied, the requester is informed in writing of the reasons for the determination, and the names and titles or positions of each person responsible for the determination, and that the determination may be appealed to the District Court of the United States in the district in which the complainant resides, or has his or her principal place of business, or in which the records are located, or in the District of Columbia.

(c) Each application for review must be made in writing and must include all information and arguments relied upon by the person making the request. It is recommended that such request be made within 180 days of the date of the initial denial; however, exceptions to this time period are considered in the event that a longer time is required for good reasons.

(d) Upon a determination that a request for the correction of a record will be denied, the requester is informed that he may file a concise statement in accordance with § 10.45.

(e) Each application for review must indicate that it is an appeal from a denial of a request made under the Privacy Act. The envelope in which the application is sent should be marked prominently with the words "Privacy Act." If these requirements are not met, the time limits described in § 10.43 do not begin to run until the application has been identified by an employee of the Department as an application under the Privacy Act and has been received by the appropriate office.

(f) The Administrator concerned, or the General Counsel, as the case may be, may require the person making the request to furnish additional information, or proof of factual allegations, and may order other proceedings appropriate in the circumstances. The decision of the Administrator concerned, or the General Counsel, as the case may be, as to the availability of the record or whether to amend the record is administratively final.

(g) The decision by the Administrator concerned, or the General Counsel, as the case may be, not to disclose a record under this part is considered a determination for the purposes of section 552a(g) of Title 5, United States Code, "Civil Remedies."

(h) Any final decision by an Administrator or his or her delegee, identified in Appendices B through J of this part, not to grant access to or amend a record under this part, is subject to concurrence by the General Counsel or his or her delegee.

Subpart G—Exemptions

§ 10.61 General exemptions.

(a) The Assistant Secretary for Administration, with regard to the Investigations Division; the Federal Aviation Administrator, with regard to the FAA's Investigative Record System (DOT/FAA 815) and also with regard to the police functions of the National Capital Airport Police; the Commandant of U.S. Coast Guard, with regard to the Intelligence and Security Division; and the Federal Railroad Administrator, with regard to the Alaska Railroad Special Agents, may exempt from any part of the Act and this part except subsections (b), (c) (1) and (2), (e)(4) (A) through (F), (e) (6), (7), (9), (10) and (11), and (i) of the Act, and implementing §§ 10.35, 10.23 (a) and (b), 10.21(d) (1) through (6), 10.81 10.83, and 10.85, any systems of records, or portions thereof, which they maintain which consist wholly of;

(1) Information compiled for the purpose of identifying individual criminal offenders and alleged offenders and consisting only of identifying data and notations of arrests, the nature and disposition of criminal charges, sentencing, confinement, release, and parole and probation status;

(2) Information compiled for the purpose of a criminal investigation, including reports of informants and investigators, and associated with an identifiable individual; or

(3) Reports identifiable to an individual compiled at any stage of the process of enforcement of the criminal laws from arrest or indictment through release from supervision.

(b) The requirements (including general notice) of sections 553(b) (1), (2) and (3), and (c) and (e) of Title 5, United States Code, will be met by publication in Appendix A to this part, which must, at a minimum, specify:

(1) The name of the system; and

(2) The specific provisions of the Act from which the system is to be exempted and the reasons therefor.

(c) Any decision to exempt a system of records under this section is subject to concurrence by the General Counsel.

(d) Any person may petition the Secretary in accordance with the provisions of Part 5 of this Title, to institute a rulemaking proceeding for the amendment or repeal of any exemptions established under this section.

§ 10.63 Specific exemptions.

The Secretary or his or her delegee, in the case of the Office of the Secretary, or the Administrator or his or her delegee, in the case of an operating administration, may exempt any system of records which is maintained by the Office of the Secretary or the administration, as the case may be, from subsections (c)(3), (d), (e) (1), and (4) (G), (H), and (I), and (f) of the Act and implementing §§ 10.23(c); 10.35(b); 10.41; 10.43; 10.45; 10.21(a) and 10.21(d) (6), (7) and (8), under the following conditions:

(a) The system of records must consist of:

(1) Records subject to the provisions of section 552(b)(1) of Title 5, United States Code;

(2) Investigatory material compiled for law enforcement purposes, other than material within the scope of paragraph (a)(2) of § 10.61: *Provided, however,* That if any individual is denied any right, privilege, or benefit to which that individual would otherwise be entitled by Federal law, or for which that individual would otherwise be eligible, as a result of the maintenance of such material, such material is provided to such individual, except to the extent that the disclosure of such material would reveal the identity of a source who furnished information to the Government under an express promise that the identity of the source would be held in confidence, or, prior to September 27, 1975, the effective date of the Privacy Act of 1974, under an implied promise that the identity of the source would be held in confidence;

(3) Records maintained in connection with providing protective services to the President of the United States or other individuals pursuant to section 3056 of Title 18, United States Code;

(4) Records required by statute to be maintained and used solely as statistical records;

(5) Investigatory material compiled solely for the purpose of determining suitability, eligibility, or qualifications for Federal civilian employment, military service, Federal contracts, or access to classified information, but only to the extent that the disclosure of such material would reveal the identity of a source who furnished information to the Government under an express promise that the identity of the source would be held in confidence, or, prior to September 27, 1975, the effective date of the Privacy Act of 1974, under an implied promise that the identity of the source would be held in confidence;

(6) Testing or examination material used solely to determine individual qualifications for appointment or promotion in the Federal service the disclosure of which would compromise the objectivity or fairness of the testing or examination process; or

(7) Evaluation material used to determine potential for promotion in the armed services, but only to the extent that the disclosure of such material would reveal the identity of a source who furnished information to the Government under an express promise that the identity of the source would be held in confidence, or, prior to the effective date of this section, under an implied promise that the identity of the source would be held in confidence.

(b) The requirements (including general notice) of sections 553(b) (1), (2) and (3), and (c) and (e) of Title 5, United States Code, will be met by publication in Appendix A to this part, which must, at a minimum, specify:

(1) The name of the systems; and

(2) The specific provisions of the Act from which the system is to be exempted and the reasons therefor.

(c) Any decision to exempt a system of records under this section is subject to the concurrence of the General Counsel.

(d) Any person may petition the Secretary in accordance with the provisions of 49 CFR Part 5, to institute a rulemaking for the amendment or repeal of any exemptions established under his section.

Subpart H—Fees

§ 10.71 General.

This subpart prescribes fees for services performed for the public under this part by the Department.

§ 10.73 Payment of fees.

The fees prescribed in this subpart may be paid by check, draft, or postal money order payable to the Treasury of the United States.

§ 10.75 Fee schedule.

(a) Copies of documents by photocopy or similar method:	
Each page not larger than 11 x 17 inches:	
1 page	0.25
Each additional page	.05
(b) Copies of documents by typewriter: Each page.	2.00

V 4 3 / 2 3 3 D E 4 7 8 UMI

(c) Certified copies of documents:	
(1) With Department of Transportation seal.	3.00
(2) True copy, without seal	1.00
(d) Photographs:	
(1) Black and white print (from negative).	1.25
(2) Black and white print (from print)	3.15
(3) Color print (from negative)	3.50
(4) Color print (from print)	6.25
(e) Duplicate data tapes—each reel of tape or fraction thereof.	36.00

The applicant must furnish the necessary number of blank magnetic tapes. The tapes must be compatible for use in the supplier's computer system, ½ inch wide and 2,400 feet long, and must be capable of recording data at a density of 556 or 800 characters per inch. Unless otherwise designated, the tapes will be recorded at 556 CPI density. The Department of Transportation is not responsible for damaged tape. However, if the applicant furnishes a replacement for a damaged tape, the duplication process is completed at no additional charge.

(f) Microreproduction fees are as follows:	
(1) Microfilm copies, each 100-ft roll or less.	3.75
(2) Microfiche copies, each standard size sheet (4x6 in containing up to 65 frames).	.15
(3) Aperture card to hard copy, each copy	.50
(4) 16mm microfilm to hard copy:	
First	.25
Additional	.07
(g) Computerline printer output, each 1,000 lines or fraction thereof	1.00

§ 10.77 Services performed without charge.

(a) No fee is charged for time spent in searching for records or reviewing or preparing correspondence related to records subject to this part.

(b) No fee is charged for documents furnished in response to:

(1) A request from an employee or former employee of the Department for copies of personnel records of the employee;

(2) A request from a Member of Congress for official use;

(3) A request from a State, territory, U.S. possession, county or municipal government, or an agency thereof;

(4) A request from a court that will serve as a substitute for the personal court appearance of an officer or employee of the Department;

(5) A request from a foreign government or an agency thereof, or an international organization.

(c) Documents are furnished without charge or at a reduced charge, if the Assistant Secretary of Administration or the Administrator concerned, as the case may be, determines that waiver or reduction of the fee is in the public interest, because furnishing the information can be considered as primarily benefiting the general public.

(d) When records are maintained in computer-readable form rather than human-readable form, one printed copy is made available which has been translated to human-readable form without a charge for translation but in accordance with § 10.75(g), regarding computer line-printed charges.

Subpart I—Criminal Penalties

§ 10.81 Improper disclosure.

Any officer or employee of the Department who by virtue of his or her employment of official position, has possession of, or access to, agency records which contain individually identifiable information the disclosure of which is prohibited by this part and who knowing that disclosure of the specific material is so prohibited, willfully disclosures the material in any manner to any person or agency not entitled to receive it, is guilty of a misdemeanor and fined not more than $5,000 in accordance with 5 U.S.C. 552a(i)(1).

§ 10.83 Improper maintenance of records.

Any officer or employee of the Department who willfully maintains a system of records without meeting the notice requirements of § 10.21(d) is guilty of a misdemeanor and fined not more than $5,000 in accordance with 5 U.S.C. 552a(i)(2).

§ 10.85 Wrongfully obtaining records.

Any person who knowingly and willfully requests or obtains any record concerning an individual from the Department under false pretenses is guilty of a misdemeanor and fined not more than $5,000 in accordance with 5 U.S.C. 552a(i)(3).

Appendix A—Exemptions

Part I. General exemptions.

Those portions of the following systems of records that consist of (a) information compiled for the purpose of identifying individual criminal offenders and alleged offenders and consisting only of identifying data and notations of arrests, the nature and disposition of criminal charges, sentencing, confinement, release, and parole and probation status; (b) information compiled for the purpose of a criminal investigation, including reports of informants and investigators, and associated with an identifiable individual; or (c) reports identifiable to an individual compiled at any stage of the process of enforcement of the criminal laws from arrest or indictment through release from supervision, are exempt from all parts of 5 U.S.C. 552a except subsections (b), (c)(1) and (2), (e)(4)(A) through (F), (e)(6), (7), (9), (10), and (11), and (i):

A. The General Investigations Record System maintained by the Investigations Division, Office of Investigations and Security, Office of the Secretary (DOT/OST 016).

B. Police Warrant Files and Central Files maintained by the Police Branches, Washington National and Dulles International Airports, Federal Aviation Administration (DOT/FAA807).

C. Intelligence and Security Investigative Case Systems (DOT/CG 611), maintained by the Intelligence and Security Division, U.S. Coast Guard, at headquarters and district offices.

D. The files maintained by the Federal Aviation Administration regarding criminal investigations conducted by offices of Investigations and Security at headquarters and FAA Regional and Center Security Divisions (DOT/FAA 815).

The purpose of these exemptions is to prevent the compromise or impairment of criminal investigations conducted by the Office of Investigations and Security, OST; the Airport Police Branches; and the Investigations and Security Division, USCG.

Part II. Specific exemptions.

A. The following systems of records are exempt from subsection (c)(3) (Accounting of Certain Disclosures), (d) (Access to Records), (e)(4)(G), (H), and (I) (Agency Requirements), and (f) (Agency Rules) of 5 U.S.C. 552a, to the extent that they contain investigatory material compiled for law enforcement purposes, in accordance with 5 U.S.C. 552a(k)(2):

1. Investigative Record System maintained by the Federal Aviation Administration at FAA Regional and Center Air Transportation Security Divisions; the Investigations and Security Division, Aeronautical Center; and Office of Investigations and Security, FAA Headquarters, Washington, D.C. (DOT/FAA 805).

2. FHWA Investigations Case File System, maintained by the Office of Program Review and Investigations, Federal Highway Administration (DOT/FHWA 214).

3. FHWA Motor Carrier Safety Proposed Civil and Criminal Enforcement Cases, maintained by the Bureau of Motor Carrier Safety, Federal Highway Administration (DOT/FHWA 204).

4. Recreational Boating and Law Enforcement Cases (DOT/CG 505), maintained by the Office of Boating Safety, U.S. Coast Guard.

5. Port Safety Reporting System—Individual Violation Histories (DOT/CG 561), maintained by the Office of Marine Environment and Systems, U.S. Coast Guard.

6. Merchant Vessel Casualty Reporting System (DOT/CG 590), maintained by the Office of Merchant Safety, U.S. Coast Guard.

7. U.S. Merchant Seaman's Records (DOT/CG 589), maintained by the Office of Merchant Safety, U.S. Coast Guard.

8. Intelligence and Security Investigative Case Systems (DOT/CG 611), maintained by the Office of Operations, U.S. Coast Guard.

9. Port Security Case System (DOT/CG 612), maintained by the Office of Operations, U.S. Coast Guard.

10. DOT/NHTSA Investigations of Alleged Misconduct or Conflict of Interest, maintained by the Associate Administrator for Administration, National Highway Traffic Safety Administration (DOT/NHTSA 458).

11. Investigations of Violations of Marine Safety Laws (DOT/CG 587), maintained by the Office of Merchant Marine Safety, U.S. Coast Guard.

12. Civil Aviation Security System (DOT/FAA 813), maintained by the Civil Aviation Security Service, Federal Aviation Administration.

The purpose of these exemptions is to protect investigatory materials compiled for law enforcement purposes. Disclosure of such material would hamper law enforcement by prematurely disclosing the knowledge of illegal activity and the evidentiary basis for possible enforcement actions.

B. The following systems of records are exempt from subsections (c)(3) (Accounting of Certain Disclosures), and (d) (Access to Records) of 5 U.S.C. 552a:

1. Alaska Railroad Security and Freight Claims Investigatory Files maintained by the Alaska Railroad, Federal Railroad Administration (DOT/FRA 102).

2. Administrative Action and Legal Enforcement System, maintained by the Chief Counsel, Federal Aviation Administration (DOT/FAA 805).

3. Investigations Record System, maintained by the Investigations Division, Office of Investigations and Security, Office of the Secretary (DOT/OST 016).

The purpose of these exemptions is to prevent the compromise or impairment of law enforcement investigations by altering individuals that they are the subject of investigation, and to prevent the disclosure of the identity or sources of information promised confidentiality, in accordance with 5 U.S.C. 552a(k)(2).

C. The system of records known as the Alaska Railroad Examination of Operating Personnel, maintained by the Alaska Railroad, Federal Railroad Administration (DOT/FRA 100), is exempt from the provisions of subsection (d) of 5 U.S.C. 552a. The release of these records would compromise their value as impartial measurement standards for appointment and promotion within the Federal Service.

D. Those portions of the following systems of records consisting of investigatory material compiled for the purpose of determining suitability, eligibility, or qualifications for Federal civilian employment, military service, or access to classified information or used to determine potential for promotion in the armed services, are exempt from sections (c)(3) (Accounting of Certain Disclosures), (d) (Access to Records), (e)(4)(G), (H), and (I) (Agency Requirements), and (f) (Agency Rules) of 5 U.S.C. 552a to the extent that disclosure of such material would reveal the identity of a source who provided information to the government under an express or, prior to September 27, 1975, an implied promise of confidentiality (5 U.S.C. 552a(k) (5) and (7)):

1. Personnel Security Record Systems, maintained by the Investigations Division, Office of Investigations and Security, Office of the Secretary (DOT/OST 016).

2. Intelligence and Security Investigative Case System (DOT/CG 611), maintained by the Office of Operations, U.S. Coast Guard.

3. Officer Selection and Appointment System (DOT/CG 625), maintained by the Office of Personnel, U.S. Coast Guard.

4. Official Officer Service Records (DOT/CG 626), maintained by the Office of Personnel, U.S. Coast Guard.

5. Enlisted Recruiting Selection Record system maintained by the Office of Personnel, U.S. Coast Guard.

6. Officer, Enlisted, and Recruiting Selection Test Files (DOT/CG 628), maintained by the Office of Personnel, U.S. Coast Guard.

7. Enlisted Personnel Record System, (DOT/CG 629), maintained by the Office of Personnel, U.S. Coast Guard.

8. Coast Guard Personnel Security Program (DOT/CG 633), maintained by the Office of Personnel, U.S. Coast Guard.

9. Official Coast Guard Reserve Service Record System (DOT/CG 676), maintained by the Office of Reserve, U.S. Coast Guard.

10. Investigative Record System, maintained by the Federal Aviation Administration at FAA Regional and Center Air Transportation Security Divisions; the Investigations and Security Division, Aeronautical Center; and Office of Investigations and Security, Headquarters, Washington, D.C. (DOT/FAA 815).

11. Military Training and Education Records (DOT/CG 622), maintained by the Office of Personnel, U.S. Coast Guard.

12. Files pursuant to suitability for employment with National Highway Traffic Safety Administration (DOT/NHTSA-457) containing confidential investigatory reports.

The purpose of these exemptions is to prevent disclosure of the identities of sources who provide information to the government concerning the suitability, eligibility, or qualifications of individuals for Federal civilian employment, contracts, access to classified information, or appointment or promotion in the armed services, and who are expressly or, prior to September 27, 1975, implied promised confidentiality (5 U.S.C. 552a(k)(5) and (7)).

E. Those portions of the following systems of records consisting of testing or examination material used solely to determine individual qualifications for appointment or promotion in the Federal Service are exempt from subsections (c)(3) (Accounting of Certain Disclosures), (d) (Access to Records), (e)(4)(G), (H) and (I) (Agency Requirements), and (f) (Agency Rules) of 5 U.S.C. 552a:

1. Officer, Enlisted and Recruiting Selection Test Files (DOT/CG 628), maintained by the Office of Personnel, U.S. Coast Guard.

2. Official Coast Guard Reserve Service Record System (DOT/CG 676), maintained by the Office of Reserve, U.S. Coast Guard.

3. Military Training and Education Records (DOT/CG 622), maintained by the Office of Personnel, U.S. Coast Guard.

4. Suitability Files (DOT/NHTSA 457), maintained by the National Highway Traffic Safety Administration personnel offices to determine suitability for employment prior to hiring.

The purpose of these exemptions is to preserve the value of these records as impartial measurement standards for appointment and promotion within the Federal service.

F. Those portions of the following systems of records which consist of information properly classified in the interest of national defense or foreign policy in accordance with 5 U.S.C. 552(b)(1) are exempt from sections (c)(3) (Accounting of Certain Disclosures), (d) (Access to Records), (e)(4)(G), (H) and (I) (Agency Requirements), and (f) (Agency Rules) of 5 U.S.C. 552a:

1. Investigations Records System maintained by the Investigations Division, Office of Investigations and Security, Office of the Secretary (DOT/OST 016).

2. Personnel Security Records System, maintained by the Office of Investigations and Security, Office of the Secretary (DOT/OST 016).

3. Civil Aviation Security System (DOT/FAA 813), maintained by the Civil Aviation Security Service, Federal Aviation Administration.

The purpose of these exemptions is to prevent the disclosure of material authorized to be kept secret in the interest of national defense or foreign policy, in accordance with 5 U.S.C. 552(b)(1) and 552a(k)(1).

G. Those portions of the following systems of records which consist of information properly classified in the interest of national defense or foreign policy in accordance with 5 U.S.C. 552a(b)(1) are exempt from subsections (c)(3) (Accounting of Certain Disclosures) and (d) (Access to Records) of 5 U.S.C. 552a:

1. Investigative Records System (DOT/FAA 815), maintained by the Federal Aviation Administration at FAA Regional and Center Air Transportation Security Divisions; the Investigations and Security Division, Aeronautical Center; and Office of Investigations and Security, Headquarters, Washington, D.C.

The purpose of these exemptions is to prevent the disclosure of material authorized to be kept secret in the interest of national defense or foreign policy, in accordance with 5 U.S.C. 552(b)(1) and 552a(k)(1).

Appendix B

Office of the Secretary

1. *Introduction.* This Appendix, with respect to the Office of the Secretary:

a. Describes the places and times at which records are available for inspection and copying;

b. Indicates the systems of records maintained in the Office of the Secretary;

c. Identifies the officials having authority to deny requests for access to records;

d. Describes the procedures to be followed in requesting correction of a record; and

e. Describes identification requirements which may be in addition to those delineated in paragraph 10.35 of these regulations.

An individual requiring assistance, concerning this Appendix or systems maintained in the Office of the Secretary, may contact the Privacy Act Officer, or Privacy Act Coordinator, Office of the Assistant Secretary for Administration, M-20, 400 Seventh Street SW., Washington, D.C. 20590.

2. *Availability for Inspection and Copying.*

a. Records in systems maintained in the Office of the Secretary (OST) are available at 400 Seventh Street SW., Washington, D.C., except where otherwise noted:

(1) Records are maintained at 2100 Second Street SW., Washington, D.C., for the following systems:

(a) DOT/OST 011 Discrimination Complaint Investigative Files;

(b) DOT/OST 042 Technical Pipeline Safety Standards Committee.

(2) DOT/OST 013 Employee Management Files: Records for the employees at each location are located as delineated in the system notice.

(3) DOT/OST 015 Funds Management Records: Central records are maintained at 400 Seventh Street SW., Washington, D.C. Records for the application region are maintained in the office of each of the eleven Regional Emergency Transportation Coordinators, as delineated in the system notice.

(4) DOT/OST 022 National Defense Executive Reserve File: Complete records are maintained at 400 Seventh Street SW., Washington, D.C. Applicable records are maintained in a wide variety of field offices as delineated in the system notice.

(5) DOT/OST 028 Personnel Convenience Files: Employee records applicable to the

Appendix C

m. Superintendent, U.S. Coast Guard

I am the parent or guardian of the minor

V 4 3 / 2 3 3

Complaints Division of the Office of the Civil Rights of the Office of the Secretary are located at 2100 Second Street SW., Washington, D.C. All other records are located at 400 Seventh Strect SW., Washington, D.C.

(6) DOT/OST 043 Telephone Directory and Locator System: Records are stored on magnetic tape at 13 Massachusetts Avenue NW., Washington, D.C. However, access is controlled by the System Manager: Chief, Accounting Operations Center, Rom 2228, 400 Seventh Street SW., Washington, D.C.

(7) DOT/OST 048 Transportation Research Activities Information System: Records are stored on magnetic tape at the Transportation Systems Center, Cambridge, Massachusetts. Individuals desiring access to their own personal data should contact the System Manager: Chief, Resources Management Division, DPA-20, Department of Transportation, 400 Seventh Street SW., Washington, D.C.

(8) DOT/OST 049 Transportation Research Information System: Records are maintained on magnetic tape at the Battelle Laboratories, Columbus, Ohio. Individuals desiring access to their own personal data should contact the System Manager: Chief, Resources Management Division, DPA-20, Department of Transportation, 400 Seventh Street SW., Washington, D.C.

(9) DOT/OST 050 Executive Team Cadre Listings: Records are maintained at 400 Seventh Street SW., Washington, D.C., and at the offices of the Regional Emergency Transportation Coordinators, as delineated in the system notice.

(10) Records are maintained at the Transportation Systems Center, Kendall Square, Cambridge, Massachusetts, for the following systems:

(a) DOT/TSC 700 Automated Management Information Systems;

(b) DOT/TSC 701 Employee Travel Records;

(c) DOT/TSC 702 Legal Counsel Information Files;

(d) DOT/TSC 703 Occupational Safety and Health Reporting Systems;

(e) DOT/TSC 704 Stand-by Personnel Information;

(f) DOT/TSC 706 Automated Planning System;

(g) DOT/TSC 707 Automated Manpower Distribution System;

(h) DOT/TSC 708 Combined Federal Campaign Information;

(i) DOT/TSC 709 Minority Information Files;

(j) DOT/TSC 711 Blood Donor Information Files;

(k) DOT/TSC 712 Automated Payroll / Personnel / Communications / Security System;

(l) DOT/TSC 713 Employee Payroll-Manpower Distribution System;

(m) DOT/TSC 714 Health Unit Employee Medical Records;

(n) DOT/TSC 715 Bi-Weekly Personnel Status Report.

b. Records are available for inspection and copying at the applicable locations delineated above between the hours of 9 A.M. and 5:30 P.M., except Saturdays, Sundays, and holidays. Access to certain records may be restricted in accordance with exemptions applied and noticed in accordance with sections 3(j) and (k) of the Privacy Act of 1974. Individuals desiring access to their own records should follow the instructions contained in the system notice published for each system of records. Request for access shall be submitted to the System Manager having responsibility for the system in which the records are maintained, unless the system notice describing the system prescribes or permits submission to some other official or officiais.

3. *Systems of Records.* A compiiation of notices describing the systems of records maintained in the Department of Transportation is published annually in the FEDERAL REGISTER. The notices describing the systems maintained in the Office of the Secretary are published in a block within the overall compilation and each is identified by a three-digit number preceded by the acronym, OST; e.g., OST 013 (except those maintained at the Transportation Systems Center which uses the acronym, TSC; e.g., TSC 701). The basic compilation of system notices, for systems subject to the Privacy Act of 1974, which are maintained in the Office of the Secretary, is published in the FEDERAL REGISTER annually.

4. *Access to Records.* Requests for access to records are processed in accordance with the rules provided in Subpart D of these regulations.

a. A request from an individual for access to a record pertaining to such individual is granted promptly unless:

(1) The record was compiled in reasonable anticipation of a civil action or proceeding; or

(2) The system of records is one which has been exempted from the notification and access provisions of the Privacy Act by rulemaking; or

(3) The record is not part of a system of records required to be noticed in accordance with the provisions of the Privacy Act and is not otherwise required to be made available by a law or regulation; or

(4) The System Manager or other cognizant official determines that the particular circumstances justify denial or access; or

(5) The information requested is contained in and is inseparable from another individual's record.

b. When information sought from a system of records in the Office of the Secretary includes information that has been furnished by an operating element of the Department or by another agency, as the case may be, the Systems Manager or other cogizant official consults the operating element or the other agency, as the case may be, before granting access. If referral of the request to the operating element or the other agency, as the case may be, will provide a more expeditious decision with resulting probable access, the request may be referred to the operating element or the other agency, as the case may be, but the requester is notified of the referral.

c. When a Systems Manager or other cognizant official in the Office of the Secretary determines that a request for access should be denied, the request and the reason(s) for the determination are referred to the Assistant Secretary for Administration for decision. In the event of a decision to deny access, the Office of the Assistant Secretary for Administration notifies the requester in writing in accordance with section 10.51 of these regulations.

5. *Requests to Correct or Alter Records.* An individual may request that a record pertaining to such individual be amended to correct any portion thereof which such individual believes is not accurate, relevant, timely, or complete.

a. A request to amend a record must:

(1) Be in writing and signed by the individual to whom the record pertains;

(2) Be clearly marked "Request for Amendment of Record";

(3) Contain a statement that the request is being made under the provisions of the Privacy Act of 1974;

(4) Contain the name and address of the individual making the request;

(5) Specify the name and location of the systems of records, as set forth in the system notice, in which the record is maintained;

(6) Specify the title and business address of the official designated in the "Contesting Record Procedures" paragraph of the applicable system notice;

(7) Specify the particular record in the system which the individual is seeking to amend;

(8) Clearly state the specific changes which the individual wishes to make in the record and a concise explanation of the reason for the changes. If the individual wishes to correct or add any information, the request shall contain specific language making the desired correction or addition; and

(9) Be addressed to or delivered in person to the office of the official designated in the "Contesting Records Procedures" paragraph of the applicable system notice. A request delivered to an office in person must be delivered during the regular office hours of that office.

6. *Personal Identification Requirements.* Generally, the identification rules in paragraph 10.35 of these regulations apply to systems maintained in the Office of the Secretary. In addition, specific requirements for some systems are delineated below:

a. The notarized signature of the requester is required for requests by mail for notification and access to records in the following systems:

(1) OST 001 Generai Employee Records System;

(2) OST 030 Personal Management Convenience Files.

(NOTE.—An individual's social security number is an optional means of identification, which may be supplied in lieu of notarization. Social security numbers are used on these records as authorized under the provisions of Executive Order 9397, dated November 22, 1943.)

b. The notarized signature of the requester is required for requests by mail for notification and access to records in the following systems:

(1) OST 006 Confidential Statement of Employment and Financial Interests; and

(2) OST 037 Records of Confirmation Proceeding Requirements.

c. The number of the Federal Emergency Assignee Identification Card (SF 138) issued to the requester is required for requests by mail for notification and access to records in the following systems:

(1) OST 022 National Defense Executive Reserve File;

(2) OST 036 Planning Officials for Emergency Functions and;

(3) OST 050 Executive Team Cadre Listings.

d. The name of the applicable advisory committee is required for notification and access to records in the following system: OST 008 Departmental Advisory Committee Files.

APPENDIX C

UNITED STATES COAST GUARD

1. *Introduction.* This Appendix supplements the procedures set forth for the Department of Transportation in Subparts A through I of 49 CFR Part 10.

2. *Availability for Inspection and Copying.*

a. Individuals who wish the Coast Guard to examine a system of records covered by this part to determine whether any records in the system contain information about them or who wish to gain access to or receive copies of records which contain information about them, should address written requests either to the appropriate system manager as listed in the annual description of Coast Guard record systems appearing in the FEDERAL REGISTER or to: Commandant (G-CMA), U.S. Coast Guard Headquarters, 400 Seventh Street SW., Washington, D.C. 20590. Requests may also be delivered in person to the above address between 7:30 a.m. and 4 p.m. (Monday through Friday, excluding holidays).

b. The Coast Guard acknowledges requests for notification of the existence of a record within ten working days (excluding Saturdays, Sundays and holidays) after receipt of a completed request. The Coast Guard makes every effort within 30 days of the receipt of a request for access to a record to:

(1) Make the record available;

(2) Notify the requester of the need for additional information; or

(3) Notify the requester of any denial, either in whole or in part, of access to a record. Para. 3 of this Appendix sets forth the addresses of Coast district offices and headquarters units where records in decentralized systems may be located.

3. *Systems of Records.* The annual notice of systems of records required by 5 U.S.C. 552a(e)(4) with respect to records maintained by the Coast Guard is set forth in the FEDERAL REGISTER. Assistance may be requested in exercising his or her rights by an individual addressing the Privacy Act Coordinator at one of the following U.S. Coast Guard offices nearest his residence:

a. Commander, 1st Coast Guard District, 150 Causeway Street, Boston, MA 02114.

b. Commander, 2nd Coast Guard District, Federal Building, 1520 Market Street, St. Louis, MO 63013.

c. Commander, 3rd Coast Guard District, Governors Island, New York, NY 10004.

d. Commander, 5th Coast Guard District, Federal Building, 431 Crawford Street, Portsmouth, VA 23705.

e. Commander, 7th Coast Guard District, Federal Building, 51 S.W. 1st Avenue, Miami, FL 33130.

f. Commander, 8th Coast Guard District, Customhouse, New Orleans, LA 70130.

g. Commander, 9th Coast Guard District, 1240 East 9th Street, Cleveland, OH 44199.

h. Commander, 11th Coast Guard District, Heartwell Building, 19 Pine Avenue, Long Beach, CA 90802.

i. Commander, 12th Coast Guard District, 630 Sansome Street, San Francisco, CA 94126.

j. Commander, 13th Coast Guard District, Federal Building, 915 Second Avenue, Seattle, WA 98174.

k. Commander, 14th Coast Guard District, P.O. Box 48, FPO San Francisco 96610.

l. Commander, 17th Coast Guard District, FPO Seattle 98771.

m. Superintendent, U.S. Coast Guard Academy, New London, CT 06320.

n. Commanding Officer, U.S. Coast Guard Yard, Curtis Bay, Baltimore, MD 21225.

o. Commanding Officer, U.S. Coast Guard Training Center, Governors Island, New York, NY 10004.

p. Commanding Officer, U.S. Coast Guard Training Center, Cape May, NJ 08204.

q. Commanding Officer, U.S. Coast Guard Training Center, Government Island, Alameda, CA 94501.

r. Commanding Officer, U.S. Coast Guard Supply Center, 830 3rd Avenue, Brookiyn, NY 11232.

s. Commanding Officer, U.S. Coast Guard Institute, P.O. Substation 18, Oklahoma City, OK 73169.

t. Commanding Officer, U.S. Coast Guard Aircraft Repair & Supply Center, Elizabeth City, NC 27909.

u. Commanding Officer, U.S. Coast Guard Aviation Training Center, Mobile, AL 36608.

v. Commanding Officer, U.S. Coast Guard Radio Station (NMH), 7223 Telegraph Road, Alexandria, VA 22310.

w. Commanding Officer, U.S. Coast Guard Reserve Training Center, Yorktown, VA 23490.

x. Officer in Charge, Record Depot, U.S. Coast Guard Air Station, Elizabeth City, NC 27909.

y. Commander, Coast Guard Activities, Europe, London, Box 50, FPO New York 09510.

z. Commanding Officer, U.S. Coast Guard Training Center, Petaluma, CA 94952.

aa. Commander, U.S. Coast Guard Air Base, Elizabeth City, NC 27909.

bb. Commanding Officer, U.S. Coast Guard Electronics, Engineering Center, Wildwood, NJ 08260.

cc. Commanding Officer, Research & Development Center, Avery Point, Groton, CT 063410.

dd. Commanding Officer, U.S. Coast Guard Oceanographic Unit, Building 159E, Navy Yard Annex, Washington, D.C. 20590.

4. *Access to Records.*

a. The Coast Guard honors only those requests for notification, access, or amendment made by:

(1) the individual to whom the record pertains;

(2) the parent or guardian of a minor to whom the record pertains;

(3) the legal guardian of a person to whom the record pertains when that person has been declared incompetent by reason of physical or mental disability by a court having jurisdiction of the matter; or

If made by a person other than the individual to whom the record pertains, the request must specify the relationship of the requester to that individual.

b. Written requests for information or amendment must be signed by the requester. Requests for access to records containing sensitive or detailed personnel information (including, but not limited to, earnings and tax statements, employee payroll records, employee grievance and appeal files, civilian, officer, and enlisted personnel files, and health and medical records (subject to the conditions of 49 CFR 10.33(b)) may be required to contain the following notarized certification:

I, ————, do hereby certify that I am the individual to whom the record in question pertains.

(or)

I am the parent or guardian of the minor to whom the record in question pertains.

(or)

I am the legal guardian of the individual determined by a court to be incompetent to whom the record in question pertains.

————————————

Notarization ————————————

(Signature) ————————————

(Date) ————————————

5. *Requests to Correct or Alter Records.* The official responsible for administering a system of records, in consulation as appropriate with the System Manager, Privacy Act Coordinator, and Privacy Act officer, initially determines whether to grant requests under 49 CFR 10.41 to amend records. Requests must be made as provided in paragraph 2a. of this Appendix. Requests for amendment must contain a complete description of the item sought to be changed and documentation to substantiate the grounds for the requested change. The Coast Guard acknowledges the receipt of completed requests for amendment within ten working days. As promiptly as possible the Coast Guard advises the requester whether or not the change has been made, and in cases where a change has been made, transmits a copy of the amended record to the requester.

a. When a request for access to a record or amendment of a record is denied, in whole or in part, the manager of the system of records involved notifies the requester in writing, of the reasons for the denial and furnishes the requester a statement of the name and position or title of each person responsible for the denial. The requester also is advised of the right to file a written appeal of the adverse decision within 180 days of receipt of the initial denial. Appeals must be addressed to: Commandant (G-CMA), U.S. Coast Guard Headquarters, 400 Seventh Street SW., Washington, D.C. 20590.

b. Within 30 working days of the receipt of a written appeal, the Commandant or his designee makes an independent review of the record and decides whether or not to make the requested disclosure or amendment. If the appeal is granted, the Coast Guard promptly notifies the requester of the decision in writing and transmits to the requester a copy of the record or amended record. If the appeal is denied, the Coast Guard promptly notifies the requester, in writing, of the reasons for the denial and furnishes the requester a statement of the name and position or title of each person responsible for the denial. The Coast Guard also informs the requester of the right to seek judicial review of the adverse decision pursuant to 5 U.S.C. 552a(g)(1).

c. In addition to appealing an adverse determination of a request to amend a record, the requester may file a concise "statement of disagreement" setting forth the reasons for disagreeing with the refusal of the Coast Guard to amend the record. The notification by the Coast Guard of the denial of an initial request for amendment or the denial of an administrative appeal for an amendment informs the requester of the right to file a statement of disagreement.

d. The Commandant of the Coast Guard, by Commandant Instruction 5212.11 (26 September 1975), has redelegated to the Chief of Staff the authority under 49 CFR Part 10 to:

D E 4 7 8 UMI

V 43/233 DEC 78 UMI

(1) exempt systems of records from certain provisions of the Privacy Act;

(2) make final administrative determinations not to disclose or amend a record; and

(3) issue extensions of review time.

This authority may not be redelegated further.

6. *Personal Identification Requirements.*

a. When an individual requests notification, access, or amendment in person, he or she must show identification such as a driver's license, military or employment identification card, credit card, or medicare card. An individual requesting in person information about or amendment to a "sensitive" record may be required to complete the notarized certification set forth in paragraph 4.b of this Appendix.

b. The Coast Guard may require more specific information in order to establish the identity of a requester. For example, the Coast Guard may require that a legal guardian or personal representative produce certified copies of court documents appointing him to his position. The Coast Guard may independently verify the identify of a requester by telephone contact with the requester, personal identification by Coast Guard employees who may know the requester, or any other lawful means considered appropriate under the circumstances.

c. An individual may be accompanied by a person of the individual's choosing while reviewing records to which he or she has been granted access: *Provided*, That the individual signs a statement authorizing the accompanying person to do so. An individual granted access to a record may be required to sign and notarize a statement authorizing the Coast Guard to release the record to a person (e.g., his attorney) designated by the individual.

d. No request for information or amendment is considered complete until all necessary identification material has been provided. No copies of records are provided to individuals until they pay appropriate fees as set forth in 49 CFR Subpart H.

APPENDIX D

FEDERAL AVIATION ADMINISTRATION

1. *Introduction.* This Appendix:

a. Describes the procedures for determining if an individual is the subject of a record maintained by the Federal Aviation Administration;

b. Describes the availability of records and prescribes requirements for identifying an individual who requests a record pertaining to him or her;

c. Prescribes procedures for granting access to an individual upon that individual upon that individual's request for the record pertaining to him or her;

d. Prescribes procedures for reviewing a request from an individual concerning the amendment of any record pertaining to him or her;

e. Prescribes procedures for making a determination on the request of an individual for amendment of any record pertaining to him or her; and

f. Prescribes procedures for an appeal within the FAA of a determination not to grant access to or amendment of records.

2. *Availability for Inspection and Copying.* Records may be inspected at the FAA facility identified for the particular system of records appearing in the systems notices published in the FEDERAL REGISTER. These facilities are open to the public during regular business hours, except Saturday, Sundays, and Federal holidays.

3. *Systems of Records.*

a. A list of FAA systems of records pertaining to bhe Privacy Act indicating the geographic locations and the responsible systems managers has been published in the FEDERAL REGISTER and appears as follows:

(1) August 27, 1975 on pages 38829-38839;

(2) November 19, 1975 on pages 53967-53978; and

(3) March 1, 1976 on pages 8820-8821.

b. Any individual who is unable to determine in which FAA-maintained system the records pertaining to him or her may be found may submit a written request for assistance to the attention of the Privacy Act Coordinator located at the region or center nearest to his residence. The addresses for the regional and center facilities of the FAA are listed below:

(1) FAA Headquarters, 800 Independence Avenue SW., Washington, D.C. 20591;

(2) Alaskan Region, 632 Sixth Avenue, Anchorage, AK 99501;

(3) Central Region, 601 East 12th Street, Kansas City, MO 64106;

(4) Southern Region, 3400 Whipple Street, East Point, GA (Mailing address: P.O. Box 20636, Atlanta, GA 30320);

(5) Southwest Region, 4400 Blue Mound Road (Mailing address: P.O. Box 1689, Fort Worth, TX 76101);

(6) Western Region, 5651 West Manchester Avenue (Mailing address: P.O. Box 92007, Los Angeles, CA 90009);

(7) Eastern Region, Federal Building, JFK International Airport, Jamaica, NY 11430;

(8) Pacific Region, 1833 Kalakaua Avenue (Mailing address: P.O. Box 4009, Honolulu, HI 96813);

(9) Aeronautical Center, 6400 South MacArthur Boulevard (Mailing address: P.O. Box 25082, Oklahoma City, OK 73125);

(10) National Aviation Facilities Experimental Center, Tilton Road, Route 563 (near Pomona, NJ), (Mailing address: Atlantic City, NJ 08405);

(11) New England Region, 12 New England Executive Park, Burlington, MA 01803;

(12) Great Lakes Region, 2300 East Devon, Des Plaines, IL 60018;

(13) Rocky Mountain Region, 10455 East 25th Avenue, Aurora, Colorado 80010; and

(14) Northwest Region, FAA Building, 9010 East Marginal Way South, King County International Airport (Boeing Field), Seattle, WA 98108.

4. *Access to Records.*

a. Any individual desiring to inspect a record or obtain a copy thereof to determine if it contains information pertaining to him or her must present a written request in accordance with the provisions of this section. An individual making a request under this section may either appear in person or submit a request by mail to the address and attention of the system manager as it appears in the list of systems of records published in the FEDERAL REGISTER. The individual must first determine in which system of records he or she believes the particular records pertaining to him or her are maintained by examining the categories of records and routine uses in the list of the systems of records published in the FEDERAL REGISTER and available at the addresses set forth in paragraph 3.b of this Appendix.

b. The individual must include in the request the information necessary to identify the specific system fo records as it appears in the list of the systems of records of the FAA published in the FEDERAL REGISTER.

c. Upon request by any individual to gain access to an FAA record that contains information pertaining to him or her, the FAA official responsible for the record informs the individual whether the requested record is exempt under subpart G of this part.

d. An individual making a request under this section is permitted to inspect and have a copy made of any record pertaining to him or her in a form comprehensible to him or her, if—

(1) He or she has given identification in accordance with section 6 of this Appendix;

(2) The record is not exempt under subpart G of this part; and

(3) The record was not compiled in reasonable anticipation of a civil action or proceeding.

e. Notwithstanding paragraph d of this section, if an individual requesting a record pertaining to him or her is accompanied by a person of his or her own choosing to review the record, the individual making the request must submit a signed statement authorizing the discussion of the record in the presence of the accompanying person.

f. Each request for a record determined to be releasable under paragraph d of this section is complied with within ten days, excluding Saturdays, Sundays, and Federal holidays. If additional time is necessary to make the requested record comprehensible to the individual requesting it, the FAA official responsible for the record notifies the individual within ten days of the request of the estimated time required to fill the request.

g. Any individual whose request for access to a record pertaining to him or her is denied may file a written appeal to the Administrator, Federal Aviation Administration, 800 Independence Avenue SW., Washington, D.C. 20591. Appeals submitted under this section must comply with the requirements of § 10.51 of this part.

5. *Requests to Correct or Alter Records.*

a. Any individual may request an amendment of any record pertaining to him or her maintained by the FAA in a system of records, by submitting the request in writing to the attention of the FAA official responsible for the record at the address appearing in the list of systems of records published in the FEDERAL REGISTER.

b. Each request for an amendment of a record must be accompanied by a written explanation as to why the individual believes the present record is not accurate, timely, relevant, or complete. The individual making the request may submit any documentation he or she wishes in support of his request.

c. Upon receipt of a request for an amendment of a record, the FAA official responsible for the record reviews the record and supporting documentation and determines if there is a sufficient basis upon which to make a decision to make the requested amendment.

d. If the FAA official responsible for the record determines under paragraph c of this section that additional information is necessary before a decision can be made as to whether to make the requested amendment, the official notifies the individual making the request to amend specifying what additional information is necessary.

e. If the FAA official responsible for the record determines that the requested amendment should be made, the official

amends the record, notifies the individual making the request, and sends to that individual a copy of the corrected record, as well as to other persons or agencies to whom the record may have been disclosed (See 49 CFR 10.23(d)).

f. If the FAA official responsible for the record determines that the requested amendment should be denied, the official forwards to his supervisor the request for amendment with all supporting documentation and reasons for the denial.

g. If the supervisor determines that the requested amendment should be made, the supervisor follows the procedures in paragraph e of this section.

h. If the supervisor determines that the requested amendment should be denied, the supervisor notifies the individual making the request of the denial, the reasons therefor, and informs the individual of the FAA procedures for appealing the denial.

i. Any individual whose request for correction or alteration of a record pertaining to him or her is denied may file a written appeal to the Administrator, Federal Aviation Administration, 800 Independence Avenue SW., Washington, D.C. 20591. Appeals submitted under this section must comply with the requirements of § 10.51 of this part.

6. *Personal Identification Requirements.*

a. Each individual making a request under this Appendix for a record pertaining to him or her must present appropriate identification before the requested record is released. Types of appropriate identification include—

(1) For requests made in person, a driver's license or employee identification card; and

(2) For requests made by mail, name (printed or typed, and signature) and date of birth, or the unique identifier used in the system of records.

b. If an individual cannot provide appropriate identification as required in paragraph 6.a of this Appendix, or if the record requested is particularly sensitive, the FAA official responsible for the record may require the individual to sign a statement certifying his or her identity and understanding that knowingly and willfully to request or obtain any record concerning an individual from the FAA under false pretenses is a misdemeanor punishable by a fine of up to $5,000 as provided in 5 U.S.C. 552a(i) (3).

APPENDIX E

FEDERAL HIGHWAY ADMINISTRATION

1. *Introduction.* This Appendix, with respect to the Federal Highway Administration (FHWA);

a. Describes the places and times at which records are available for inspection and copying;

b. Indicates the systems of records maintained in the FHWA;

c. Identifies the officials having authority to deny requests for access to records;

d. Describes the procedures to be followed in requesting correction of a record; and

e. Describes identification requirements which may be in addition to those delineated in paragraph 10.35 of these regulations.

2. *Availability for Inspection and Copy.* Places and times at which records are available for inspection and copying, and the system of records and systems managers having authority at each place.

a. *Headquarters:* The Federal Highway Administration, 400 7th Street SW., Washington, D.C. 20590. Time: 7:45 a.m.-4:15 p.m.

Systems of Records and Responsible Systems Managers:

1. Accounts Receivable DOT/FHWA—Chief General Ledger and Funds Control Section.

2. Applications for U.S. Government Motor Vehicle Operator's Identification Card (U.S. Government Drivers License) DOT/FHWA—Occupational Safety Engineer.

3. Driver Waiver File (BMCS) DOT/FHWA—Chief, Driver Requirements Branch.

4. Employee Utilization Monthly Report DOT/FHWA—Chief, Data Systems Division.

5. Investigation Case File DOT/FHWA—Chief, Investigations and Special Inquiry Division.

6. Medal of Honor File DOT/FHWA—Chief, Compliance Division.

7. Memorandum of Monthly Performance of Key Punch Operators DOT/FHWA—Chief, TCC Operation (Groups A and B).

8. Motor Carrier Accident File (BMCS) Property and Passenger—Chief, Accident Analysis Branch.

9. Occupational Safety and Health Accident Reporting System DOT/FHWA—Occupational Safety Engineer.

10. Payroll Administration DOT/FHWA—Chief, Payroll and Employee Records Section.

11. Personnel Records (CSC Governmentwide) DOT/FHWA—Chief, Personnel Programs Division.

12. Travel Advance File DOT/FHWA—Chief, Voucher Review and Disbursement Section.

13. Travel Order (Change of Duty station) DOT/FHWA—Chief, Voucher Review and Disbursement Section.

14. University and Industry Programs Coding and Filing Systems DOT/FHWA—Administrative Assistant—National Highway Institute.

b. *Regional Offices:* Region 1—Federal Highway Administration, Leo W. O'Brien Federal Building, Albany, New York 12207. Time: 8:00 a.m.-4:30 p.m.

Systems of Records and Responsible Systems Managers:

1. Applications for U.S. Government Motor Vehicle Operator's Identification Card (U.S. Government Drivers License)—DOT/FHWA—Executive Officer.

2. Motor Carrier Safety Proposed Civil and Criminal Enforcement Cases DOT/FHWA—Regional Counsel.

3. Travel Advance File—DOT/FHWA Executive Officer, Region 3—Federal Highway Administration, George H. Fallon Federal Office Building, 31 Hopkins Plaza, Baltimore, Maryland 21201. Time: 8:00 a.m.-4:30 p.m.

Systems of Records and Responsible Systems Managers:

1. Applications for U.S. Government Motor Vehicle Operator's Identification Card (U.S. Government Drivers License) DOT/FHWA—Executive Officer.

2. Motor Carrier Safety Proposed Civil and Criminal Enforcement Cases—DOT/FHWA—Regional Counsel.

3. Travel Advance File—DOT/FHWA—Executive Officer, Region 4—Federal Highway Administration, 1720 Peachtree Road, NW., Atlanta, Georgia 30309. Time: 7:45 a.m.-4:15 p.m.

Systems of Records and Responsible Systems Managers:

1. Applications for U.S. Government Motor Vehicle Operator's Identification Card U.S. Government Drivers License) DOT/FHWA—Executive Officer.

2. Motor Carrier Safety Proposed Civil and Criminal Enforcement Cases—DOT/FHWA—Regional Counsel.

3. Travel Advance File—DOT/FHWA Executive Officer, Region 5—Federal Highway Administration, 18209 Dixie Highway, Homewood, Illinois 60430. Time: 7:30 a.m.-4:00 p.m.

Systems of Records and Responsible Systems Managers:

1. Applications for U.S. Government Motor Vehicle Operator's Identification Card (U.S. Government Drivers License) DOT/FHWA—Executive Officer.

2. Motor Carrier Safety Proposed Civil and Criminal Enforcement Cases—DOT/FHWA—Regional Counsel.

3. Travel Advance File—DOT/FHWA—Executive Officer. Region 6—Federal Highway Administration, 819 Taylor Street, Fort Worth, Texas 76102. Time: 8:00 a.m.-4:30 p.m.

Systems of Records and Responsible Systems Managers:

1. Applications for U.S. Government Motor Vehicle Operator's Identification Card (U.S. Government Drivers License) DOT/FHWA—Executive Officer.

2. Motor Carrier Safety Proposed Civil and Criminal Enforcement Cases—DOT/FHWA—Regional Counsel.

3. Travel Advance File—DOT/FHWA—Executive Officer, Region 7—Federal Highway Administration, 6301 Rockhill Road, Kansas City, Missouri 64131. Time: 7:45 a.m.-4:15 p.m.

Systems of Records and Responsible Systems Managers:

1. Applications for U.S. Government Motor Vehicle Operator's Identification Card (U.S. Government Drivers License) DOT/FHWA—Executive Officer.

2. Motor Carrier Safety Proposed Civil and Criminal Enforcement Cases—DOT/FHWA—Regional Counsel.

3. Travel Advance File—DOT/FHWA—Executive Officer, Region 8—Federal Highway Administration, P.O. Box 25246, Denver Federal Building Center, Denver, Colorado 80225. Time: 7:45 a.m.-4:15 p.m.

Systems of Records and Responsible Systems Managers:

1. Applications for U.S. Government Motor Vehicle Operator's Identification Card (U.S. Government Drivers License) DOT/FHWA—Executive Officer.

2. Motor Carrier Safety Proposed Civil and Criminal Enforcement Cases—DOT/FHWA—Regional Counsel.

3. Payroll Administration DOT/FHWA—Appropriate Finance Officer.

4. Travel Advance File—DOT/FHWA—Executive Officer. Region 9—Federal Highway Administration, 2 Embarcadero Center, P.O. Box 7616, San Francisco, California 94120. Time: 7:45 a.m.-4:15 p.m.

Systems of Records and Responsible Systems Managers:

1. Applications for U.S. Government Motor Vehicle Operator's Identification Card (U.S. Government Drivers License)—DOT/FHWA—Executive Officer.

2. Motor Carrier Safety Proposed Civil and Criminal Enforcement Cases—DOT/FHWA—Regional Counsel.

V 4 3 / 2 3 3 D E 4 7 8 UMI

3. Travel Advance File DOT/FHWA—Executive Officer. Region 10—Federal Highway Administration, 222 SW. Morrison Street, Portland, Oregon 97204. Time: 8:00 a.m.-4:45 p.m.

Systems of Records and Responsible Systems Managers:

1. Applications for U.S. Government Motor Vehicle Operator's Identification Card (U.S. Government Drivers License)—DOT/FHWA—Executive Officer.

2. Driver Accident Cross-Reference File (BMCS) DOT/FHWA—Regional Director.

3. Motor Carrier Safety Proposed Civil and Criminal Enforcement Cases—DOT/FHWA—Regional Counsel.

4. Payroll Administration DOT/FHWA—Appropriate Finance Officer.

5. Travel Advance File—DOT/FHWA—Executive Officer. Region 15—Federal Highway Administration, 1000 North Glebe Road, Arlington, Virginia 22201. Time: 7:45 a.m.-4:15 p.m.

Systems of Records and Responsible Systems Manager: Applications for U.S. Government Motor Vehicle Operator's Identification Card (U.S. Government Drivers License) DOT/FHWA—Executive Officer.

c. Division Officers (For location and hours of duty see 49 CFR Part 7).

Systems of Records and Responsible Systems Managers: Applications for U.S. Government Motor Vehicle Operator's Identification Card (U.S. Government Drivers License) DOT/FHWA—Administrative Managers.

3. *Access to Records:*

a. Each individual desiring to determine whether a record pertaining to him or her is contained in a system of records, or desiring access to such record, or to obtain a copy of such record, shall make request to the appropriate System Manager. In appropriate circumstances, oral requests are acted upon. Each request must specify the name of the requesting individual and the system of records in which the subject record is located or thought to be located.

4. *Requests to Correct or Alter Records:*

a. The FHWA allows individuals to request amendment of their personal records to the extent that such amendment does not violate existing statutes, regulations, or administrative procedures. Requests to amend personnel records of active employees should be addressed to the responsible system managers specified in paragraph 2 above.

b. The System Managers provide written acknowledgment of the receipt of a request to amend a record to the individual within 10 days. However, if the request can be reviewed, processed and the individual notified of compliance or denial within the 10-day working period, no acknowledgment is required.

c. If the System Manager agrees with an individual's request to amend the person's record, the following steps are taken:

1. Correct the record accordingly.

2. Advise the individual in writing, and

3. If an accounting of disclosure has been made, advise all previous recipients of the record of the fact that the correction was made and the substance of the correction.

d. If the System Manager disagrees with all or any portion of the request to amend a record, he or she:

1. Proceeds as described above with respect to those portions of the record which will be amended.

2. Advises the individual of the refusal and the reason for not amending a record, indicating the name and title or position of each person responsible for the denial, and

3. Informs the individual of the right to appeal the decision not to amend a record to: Associate Administrator for Administration, Federal Highway Administration, Washington, D.C. 20590.

e. If after this review the FHWA refuses to amend the record on the individual requested, the FHWA advises the individual:

1. Of the refusal and the reason for it,

2. Of the individual's right to file a concise statement of the reasons for disagreeing with the decision of the FHWA,

3. The procedures for filing the statement of disagreement,

4. That the statement which is filed will be made available to anyone to whom the record is subsequently disclosed, and

5. Of the individual's right to seek judicial review of the FHWA's refusal to amend a record.

f. The final FHWA determination on the individual's request is concluded within 30 days of the receipt of the appeal unless for good cause shown, the Associate Administrator for Administration extends such period. Such final administrative decision addresses all information and arguments relied upon by the individual.

g. Each application for review by FHWA must indicate that it is an appeal from a denial of a request made under the Privacy Act. The envelope in which the application is sent should be marked prominently with the words "Privacy Act".

If these requirements are not met, the time limits described in § 10.43 do not begin until the application has been identified by an employee of the FHWA as an application under the Privacy Act and has been received by the appropriate office.

h. The Associate Administrator for Administration may require the person making a request to furnish additional information, or proof of factual allegations, and may order other appropriate proceedings. His or her decision as to the availability of a record or whether to amend a record is administratively final subject to the concurrence of the DOT General Counsel or his or her delegate. However, requests for review of denials of information contained in Government-wide systems of personnel records, which includes the FHWA Personnel Records System, are handled by the Civil Service Commission in accordance with 5 CFR 294.108 and 5 CFR 297.108.

i. If the Associate Administrator for Administration also refuses to grant access or to correct the individual's record, he or she advises the individual of:

1. The reason(s) for the refusal and the names, and titles or positions of each person responsible for the denial;

2. The individual's right to file a statement of disagreement; that the statement will be made available to anyone to whom the record is subsequently disclosed, and to prior recipients of the record (see Section 10.23(d)), and

3. The right to bring suit in the District Court of the United States in the district in which the individual resides, the district in which his principal place of business is located, the district in which the record(s) is located, or the District of Columbia.

5. *Personal Identification Requirements:*

a. When a record is applied for in person, the person so applying must, unless personally known to the custodian of the records, furnish adequate identification. Such identification may consist of an employee identification card, Medicare Card, driver's license, or a similar document.

b. When a record is applied for by mail, sufficient information to identify the individual must be furnished, and a notarized statement as to the identity of the requester may be required in some instances when the record involved contains particularly sensitive information in the judgment of the systems manager.

Appendix F

FEDERAL RAILROAD ADMINISTRATION

1. *Introduction.* This Appendix, with respect to the Federal Railroad Administration (FRA):

a. Describes the places and times at which records are available for inspection and copying;

b. Indicates the systems of records maintained in the Federal Railroad Administration;

c. Indentifies the officials having authority to deny requests for access to records;

d. Describes the procedures to be followed in requesting correction of a record; and

e. Describes identification requirements which may be in addition to those delineated in paragraph 10.35 of these regulations.

2. *Availability for Inspection and Copying.* Places and times at which records are available for inspection and copying and the systems of records and systems managers having authority to deny requests for disclosure at each facility.

a. Records in systems maintained in the Federal Railroad Administration are available at the Alaska Railroad, Anchorage, Alaska 99510, 9:00 a.m.-4:00 p.m.

Systems of Records and Responsible Systems Managers:

1. Alaska Railroad Examination of Operating Personnel; DOT/FRA Operations Officer (System Manager).

2. Alaska Railroad Personnel and Pay Management Information System; DOT/FRA—General Manager (System Manager).

3. Alaska Railroad Security and Freight Claims Investigatory Files; DOT/FRA—Chief, Security and Claims Office (Systems Manager).

b. *Places:* The Alaska Railroad, Anchorage, Alaska 99510. Hours: 9:00 a.m.-4:00 p.m.

Systems of Records and Responsible Systems Managers:

1. Application for (Vehicle) Operator's Identification Card; DOT/FRA—Director, Office of Administrative Operations (System Manager).

2. Confidential Statement of Employment and Financial Interest; DOT/FRA—Chief Counsel, Office of the Chief Counsel (System Manager).

3. Employee Travel Records; DOT/FRA—Accounting Officer, Accounting Division (System Manager).

4. Occupational Safety and Health Reporting System; DOT/FRA—FRA Safety Manager, Office of Administrative Operations (System Manager).

5. Office of Safety Past Employees Files; DOT/FRA—Deputy Associate Administrator for Safety (System Manager).

6. Personnel and Pay Management Information Systems; DOT/FRA—Director, Office of Personnel and Training (System Manager).

7. Travel Advance Records; DOT/FRA—Director, Office of Administrative Operations (System Manager).

8. Work Measurement System; DOT/FRA—Director, Office of Management Systems.

c. *Places: Regional Offices as follows:*

Region 2, Federal Railroad Administration, Philadelphia, Pa. 19106.

Region 3, Federal Railroad Administration, College Park, Ga. 30337.

Region 4, Federal Railroad Administration, Chicago, Illinois 60605.

Region 5, Federal Railroad Administration, Ft. Worth, Texas 76102.

Region 6, Federal railroad Administration, Portland, Oregon 97204.

Region 7, Federal Railroad Administration, San Francisco, California 94102.

Region 8, Federal Railroad Administration, Kansas City, Missouri 64106

Hours: 9:00 a.m.-4:00 p.m.

Systems of Records and Responsible Systems Managers at each Region:

Regional Personnel Convenience Files; DOT/FRA—Regional Directors (Systems Manager).

d. *Place: Transportation Test Center* (TTC) Pueblo, Colorado 81001. Hours: 9:00 a.m.-4:00 p.m.

System of Records and Responsible System Manager:

Transportation Test Center Employee Service Record File- Director, TTC (System Manager).

3. *Access to Records.*

a. Each individual desiring to determine whether a record pertaining to him or her is contained in a system of records or to obtain a copy of such a record, shall make his request in writing to the appropriate official listed in Section 2.3 of this Appendix. Each request shall specify the name of the requesting individual and the system of records in which the subject record is located or thought to be located.

b. FRA allows individuals to request amendment of their personal records to the extent that such amendment does not violate existing statutes, regulations, or administrative procedures. Requests to amend personal records of active employees should be addressed to the responsible system managers specified in 2.3A-D.

c. The system managers provide written acknowledgment of the receipt of a request to amend a record to the individual within ten days. However, if the request can be reviewed, processed and the individual notified of compliance or denial within the ten-day working period, no acknowledgment is required.

d. If FRA agrees with an individual's request to amend the person's record, the following steps are taken:

1. Advises the individual in writing;

2. Corrects the record accordingly; and

3. If a prior disclosure has been made, advises all previous recipients of the record of the correction and its substance.

e. If FRA, after an initial review by the system manager of a request to amend a personal record, disagrees with all or any portion of it, FRA:

1. Advises the individual of refusal and the reasons for it;

2. Informs the individual of procedures to request a further review;

f. If an individual disagrees with the initial determination, the individual may file a request for a further review of that determination. The request for a review should be addressed to: Attn. Privacy Act of 1974, Office of the Chief Counsel, Federal Railroad Administration, Washington, D.C. 20590.

g. If after this review FRA refuses to amend the record as the individual requested, FRA advises the individual:

1. Of refusal and the reasons for it;

2. Of the individual's right to file a concise statement of the reasons for disagreeing with the decision of the Administration;

3. The procedures for filing the statement of disagreement;

4. That the statement which is filed will be made available to anyone to whom the record is subsequently disclosed;

5. Of the individual's right to seek judicial review of the refusal to amend a record.

h. The final FRA determination on the individual's request is concluded within thirty (30) working days unless the FRA Administrator determines that a fair and equitable review cannot be completed in that timeframe. If additional time is required, the individual is informed in writing of reasons for the delay and of the estimated date on which the review is expected to be completed.

4. *Procedures for Establishing Identity of Individual Making a Request:*

a. Disclosure of personnel records requires that the individual produce an identification card; employee identification, annuitant identification, Medicare cards, or driver's license are examples. For records disclosed by mail, FRA requires identifying information to locate the record, i.e., employee identification number, name, date of birth or social security number. A comparison of the signature of the requester and those in the record is used to determine identity.

b. If an individual can provide no suitable documents for identification, FRA requires a signed statement asserting identity and stipulating that the individual understands that knowingly or willfully seeking or obtaining access to records about another person under false pretenses is punishable by a fine of up to $5,000 under 5 U.S.C. 552a(i)(3).

Appendix G

NATIONAL HIGHWAY TRAFFIC SAFETY ADMINISTRATION

1. *Introduction.* This appendix, with respect to the National Highway Traffic Safety Administration:

a. Describes the places and times at which records will be available for inspection and copying;

b. Indicates the systems of records maintained in the National Highway Traffic Safety Administration;

c. Identifies the officials having authority to deny requests for access to records;

d. Describes the procedures to be followed in requesting correction of a record; and

e. Describes identification requirements which may be in addition to those delineated in paragraph 10.35 of these regulations.

2. *Availability for Inspection and Copying.* Records of the National Highway Traffic Safety Administration, hereafter referred to as NHTSA, are located at NHTSA headquarters, Washington, D.C., and at regional office locations, both described below. Records created, collected, maintained and used in various demonstration and research projects as contract requirements of NHTSA are located at various points in the several States and the Commonwealth of Puerto Rico.

a. All NHTSA headquarters offices are open from 7:45 a.m. to 4:15 p.m., each day except Saturdays, Sundays, and Federal legal holidays. The main headquarters office is located at 400 Seventh Street SW., Washington, D.C. 20590. The Office of Vehicle Safety Compliance, Enforcement Programs; the National Driver Register, Traffic Safety Programs, and the Office of Research and Development are located at the Trans Point Building, 2100 2nd Street SW., Washington, D.C. 20590

b. NHTSA Regional offices are located at the following addresses and are open during the indicated hours each day, except for Saturdays, Sundays, and Federal legal holidays:

(1) Region I (Connecticut, Maine, Massachusetts, New Hamsphire, Rhode Island, Vermont), 55 Broadway, Cambridge, Massachusetts 02142 (7:45 a.m.-4:15 p.m.).

(2) Region II (New Jersey, New York, Puerto Rico, Virgin Island), 222 Mamaroneck Avenue (Room 204), White Plains, New York 10601 (7:45 a.m.-4:15 p.m.).

(3) Region III (Delaware, District of Columbia, Maryland, Pennsylvania, Virginia, West Virginia), Airport Plaza Building, 6701 Elkridge Landing Road, Linthicum, Maryland 21090 (8 a.m.-4:30 p.m.).

(4) Region IV (Alabama, Florida, Georgia, Kentucky, Mississippi, North Carolina, South Carolina, Tennessee), Suite 501, 1720 Peachtree Road NW., Atlanta, Georgia 30309 (7:45 a.m.-4:15 p.m.).

(5) Region V (Illinois, Indiana, Michigan, Minnesota, Ohio, Wisconsin), Suite 214, Executive Plaza, 1010 Dixie Highway, Chicago Heights, Illinois 60411 (8 a.m.-4:30 p.m.).

(6) Region VI (Arkansas, Louisiana, New Mexico, Oklahoma, Texas), 819 Taylor Street, Room 11A26 Fort Worth, Texas 76102 (8 a.m.-4:30 p.m.).

(7) Region VII (Iowa, Kansas, Missouri, Nebraska), 6301 Rockhill Road, Kansas City, Missouri 64111 (7:45 a.m.-4:15 p.m.).

(8) Region VIII (Colorado, Montana, North Dakota, South Dakota, Utah, Wyoming), 330 South Garrison Street, Lakewood, Colorado 80226 (7:45 a.m.-4:15 p.m.).

(9) Region IX (American Samoa, Arizona, California, Guam, Hawaii, Nevada), Suite 610, Two Embarcadero Center, San Francisco, California 94111 (7:45 a.m.-4:15 p.m.).

(10) Region X (Alaska, Idaho, Oregon, Washington), 3140 Federal Building, 915 Second Avenue, Seattle, Washington 98174 (7:45 a.m.-4:15 p.m.).

c. NHTSA demonstration and research project records may be created, collected, maintained, and used for the purposes of NHTSA contract requirements. These records are maintained at various points in the several States and the Commonwealth of Puerto Rico. Since these project contractors only act as agents for NHTSA, and to prevent unauthorized disclosure of information that may be subject to the provisions of the Privacy Act of 1974, management of the systems has been retained by appropriate officials of NHTSA. Access to the published systems may be obtained by corresponding with the systems manager indicated for the system of records found in the citations in paragraph 3 of this appendix. Appropriate personal identification must be furnished in accordance with paragraph 4. These officials should be notified of any inaccuracy of the record and, also, are responsible for con-

V 4 3 / 2 3 3 D E 4 7 8 UMI

sidering requests for correction or alternation of the record.

3. *Systems of Records.* A list of NHTSA systems of records pertaining to the Privacy Act indicating the geographic locations and the responsible systems managers has been published in the FEDERAL REGISTER and appears as follows: Vol. 42, No. 181, September 19, 1977, beginning on page 47099.

4. *Access to Records.*

a. Individuals desiring to determine whether records pertaining to them are contained in systems of records covered by this Appendix or desiring access to records covered by this Appendix, or to obtain copies of such records, shall make written requests providing appropriate identification of the system and proof of their identity in the same manner as former employees described in 4.c below. When an individual is not capable of personally providing the required information, a second party request may be honored if a duly attested authorization, power of attorney, or appropriate court order is submitted with the request.

b. Decision to release or deny requested records is made by the system manager, identified in the citations of paragraph 3 of this Appendix, within ten working days of the receipt of the request. A person seeking review of a denial of the disclosure of a record may appeal to the NHTSA Associate Administrator for Administration, 400 Seventh Street SW., Washington, D.C. 20590, preferably within 180 days of the initial denial. Decision on the request for review is made in writing within 30 working days from the receipt of the request for reconsideration of disclosure. For additional details see sections 10.45 and 10.51 of these rules.

c. Employees and former employees of NHTSA may obtain access to and consideration of the amendment of their records by providing a current Department of Transportation (DOT) identification card (Form D-1600.1.9), a DOT retired employee identification card (Form D-1600.2), Medicare card, attested signed request, or such other identification that may prove the validity of their claims.

d. Since nearly all NHTSA systems of records are maintained on electronic data processing equipment, it may require up to 48 hours to obtain individual records due to computer scheduling requirements. It is in the interest of the individual, therefore, to request information in writing rather than in person.

5. *Requests to Correct or Alter Records.*

a. Individuals may request correction or alternative of records pertaining to them by addressing such requests to the system managers or the NHTSA Privacy Act Coordinator, the addresses of whom are contained in the citation of paragraph 3 of this Appendix.

b. Since the records of the National Driver Register merely contain partial records of the States' motor vehicle records, they are susceptible to correction or alternation only to the extent that such records are at variance with the State records. Persons seeking to correct their State motor vehicle records should address requests to their respective States' motor vehicle licensing authorities.

c. The system manager, in accordance with 49 CFR 10.41, provides written acknowledgment of the receipt of a request to amend a record to the individual within ten working days. If the request can be reviewed, processed, and the individual notified of compliance or denial of the request within the ten working day period, no acknowledgment is required.

d. When decision is made by the system manager to comply with an individual's request to amend the person's record, the following steps are taken within 30 working days from the date of acknowledgment of the request:

(1) Advises the individual of the decision in writing;

(2) Corrects the record accordingly; and

(3) Advises all previous recipients of the record, if an accounting of disclosure has been made, of the correction.

e. When decision is made, after initial review by the system manager of a request to amend a personal record, to disagree with all or any portion of the requested amendment, the following steps are taken within 30 working days from the date of acknowledgment of the request.

(1) Advises the individual of refusal and the reasons therefore; and

(2) Informs the individual of the procedures for appeal to the NHTSA Administrator for further review.

f. If the individual disagrees with the initial determination of the system manager, the individual may file a request for further review of that determination. This request for review should be addressed to the Chief Counsel, National Highway Traffic Safety Administration, 400 Seventh Street SW., Washington, D.C. 20590.

g. If after review the Administrator agrees to the amendment of the record, the procedures of subparagraph 5.d of this Appendix are followed. If amendment of the record is refused as requested by the individual, the individual is advised:

(1) Of the refusal and reasons therefore, and the names and titles of positions of each person responsible for the determination;

(2) Of the individual's right to file, together with the appropriate procedures, a concise statement of the reasons for disagreeing with the decision of the Administrator;

(3) Of the fact that the statement which is filed by the requester is made available to prior recipients and anyone to whom the record is subsequently disclosed; and

(4) Of the individual's right to seek judicial review of the administrator's refusal to amend a record.

h. The final determination to refuse an individual's request for amendment of a record is concluded within 30 working days after the receipt of the appeal to the Administrator. If a fair and equitable review cannot be completed by the stipulated time, the Administrator informs the individual in writing of the reasons for delay and provides an estimated date on which completion of the review is expected.

6. *Personal Identification Requirements.* The NHTSA does not demand any personal identification beyond that specified by § 10.35 of this part.

APPENDIX H

URBAN MASS TRANSPORTATION ADMINISTRATION

1. *Introduction.* This Appendix, with respect to the Urban Mass Transportation Administration (UMTA):

a. Describes the places and times at which records are available for inspection and copying;

b. Indicates the systems of records maintained in the Urban Mass Transportation Administration;

c. Identifies the officials having authority to deny requests for access for records;

d. Describes the procedures to be followed in requesting correction of a record; and

e. Describes identification requirements which may be in addition to those delineated in paragraph 1035 of these regulations.

2. *Availability for Inspection and Copying.* In accordance with Title 49, Part 10, Subpart A, Section 10.1, dealing with the maintenance of and access to records pertaining to individuals under the Privacy Act of 1974 (Pub. L. 93-579), the following places and times at which individual's records are available for inspection and copying, and the titles of the officials who are responsible system managers are submitted.

a. Regional Offices as follows:

(1) Region I, Urban Mass Transportation Administration, Cambridge, MA 02142

(2) Region II, Urban Mass Transportation Administration, New York, NY 10007;

(3) Region III, Urban Mass Transportation Administration, Philadelphia, PA 19106;

(4) Region IV, Urban Mass Transportation Administration, Atlanta, GA 30309;

(5) Region V, Urban Mass Transportation Administration, Chicago, IL 60606;

(6) Region VI, Urban Mass Transportation Administration, Fort Worth, TX 76102;

(7) Region VII, Urban Mass Transportation Administration, Kansas City, MO 64131;

(8) Region VIII, Urban Mass Transportation Administration, Denver, CO 80202;

(9) Region IX, Urban Mass Transportation Administration, San Francisco, CA 94111; and

(10) Region X, Urban Mass Transportation Administration, Seattle, WA 98174.

b. Hours: 8:30 A.M. to 5 P.M., local time.

c. System of Records: Regional Personnel Convenience Files at each location.

d. System Managers: Regional Directors or Chiefs are System Managers.

e. Headquarters: Urban Mass Transportation Administration, Washington Headquarters, Washington, D.C. 20590; Hours: 8:30 A.M. to 5 P.M.

3. *Systems of Records.*

a. Confidential Statement of Employment and Financial Interest—DOT/UMTA, Chief Counsel, Office of the Chief Counsel;

b. Occupational Safety and Health Reporting System, Director of Personnel Division;

c. Litigation and Claims File—Chief Counsel, Office of Chief Counsel;

d. Grant Applicants List, Director, Grant Management Division;

e. Contract Information System, Director, Procurement Division;

f. Unsolicited Research and Development Grants, Director, Grant Management Division;

g. Complaints of Discrimination, Director, Office of Civil Rights;

h. Employee Travel Vouchers, Chief, Accounting Branch;

i. Accounts Receivable, Chief, Accounting Branch;

j. Equal Employment Opportunity, Minority/Female Statistical Reporting System, Director, Office of Civil Rights;

k. Minority Recruitment File, Director, Office of Civil Rights;

l. UMTA Sponsored Reports—Authors file, Director, Office of Transit Management;

m. Blood Donors File, Director, Administrative Services Division;

n. Approved Grants, Director, Administrative Services Division;

o. Closed-Out Grants, Director, Administrative Services Division; and

p. Docket DOT/UMTA, Chief Counsel, Office of Chief Counsel.

4. *Access to Records.* Each individual desiring to determine whether a record pertaining to him or her is contained in a system of records or to obtain a copy of such a record, shall make request in writing to the official specified in paragraph 1 of this Appendix. Each request shall specify the name of the requesting individual and the system of records in which the subject record is located or thought to be located.

5. *Requests to Correct or Alter Records.*

a. The Administration allows individuals to request amendment of their personal records to the extent that such amendment does not violate existing statutes, regulations, or administrative procedures. Requests to amend personal records of active employees should be addressed to the responsible system manager specified in paragraph 1.

b. The system manager provides a written ackowledgment of the receipt of a request to amend a record to the individual within ten days. However, if the request can be reviewed and processed and the individual notified of compliance or denial within the ten-day working period, no separate acknowlegment is required.

c. If UMTA agrees with an individual's request to amend the person's record, the following steps are taken:

(1) Advises the individual in writing;

(2) Corrects the record accordingly; and

(3) Advises all previous recipients of the record which was corrected of the correction and its substance.

d. If UMTA, after an initial review by the system manager of a request to amend a personal record, disagrees with all or any portion of it, it:

(1) Advises the individual of refusal and the reasons for it; and

(2) Informs the individual of procedures to request a further review.

e. If an individual disagrees with the initial determination, the individual may file a request for a further review of that determination. This request for a review should be addressed to: Privacy Act Officer, UAD-60, 400 Seventh Street SW., Washington, D.C. 20590.

f. If after this review UMTA refuses to amend the record as the individual requested, UMTA advises the individual:

(1) Of refusal and the reasons for it;

(2) Of the individual's right to file a concise statement of the reasons for disagreeing with the decision;

(3) The procedures for filing the statement of disagreement;

(4) That the statement which is filed in made available to any one to whom the record is subsequently disclosed; and

(5) Of the individual's right to seek judicial review of the Administration's refusal to amend a record.

g. The final determination on the individual's request is concluded within 30 working days unless the UMTA Administrator determines that a fair and equitable review cannot be completed in that period. If additional time is required, the individual is informed in writing of reasons for the delay and of the estimated date on which the review is expected to be completed.

h. For personnel-related records final Civil Service Commission determination may apply within 30 working days following the procedures explained above.

6. *Personal Identification Requirements.*

a. Disclosure of personal records requires that the individual produce an identification card; employee identification, annuitant identification, Medicare card, and driver's license are examples. For records disclosed by mail, UMTA requires identifying information to locate the record, i.e., employee identification number, name, date of birth, or social security number. A comparison of the signature of the requester and those in the record is used to determine identity.

b. If an individual can provide no suitable documents for identification, UMTA requires a signed statement asserting identity and stipulating that the individual understands that knowingly or willfully seeking or obtaining access to records about another person under false pretences is punishable by a fine of up to $5,000 under citation 3(i)3 of the Privacy Act.

APPENDIX I

SAINT LAWRENCE SEAWAY DEVELOPMENT CORPORATION

1. *Introduction.* This Appendix, with respect to the Saint Lawrence Seaway Development Corporation:

a. Describes the places and times at which records are available for inspection and copying;

b. Indicates the systems of records maintained;

c. Identifies the officials having authority to deny requests for access to records;

d. Describes the procedures to be followed in requesting correction of a record; and

e. Describes identification requirements which may be in addition to those delineated in paragraph 10.35 of these regulations.

2. *Availability for Inspection and Copying.*

a. Place and time for records inspection and copying: Saint Lawrence Seaway Development Corporation, Administration Building, Andrews Street, Massena, New York 13662; Massena Office: 9:00 a.m.-4:00 p.m.

b. Systems of records located at each facility: *Administration Building:* Claimants under Federal Tort Claims Act, Data Automation Program Records, Employees' Compensation Records, Emergency Operating Records (Vital Records).

c. Official having authority to deny requests for disclosure of records under this part:

Resident Manager, Saint Lawrence Seaway Development Corporation, Administration Building, Andrews Street, Massena, New York 13662.

3. *Systems of Records:* A complete listing of the systems of records maintained by the Saint Lawrence Seaway Development Corporation has been published in the FEDERAL REGISTER as follows: September 19, 1977, pages 47138-47140.

4. *Access to Records:* Each individual desiring to determine whether a record pertaining to him or her is contained in a system of records or to obtain a copy of such record, shall make request in writing to the address provided in Section 2 of this Appendix. Each request shall specify the name of the requesting individual and the system of records in which the suject record is located or thought to be located.

5. *Requests to Correct or Alter a Record:*

a. Any person who desires to have his or her own record corrected shall submit a written request.

b. Only the individual to whom the record pertains may make the written request and it shall be signed by that person.

c. Request should state the reasons the record should be corrected and that the request is made pursuant to the Privacy Act: alternatively the requester may mark "Privacy Act Amendment Request" on the envelope in which the request is submitted.

d. Requests for correction of records shall be submitted to the Personnel Officer, Saint Lawrence Seaway Development Corporation, Administration Building, Andrews Street, Massena, New York 13662.

6. *Personal Identification Requirements:* Refer to subsection 10.35 for normal requirements. In those cases involving mail requests for sensitive records, i.e.—medical records, the requester's signature shall be notarized.

APPENDIX J

RESEARCH AND SPECIAL PROGRAMS ADMINISTRATION

The Research and Special Programs Administration (RSPA) will operate under the general rules of Part 10 (49 CFR Part 10) until specific procedures are deemed necessary for the RSPA.

[FR Doc. 78-33780 Filed 12-1-78; 8:45 am]

[4910-59-M]

National Highway Traffic Safety Administration

[49 CFR Parts 571 and 572]

[Docket No. 74-9, Notice 5; Docket No. 78-9, Notice 3]

CHILD RESTRAINT SYSTEMS

Anthropomorphic Test Dummies Representing 3-Year-Old Children

AGENCY: National Highway Traffic Safety Administration, DOT.

ACTION: Extension of time for comments.

SUMMARY: This notice extends the time for comments on the portions of the notice of proposed rulemaking on Federal Motor Vehicle Safety Standard No. 213-80 involving testing with anthropomorphic test dummies. The comment period is also extended for the notices of proposed rulemaking on Part 572, Anthropomorphic Test Dummies, Subpart C, 3-Year-Old Child, proposed in May 1978 and amended in November 1978.

DATES: The comment period for the notices on Part 572, Anthropomorphic Test Dummies, and on the portions of the notice of FMVSS 213-80, Child Restraint Systems, involving testing with anthropomorphic test dummies is extended until January 5, 1979. Comments on the remaining portions of

V 4 3 / 2 3 3

the notice on FMVSS 213-80 are still due December 1, 1978.

ADDRESS: Comments should refer to the docket numbers and be submitted to Room 5108, Nassif Building, 400 Seventh Street, SW., Washington, D.C. 20590.

FOR FURTHER INFORMATION CONTACT:

Mr. Vladislav Radovich, Office of Vehicle Safety Standards, National Highway Traffic Safety Administration, 400 Seventh Street, S.W., Washington, D.C. 20590, (202) 426-2264.

SUPPLEMENTARY INFORMATION: A notice of proposed rulemaking to establish a new Federal Motor Vehicle Safety Standard No. 213-80, Child Restraint Systems, was published on May 18, 1978 (43 FR 21470). The closing date for comments on the notice was December 1, 1978. In order to do research on the proposed requirements, the Juvenile Products Manufacturers Association on August 1 requested an extension of time of 180 days to submit comments on the portions of the notice involving testing with anthropomorphic test dummies. The agency initially denied the petition but invited the submission of further justification. The petitioner submitted additional information in a November 27, 1978, letter. Based on that letter and other information concerning the availability of testing facilities and anthropomorphic test dummies to do the necessary testing, the agency has concluded that an extension of time to comment should be granted. However, only a short extension is appropriate and in the public interest. Further, the extension should be limited to the portions of the proposed standard involving testing with the anthropomorphic test dummy. Accordingly, the deadline for commenting on those portions is extended until January 5, 1979. Comments on the remaining portions of the notice of proposed rulemaking must still be submitted by the original comment closing date of December 1, 1978.

Because of the interrelationship between the portions of the notice of proposed rulemaking on FMVSS 213-80 involving testing with anthropomorphic test dummies and the notices of proposed rulemaking on Part 572, Anthropomorphic Test Dummies, Part C, 3-Year-Old Child, (43 FR 21490; 43 FR 53478), the agency has decided to extend the time to comment on those notices until January 5, 1979.

The principal authors of this notice are Mr. Vladislav Radovich, Office of Vehicle Safety Standards, and Mr. Stephen Oesch, Office of the Chief Counsel.

(Sec. 103, 119, Pub. L. 89-563, 80 Stat. 718 (15 U.S.C. 1392, 1407); delegations of authority at 49 CFR 1.50 and 501.8).

Issued on November 30, 1978.

MICHAEL M. FINKELSTEIN,
Associate Administrator for Rulemaking.

notices

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

[3410-11-M]

DEPARTMENT OF AGRICULTURE

Forest Service

AMAX MINING CO., MOUNT EMMONS PROJECT

Gunnison National Forest, Gunnison County, Colo.

Intent To Prepare an Environmental Statement

Pursuant to Section 102(2)(c) of the National Environmental Policy Act of 1969, the Forest Service, Department of Agriculture, will prepare an Environmental Statement upon the submission of a notice of intent or proposal from AMAX, Inc., for development of its proposed Mt. Emmons molybdenum mining and milling project in the Gunnison National Forest, Gunnison County, Colorado. Company studies indicate mining and milling will take place over an estimated period of 25 years. The mill will have a capacity of about 30,000 tons per day. The waste material (tailings) from the mill will be produced at a rate of about 30, 000 tons per day. The statement will address alternative mine access and mill/tailings site locations and their environmental effects.

Initial issues and concerns have been identified through the Colorado Review Process (CRP). The CRP is being used by representatives of the Gunnison National Forest, State of Colorado and Gunnison County to coordinate the interjurisdictional review of the potential environmental effects of this major development proposal. Meetings of these representatives (the CRP Group) so far have identified many issues and concerns related to the project. These issues and concerns may change or be modified as the evaluation proceeds.

Initial public issues and management concerns identified include: land subsidence, air and water quality, tailings and waste rock disposal, transportation, wildlife and fisheries, reclamation, recreation, population growth, community services impacts, county land use changes, and community changes.

The Forest Supervisor is the responsible official for the Environmental Statement.

It is anticipated the Environmental Statement will require about 18 months following receipt of the notice of intent or proposal from AMAX, Inc., as described in the first paragraph.

Comments on this Notice of Intent to Prepare an Environmental Statement should be sent to the Forest Supervisor, Gunnison National Forest, P.O. Box 138, Delta, Colorado 81416.

JIMMY R. WILKINS,
Forest Supervisor.

WITHDRAWAL OF APPLICATION FOR DUTY-FREE ENTRY OF SCIENTIFIC ARTICLE

The University of Tennessee has withdrawn Docket Number 78-00407 an application for duty-free entry of an ultramicrotome.

Accordingly, further administrative proceedings will not be taken by the Department of Commerce with respect to this application.

(Catalog of Federal Domestic Assistance Program No. 11.105, Importation of Duty-Free Educational and Scientific Materials.)

[3510-25-M]

APPLICATIONS FOR DUTY-FREE ENTRY OF SCIENTIFIC ARTICLES

The following are notices of the receipt of applications for duty-free entry of scientific articles pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651; 80 Stat. 897). Interested persons may present their views with respect to the question of whether an instrument or apparatus of equivalent scientific value for the purposes for which the article is intended to be used is being manufactured in the United States. Such comments must be filed in triplicate with the Director, Statutory Import Programs Staff, Bureau of Trade Regulation, U.S. Department of Commerce, Washington, D.C. 20230, by December 26, 1978.

Regulations (15 CFR 301.9) issued under the cited Act prescribe the requirements for comments.

A copy of each application is on file, and may be examined between 8:30 A.M. and 5:00 P.M., Monday through Friday, in Room 6886C of the Department of Commerce Building, 14th and Constitution Avenue, N.W. Washington, D.C. 20230.

Docket No.: 79-00038. Applicant: Biomedical Engineering and Instrumentation Branch DRS, National Institutes of Health, Bldg. 13, Room 3W13, 9000 Rockville Pike, Bethesda, MD 20014. Article: Electron Microscope, Model H-700 and accessories. Manufacturer: Hitachi Ltd., Japan. Intended use of article: The article is intended to be used to analyze the ultrastructure and composition of a wide variety of biological specimens. In addition, the article will be equipped with X-ray and electron energy—less spectrometers, whose data output will assist in the exploration of the structure—function relationships in the tissues examined. Application received by Commissioner of Customs: November 3, 1978.

Docket No.: 79-00039. Applicant: University of Rochester, University of Rochester Medical Center, 601 Elmwood Avenue, Rochester, New York 14642. Article: Sheath Flow Chamber for Phywe ICP 22. Manufacturer: Phywe AG, West Germany. Intended use of article: The article is intended to be used for the study of cytochemistry of human and other animal cells and chromosomes to develop new techniques for the recognition of abnormal or unusual cells or chromosomes by virtue of their cytochemical properties. Application received by Commissioner of Customs: November 3, 1978.

Docket No.: 79-00040. Applicant: Kansas State University, College of Veterinary Medicine, Manhattan, KS 66506. Article: Electron Microscope, Model H-300 and accessories. Manufacturer: Hitachi, Japan. Intended use of article: The article is intended to be used to help elucidate the pathogenesis and pathologic changes in various diseases of domestic animals. The experiments to be conducted will include daily examination of specimens from animals for diagnostic purposes and planned experiments arising from di-

V

SUMMARY: The Pacific Fishery Man-

V 4 3 / 2 3 3

agnostic cases of economic significance. The objectives of the investigations are to develop a better understanding of the structural and functional changes with cells that result in malfunction and disease. In addition, the article will also be used in the courses: Topics in Pathology, Advanced Topics in Pathology, and Advanced Diagnostic Pathology to give the pathologists-in-training training in the use of electron microscope and in the recognition of ultrastructural disease processes. Application received by Commissioner of Customs: November 3, 1978.

Docket No.: 79-00041. Applicant: Louisiana State University, Civil Engineering Department, Baton Rouge, LA 70803. Article: Swelling Test Apparatus. Manufacturer: Geonor A.S., Norway. Intend use of article: The article is intended to be used for research in an attempt to satisfy the following general goals:

(1) Identify the swell mechanism of Louisiana soils,

(2) Estimate the magnitude of swell potential of various soil types in Louisiana,

(3) Focus on developing a field method to identify swelling soils.

Specific steps that will be followed in order to satisfy the objectives of the study are:

1. Comprehensive literature study to isolate completed research pertinent to Louisiana soils.

2. An investigation of the physicochemical and mineralogical properties of typical swelling soils in Louisiana.

3. The development of a field test method compatible and correctable with the laboratory test methods for identifying swelling potential.

4. The field verification of test methods in known swelling soil deposits.

5. The development of a system of mapping the estimated potential/actual swell of the swell-susceptible soils in the State of Louisiana.

6. The experimental mapping of selected areas of Louisiana identifying swelling soils.

7. Estimate the potential damage risk associated with the swelling soils in the mapped areas.

8. Identify, develop and test methods for the improvement of swelling soils, such as lime and lime-fly-ash stabilization (which will be abundantly available in Louisiana in the near future).

Application received by Commissioner of Customs: November 3, 1978.

Docket No.: 79-00042. Applicant: East Tennessee State University College of Medicine, P.O. Box 19540A, State University Station, Johnson City, Tennessee 37601. Article: Electron Microscope, Model EM 201C and Plate Camera with accessories. Manufacturer: Philips Electronics Instruments NVD, The Netherlands. Intended use of article: The article is intended to be used for studies of tissues from experimental animals used in a model of experimental endometrial and bladder cancer. The ultrastructure of organelles of target tissue is altered by the administration of chemical carcinogens, sex hormones, and castration. These alterations will be studied. The article will also be used in a Sophmore Pathology course designed to present a comprehensive survey of general and organ system pathology to familiarize the students with medical nomenclature, basic concepts of etiology and pathogenesis and sufficient information about disease states so that they can perform up to their capabilities on the National Board examinations and benefit maximally from their subsequent clinical clerkships. Application received by Commissioner of Customs: November 3, 1978.

Docket No.: 79-00043. Applicant: University of Mississippi Medical Center, 2500 North State Street, Jackson, MS 39216. Article: Electron Microscope, Model EM 10A with Goniometer and accessories. Manufacturer: Carl Zeiss, West Germany. Intended use of article: The article will be used in part for a combined ultrastructural, immunocytochemical and biochemical investigation of the role of the large dense core noradrenergic vesicles of the peripheral sympathotic nervous system. Application received by Commissioner of Customs: November 3, 1978.

Docket No.: 79-00044. Applicant: University of Delaware, Newark, Delaware 19711. Article: Specific Heat Flow Calorimeter and accessories. Manufacturer: Sodev Inc., Canada. Intended use of article: The article is intended to be used for the measurement of the specific heats of dilute solutions of various substances in aqueous substances in aqueous solution. Solutes include alcohols, amides, acids, etc. which are needed in connection with the study of functional group interactions in dilute aqueous solutions. It will be necessary to measure specific heat differences between water and 0.1 mole kg^{-1} solutions to get apparent molal heat capacities of the solutes. Application received by Commissioner of Customs: November 3, 1978.

Docket No.: 79-00046. Applicant: Trustees of Columbia University in the City of New York, 315 Havemeyer Hall, Columbia University, New York, New York 10027. Article: TEA CO_2 laser Model DD-250 and accessories. Manufacturer: Gen Tec Inc., Canada. Intended use of article: The article is intended to be used for the study of multiphoton dissociation properties of CF_3I, CF_3Br, and other similar gases. Investigations will be conducted to determine the usefulness of infrared lasers as a source of catalysis in chemical reactions. The article will also be used in independent scientific research projects by graduate students in the area of multiphoton infrared photochemistry. Application received by Commission of Customs: November 8, 1978.

Docket No.: 79-00047. Applicant: National Institutes of Health, 9000 Rockville Pike, Building 36, Rm. 4B17, Bethesda, Maryland 20014. Article: LKB 2128-010/Ultrotome IV Ultramicrotome and accessories. Manufacturer: LKB Produkter AB, Sweden. Intended use of article: The article is intended to be used for studies of myelinated tracts or nerves obtained surgically which may be chemically fixed and embedded or frozen before sectioning. Thin or semi-thin sections of nervous tissue will be studied by light and electron microscopy. The features characteristic of various types of myelin breakdown will be identified and described in research reports that will be published. Additional objectives include the localization of myelin constituents visualized electron microscopically in thin sections after using specific immunocytochemical staining procedures. Application received by Commissioner of Customs: November 8, 1978.

Docket No.: 79-00048. Applicant: National Institute of Environmental Health Science, Laboratory of Pulmonary Function and Toxicology, P.O. Box 12233, Research Triangle Park, NC 27709. Article: LKB 2088 Ultrotome III Ultramicrotome and accessories. Manufacturer: LKB Produkter AB, Sweden. Intended use of article: The article is intended to be used for electron microscopic studies of cells and tissues from normal and diseased lungs during experiments on the pathobiology of pulmonary disease. Application received by Commissioner of Customs: November 8, 1978.

Docket No.: 79-00049. Applicant: University of California, San Francisco, 1438 Harbour Way South, P.O. Box 4028, Richmond, CA 94804. Article: Kratos MS-25S Gas Chromatograph/Mass Spectrometer System and accessories. Manufacturer: Kratos/AEI, United Kingdom. Intended use of article: The article is intended to be used by faculty, graduate students and Pharm. D. candidates to obtain: (1) High quality, high sensitivity mass spectra on organic substances occurring primarily as complex mixtures isolated from biological matrices; and (2) ultra high sensitivity measurements of the quantitative occurrence of specific organic and chemotherapeutic agents or mixtures thereof and fractions isolated from physiological fluids, tissue and cell cultures, biopsy materials, etc. as well as toxic substances from environmental samples.

D E 4 7 8 UMI

Experiments in biomedical and pharmaceutical research and related environmental toxicology will support multicomponent qualitative analystic studies, and quantitative studies will be carried out on race amounts of substances isolated from complex chemical and biological mileux using stable isotopically labelled synthetic specific analogs. Studies of the products of chemical reactions aimed at developing a knowledge of reaction mechanisms will also be carried out. The article will also be used for educational purposes in the courses: Organic Chemistry Laboratory (Chemistry 117), Qualitative Organic Analysis (Chemistry 165), and Mass Spectrometer (a graduate course in the Chemistry 200 series). The general objective of these courses is to train students in the analytical methodology for identification and qualitative structure determination of unknowns and knowns in complex mixtures isolated from biological and medical milieux. Application received by Commissioner of Customs: November 9, 1978.

TUFTS UNIVERSITY

Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR 301).

A copy of the record pertaining to this decision is available for public review between 8:30 A.M. and 5:00 P.M. in Room 6886C of the Department of Commerce Building, at 14th and Constitution Avenue NW., Washington, D.C. 20230.

Docket No. 78-00300. Applicant: Tufts University, Lane Hall, Medford, Mass. 02155. Article: PS-400 Coherent NMR Pulse Spectrometer and Accessories. Manufacturer: Spin-Tech Electronics Ltd., Canada. Intended use of article: The article is intended to be used to study liquid crystals, soaps and lipids in the liquid crystals, and solid state. Their dynamics and ordering properties such as orientation, lateral and rotational diffusion, molecular conformational equilibrium, etc. will be studied by a variety of multiple-pulse nuclear magnetic resonance experiments, including spin-lattics relaxation (T_1) of both protons and deuterons, relaxation in the rotating frame ($T_{1\rho}$ or spin-locking), second moment (M_2) by solid echo technique and Jeener-Brookaert pulse sequence. The article will also be used in the following courses:

Nuclear Magnetic Resonance—to teach the principle and application of NMR to physical chemistry and biophysical chemistry students.

Research (course numbers 91, 92, 297, 298)—by graduate students and advanced undergraduate students engaged in the above research.

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States. Reasons: The foreign article provides the multiple pulse capability to perform Jeener-Brookaert ($T_{1\rho}$) pulse sequence experiments. The National Bureau of Standards advises in its memorandum dated October 20, 1978 that (1) the capability of the foreign article described above is pertinent to the applicant's intended purpose and (2) it knows of no domestic instrument or apparatus of equivalent scientific value to the foreign article for the applicant's intended use.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which is being manufactured in the United States.

(Catalog of Federal Domestic Assistance Program No. 11.105, Importation of Duty-Free Educational and Scientific Materials.)

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

PACIFIC FISHERY MANAGEMENT COUNCIL, SCIENTIFIC AND STATISTICAL COMMITTEE, SALMON ADVISORY SUBPANEL AND PLAN DEVELOPMENT TEAM, AND GROUNDFISH ADVISORY SUBPANEL

Meeting

AGENCY: National Marine Fisheries Service, NOAA.

ACTION: Notice of Public Meeting with Partially Closed Session.

SUMMARY: The Pacific Fishery Management Council and its Scientific and Statistical Committee, Salmon Advisory Subpanel and Plan Development team, and Groundfish Advisory Subpanel established under Section 302(a), (g) (1) and (2) of the Fishery Conservation and Management Act of 1976 (Pub. L. 94-265), will conduct a series of meetings.

DATES: The Council meetings will convene at 8:00 a.m. on Wednesday, December 6, 1978, and at 8:00 a.m. on Thursday, December 7, 1978, adjourning at 6:00 p.m. both days. The Scientific and Statistical Committee meetings will convene at 9:00 a.m. on Tuesday, December 5, 1978, and at 8:00 a.m. on Wednesday, December 6, 1978, adjourning at 5:00 p.m. both days. The Salmon Advisory Subpanel and Plan Development team meetings will convene at 8:00 a.m. on Tuesday, December 5, 1978, and at 8:00 a.m. on Wednesday, December 6, 1978, adjourning at approximately 5:00 p.m. on both days. The Groundfish Advisory Subpanel meetings will convene at 1:00 p.m. on Tuesday, December 5, 1978, and at 8:00 a.m. on Wednesday, December 6, 1978, adjourning at approximately 5:00 p.m. on both days.

ADDRESS: The Council, Scientific and Statistical Committee, Salmon Advisory Subpanel and Plan Development Team, and Groundfish Advisory Subpanel meetings will take place at the Portland Hilton, 921 S.W. 6th Avenue, Portland, Oregon.

FOR FURTHER INFORMATION CONTACT:
Mr. Lorry M. Nakatsu, Executive Director, Pacific Fishery Management Council, 526 S.W. Mill Street, Second Floor, Portland, Oregon 97201, telephone: (503) 221-6352.

PROPOSED AGENDA

The Groundfish Advisory Subpanel agenda is as follows:

DECEMBER 5-6, 1978

(1) Consideration of second draft of Groundfish Fishery Management Plan. The Salmon Advisory Subpanel and Plan Development Team agenda is as follows:

DECEMBER 5-6, 1978

(1) Consideration of progress report on Comprehensive Salmon Management Plan.

The Scientific and Statistical Committee agenda is as follows:

DECEMBER 5-6, 1978

(1) Development of fishery management plans: Comprehensive Salmon; Ocean Salmon for 1979; Squid; Groundfish; Billfish; Dungeness Crab; Jack Mackerel and Pink Shrimp. (2)

V 43/233 DEC 78 UMI

Operational and procedural matters of the Council, including advisory panel and management plan development team activities; (3) Public comment period beginning at 3:30 p.m. on December 5, and (4) Other committee business.

The Council agenda is as follows:

DECEMBER 6, 1978

(1) Closed 2-hour session (8:00 a.m. to 10:00 a.m.) to discuss classified material on the status of current maritime boundary and resource negotiations between the United States and Canada. Personnel matters will also be discussed: (1) Selection of Jack Mackerel Advisors; and (2) Selection of Pink Shrimp Advisors. (2) Consideration of a progress report on the Comprehensive Salmon Management Plan and the first draft of the Jack Mackerel Fishery Management Plan; (3) Consideration of reports from ad hoc committees; (4) Review of Communications from other agencies and organizations; and (5) Public comment period beginning at 4:00 p.m.

DECEMBER 7, 1978

(1) Consideration of the second draft of the Groundfish Fishery Management Plan; (2) Operational and procedural matters of the Council, including its staff, advisory panels, and committee activities; (3) Consideration of reports from ad hoc committees; and (4) Review of communication from other agencies and organizations.

The Council, Scientific and Statistical Committee, Salmon Advisory Subpanel and Plan Development Team, and Groundfish Advisory Subpanel expect to address each of the items of their respective agendas above. Time restraints may require that some items be deferred to a later meeting. In addition, there is a possibility that late items of importance may be added to the agenda after the appearance of this announcement. Interested parties should contact the Executive Director as mentioned above to obtain a more detailed agenda.

The Scientific and Statistical Committee, Salmon Advisory Subpanel and Plan Development Team, and Groundfish Advisory Subpanel meetings will be open to the public. The council meeting will also be open to the public except for the first agenda item on the first day. The closed session of the Council meeting is planned for the early morning of December 6, 1978, from 8:00 a.m. through 10:a.m. to hear and discuss Department of State security classified material on the status of current maritime boundary and resource negotiations between the United States and Canada. Only those Council members, SSC members, and related staff members having security clearances will be allowed to attend this closed session.

The Assistant Secretary for Administration of the Department of Commerce, with the concurrence of its General Counsel, formally determined on November 30, 1978, pursuant to Section 10(d) of the Federal Advisory Committee Act, that the agenda items covered in the closed session may be exempt from the provisions of the Act relating to open meetings and public participation therein, because items will be concerned with matters that are within the purview of 5 U.S.C. 552b(c) (1) and (6) as information which is properly classified pursuant to Executive Order 11652. (A copy of the determination is available for public inspection and copying in the Public Reading Room, Central Reference and Record Inspection Facility, Room 5317, Department of Commerce.) The Notice of Public Meeting with a Partially Closed Session does not permit members of the public sector 15 days notification, because of an administrative delay in processing a formal Notice of Determination.

Dated: November 29, 1978.

WINFRED H. MEIBOHM,
Associate Director, National Marine Fisheries Service.

CONSUMER PRODUCT SAFETY COMMISSION

PRODUCT SAFETY ADVISORY COUNCIL

Meeting

AGENCY: Consumer Product Safety Commission.

ACTION: Notice of Meeting: Product Safety Advisory Council.

SUMMARY: This notice announces a meeting of the Product Safety Advisory Council on Monday, December 18, 1978, from 9 a.m. to 5 p.m., and Tuesday, December 19, 1978, from 8:30 a.m. to 3:45 p.m. The meeting will be held at 1111 18th Street, NW., Washington, D.C. 20207, Third Floor Conference Room.

FOR FURTHER INFORMATION CONTACT:

Sadye Dunn, Office of the Secretary, Suite 300, 1111 18th Street, NW., Washington, D.C. 20207, 202-634-7700.

SUPPLEMENTAL INFORMATION: The Product Safety Advisory Council was established by section 28 of the Consumer Product Safety Act, which provides that the Commission may consult with the Council before prescribing a consumer product safety rule or taking other action under the Act. Topics tentatively scheduled for discussion on Monday, December 18, include (1) voluntary vs. mandatory standards; (2) performance vs. design standards; and (3) cost/benefit in health and safety matters, with discussion of these policy issues focused on the pending questions of an upholstered furniture flammability standard. Other topics to be discussed on Tuesday, December 17, include CPSC's Voluntary Standards Policy; Commission participation in the development of a voluntary standard to reduce the risk of injury associated with chain saw kickback; and implementation of CPSC's Public Participation Program. The meeting is open to the public; however, space is limited. Persons who wish to make oral or written presentation to the Product Safety Advisory Council should notify the Office of the Secretary (see address above) by December 11, 1978. The notification should list the name of the individual who will make the presentation, the person, company, group or industry on whose behalf the presentation will be made, the subject matter, and the approximate time requested. Time permitting, these presentations and other statements from the audience to members of the Council may be allowed by the presiding officer.

Dated: November 28, 1978.

SADYE E. DUNN,
Secretary, Consumer Product Safety Commission.

DEPARTMENT OF DEFENSE

Office of the Secretary

DOD ADVISORY GROUP OF ELECTRON DEVICES

Meeting

Working Group D (Mainly Laser Devices) of the DOD Advisory Group on Electron Devices (AGED) will meet in closed session at the Institute of Defense Analyses, 400 Army Navy Drive, Arlington, VA 22202, on 18-19 January 1979.

The purpose of the Advisory Group is to provide the Under Secretary of Defense for Research and Engineering, the Director, Defense Advanced Research Projects Agency and the Military Departments with technical advice on the conduct of economical and effective research and development programs in the area of electron devices.

The meeting will be limited to review of research and development programs which the Military Departments propose to initiate with industry, universities or in their laboratories. The laser area includes programs on developments and research related to low energy lasers for such applications as battlefield surveillance, target designation, ranging, communications, weapon guidance and data transmission. The review will include details of classified defense programs throughout.

In accordance with Section 10(d) of Appendix I, Title 5, United States Code, it has been determined that this Advisory Group meeting concerns matters listed in section 552b(c) of Title 5 of the United States Code, specifically, Subparagraph (1) thereof, and that accordingly this meeting will be closed to the public.

MAURICE W. ROCHE,
Director, Correspondence and Directives, Washington Headquarters Service, Department of Defense.

DEPARTMENT OF ENERGY

Economic Regulatory Administration

MAJOR FUEL BURNING INSTALLATION/POWERPLANT PETITION FOR EXISTING FACILITY CLASSIFICATION

Request for Public Comment

AGENCY: Department of Energy, Economic Regulatory Administration.

ACTION: Notice of Request for Public Comment on ERA-300A, Powerplant Petition for Existing Facility Classification and ERA-300B, Major Fuel Burning Installation Petition for Existing Facility Classification.

SUMMARY: To implement the Interim Rule to Permit Classification of Certain Powerplants and Installations as Existing Facilities (43 FR 54911, November 22, 1978, Part IV), the Economic Regulatory Administration (ERA) of the Department of Energy (DOE) has developed the ERA-300A and ERA-300B. Potential Respondents, interested parties and members of the public are invited to submit comments on the proposed Forms ERA-300A and ERA-300B, which are reproduced herein.

EFFECTIVE DATE: Comments received no later than January 15, 1979, will be given full consideration.

FOR FURTHER INFORMATION CONTACT:

Alfred C. Metz, Department of Energy, Economic Regulatory Administration, Office of Fuels Regulation, Room 7219C, 2000 M Street NW., Washington, D.C. 20461, 202-254-5436.

Written comments should be submitted in triplicate to:

Robert C. Gillette, Department of Energy, Economic Regulatory Administration, ERA Docket ERA-R-78-21, 2000 M Street NW., Room 2313, Washington, D.C. 20461.

SUPPLEMENTARY INFORMATION:

I. Background.
II. Comments invited in key issues.
III. Confidentiality.
IV. Clarity of instructions and definitions.

I. BACKGROUND

Title II of the Act prohibits "new" powerplants and installations from using oil and natural gas, unless granted an exemption by DOE, and prohibits "new" powerplants from constructing without alternate fuel capability. The Act classifies all powerplants and installations which began construction or acquisition after April 20, 1977, as "new".

However, the Act also permits ERA to classify certain installations for which construction or acquisition began between April 20, 1977, and November 9, 1978 (enactment date), as "existing" and, therefore, subject to the provisions of Title III rather than those of Title II of the Act.

The Act classifies transitional facilities as "new" units unless the petitioner can demonstrate that such a classification would result in a substantial financial penalty for an installation or powerplant, or would result in a significant operational detriment to an installation or in an impairment of reliability for a powerplant.

In order for DOE to classify a transitional facility as an existing facility, a Powerplant Petition for Existing Facility Classification (ERA-300A) of Major Fuel Burning Installation Petition for Existing Classification (ERA-300B) must be filed not later than 14 days following the effective date of the Final Transitional Facility Regulations.

Under the Federal Reports Act, the ERA-300A and 300B must be approved by the Office of Management and Budget (OMB). As a part of the approval process, ERA hereby solicits comments concerning these reporting documents. An advance copy of the forms will be forwarded to OMB concurrently with the publication of this FEDERAL REGISTER notice. Comments submitted to ERA concerning the draft reporting forms will be forwarded to OMB for its consideration in granting an approval and will be considered by ERA.

II. COMMENTS INVITED ON KEY ISSUES

Review comments should address the following areas of concern:

- Is the overall layout and general format of the forms easy to understand and follow?
- How many person-hours will be required to provide the information required for submitting a petition?
- What is your estimate of the cost to your firm for completing and submitting the proposed ERA-300A or ERA-300B?
- Are the instructions for the forms sufficiently clear?
- Which instructions should be clarified or expanded?
- Are the definitions provided sufficiently clear?
- Are there definitions which require further clarification?
- Are there any additional terms which should be defined?
- Are the reporting units specified in the forms consistent with those generally used by your firm for record-keeping and reporting purposes?

ERA is cognizant of the need to collect the data required on the ERA-300A and ERA-300B and of the burden that the reporting requirement may have on the respondent. Therefore, ERA encourages potential respondents to submit comments concerning these reporting forms to enable the development of a comprehensive reporting document with a minimum imposition of respondent burden.

III. REQUEST FOR CONFIDENTIAL TREATMENT

If you wish to file a document with ERA claiming that some or all of the information contained in the document is exempt from the mandatory public disclosure requirements of the Freedom of Information Act (5 U.S.C. 552 (1970) as amended) or is otherwise exempt by law from public disclosure, and if you wish to request ERA not to disclose such information, you must disclose which information you wish to claim confidential treatment. You must indicate in the original document that it is confidential or contains confidential information and file a concise statement specifying the justification or non-disclosure of the information

V 43/233 DEC 4 78 UMI

for which confidential treatment is claimed. If you state that the information comes within the exception in 5 U.S.C. 552(b)(4) for trade secrets and commercial or financial information or is covered by 18 U.S.C. 1905, you must include a concise statement specifying that such information is privileged or confidential.

If you indicate that a document is confidential and fail to submit a second copy of the document with the confidential information deleted, the ERA may assume that there is no objection to public disclosure of the document in its entirety.

The ERA retains the right to make its own determination with regard to any claim of confidentiality. Notice of the decision by ERA to deny each claim in whole or in part, and an opportunity to respond will be given to the person claiming confidentiality of information no less than 48 hours prior to the public disclosure of such information.

IV. Clarity of Instruction and Definitions

If certain instructions or definitions accompanying the form are ambiguous, they should be identified and suggestions on how to clarify the obscurities submitted.

Issued at Washington, D.C., on November 27, 1978.

Hazel R. Rollins,
Deputy Administrator, Economic Regulatory Administration.

[6450-01-C]

ERA-300A

U.S. DEPARTMENT OF ENERGY
Washington, D.C. 20461

Draft 11/24/78

POWERPLANT PETITION FOR EXISTING FACILITY CLASSIFICATION

No petition may be approved unless a completed ERA-300A is received no later than 14 days following the effective date of the final Transitional Facility Regulations.

A separate form must be submitted for each combustion turbine, combined cycle unit, package boiler or field erected boiler for which you are seeking a classification.

1.0 IDENTIFICATION INFORMATION

What is the name, mailing address, city, state and zip code for the Facility, the Operating Company and the Parent Company, if applicable?

1.1 Facility Data (Site) — DOE USE ONLY
- (a) Name
- (b) Address
- (c) City, State Zip Code
- (d) County
- (e) Unit Identification

1.2 Operating Company — DOE USE ONLY
- (a) Name
- (b) Address
- (c) City, State Zip Code

1.3 Parent Company (Complete if applicable) — DOE USE ONLY
- (a) Name
- (b) Address
- (c) City, State Zip Code

1.4 Enter the name of the person in your company to whom questions regarding this petition may be directed:
- (a) Name
- (b) Title
- (c) Telephone, Including Area Code

1.5 For what type of facility are you seeking a classification? (Check one)
(a) ☐ Package Boiler (b) ☐ Field Erected Boiler (c) ☐ Combustion Turbine (d) ☐ Combined Cycle Unit

1.6 What is the capacity of the Transitional Facility
- (a) Combustion Turbine: _____ MMBTU's/Hour Heat Input
- (b) Boiler: _____ Pounds of Steam/Hour
- (c) Powerplant: _____ Megawatts Output

1.7 What is the Primary Energy Source and the Alternate Fuel Capability for this Facility?
(a) _____ Primary Energy Source (b) _____ Alternate Fuel Capability

2.0 ELIGIBILITY TO PETITION FOR AN EXISTING FACILITY CLASSIFICATION

2.1 Construction/Purchase Dates	(Month, Day, Year)	2.2 Facility Data	(Month, Day, Year)
(a) What is the date the purchase contract for the Transitional Facility was executed?		(a) If 1.5 (a) or (d) is checked above, enter the date the packaged boiler was delivered to site.	
(b) What is the date the construction contract for the Transitional Facility was executed?		(b) If 1.5 (b) is checked above, enter the date the boiler became operational.	
		(c) If 1.5 (c) is checked above, enter the date the combustion turbine was delivered to the site.	
		(d) If 1.5 (d) is checked above, enter the date the main steam drum was in place.	

2.3 Eligibility

You are eligible to petition for an Existing Facility Classification and may complete the remainder of this petition if:

(a) Either date entered in 2.1 was on or after April 20, 1977 and the date entered in 2.2 was on or before November 9, 1978. OR (b) Either date entered in 2.1 was prior to April 20, 1977 and the date entered in 2.2 is after Aoril 20. 1977.

IF YOU DO NOT MEET THESE REQUIREMENTS, YOU ARE INELIGIBLE TO PETITION FOR AN EXISTING FACILITY CLASSIFICATION.

3.0 SUPPORTING DOCUMENTATION

In support of your petition, you must complete and attach Schedule 3, Certified Statement of Delivery.

4.0 CLASSIFICATION OF CONSIDERATION

If you meet the eligibility requirements, check the appropriate box(es) to indicate the basis for consideration of your petition and submit the schedule(s) indicated.

(a) ☐ Electric Powerplant Petioning under Substantial Financial Penalty (Schedule 1)

(b) ☐ Powerplant Petitioning Under Impairment of Reliability (Schedule 2)

5.0 CERTIFICATION

I certify that the information contained herein and appended hereto is true and accurate to the best of my knowledge.

Name	Title	Signature	Date

Title 18, USC 1001, makes it a crime for any person knowingly and willingly to make to any Agency or Department of the United States any false, fictitious or fraudulent statements as to any matter within its jurisdiction.

Draft 11/24/78

ERA-300A

SCHEDULE 1 - CLAIM BASED ON SUBSTANTIAL FINANCIAL PENALTY

Complete this schedule only if your facility meets the Eligibility Requirements and is an Electric Powerplant Applying Under a Substantial Financial Penalty.

1.0 IDENTIFICATION DATA

1.1 What is the name of the Facility (Site)? _____ 1.2 What is the Unit Identification? _____

1.3 What is the name of the Operating Company? _____

2.0 EXPENDITURES/NON-RECOVERABLE OUTLAY DATA

Enter the expenditures incurred for each of the items listed in (a) below, assuming (1) that the Transitional Facility (Unit) is terminated and (2) that the Transitional Facility (Unit) is redesigned. Items of Cost are listed by accounts as prescribed for Public Utilities in the Federal Energy Regulatory Commission's (formerly Federal Power Commission) Uniform System of Accounts. (Report all costs in Thousands of Dollars)

	Account Code/Item of Cost (a)	Expenditures To 11/9/78 (b)	Required Future Expenditures As of 11/9/78 Terminated (c)	Required Future Expenditures As of 11/9/78 Redesigned (d)	Recoverable Expenditures Terminated (e)	Recoverable Expenditures Redesigned (f)	Non-Recoverable Outlays Terminated (g)	Non-Recoverable Outlays Redesigned (h)	Estimated Expenditures For a Comparable Coal Fired Unit (i)
		(Actual $)	(1978 Dollars)						
Basic Cost Items	2.1 312 Boiler Plant Equipment								
	(2) Boiler Feed System								
	(3) Boiler Plant Cranes								
	(4) Boiler & Equipment								
	(5) Breeching & Accessories								
	(6) Coal Handling & Storage Equipment								
	(7) Draft Equipment								
	(8) Gas-burning Equipment								
	(9) Instruments & Devices								
	(11) Oil Burning Equipment								
	(12) Pulverized Fuel Equip.								
	2.2 314 Turbogenerator Unit								
	(21) Turbogenerator-Main								
	2.3 316 Miscellaneous Powerplant Equipment								
	(2) Cranes & Hoisting Equip.								
	(5) Locomotive Cranes								
	(6) Locomotives								
	2.4 343 Prime Movers								
	(5) Combustion Turbine								
	2.5 Air Pollution Control Equip. (as defined in 10 CFR)								
	2.6 TOTAL BASIC COST ITEMS								
Additional Cost Items	2.7 311 Structures & Improvement								
	Boiler House								
	Cooling Ponds								
	2.8 312 Boilerplant Equipment								
	(1) Ash Handling Equipment, including Sludge Disposal								
	(13) Stacks								
	2.9 350 Structures & Improvement								
	Other Building								
	2.10 Roads, Railroads & Bridges								
	(3) Railroads								
	2.11 353 Station Equipment								
	2.12 315 Accessory Electric Equip)								
	2.13 TOTAL ADDITIONAL COST ITEMS								
	2.14 TOTAL BASIC COST ITEMS & ADDITIONAL COST ITEMS								

3.0 SUPPORTING DOCUMENTATION

You must submit the following documents in support of your request for a classification based on Substantial Financial Penalty. Enter an "X" in the boxes provided to indicated that the documents are attached.

3.1 ☐ Copies of the sections of the Engineering design plan and copies of environmental analyses or their summaries which describes in detail, the design specifications, the construction schedule and the estimated engineering and contingencies of the transitional facility.

3.2 ☐ Copies of the contracts concerned with the Purchase and and construction of the Transitional Facility (Unit).

3.3 ☐ An analysis of all capital expenditures for engineering, construction material and contingencies. Itemize in detail all project pahses by percentage completed and expenditures or obligated expenditures as of November 9, 1978. (All capital expenditures to November 9, 1978 should be reported in actual dollars and should include date expended.)

3.4 ☐ An analysis of all non-recoverable capital outlays that would result from termination, modification or rescheduling of your transitional facility construction project. Itemize in detail all non-recoverable outlays in 1978 dollars and all credits for equipment reused, any expenditures required for additional equipment or labor for modifying the transitional facilty for an alternate fuel burning capability. Include significant sections contracts or legal obligations concerned with the termination and cancellation of contracts. A separate analysis should be submitted for (1) the termination of the facilty construction and (2) the redirection for alternate fuel burning and their impact upon the rate base.

ERA-300A

SCHEDULE 2 - CLAIM BASED ON IMPAIRMENT OF RELIABILITY

Complete this schedule only if you are requesting consideration on the basis of an impairment of reliability.

1.0 IDENTIFICATION DATA

1.1 What is the name of the Facility (Site)? _____

1.2 What is the name of the Operating Company? _____

1.3 What is the Unit Identification? _____

1.4 What is the name of the Electrical Region? _____

1.5 Enter the date your Transitional Facility Became Operational. (Month,Day,Year) _____

1.6 Enter the projected date your Transitional Facility will become operational (Month,Day,Year) _____

1.7 Enter the estimated date your alternate Fuel Fired Powerplant will be operational (Month, Day, Year). _____

THE PERIOD BETWEEN THE DATE ENTERED in 1.5 or 1.6 AND THE DATE ENTERED IN 1.7 CONSTITUTES THE PERIOD OF DELAY.

2.0 RELIABILITY CONSIDERATIONS

Enter in megawatts for the years indicated: (a) the total projected capacity for the electric region, without the capacity from this Transitional Facility (unit), (b) the forecasted peakload for the electric region, (c) the capacity in excess of peakload and (d) the computation of the percentage effect on peakload.

	Projected Capacity (a)	Forecasted Peakload (b)	Capacity in Excess of Peakload (b-c) (c)	Percentage Effect On Peakload (c ÷ b) (d)
2.1 1978				
2.2 1979				
2.3 1980				
2.4 1981				
2.5 1982				
2.6 1983				
2.7 1984				
2.8 1985				
2.9 1986				
2.10 1987				
2.11 1988				

IF THE AMOUNT SHOWN IN COLUMN (d) IS LESS THAN .20 FOR ANY YEAR DURING THE PERIOD OF DELAY, A REQUEST FOR CLASSIFICATION AS AN EXISTING FACILITY BASED ON IMPAIRMENT OF RELIABILITY MAY BE CONSIDERED.

3.0 ADDITIONAL REQUIREMENTS

In support of your claim for a classification based on impairment of reliability, you must submit the following supporting documentation. Place an "X" in the box to indicate that the documentation is attached.

3.1 ☐ A description of the current generating capacity of the electrical region and a list of projected capacity addition by name and number of unit, owners, capacity, fuel type and alternate fuel. Annual contracted net purchases and sales to systems outside the region should also be identified by power level, by buyers and sellers.

3.2 ☐ A description of the interconnection with other utilities including emergency ratings for each connection and an estimate of any additions or delitions to these interconnections.

3.3 ☐ Copies of all contracts concerned with the purchase and construction of the transitional facility, to include the purchaser's design specifications contained in those contracts and a complete description of the transitional facility, if not included as a part of the contracts.

ERA-300A 9

SCHEDULE 3 - CERTIFIED STATEMENT OF DELIVERY

This schedule must be signed by the Duly Authorized Officer of the firm which manufactured the packaged boiler, Field Erected Boiler, Combustion Turbine or Combined Cycle Unit for the facility for which you are submitting a petition.

1.0 IDENTIFICATION DATA

1.1 What is the name, mailing address, city, state, zip code and facility identification for this facility?

(a) Name _____ (d) Facility Identification

(b) Address _____ _____

(c) City, State
Zip Code _____

1.2 Manufacturing Company Data

(a) Name _____

(b) Address _____

(c) City, State
Zip Code _____

2.0 DELIVERY DATA

2.1 What is the date of delivery of the packaged Boiler or Combustion Turbine Unit (single or combined cycle operation)

Month	Day	Year

2.2 What is the date the field erected boiler's main steam drum was in place?

Month	Day	Year

3.0 CERTIFICATION

I certify that the dates entered above are true and accurate to the best of my knowledge.

Name	Date	Signature
Title		

Title 18 USC 1001, makes it a crime for any person knowingly and willingly to make to any Agency or Department of the United States any false, fictitious or fraudulent statements as to any matter within its jurisdiction.

DEPARTMENT OF ENERGY, ECONOMIC REGULATORY ADMINISTRATION, POWERPLANT PETITION FOR EXISTING FACILITY CLASSIFICATION, ERA 300A

I. Authority/Purposes. This petition form is required, pursuant to the provisions of Title 10 of the Code of Federal Regulations, Part 515 and Public Law 95-620 Powerplant and Industrial Fuel Use Act (FUA), to complete a petition to the Economic Regulatory Administration (ERA) for classification as an "existing" facility under the meaning of FUA. The information provided by the petition form will be used by ERA to perform the evaluation for classification as "existing."

II. Who May Submit. Form ERA 300A may be submitted by owners of facilities (units) for which acquisition and construction was commenced between April 20, 1977 and November 9, 1978. These facilities are considered "new" under FUA unless you petition ERA to classify the facility as "existing" under the meaning of FUA, and your petition is granted by ERA. Form ERA 300A is the means by which this petition may be made.

III. To Whom. Submit Form ERA 300A in triplicate (3) to: Department of Energy, Economic Regulatory Administration, ERA Docket—ERA-R-78-21, 2000 M Street NW., Room 2313, Washington, D.C. 20461.

IV. When to Report. The Form ERA 300A must be submitted to ERA no later than 14 days after the effective date of the Final Transitional Facility Regulations.

V. Section 1.0 *Identification Data.*

1.1 Facility Location Data (site): This information pertains to the site where your transitional facility is located.

(a) Enter the Name by which the facility site is identified.

(b) Enter the Street Address of the facility site.

(c) Enter the City, State and County in which the facility site is located and the ZIP Code of the address.

(d) Enter the specific identification of the transitional facility unit. For example boiler #234.

1.2 Operating Company Identification: This information relates to the company which has the actual responsibility for the operation of the transitional facility. Included under the meaning of company is any individual corporation, company, partnership, association, firm, institution, society, trust, joint venture, stock company, or municipal, county, State or Federal entity.

(a) Enter the Complete Name of the company.

(b) Enter the Street Address of the company.

(c) Enter the City and State where the company is located and the ZIP code for the address.

1.3 Parent Company Data: Complete this section only if there is an entity which controls, wholly or partially owns, or is responsible for the operating company.

(a) Enter the Name of the entity.

(b) Enter the Street Address of the entity.

(c) Enter the City and State where the entity is located and the ZIP code of the address.

1.4 Contact Person Identification: This information should relate to someone who can be contacted if there are questions regarding the information contained in this petition.

(a) Enter the Name of the individual.

(b) Enter the Title by which the individual is identified in the company.

(c) Enter the Area Code and the Telephone Number at which the individual can be reached during normal working hours.

1.5 Check the appropriate box that indicates the type of unit for which you are requesting classification.

1.6 (a) Indicate the capacity of the transitional facility in British Thermal Units (BTU's) per hour in millions (input) for boilers and combustion turbines.

(b) Indicate the capacity of the transitional facility in Pounds of Steam per Hour (output) for powerplant boilers.

(c) The capacity of the Powerplant in Megawatts.

1.7 (a) Indicate the Primary Energy Source Used for all purposes except for minimum amounts required for start-up, testing, flame stabilization and control.

(b) Indicate any Alternate Fuel(s) capability the transitional facility may have.

Section 2.0 *Eligibility to petition for an existing facility classification.*

2.1 (a) Purchase Contract Date: Enter here the date that the contract for the purchase of the transitional facility unit was executed. For example, if the date was June 30, 1977, enter 06/30/77.

(b) Construction Contract Date: Enter here the date that the contract for the construction of the transitional facility unit was executed. For example, if the date was August 3, 1977, enter 08/03/77.

2.2 (a) If your transitional facility is a packaged boiler or a combined cycle unit that will utilize a packaged boiler, enter the date the packaged boiler was delivered to the facility site.

(b) If your transitional facility is a field erected boiler, enter the date that the boiler became operational.*

(c) If your transitional facility is a combustion turbine, enter the date the combustion turbine was delivered to the facility site.

(d) If your transitional facility is a combined cycle unit that will utilize a field erected boiler, enter the date that the main steam drum of the boiler was put in place.

Section 4.0 *Classification of consideration.*

Indicate in this section what the basis of your petition to ERA will be. Check the appropriate box(es) to indicate whether you are petitioning for consideration under Substantial Financial Penalty, or Impairment of Reliability. Note that each item has a schedule indicated. For each item checked you must complete the appropriate schedule.

Section 5.0 *Certification.*

(1) If you file a petition under this part, on behalf of a corporation, the duly authorized officer of the corporation shall attest in writing to the accuracy of all information contained in or appended to your petition.

(2) If you are filing a petition under this part on behalf of a wholly-owned subsidiary, then the requirements of Paragraph (1) shall apply to the subsidiary and to the parent corporation as well. (Two signatures required.)

(3) If you are filing on behalf of an entity other than a corporation, the duly authorized officer shall attest in writing to the accuracy of all information contained in or appended to your petition.

*As determined in accordance with this form and the FUA regulations governing transitional facilities.

SCHEDULE I—CLAIM BASED ON SUBSTANTIAL FINANCIAL PENALTY

This Schedule is to be used by Powerplants (Utilities) under the Substantial Financial Penalty classification.

1.0 *Identification data.*

1.1 Facility Name: Enter the name of the facility. This should be the same name that appears in item 1.1(a) on the Petition for Existing Facility Classification form.

1.2 Unit Identification: Enter the specific identification of the transitional unit. This should be the same name that appears in Item 1.1(d) on the Petition for Existing Facility Classification form.

1.3 Operating Company Name: Enter the name of the company that holds the responsibility for the operation of the Transitional Facility (unit). This should be the same name that appears in 1.2(a) of the Petition for Existing Facility Classification.

2. *Expenditures/non-recoverable outlay data.*

You may enter expenditures resulting from project termination, and/or enter expenditures resulting from project redesign.

Items of Cost Column (a) are listed by Accounts as prescribed for Public Utilities in The Federal Power Commission's Uniform Systems of Accounts currently in effect. All expenditures and outlay entered under Column (b) through (i) are restricted only to those items listed under Column (a) and specified by account and section number. (e.g. Boiler Plant Equipment (account 312) (2) Boiler Feed System would include only items as listed in section (2))

2.1-2.11 Enter for each Item of Cost under:

Column (b)—Expenditures as of November 9, 1978.

Expenditures in actual dollars (in thousands) for the project to November 9, 1978.

Column (c) or (d)—Required Future Expenditures:

Amounts in 1978 dollars (in thousands) of additional future expenditures required due to termination or redesign of project bound by legal obligations made prior to November 9, 1978.

Columns (e) or (f)—Recoverable Expenditures:

Amounts in 1978 dollars (in thousands) which are credits against (a) Expenditures to Date of Enactment and (b) Required Future Expenditures. This includes credit for equipment, material and properties which can be salvaged, sold, or reused.

Columns (g) or (h)—Non-Recoverable Outlays:

Amounts in 1978 dollars (in thousands). These numbers equal the difference between the sum of Expenditures to November 9, 1978 and Required Future Expenditures minus Recoverable Expenditures, Columns (b+c)−e=g or (b+d)−f=h.

You should compute (for each column (b) through (i) separately):

1. Total Basic Cost (Item 2.6) by adding Item 2.1 through 2.5.

Total Additional Cost (Item 2.13) by adding Items 2.7 through 2.12.

3. Total Basic Cost Items and Additional Cost Items (Item 2.14) by adding Items 2.6 and 2.13.

4. Total Basic Cost Items and Additional Cost Items (Item 2.14) by adding Items 2.6 and 2.13.

5. Total Recoverable Expenditures (Item 2.15) by adding Items 2.7 through 2.12.

6. Total Non-Recoverable Outlays (Item 2.16) by adding Items 2.1 through 2.5.

7. Total Recoverable Expenditures and Total Non-Recoverable Outlays (Item 2.17) by adding Items 2.15 and 2.16.

8. Total Basic Cost Items and Additional Cost Items (Item 2.14) minus Total Recoverable Expenditures and Total Non-Recoverable Outlays (Item 2.17) by subtracting Item 2.17 from Item 2.14.

3.0 *Certification.*

(1) If you file a petition under this part, on behalf of a corporation, the duly authorized officer of the corporation shall attest in writing to the accuracy of all information contained in or appended to your petition.

(2) If you are filing a petition under this part on behalf of a wholly-owned subsidiary, then the requirements of Paragraph (1) shall apply to the subsidiary and to the parent corporation as well. (Two signatures required.)

(3) If you are filing on behalf of an entity other than a corporation, the duly authorized officer shall attest in writing to the accuracy of all information contained in or appended to your petition.

SCHEDULE II—CLAIM BASED ON IMPAIRMENT OF RELIABILITY

This Schedule is to be used by Powerplants (Utilities) under the Impairment of Reliability classification.

1.0 *Identification data.*

1.1 Facility Name: Enter the name of the facility. This should be the same name that appears in item 1.1(a) on the Petition for Existing Facility Classification form.

1.2 Unit Identification: Enter the specific identification of the transitional unit. This should be the same name that appears in Item 1.1(d) on the Petition for Existing Facility Classification form.

1.3 Operating Company Name: Enter the name of the company that holds the responsibility for the operation of the Transitional Facility (unit). This should be the same name that appears in 1.2(a) of the Petition for Existing Facility Classification.

2. *Expenditures/non-recoverable outlay data.*

You may enter expenditures resulting from project termination, and/or enter expenditures resulting from project redesign.

Items of Cost Column (a) are listed by Accounts as prescribed for Public Utilities in The Federal Power Commission's Uniform Systems of Accounts currently in effect. All expenditures and outlay entered under Column (b) through (i) are restricted only to those items listed under Column (a) and specified by account and section number. (e.g. Boiler Plant Equipment (account 312) (2) Boiler Feed System would include only items as listed in section (2))

2.1-2.11 Enter for each Item of Cost under:

Column (b)—Expenditures as of November 9, 1978.

Expenditures in actual dollars (in thousands) for the project to November 9, 1978.

Column (c) or (d)—Required Future Expenditures:

Amounts in 1978 dollars (in thousands) of additional future expenditures required due to termination or redesign of project bound by legal obligations made prior to November 9, 1978.

Columns (e) or (f)—Recoverable Expenditures:

Amounts in 1978 dollars (in thousands) which are credits against (a) Expenditures to Date of Enactment and (b) Required Future Expenditures. This includes credit for equipment, material and properties which can be salvaged, sold, or reused.

Columns (g) or (h)—Non-Recoverable Outlays:

Amounts in 1978 dollars (in thousands). These numbers equal the difference between the sum of Expenditures to November 9, 1978 and Required Future Expenditures minus Recoverable Expenditures, Columns (b+c)−e=g or (b+d)−f=h.

You should compute (for each column (b) through (i) separately):

1. Total Basic Cost (Item 2.6) by adding Item 2.1 through 2.5.

Total Additional Cost (Item 2.13) by adding Items 2.7 through 2.12.

3. Total Basic Cost Items and Additional Cost Items (Item 2.14) by adding Items 2.6 and 2.13.

[6450-01-C]

4. Total Basic Cost Items and Additional Cost Items (Item 2.14) by adding Items 2.6 and 2.13.

5. Total Recoverable Expenditures (Item 2.15) by adding Items 2.7 through 2.12.

6. Total Non-Recoverable Outlays (Item 2.16) by adding Items 2.1 through 2.5.

7. Total Recoverable Expenditures and Total Non-Recoverable Outlays (Item 2.17) by adding Items 2.15 and 2.16.

8. Total Basic Cost Items and Additional Cost Items (Item 2.14) minus Total Recoverable Expenditures and Total Non-Recoverable Outlays (Item 2.17) by subtracting Item 2.17 from Item 2.14.

3.0 *Certification.*

(1) If you file a petition under this part, on behalf of a corporation, the duly authorized officer of the corporation shall attest in writing to the accuracy of all information contained in or appended to your petition.

(2) If you are filing a petition under this part on behalf of a wholly-owned subsidiary, then the requirements of Paragraph (1) shall apply to the subsidiary and to the parent corporation as well. (Two signatures required.)

(3) If you are filing on behalf of an entity other than a corporation, the duly authorized officer shall attest in writing to the accuracy of all information contained in or appended to your petition.

V 4 3 / 2 3 3

SCHEDULE 2—CLAIM BASED ON IMPAIRMENT OF ELECTRIC RELIABILITY

This schedule can be completed only if your transitional facility is an electric powerplant which produces electric power for purposes of sale or exchange and you are basing your claim for classification as an existing facility on an impairment of reliability.

Section 1.0 *Identification data.*

1.1 Enter the Name of the facility: This should be the same name that was entered in item 1.1(a) on the Petition for Existing Facility Classification form.

1.2 Name of Operating Company: Enter the name of the company that has operational responsibility for the transitional facility unit. The name entered here should be the same as was entered in 1.2(a) on the Petition for Existing Facility Classification.

1.3 Name of Electric Region: Enter here the Name of the electric region that the transitional facility powerplant is located in. (Note a complete listing of the Electric Regions is provided in the appendix to the definition section of this petition form.)

Section 2.0 *Reliability considerations.*

(a) Total Electric Region Capacity: Enter the total capacity of the electric region of which the transitional facility powerplant is a part. Do not include the capacity of your transitional facility powerplant. Express this answer in whole megawatts and enter the total for the correct year and for each year during the period of delay, which starts with the original operational date for your transitional facility unit and ends with the estimated operational date of the comparable alternate fuel fired unit.

[6450-01-C]

Draft 11/24/78

ERA-300B

U.S. DEPARTMENT OF ENERGY
Washington, D.C. 20461

MAJOR FUEL BURNING INSTALLATION PETITION FOR EXISTING FACILITY CLASSIFICATION

No petition may be approved unless a completed ERA-300B is received no later than 14 days following the effective date of the final Transitional Facility Regulations.

A separate form must be submitted for each combustion turbine, combined cycle unit, package boiler or field erected boiler for which you are seeking a classification.

1.0 IDENTIFICATION INFORMATION

What is the name, mailing address, city, state and zip code for the Facility, the Operating Company, and the Parent Company, if applicable?

1.1 Facility Data (Site) — DOE USE ONLY
(a) Name
(b) Address
(c) City, State Zip Code
(d) County
(e) Unit Identification

1.2 Operating Company — DOE USE ONLY
(a) Name
(b) Address
(c) City, State Zip Code

1.3 Parent Company (Complete if applicable) — DOE USE ONLY
(a) Name
(b) Address
(c) City, State Zip Code

1.4 Enter the name of the person in your company to whom questions regarding this petition may be directed:
(a) Name
(b) Title
(c) Telephone, Including Area Code

2.0 FACILITY OPERATIONAL INFORMATION

2.1 What is the designed capacity of your Transitional Facility (unit)?
(a) _____ MMBTU's/Hour Heat Input (b) If the unit is a boiler: _____ Pounds of Steam/Hour Output

2.2 If your transitional facility (unit) is operational, enter the date the unit became operational
[ ][ ][ ] (Month, Day, Year)

2.3 If your transitional facility (unit) is a Major Fuel Burning Installation that has 150 Million British thermal units per hour heat input design capacity or less, and the unit was operational on or before April 20, 1978, you need not complete the remainder of this petition. Proceed directly to 7.0.

3.0 FACILITY INFORMATION

3.1 What is the name and Standard Industrial Classification Code for the primary end product(s) manufactured utilizing the energy output of the transitional facility unit? If the SIC is unknown, enter the product only and DOE will enter the SIC.

	(a)	(b)	(c)	(d)
1. Name of Product				
2. Four Digit SIC				

3.2 For what type of facility are you seeking a classification? (Check One)
(a) ☐ Package Boiler (b) ☐ Field Erected Boiler (c) ☐ Combustion Turbine (d) ☐ Combined Cycle Unit

3.3 What is the Primary Energy Source and the Alternate Fuel Capability for this Facility?
(a) _____ Primary Energy Source (b) _____ Alternate Fuel Capability

4.0 ELIGIBILITY TO PETITION FOR AN EXISTING FACILITY CLASSIFICATION

4.1 Construction/Purchase Dates (Month, Day, Year)	4.2 Facility Dates (Month, Day, Year)
(a) What is the date the purchase contract for the Transitional Facility was executed?	(a) Enter the date the packaged boiler was delivered to site.
	(b) Enter the date the main steam drum was formed
(b) What is the date the construction contract for the Transitional Facility was executed?	(c) Enter the date the combustion turbine was delivered to the site.

4.3 Eligibility
You are eligible to petition for an Existing Facility Classification and may complete the remainder of this petition only if:
(a) Either date entered in 4.1 was on or after April 20, 1977 and the date entered in 4.2 was on or before November 9, 1978. OR (b) Either date entered in 4.1 was prior to April 20, 1977 and the date entered in 4.2 is after April 20, 1977.

IF YOU DO NOT MEET THESE REQUIREMENTS, YOU ARE INELIGIBLE TO PETITION FOR AN EXISTING FACILITY CLASSIFICATION.

5.0 SUPPORTING DOCUMENTATION

In support of your petition, you must complete and attach Schedule 3, Certified Statement of Delivery.

6.0 CLASSIFICATION OF CONSIDERATION

Check the appropriate box(es) to indicate the basis for consideration of your petition and submit the schedule(s) indicated.
(a) ☐ MFBI Petition Under Substantial Financial Penalty (Schedule 1)
(b) ☐ MFBI Petition for Significant Operational Detriment Under Substantial Mitigating Circumstances (Schedule 2)
(c) ☐ MFBI Petitioning for Significant Operational Detriment Under Load Shifting Criteria (Schedule 2)

7.0 CERTIFICATION

I certify that the information contained herein and appended hereto is true and accurate to the best of my knowledge.

Name	Title	Date	Signature

Title 18, USC 1001, makes it a crime for any person knowingly and willingly to make to any Agency or Department of the United States any false, fictitious or fraudulent statements as to any matter within its jurisdiction.

SCHEDULE 1 - CLAIM BASED ON SUBSTANTIAL FINANCIAL PENALTY

Complete this schedule only if your facility meets the Eligibility Requirements and is an Major Fuel Burning Installation Applying Under a Substantial Financial Penalty

1.0 IDENTIFICATION DATA

1.1 What is the name of the Facility (Site)? _____ 1.2 What is the Unit Identification? _____

1.3 What is the name of the Operating Company? _____

2.0 EXPENDITURES/NON-RECOVERABLE OUTLAY DATA

Enter the expenditures incurred for each of the items listed in (a) below, assuming (1) that the Transitional Facility (Un is terminated and (2) that the Transitional Facility (Unit) is redesigned. Do not include costs associated with land, labo engineering, contingency, facilities and site construction. (Report all costs in Thousands of Dollars)

Item of Cost (a)	Expenditures To 11/9/78 (b)	Required Future Expenditures As of 11/9/78		Recoverable Expenditures		Non-Recoverable Outlays		Estimated Exp For a Compara Sized Coal Fi Unit (i)
		Terminated (c)	Redesigned (d)	Terminated (e)	Redesigned (f)	Terminated (g)	Redesigned (h)	
	(Actual $)	(1978 Dollars)						
2.1 Boiler								
2.2 Combustion Turbine								
2.3 Steam Turbine								
2.4 Air Pollution Equip.								
2.5 Fuel Handling Equip. (Coal)								
(1) Coal Tower								
(2) Thawing Shed								
(3) Car Dumper								
(4) Conveyor(s)								
(5) Front End Loader(s)								
(6) Breaker								
(7) Coal Hopper, Silo, Bunker								
(8) Coal Feeders								
(9) Coal Seales								
(10) Pulverizers or Ball Mills								
(11) Primary Air System								
2.6 Fuel Handling Equip. (Oil)								
(1) Oil Storage Tanks								
(2) Heaters								
(3) Pumps								
(4) Control Valves								
2.7 TOTAL BASIC COST ITEMS								
2.8 Boiler House								
2.9 Other Buildings								
2.10 Stack								
2.11 Ash Handling Equipment								
2.12 Sludge Disposal Equipment								
2.13 Ponding								
2.14 Substation Power Generation								
2.15 Rail Spur or Barge								
2.16 Controls								
2.17 TOTAL ADDITIONAL COST ITEMS								
2.18 TOTAL BASIC COST ITEMS & ADDITIONAL COST ITEMS								

Additional Cost Items

3.0 COMPARISON COMPUTATION

3.1 Enter the amount shown in 2.7(i) _____

3.2 Multiply this amount by 25% x .25

3.3 Enter the product _____

4.0 PETITION CONSIDERATION

4.1 If the amount entered in 2.7 (g) or (h) is equal to or greater than the amount entered in 3.3, ERA will consider your request for a classification as an Existing Facility based on Substantial Financial Penalty.

4.2 If the amounts entered in 2.7 (g) and (h) are both less than the amount entered in 3.3, ERA will not consider your reques for a classification as an Existing Facility based on Substantial Financial Penalty.

5.0 SUPPORTING DOCUMENTATION

You must submit the following documents in support of your request for a classification based on Substantial Financial Penalty. Enter an "X" in the boxes provided to indicated that the documents are attached.

5.1 ☐ Copies of the sections of the Engineering design plan and copies of environmental analyses or their summaries which describes in detail, the design specifications, the construction schedule and the estimated engineering and contingencies of the transitional facility.

5.2 ☐ Copies of the contracts concerned with the Purchase and and construction of the Transitional Facility (Unit).

5.3 ☐ An analysis of all capital expenditures for engineering, construction material and contingencies. Itemize in detail all project pahses by percentage completed and expenditures or obligated expenditures as of November 9, 1978. (All capital expenditures to November 9, 1978 should be reported in actual dollars and should include date expended.)

5.4 ☐ An analysis of all non-recoverable capital outlays that would result from termination, modification or rescheduling of your transitional facility construction project. Itemize in deta all non-recoverable outlays in 1978 dollars and all credits for equipment reused, any expenditu required for additional equipment or labor for modifying the transitional facility for an alte nate fuel burning capability. Include signific sections contracts or legal obligations concern with the termination and cancellation of contra A separate analysis should be submitted for (1) the termination of the facility constructio and (2) the redirection for alternate fuel burn and their impact upon the rate base.

ERA-300 B

Draft 11/24/78

SCHEDULE 2 - Claim Based on Significant Operational Detriment

Complete Schedule 2 only if your are a Major Fuel Burning Installation basing your claim for an Existing Facility Classification on a Significant Operational Detriment

1.0 IDENTIFICATION DATA

1.1 What is the Name of the Facility _____

1.2 What is the Unit Identification? _____

1.3 What is the name of the Operating Company? _____

1.4 What was the status of the Facility (Unit) on 11/9/78?

(a) ☐ Operational. Complete 2.0 and/or 5.0 below (b) ☐ Not Operational Complete 3.0 below

1.5 If the Facility is Operational, enter the date it became operational

Month	Day	Year

2.0 LOAD SHIFTING CRITERIA

Enter pounds of steam per hour output for boilers or BTU's per hour for combustion turbines. Do not include unscheduled downtime which was not maintenance on boiler inspection during which the facility was operational

	Pounds of Steam Per Hour (a)	BTU's Per Hour (b)
2.1 What is the expected operations out/input of the Transitional Facility?		
2.2 What was the average total output/input of all other existing operational units at the site which produced the same form or energy output as the Transitional Facility for the 12-month period ending 12/31/78?		
2.3 What is the total design output/input capacity of all other existing units at the site which produce the same form of energy output as the Transitional Facility?		

3.0 COMPUTATION OF SIGNIFICANT OPERATIONAL DETRIMENT CLASSIFICATION

3.1 Enter the sum of 2.1 and 2.2 _____

3.2 Compute 95 % of this sum x .95

3.3 Enter the product _____

4.0 PETITION CONSIDERATION

If the entry on line 3.3 is greater than the entry on line 2.3, ERA will consider your claim based on Substantial Operational Detriment

5.0 SUBSTANTIAL MITIGATING CIRCUMSTANCES

If there are substantial mitigating circumstances that will cause a significant operational detriment, should your facility not be classified as an existing facility, you may file under this section if you are an MFBI. Mitigating circumstances may be based on, but are not limited to following examples:

5.1 Status of construction and anticipated start up date.

5.2 Anticipated annual capacity utilization factor, as well as seasonal or other variations in use.

5.3 Potential impact on the loss of production which could not be rescheduled elsewhere.

5.4 Potential adverse impact on employment, which would include the number and types of jobs lost, the duration of unemployment and whether such jobs could be absorbed elsewhere within the parent company, if applicable.

V43/233 DEC 78 UMI

Draft 11/24/78

6.0 SUPPLEMENTAL DOCUMENTATION

If you cannot produce at least 95 percent of the capacity of your Transitional Facility or if you are applying under Mitigating Circumstances, you must submit the following supporting documentation.

6.1 ☐ Copies of contracts concerned with the purchase and construction of your Transitional Facility and a full accounting of the design specifications. The design specifications are to include but are not limited to a steam flow (pressure and temperature), heat balance coal analysis (BTU's/cubic foot/hour), furnace volume (cubic feet), tube spacing and velocity of flue gas (feet/second).

6.2 ☐ A description of the site at which the Transitional Facility is located to include as a minimum the following (a) location of the boiler, turbines, stack, coal yard, ash pond, waste water treatment plant, and 2 a floor plan of all building indicating the location of major items.

6.3 ☐ Worksheet Schedule 2A

6.4 ☐ If applicable, a statement containing any other relevant factors ERA should consider in making a decision on your claim.

Submit the following supplemental documentation only if the facility is not operational (Item 1. 4 (b) is checked.)

6.5 ☐ A Site Construction Status Report to include (a) the date major components were delivered to the site, (b) the date foundation work was completed, (c) the date the building structure work was completed, (d) the date on site component assembly was completed (e) a schedule of milestone leading to completion of facility, (f) the estimated date transitional facility will be placed in service.

6.6 ☐ If the construction of this facility has been completed, provide the operation status of the facility.

6.7 ☐ Provide the planned or actual capacity utilization factor of the unit and the planned or actual hours of operation per year and the annual average volume of each fuel to be used.

ERA-300B

SCHEDULE 3 - CERTIFIED STATEMENT OF DELIVERY

This schedule must be signed by the Duly Authorized Officer of the firm which manufactured the packaged boiler, Field Erected Boiler, Combustion Turbine or Combined Cycle Unit for the facility for which you are submitting a petition.

1.0 IDENTIFICATION DATA

1.1 What is the name, mailing address, city, state,zip code and facility identification for this facility?

(a) Name _____ (d) Facility Identification _____

(b) Address _____

(c) City,State
Zip Code _____

1.2 Manufacturing Company Data

(a) Name _____

(b) Address _____

(c) City, State
Zip Code _____

2.0 DELIVERY DATA

2.1 What is the date of delivery of the packaged Boiler or Combustion Turbine Unit (single or combined cycle operation)

Month	Day	Year

2.2 What is the date the field erected boiler's main steam drum was formed?

Month	Day	Year

3.0 CERTIFICATION

I certify that the dates entered above are true and accurate to the best of my knowledge.

Name	Date	Signature
Title		

Title 18 USC 1001, makes it a crime for any person knowingly and willingly to make to any Agency or Department of the United States any false, fictitious or fraudulent statements as to any matter within its jurisdiction.

DEPARTMENT OF ENERGY ECONOMIC REGULATORY ADMINISTRATION MAJOR FUEL BURNING INSTALLATION PETITION FOR EXISITING FACILITY CLASSIFICATION ERA 300B

I. Authority/Purposes. This petition form is required, pursuant to the provisions of Title 10 of the Code of Federal Regulations, Part 515 and Public Law 95-620 Powerplant and Industrial Fuel Use Act (FUA), to complete a petition to the Economic Regulatory Administration (ERA) for classification as an "existing" facility under the meaning of FUA. The information provided by the petition form will be used by ERA to perform the evaluation for classification as "existing."

II. Who May Submit. Form ERA 300B may be submitted by owners of facilities (units) for which acquisition and construction was commenced between April 20, 1977 and November 9, 1978. These facilities are considered "new" under FUA unless you petition ERA to classify the facility as "existing" under the meaning of FUA, and your petition is granted by ERA. Form ERA 300B is the means by which this petition may be made.

III. To Whom. Submit Form ERA 300B in triplicate (3) to:
Department of Energy
Economic Regulatory Administration
ERA Docket—ERA-R-78-21
2000 M Street, N.W., Room 2313, Washington, D.C. 20461

IV. When to Report. The Form ERA 300-B must be submitted to ERA no later than 14 days after the effective date of the final Transitional Facility Regulations.

V. Section 1.0 *Identification data.*

1.1 Facility Location Data (site): This information pertains to the site where your transitional facility is located.

(a) Enter the Name by which the facility site is identified. For example, General Motors Lansing Plant #2

(b) Enter the Street Address of the facility site

(c) Enter the City, State and County in which the facility site is located and the ZIP code of the address

(d) Enter the specific identification of the transitional facility unit. For example, Boiler #234.

1.2 Operating Company Identification: This information relates to the company which has the actual responsibility for the operation of the transitional facility. Included under the meaning of the company is any individual corporation, company, partnership, association, firm, institution, society, trust, joint venture, stock company, or municipal, county, state or Federal entity.

(a) Enter the Complete Name of the company

(b) Enter the Street Address of the company

(c) Enter the City and State where the company is located and the ZIP code for the address

1.3 Parent Company Data: Complete this section only if there is an entity which controls, wholly or partially owns, or is responsible for the operating company

(a) Enter the Name of the entity

(b) Enter the Street Address of the entity

(c) Enter the city and State where the entity is located and the ZIP code of the address.

1.4 Contact Person Identification: This information should relate to someone who can be contacted if there are questions regarding the information contained in this petition.

(a) Enter the Name of the individual.

(b) Enter the Title by which the individual is identified in the company.

(c) Enter the Area Code and Telephone Number at which the individual can be reached during normal working hours.

Section 2.0 *Facility operational information.*

2.1 Enter the design heat input of your transitional facility unit (expressed in millions of BTUs). If your transitional facility unit is a boiler also add the design output capacity of the unit expressed in pounds of steam per hour.

2.2 Enter the date your transitional facility unit became operational.

Section 3.0 *Facility information.*

3.1 Industrial Classification Code: This information pertains to the end products which will be produced using the energy output of the transitional facility unit.

(a), (b), (c), Enter the four digit Standard Industrial Code for the end product(s)

(d) If the Standard Industrial Code is not known, enter the common name of the product(s)

3.2 Check the appropriate box to indicate the type of unit your transitional facility is. For example, if your unit is a packaged boiler, check the box next to "packaged boiler."

3.3 Indicate the Primary Fuel energy source used for all purposes except for minimum amounts required for start-up, testing, flame stabilization and control.

Indicate any Alternate Fuel(s) capability the transitional facility may have.

Section 4.0 *Eligibility to petition for an existing facility classification.*

4.1 (a) Purchase Contract Date: enter here for the Date that the contract for the purchase of the transitional facility unit was executed. For example, if the date was August 3, 1977, enter 08/03/77.

(b) Construction Contract Date: Enter here the Date that the contract for the construction of the transitional facility unit was executed. For example if the date was August 3, 1977, enter 08/03/77.

4.2 (a) If your transitional facility is a packaged boiler or a combined cycle unit that will utilize a packaged boiler, enter the date the packaged boiler was delivered to the facility site.

(b) If your transitional facility is a field erected boiler or a combined cycle unit that will utilize a field erected boiler, enter the date that the main steam drum of the boiler was formed at the boiler factory.

(c) If your transitional facility is a combustion turbine, enter the date the combustion turbine was delivered to the facility site.

Section 6.0 *Classification of Consideration.* Indicate in this section what the basis of your petition to ERA will be. Check the appropriate box(es) to indicate whether you are petitioning for consideration under Substantial Financial Penalty, Significant Operational Detriment. Note that each item has a schedule indicated. For each item checked you must complete the appropriate schedule. To verify that you are eligible to petition under any of these classifications, check the parenthetical numbers listed on the form.

You are not eligible to petition under load shifting unless you were operational on or before November 9, 1978.

You may petition under substantial mitigating circumstances if you are operational or non-operational.

Section 7.0 *Certification.*

(1) if you file a petition under this part, on behalf of a corporation, the duly authorized officer of the Company shall attest in writing to the accuracy of all information contained in or appended to your petition.

(2) If you are filing a petition under this part, on behalf of a wholly-owned subsidiary, then the requirements of Paragraph (1) shall apply to the subsidiary and to the parent corporation as well. (Two signatures required.)

(3) If you are filing on behalf of an entity other than a corporation, the duly authorized officer shall attest in writing to the accuracy of all information contained in or appended to your petition.

SCHEDULE I—CLAIM BASED ON SUBSTANTIAL FINANCIAL PENALTY

This Schedule is to be used by Major Fuel Burning Installations (MFBI) under the Substantial Financial Penalty classification.

1.0 Identification data.

1.1 Facility Name:

(a) Enter the name of the facility. This should be the same name that appears in item 1.1(a) on the Petition for Existing Facility Classification form.

(b) Enter the specific identification of the transitional unit. This should be the same name that appears in Item 1.1(d) on the petition for existing facility Classification form.

1.2 Unit Identification (See Sheet A).

1.3 Operating Company Name: Enter the name of the company that holds the responsibility for the operation of the Transitional Facility (unit). This should be the same name that appears in 1.2(a) of the Petition for Existing Facility Classification.

2.0 Expenditures/non-recoverable outlay data.

You may enter under expenditures resulting from project termination, and/or enter expenditures resulting from project redesign.

2.1-2.16 Enter for each Item of Cost under:

Column (b) Expenditures as of November 9, 1978. Expenditures in actual dollars (in thousands) for the project to November 9, 1978.

Column (c) or (d) Required Future Expenditures: Amounts in 1978 dollar (in thousands) of additional future expenditures required due to termination or redesign of project bound by legal obligations made prior to November 9, 1978.

Column (e) or (f) Recoverable Expenditures: Amounts in 1978 dollars (in thousands) which are credits against (a) Expenditures to Date of Enactment and (b) Required Future Expenditures. This includes credit for equipment, material and properties which can be salvaged, sold, or reused.

Column (g) or (h) Non-Recoverable Outlays: Amounts in 1978 dollars (in thousands). These numbers equal the difference between the sum of Expenditures to November 9, 1978 and Required Future Expenditures minus Recoverable Expenditures, Columns (b+c)−e=g or (b+d)−f=h.

You should compute (for each column (b) Through (i) separately:

1. Total Basic Items (Item 2.7) by adding 2.1 through 2.6.

2. Total Additional Cost (Item 2.17) by adding Items 2.8 through 2.16.

V 4 3 / 2 3 3 D E 4 7 8 UMI

3. Total Basic Cost Items and Additional Cost Items (Item 2.18) by adding Item 2.7 and 2.17.

INSTRUCTIONS FOA SCHEDULE 2—CLAIM BASED ON SIGNIFICANT OPERATIONAL DETRIMENT

This schedule is to be used by Major Fuel Burning Installations (MFBI) only.

Identification Data

1.1 Facility Location Data (Site): Enter the name of the facility. This should be the same name that was entered in item 1.1(a) on the petition for existing facility classification form.

1.2 Unit Identification: Enter the specific identification of the transitional facility unit. This should be the same as was entered in item 1.1(d) of the petition for existing facility classification form.

1.3 Operating Company Name: Enter the name of the company that holds the responsibility for the operation of the transitional facility unit. The name entered here should be the same as was entered in 1.2(a) of the Petition for Existing Facility Classification.

1.4 Unit Operational Status: Check the operational status of your transitional facility unit as of November 9, 1978. If your unit became operational (see definitions) on or before November 9, 1978, you should check OPERATIONAL. If your unit became operational after November 9, 1978, you should check NOT OPERATIONAL.

2.0 and 3.0 *Significant operational detriment determination.*

This section contains the criteria that will allow you to base your claim for classification as an existing facility on significant operational detriment. There are two criteria. The first is the LOAD SHIFTING CRITERION and the second is the SUBSTANTIAL MITIGATING CIRCUMSTANCES criterion. If your unit was not operational November 9, 1978, you may base your claim only on substantial mitigating circumstances. If your unit was operational November 9, 1978, you may base your claim on one of both of the criteria.

2.1 Load Shifting Criterion:

2.1 Enter item c or item g for transitional facility from the work sheet Schedule 2a. (See definition of Operational)

2.2 Enter the total of Other Operational Units. (columns c and/or g only) from the work sheet Schedule 2a.

2.3 Enter the total of Other Operational Units (columns a and/or e only) from the work sheet Schedule 2a.

2.4(a) Add the pounds of steam per hour output or BTUs per hour input from 2.1 and 2.2 together and enter total.

2.4(c) Multiply the entry in 2.4(a) by .95 and enter the result.

3.0 *Substantial mitigating circumstances criterion.*

Listed in this section are several examples of what might be mitigating circumstances. This list is not all-inclusive and is not intended to limit your petition to only these mitigating circumstances. You may base your claim on whatever mitigating circumstances you feel are appropriate, however, you must be able to demonstrate to ERA that mitigating circumstances will cause significant operational detriment.

INSTRUCTIONS FOR SCHEDULE 2A

Supplemental Documentation for Petition Based on Significant Operational Detriment.

This item must be completed if you are petitioning for consideration based on the load shifing criteria of Significant Operational Detriment.

Begin by completing the line marked "Transitional Facility." reading across the page you must complete the columns that apply to your transitional facility unit. For example if your transitional facility unit is a boiler you would have to complete columns A. B. C. D. H. I. J and K. If your transitional facility unit is a combustion turbine you must complete columns E. F. G. H. I. J and K.

You must than complete one line for each operational unit at the same site as your transitional facility unit that can provide the same energy output as your transitional facility unit. If the unit is a boiler you must enter the appropriate information in columns E. F. G. H. I. J and K.

DEFINITIONS

Unless otherwise expressly provided, for purposes of this form, the term:

"Acquisition" means the physical delivery of a unit to the site and does not include mere transfer of title of ownership.

"Alternate fuel" means electricity or any fuel, other than natural gas or petroleum. The term includes—

(a) coal;

(b) solar energy;

(c) petroleum coke, shale oil, uranium, biomass, and municipal, industrial, or agricultural wastes, wood and renewable and geothermal energy sources;

(d) liquid, solid, or gaseous waste byproducts of refinery or industrial operations which are commercially unmarketable, either by reason of quality or quantity,

(e) any fuel dervied from an alternate fuel; and

(f) waste gases from industrial operations.

"Btu" means British thermal unit.

"Coal" means anthricite and bitminous and sub-bituminous coal; lignite and any fuel derivative thereof.

"Cogeneration facility" means an electric powerplant or a major fuel burning installation which produces (A) electric power and (B) any other form of useful energy (such as steam, gas or heat) which is, or will be, used for industrial, commerical, or space heating purposes.

"Combined cycle unit" means an electric power generating unit that consists of a combination of one or more combustion gas turbine units and one or more steam turbine units with the required energy input of the steam turbine(s) provided by and approximately matched to the energy in the exhaust gas from the combustion turbine unit(s). Use of small amounts of supplemental firing for the steam turbine does not preclude the unit from being a combined cycle unit.

"Comparable coal unit" means a coal-fired unit which will provide energy output equal to the output capacity of the transitional facility.

"Conference" means an informal meeting, incident to any proceeding, between DOE and any interested person.

"Construction" means substantial physical on-site construction of an electric powerplant or major fuel burning installation which constitutes more than clearance of a site, provision of access or installation of foundation pilings.

"Design capacity or capability" means, with reference to any boiler, gas turbine unit, combined cycle unit or internal combustion engine subject to the provisions of the Act, the design heat input capacity expressed in millions of BTU's per hour specified by the manufacturer of the subject unit.

"DOE" or "the Department" means the United States Department of Energy, as defined in Sections 201 and 301(a) of the Department of Energy Organization Act, including the Secretary of Energy or his designee.

"Electric Powerplant" and "powerplant" means any stationary electric generating unit, consisting of a boiler, a combustion turbine unit or a combined cycle unit, which produces electric power for purposes of sale or exchange and—

(a) has the design capability of consuming any fuel (or mixture thereof) at a fuel heat input rate of 100 million Btu's per hour or greater; or

(b) is in a combination of two or more electric generating units which are located at the same site and which in the aggregate have a design capability of consuming any fuel (or mixture thereof) at a fuel heat input rate of 250 million Btu's per hour or greater.

"Electric generating unit" does not include—

(a) any electric generating unit subject to the licensing jurisdiction of the Nuclear Regulatory Commission; and

(b) any cogeneration facility, less than half of the annual electric power generation of which is sold or exchanged for resale.

"Electric Region" means one of the 29 geographic areas identified in Appendix A at the end of this section.

"Electric utility" means any person, including any affiliate, or Federal agency, who sells electric power.

"ERA" means the Economic Regulatory Administration of the Department of Energy.

"Existing boiler" means any boiler other than a new boiler.

"Facility" means an electric powerplant or major fuel burning installation.

"FERC" means the Federal Energy Regulatory Commission.

"Formation of main stream drum" means when the drum plate has been pressed or rolled, the drum seams welded, and the stubs and nozzles welded o the drum.

"Impairment of reliability" means any delay caused by termination or redirection of the construction of your electric powerplant to provide alternate fuel burning capability during which the overall electric regions reserve margin will be less than 20 percent. The reserve margin percentage is computed by subtracting the normal peak load expected during the delay from the system's total capability, including the additional capacity that will be available through inter-connections, and dividing the result by the projected normal peak load during such delay.

"Intermediate load powerplant" means a powerplant (other than a peakload powerplant), the electrical generation of which in kilowatt hours does not exceed, for any 12-calendar-month period, such powerplant's design capacity multiplied by 3,500 hours.

"Internal combustion engine" means a heat engine in which the combustion that generates the heat takes place inside the engine proper.

"Loss of load" means the number of hours per year during which the total demand for

electicity within the region could exceed the available supply of generating capacity to the region.

"Major fuel burning installation," "installation" and "MFBI" mean a stationary unit consisting of a boiler, combustion turbine unit, combined cycle unit, including an internal combustion engine used for generation of electricity, which—

(a)(i) has a design capability of consuming any fuel, or mixture thereof, at a fuel heat input rate of 100 million Btu's per hour or greater; or

(ii) is in a combination of two or more such units which are located at the same site and which in the aggregate have a design capability of consuming any fuel, or mixture thereof, at a fuel heat input rate of 250 million Btu's per hour or greater.

(b) in determining whether units are at the same site for purposes of defining "new major fuel burning installations," ERA will presume that units within 10 miles of each other are located at the same site.

(c) "Major fuel burning installation," "installation," and "MFBI" do not include—

(i) any electric powerplant; or

(ii) any pump or compressor used solely in connection with the production, gathering, transmission, storage, or distribution of gases or liquids, but only if there is certification to ERA or such use.

"Mcf" means 1,000 cubic feet of natural gas.

Natural gas means any fuel consisting in whole or in part of natural gas; liquid petroleum gas; synthetic gas derived from petroleum or natural gas liquids; or any mixture of natural gas and synthetic gas, except as designated in (1)(iv) below.

(1) Natural gas does not include—

(i) natural gas which is commercially unmarketable either by reason of quality or quantity. Gas is commercially unmarketable when production from the well(s) does not provide adequate revenue to pay the operating expenses of production and distribution.

(ii) natural gas produced by the user from a well acquired by the user prior to July 18, 1977* the maximum efficient rate production rate of which is less than 250 million Btu's per day. For purposes of this subparagraph—

(A) "produced by the user" means that the user must own a working (mineral) interest in the gas being produced from the subject well(s).

(B) "maximum efficient production rate" means that rate at which production may be sustained without damage to the reservoir or the rate which may be sustained without damage to the ultimate recovery of gas through the well.

(iii) synthetic gas, derived from an alternate fuel which is not mixed with natural gas; or

(iv) natural gas for which the person proposing to use the gas certifies to ERA that:

(A) such person owns, or is entitled to receive, at the point of manufacture, synthetic gas derived from coal or another alternate fuel;

(B) the Btu content of such synthetic gas is equal to or greater than the Btu content of the natural gas to be converted by this subsection by reason of such certification, plus the approximate Btu content of any natural gas consumed or lost in transportation;

(C) such person delivers, or arranges for the delivery of, such synthetic gas to a pipeline or pipelines which by transport or displacement are capable of delivering such synthetic gas, mixed with natural gas, to such person; and

(D) all necessary permits, licenses, or approvals from appropriate Federal, State, and local agencies (including Indian tribes) have been obtained for construction and operation of the facilities for the manufacture of the synthetic gas involved, except that for purpose of the prohibition under Section 201(2) of the Act against powerplants being constructed without the capability of using coal or the construction of such synthetic gas facilities shall be required under this subparagraph to be certified and documented.

"New electric powerplant" means a stationary unit consisting of a boiler, gas turbine unit or combined cycle unit which—

(a)(i) has a design capacity of consuming any fuel (or mixture thereof) of a fuel heat input rate of 100 million Btu's per hour or greater; or

(ii) has in combination with all other units at the same site, whether new or existing, an aggregate design capability of consuming any fuel (or mixture thereof) at a fuel heat rate input rate of 250 million Btu's an hour or greater. For purposes of this clause, there shall be excluded any unit which has a design capability to consume any fuel (including any mixture thereof) that does not equal or exceed 50 million Btu's per hour, and

(b) which (i) was not operational as of April 20, 1977; (ii) which since April 20, 1977, has been reconstructed or refurbished or added to, to the extent that the cost of such reconstruction, refurbishment, or addition equals or exceeds 50 percent of the price of a replacement unit, or (iii) has been moved from one site to another since (the date of enactment);

(c) the term "new electric powerplant" does not include any unit deemed existing under Part 2515 of this Title.

"New major fuel burning installation" means a stationary unit consisting of a boiler, combustion turbine unit, combined cycle unit, or internal combustion engine including and internal combustion engine used for the generation of electricity which—

(a)(i) has a design capacity of consuming any fuel (or mixture thereof) at a fuel heat input rate of 100 million Btu's per hour or greater; or (ii) has in combination with all other units at the same site, whether new or existing, an aggregate design capability of consuming any fuel (or mixture thereof) at a fuel heat input rate of 250 million Btu's an hour or greater. For purposes of this clause, there shall be excluded any unit which has a design capability to consume any fuel (including any mixture thereof) that does not equal or exceed 50 million Btu's per hour; and

(b)(1) which was not operational as of April 20, 1977; or (ii) which since April 20, 1977, has been reconstructed or refurbished or added to, to the extent that the cost of such reconstruction refurbishment, or addition equals or exceeds 50 percent (iii) has been moved from one site to another since November 9, 1978.

(c) the term "new major fuel burning installation" does not include any unit deemed existing under Part 2515 of this Title.

"Non-boiler" means any stationary unit which is not a boiler and which consists of either a combustion turbine unit, combined cycle unit or internal combustion engine.

For the purposes of this Act, non-boilers includes any stationary internal combustion electric generating unit.

Petroleum means crude oil and products delivered from crude oil, other than—

(1) synthetic gas derived from crude oil and its derivatives;

(2) liquid petroleum gas;

(3) petroleum coke or waste gases from non-refinery industrial operations; and

(4) liquid, solid, or gaseous byproducts of refinery operations which are commercially unmarketable by reason of—

(i) quality, where the byproducts, including components such as butane and propane which can be extracted from the byproducts, could not—

(A) reasonably be expected to be used in non-refinery operations; and

(B) be produced and distributed at a price which would provide adequate revenue to pay the operating expenses of this production and distribution; or

(ii) quantity, where—

(A) insufficient or sporadic quantities of the byproduct, including components such as butane and propane which can be extracted from the byproducts, are produced to maintain an adequate and reliable supply to a potential user; and

(B) no dependable market exists for these byproducts, or components of the byproducts, which can support a price which will provide adequate revenue to pay the operating expenses of the production and distribution of the byproduct or its components.

"Primary energy source" means that the fuel or fuels used for normal operation by any existing or new electric powerplant or major fuel burning installation, except

(a) minimum amounts of fuel required for unit ignition startup, testing, flame stabilization and control uses, and

(b) minimum amounts of fuel required to alleviate or prevent unanticipated equipment outages and emergencies directly affecting health, safety or welfare which would result from electric power outages.

"Proceeding" means a process and activity, and any part thereof, instituted by DOE, either on its own initiative or in response to an application, complaint, petition or request submitted by the owner or operator of a powerplant, major fuel burning installation, or any other person that may lead to an action by DOE.

"Recoverable outlays" are those expenditures you have made or will be required to make, as of the date of enactment, for your transitional facility, for equipment and facilities which can be sold or salvaged, or could be used in the construction or operation of an alternate fuel facility. The following are examples of some of the items that could be recoverable outlays: land and land rights, powerplant building, steam turbine, steam turbine control equipment, transformers and switchyard, electrical, and other structural parts and materials.

"Synthetic fuel" means any synthetic fuel derived from an alternate fuel and does not include synthetic fuels derived from petroleum or natural gas.

"Transitional Facility unit" means a powerplant or major fuel burning installation on which substantial construction or

* Drafter's Note: July 18, 1977, is the date which the House of Representatives passed the provision introducing the maximum efficient production rate of 250 million Btu's/day into the proposed legislation.

V 4 3 / 2 3 3 DEC 4 78 UMI

acquisition began between April 20, 1977, and November 9, 1978, the date of enactment of the Powerplant and Industrial Fuels Use Act (FUA).

"Turbine or combustion turbine" means an electric power generating unit that is a combination of a rotary engine driven by gas under pressure that is created by the combustion of any fuel, with an electric power generator driven by the engine.

Federal Energy Regulatory Commission

[Docket Nos. CS78-747, et al.]

APPLICATIONS FOR "SMALL PRODUCER" CERTIFICATES [1]

NOVEMBER 21, 1978.

Take notice that each of the Applicants listed herein has filed an application pursuant to Section 7(c) of the Natural Gas Act and Section 157.40 of the Regulations thereunder for a "small producer" certificate of public convenience and necessity authorizing the sale for resale and delivery of natural gas in interstate commerce, all as more fully set forth in the applications which are on file with the Commission and open to public inspection.

Any person desiring to be heard or to make any protest with reference to said applications should on or before December 13, 1978, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, petitions to intervene or protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on all applications in which no petition to intervene is filed within the time required herein if the Commission on its own review of the matter believes that a grant of the certificates is required by the public convenience and necessity. Where a petition for leave to intervene is timely filed, or where the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary

ENVIRONMENTAL PROTECTION AGENCY

[FRL 1020-2]

RECEIPT OF ENVIRONMENTAL IMPACT STATEMENTS

President Carter's Reorganization Plan No. 1 (see President's Message of July 15, 1977) transferred certain functions from the Council on Environmental Quality (CEQ) to the Environmental Protection Agency (EPA). some of these functions relate to operational duties associated with the administrative aspects of the environmental impact statement (EIS) process. In Memorandum of Agreement No. 1 entered into between CEQ and EPA, dated March 29, 1978, it was agreed that EPA would be the official recipient of EIS's and would publish the availability of each EIS received on a weekly basis. This is the duty formerly carried out by CEQ pursuant to Section 1500.11(c) of the CEQ Guidelines.

Review periods for draft and final EIS will be computed as follows: The 45 day review period for draft EIS's will be computed from the Friday following the week which is being reported; the 30 day wait period for final EIS's will be computed from the date of receipt of the EIS by EPA and commenting parties.

The following is a list of environmental impact statements received by the Environmental Protection Agency from November 20, 1978 through November 24, 1978; the date of submission of comments on draft EIS's as computed from December 1, 1978 is January 15, 1979.

Copies of individual statements are available for review from the originating agency. Back copies are also available at 10 cents per page from the Environmental Law Institute, 1346 Connecticut Avenue, Washington, D.C. 20036.

Date: November 29, 1978.

PETER L. COOK,
Acting Director, Office of Federal Activities.

DEPARTMENT OF AGRICULTURE

Contact: Mr. Barry Flamm, Coordinator, Environmental Quality Activities, U.S. Department of Agriculture, Room 359A, Washington, D.C. 20250, 202-447-3965.

FOREST SERVICE

Final

Leesburg Planning Unit, Salmon National Forest, Lemhi County, Idaho, November 22: The proposal consists of the division of the Leesburg planning unit, located in Salmon National Forest, Lemhi County, Idaho. The unit is to first be divided into two major management areas with similar land types, terrain, major drainage and management qualities. These areas will then be further divided into smaller units for management requirements, protection needs, and use and development of various resources within the unit. The entire Leesburg unit is comprised of 86,390 acres, 2,009 of which are privately owned and another 1,584 acres of which are surface rights claims. (USDA-FS-FES(ADM)R4-78-5.) Comments made by: DOC, EPA, USDA, AHP, DOT, HUD, DOI, DOE, State agencies, groups, individuals, and businesses. (EIS Order No. 81246.)

Hebo Planning Unit, Siuslaw National Forest, Lincoln, Tillamook, and Yamhill Counties, Oreg., November 22: Proposed is a plan for the future management of national forest lands within the Hebo planning unit, Siuslaw National Forest, Oreg. Specifically, the objective of this statement is to identify the natural resources, their value to society, and the various proposals for using each resource. Five alternative plans are offered. Adverse impacts common to all five alternatives include alteration of wildlife habitat; construction-related pollution; and increased levels of air and noise pollution. (USDA-FS-R6-FES(ADM)78-3.) Comments made by: DOE, AHP, HUD, USDA, EPA, DOC, State and local agencies, groups, individuals, and businesses. (EIS Order No. 81247.)

SOIL CONSERVATION SERVICE

Draft

Hamilton Creek Watershed, Burnet, County, Tex., November 20: Proposed is a flood prevention plan for portions of the 52,995 acres of the Hamilton Creek Watershed in the city and county of Burnet, Tex. It is proposed that three floodwater retarding structures be installed to protect 231 acres of urban land in the city and 576 acres of agricultural flood plain land. Each retarding structure will consist of a principal spillway and plunge basin, and emergency spillway, a floodwater retarding pool, a sediment pool, and in total will require 172 acres. (USDA-SCS-EIS-WS-(ADM)-78-5-(D)-(TX).) (EIS Order No. 81242.)

East Side Green River Watershed, King County, Wash., November 20: Proposed is a watershed protection and flood prevention plan for the East Side Green River watershed project area in King County, Wash. The remaining work to be done on the partially completed project includes: (1) An accelerated land treatment program on 2,200 acres of agricultural, urban, and other lands; and (2) enlargement and/or realignment of approximately 11.1 miles of existing man-altered stream channels. Five alternatives, all including accelerated land treatment (except no action) also consider: (1) upland detention, (2) additional channels, and (3) nonstructural measures. (USDA-SCS-ES-WS-(ADM).) (EIS Order No. 81239.)

U.S. ARMY CORPS OF ENGINEERS

Contact: Dr. C. Grant Ash, Office of Environmental Policy, Attn: DAEN-CWR-P, Office of the Chief of Engineers, U.S. Army Corps of Engineers, 1000 Independence Avenue SW., Washington D.C. 20314, (202) 693-6795.

Final

Harbors and Rivers in the Territory of Guam, Guam, November 24: The proposed improvement is a combination of levee and channel improvements with pumping facilities for localized drainage near the Saylor Street-Agana River crossing in Guam. The plan consists of 1,750 feet of channelization between Saylor Street and Agana Bay, 4,900 feet of levees upstream of Saylor Street, a 360-acre flowage easement within the Agana Swamp, and a pumping plant near the left bank levee at Saylor Street. (Honolulu district.) Comments made by: USCG, DOI, DOC, HEW, USN, AHP, EPA, local agencies and groups. (EIS Order No. 81255.)

Chehalis River, South Aberdeen and Cosmopolis, Grays Harbor County, Wash., November 24: Proposed is a flood control project for Cosmopolis and Aberdeen in Grays Harbor County, Wash. The project consists of a levee system which would protect 1,318 acres of flood plain lands at the head of Grays Harbor. Elements of the project include: (1) Construction of earthen levees, and (2) placement of riprap. The alternatives considered are: (1) no action, (2) flood plain zoning in combination with flood proofing for existing structures, (3) flood plain relocation, and (4) alternate levee alignments. (Seattle district.) Comments made by: DOI, EPA, HUD, DOT, AHP, USDA, DOC, State and local agencies. (EPA Order No. 81256.)

Draft supplement

Sacramento River Bank Protection Project, several California counties, November 24: This statement supplements a final EIS filed in June 1976. Proposed is the placement of fill consisting of stone for bank protection at levee erosion sites along the Sacramento River between Collinsville and Chico and in the counties of Butte, Glenn, Colusa, Sacramento, Solano, Sutter and Yolo, Calif. This supplement EIS is for the purpose of exempting the placement of fill material for the project from regulation under the Clean Air Act (Sacramento district). (EIS Order No. 81259.)

Grand Haven Harbor, Lake Michigan, Ottawa County, Mich., November 24: Proposed is the deepening of the entrance channel and harbor of Grand Haven Harbor in Grand Haven, Ottawa County, Mich. The selected alternative involves dredging the entrance channel to a depth of 29 feet, the harbor to 27 feet, and the development of a new turning basin. The proposed plan also entails the deposition of all polluted materials in an upland site, and the disposition of unpolluted sediments either at a deep water site in Lake Michigan or used as beach nourishment (Detroit district). (EIS Order No. 81252.)

Sacramento R., Chico Landing to Red Bluff, Butte, Glenn, and Tehama Counties, Calif., November 24: This statement supplements a final EIS filed in May 1975. Proposed is the placement of fill consisting of stone for bank protection at bank erosion sites along the Sacramento River between Chico Landing and Red Bluff and in the counties of Butte, Glenn, Tehama, Calif. This supplement EIS is for the purpose of exempting the placement of fill material for the project from regulation under the Clean Air Act (Sacramento district). (EPA Order No. 81260.)

ENVIRONMENTAL PROTECTION AGENCY

Contact: Mr. Peter Cook, Director, Office of Federal Activities, Room WSMW 537, 401 M Street, S.W., Washington, D.C. 20460, (202) 755-0780.

Draft

Electric Utility Steam Generating Units. Standards, November 24: Proposed is the revision of the existing new source perfomance standards limiting the emissions of sulfur dioxide from coal fired electric utility steam generators which has been in effect since December 1971. Revisions to the new source performance standards for the emission of particulate matter and oxides of nitrogen from coal-fired electric utility steam generators are also being proposed. Several alternatives, ranging from the retention of the present standard to proposing a very stringent standard, have been considered by the EPA (EPA-450/2-78-007a). (EPA Order No. 81274.)

Contact: Ms. Susan Walker, Environmental Protection Agency, Region V, 230 South Dearborn Street, Chicago, Illinois 60604, (312) 353-2307.

Draft

Huron Valley WWT Control System Facilities Plan, Wayne and Oakland Counties, Ill., November 22: Proposed is the contruction of the Huron Valley wastewater control system to provide service to portions of Wayne and Oakland Counties, Mich. The project will consist of a regional interceptor sewer approximately 50 miles long and a 49.2 mgd. wastewater treatment plant which would be built adjacent to Lake Erie. Effluent would be discharged via a 10,000 foot outfall sewer to the mid-channel confluence of the Detroit River and Lake Erie. The new treatment facility would provide conventional secondary treatment with phosphorus removal. (EIS Order No. 81249.)

Contact: Mr. Clinton Spotts, Environmental Protection Agency, Region VI, First International Building, 1201 Elm Street, Dallas, Texas 75270, (214) 767-2716.

Final

Independence Steam Electric Station, Permit, Independence County, Ark., November 21: The proposed action is the issuance of a new source NPDES permit for wastewater discharge from the proposed Independence Steam Electric Station into the White River. The applicants, Arkansas Power & Light Company, Arkansas Electric Cooperative Corporation (AECC), and the City Water & Light Plant of the City of Jonesboro, proposed to construct and operate a coal-fired steam electric station in Independence County, Arkansas. It should be noted that the REA has participated in the preparation of this EIS to fulfill the NEPA requirements for guaranteeing REA loan funds for the AECC portion of the project. Comments made by: AHP, COE, DOE, USDA, DOI, DOT, State agencies. (EIS Order No. 81244.)

Contact: Ms. Betty Jankus, Environmental Protection Agency, Region IX, 215 Fremont Street, San Francisco, Calif. 94105, (415) 556-6695.

Draft

Point Source Metro Phoenix, 208 plan, Maricopa County, Ariz., November 24: Proposed are four alternative plans for the management of point source water pollution in the Metropolitan Phoenix Area, Maricopa County, Ariz. These alternatives were developed as part of tha Maricopa Association of Governments 208 water quality management plan. The plan presents alternatives which consider various plant locations and the surrounding service areas. (EIS Order No. 81251.)

DEPARTMENT OF HUD

Contact: Mr. Richard H. Broun, Director, Office of Environmental Quality, Department of Housing and Urban Development, 451 7th Street, S.W., Washington, D.C. 20410, (202) 755-6308.

Draft

Dogwood Park Phase II Subdivision, Bossier County, La., November 24: Proposed is the issuance of HUD home mortgage insurance for the Dogwood Park Phase II Subdivision, Haughton, Bossier County, La. The subdivision will encompass a total of 462.8 acres of land and will be developed with a total of: (1) 899 single family units and 191 patio house units on 411.4 acres, (2) a 14 acre lake, (3) 25 acres of Greenbelt/open space, and (4) 12.4 acres of commercial units. Also included is the consideration of 203 acres of presently nonparticipating lands which are expected to be bought by the developer and incorporated into the project (HUD-R06-EIS-78-47D). (EIS Order No. 81257.)

Pinelake Subdivision, Harris County, Tex., November 24: Proposed is the issuance of HUD home mortgage insurance for the Pinelake Subdivision in Harris County, Tex. The subdivision encompasses approximately 1,786 acres and is expected to consist of approximately 7,650 dwelling units. The proposed project will also include shopping facilities and recreation facilities (HUD-R06-EIS-78-50-D). (EIS Order No. 81254.)

Final

Northcliffe Subdivision, Houston, Harris County, Tex., November 20: The proposed action is the approval by HUD of home mortgage insurance for the proposed Northcliffe subdivision. The project site will be located on 228 acres with approximately 4 units per acre in the city of Houston, Harris County, Tex. The units will be composed of single family homes and some commercial reserves and provide accommodations for approximately 3,000 people in 888 dwelling units. The proposal was submitted by Homecraft Land Development, Inc. (HUD-R06-EIS-78-37F). Comments made by: HEW, AHP, USDA, DOI, COE, EPA, DOT, and State agencies. (EIS Order No. 81241.)

V 4 3 / 2 3 3 DEC 4 78 UMI

V 4 3 / 2 3 3

Final supplement

CBD Urban Renewal Project, Newburyport Essex County, Mass., November 20: This statement supplements a final EIS filed in June 1975 concerning the Central Business District (CBD) urban renewal project for Newburyport, Essex County, Mass. The purpose of the supplement is to comply with a stipulation of dismissal filed with the U.S. District Court, Mass., to provide data concerning possible archaeological sites within the waterfront parcels. The project proposed the redevelopment of the Newburyport CBD from commercial and retail use which would impact the Market Square historic district (HUD-R01-EIS-78-OIS). (EIS Order No. 81240.)

SECTION 104(h)

The following are community development block grant statements prepared and circulated directly by applicants pursuant to section 104(H) of the 1974 Housing and Community Development Act. Copies may be obtained from the Office of the Appropriate Local Executive. Copies are not available from HUD.

Final

Lincoln Park Neighborhood Revitalization, Denver County, Colo., November 20: Proposed is the intensive, housing-oriented revitalization of Lincoln Park neighborhood located in Denver County, Colo. with the use of HUD/UDAG funds. Activities of the project feature: (1) Elimination of blighting industrial uses, business encroachment and speculation in the neighborhood, (2) discouraging out-migration of middle-income households through near downtown development, (3) improvement of shopping services and living environment, and (4) conservation of the existing housing stock. Comments made by: EPA, HUD, State and local agencies. (EIS Order No. 81237.)

DEPARTMENT OF THE INTERIOR

Contact: Mr. Bruce Blanchard, Director, Environmental Project Review, Room 4256 Interior Building, Department of the Interior, Washington, D.C. 20240, 202-343-3891.

BUREAU OF SPORTS FISHERIES AND WILDLIFE

Draft

Mammalian Predator Damage Management, Livestock, several counties, November 22: Proposed is a predator damage control program as presently conducted in the States of Arizona, California, Idaho, Montana, Nebraska, Nevada, New Mexico, North Dakota, Oregon, Oklahoma, Texas, Utah, and Wyoming. The predator species controlled include coyote, bobcat, mountain lion, bear and fox. These animals are controlled primarily to alleviate damages caused by predators to domestic animals. The program is conducted on a request basis which initiates an investigation and if warranted, the removal of the predator, precautions are taken to protect humans and domestic animals from the toxicants or devices used. (DES-78-49.) (EIS Order No. 81248.)

DEPARTMENT OF TRANSPORTATION

Contact: Mr. Martin Convisser, Director, Office of Environmental Affairs, U.S. Department of Transportation, 400 Seventh Street SW., Washington, D.C. 20590, 202-426-4357.

FEDERAL HIGHWAY ADMINISTRATION

Draft

IA-100, from IA-149 to IA-94, Linn County, Iowa, November 21: Proposed is the construction of IA-100, a two-lane rural facility, from IA-149 to IA-94 in Linn County, Iowa. The segment of the project between IA-94 and Usher's Ferry Road would consist of a rural four-lane divided facility. The section between Usher's Ferry Road and I-380 would be an urban four-lane divided facility. Right-of-way acquisition would be necessary for any of the four build alternatives which are considered in addition to no-build. The total length of the project would vary from 11.2 to 8.9 miles depending on the route selected. (FHWA-Iowa-EIS-78-4-D.) (EIS Order No. 81245.)

U.S. 23, Tennessee State Line to U.S. 19, Madison County, Tenn., November 24: Proposed is the improvement of U.S. 23 from the Tennessee State line to the intersection of U.S. 19 in Madison County, Tenn. Alternative corridors along the existing alignment and on new locations are being considered. Depending upon the alternative selected, the project length will be between 9.2 and 10.4 miles long. The proposed project is a portion of corridor B of the Appalachian development highway system and is classified as a principal arterial in the regional thoroughfare plan. (FHWA-TN-EIS-78-05-D.) (EIS Order No. 81253.)

NY-47, Rochester Outer Loop, Greece, Monroe County, N.Y., November 22: Proposed is the construction and/or extension of three roads in the town of Greece, Monroe County, N.Y. The plan proposes extension of NY-47 with its present terminus with Ridge Road for 4.4 miles to the Lake Ontario State Parkway. The freeway will be located on existing right-of-way. The project also provides for the extension of the Dorsey Road, with four travel lanes for 1.95 miles, and Fetzner Road, with two travel lanes, for 1 mile. (FHWA-NY-EIS.) (EPA Order No. 81250.)

Final

Death Valley Road, CA-168 to Death Valley National Monument, Inyo County, Calif., November 21: Proposed is the improvement of Death Valley Road, RS-W658, which extends about 62.4 miles from S.R. 168 near Big Pine to the northerly boundary of Death Valley National Monument near Ubehebe Crater in Inyo County, Calif. Plans call for the pavement of portions which are now gravel, realignment of isolated sections, and upgrading of the roadway to increase safety. The project will displace 44 acres of vegetation and wildlife, and will increase noise, litter and secondary air pollution. (FHWA-CA-EIS-77-03-F.) Comments made by: DOI, COE, USDA, State agencies, and groups. (EIS Order No. 81243.)

U.S. 51, Fifth Avenue to Lakeview Drive, Rochelle, Ogle County, Ill., November 20: The proposed FHWA action is the financing with federal-aid matching funds of all or part of the costs of constructing a railroad-highway separation and necessary approaches of U.S. 51 in the city of Rochelle. The project begins near the intersection of Fifth Avenue and Seventh Street, proceeds in a southerly direction terminating near Lakeview Drive. This project is about 0.5 mile in length and is located in Ogle County. The new facility is planned as a two-lane bridge structure, and includes the construction or reconstruction of several intersections and adjacent side streets. (FHWA-ILL-EIS-78-01-F.) Comments made by: USDA, EPA, DOI, and State agencies. (EIS Order No. 81238.)

INFORMATION REPORT

The EPA has received the following report which provides supplemental information on proposals which have fulfilled the NEPA process. Copies of the report are available from the originating agency upon request.

Contact: U.S. Army, Corps of Engineers, Dr. C. Grant Ash, Office of Environmental Policy, Attn: DARN-CWR-P, Office of the Chief of Engineers, 1000 Independence, Avenue, S.W., Washington, D.C. 20310, 202-693-6795.

TOXIC SUBSTANCES CONTROL ACT; REPORTING OF HEALTH AND SAFETY STUDIES

Denial of Citizens' Petition

AGENCY: Environmental Protection Agency.

ACTION: Denial of Citizens' Petition.

SUMMARY: On September 12, 1978, the Manufacturing Chemists Association (MCA) filed a citizens' petition under § 21 of the Toxic Substances Control Act (TSCA), 15 U.S.C. § 2620. MCA requested that EPA repeal or amend the health and safety reporting regulations promulgated under § 8(d) of TSCA (43 FR 30984, July 18, 1978), and stay the rule pending administrative reconsideration. The Administrator has denied this petition, and a summary of MCA's points and the full text of EPA's response appears below in the "Supplementary Information" section.

FURTHER INFORMATION CONTACT:

Industry assistance office, office of toxic substances (TS-799), Environmental Protection Agency, 401 M Street, S.W., Washington, D.C. 20460, 800-424-9065.

SUPPLEMENTARY INFORMATION: The denial letter appearing below was sent to the Manufacturing Chemists Association by EPA.

MR. EDMUND B. FROST.
Manufacturing Chemists Association, Washington, D.C.

DEAR MR. FROST: On September 8, 1978, representatives from your organization and several chemical firms met with staff from the Office of Toxic Substances to submit oral and written comments on the health and safety reporting regulations published on July 18, 1978 (43 FR 20984-20988) under § 8(d) of the Toxic Substances Control Act (TSCA). At that time, MCA requested that EPA repeal those regulations or administratively stay them for ninety days. On September 12, 1978, you subsequently filed a petition under section 21 of TSCA to repeal or amend the regulations.[1] I am hereby informing you that EPA is denying MCA's request for reconsideration of the rule.

MCA first asked Mr. Jellinek to reconsider and/or rescind the rule over seven weeks after promulgation, three weeks after the effective date, and only ten days before the industry was required to comply with the regulations, on the basis of draft comments that could not receive the benefit of public scrutiny. MCA has an obligation, as does any other interested person, to file all comments in a complete and timely fashion, particularly when such drastic administrative relief is sought. We do not regard the citizens' petition provisions as a means of escaping the responsibility to submit timely comments or as an opportunity to delay the implementation of final administrative actions. Where late comments indicate a clear substantive error in a rule, we will exercise our discretion and propose amending it but where comments only suggest that EPA could have exercised its judgment to reach a different result, EPA will not revise a rule except in exceptional circumstances. Were EPA not to take this position, rulemaking proceedings would never obtain necessary finality.

While the citizens' petition provisions of TSCA § 21 do not require EPA to respond to a petition until ninety days after its receipt, we have attempted at your request to evaluate and respond quickly to MCA's comments. As you know, Mr. Jellinek has already granted your request to extend the deadline for submission of studies for thirty additional days in order to accord with the time period announced at proposal. The notice of this extension appeared in the September 15 FEDERAL REGISTER. We have evaluated the other matters you raised and find them without merit.

The following responds to your specific comments:

1. *MCA Comment: Not all of the public comments were available to EPA on the date of the final Work Group session. The rulemaking is therefore incomplete.* All comments on the proposal were reviewed and evaluated by the Office of Toxic Substances (OTS) prior to promulgation of the final rule, regardless of whether the comments were submitted during or after the public comment period. It is neither required nor necessary that the work group review each comment; it is the responsibility of the lead office (in this case, OTS) to ensure that all views are considered in recommending final actions for my approval.

The public file contains all such comments on the proposal.

[1] Where the September 8 submission to Mr. Jellinek and the September 12 submission to me differ, I assume the latter to be more authoritative.

2. *MCA Comment: The definition section is confusing and should simply incorporate by reference the definitions in the TSCA.* We have rejected this comment for two reasons. First and foremeost, MCA failed to raise these objections prior to promulgation, even though the definitions remained substantially the same throughout the rulemaking. Indeed, MCA itself on September 8th suggested that additional definitions be added. Secondly, we do not regard these definitions as confusing, and MCA has failed to explain the basis for its conclusion.

3. *MCA Comment: The broad definition of "health and safety studies" in TSCA should be circumscribed for the purpose of this regulation to explicitly exclude categories of health and safety studies which are not relevant to the purpose of the regulation.* We do not agree that the rule should be circumscribed; we consider all categories of health and safety studies relevant to the purpose of the regulation. As explained in the preamble, the proposed rule, which required listing and submission of studies for only those effects nominated by the Interagency Testing Committee (ITC) for testing, was changed in response to comments from the public and further consideration within EPA. Because any study of an effect of a chemical on health and/or the environment is useful in assessing the potential health and safety of the substance, and therefore the need for further testing, the rule now requires the submission of all health and safety studies relating to the chemicals named by the ITC. While we recognize that each study that is submitted may not be ultimately useful, it is necessary to see the data to assess its relevancy. Moreover, while there is a cost to itemizing and/or submitting such studies, this obligation is imposed to avoid the far greater cost of requiring needless testing where there are already existing studies. The expense of providing the data subject to this rule is considered preferable to the costs the industry would incur where such data required to be generated anew under § 4, and the strain that such testing would place on this country's scarce laboratory facilities and scientific resources.

We do not distinguish as you do between direct and indirect effects, nor do we think such a distinction is meaningful. Consequently, we have not excluded physical chemistry studies from this rule through the granting of a § 8(d)(1)(C) waiver, as MCA feels we should have done. We believe that physical chemistry data provide significant basic information about the interaction of a chemical with its environment, the likely exposure potential of the chemical and its relationship to other chemicals having known toxic effects.

You cite boiling point and vapor pressure as examples of data EPA does not need, yet in fact chemicals with low boiling points and high vapor pressures are more likely to be released into the atmosphere and result in significant exposure than chemicals with lower pressures and higher boiling points. Similarly, solubility and partition coefficient data are critical indicators of the likelihood that a chemical will be absorbed and retained in human tissue as a residue. Hence, such data are clearly relevant to the agency's assessment of exposure and/or hazard potential. Moreover, the requirement to submit such data is not unduly burdensome since most physical chemistry data are found in the scientific literature for these chemicals and therefore do not have to be submitted. (See § 730.5(b)).

MCA has also raised the question of whether routine industrial hygiene surveys and environmental monitoring are health and safety studies. EPA's response is that studies of a chemical substance, regardless of the label attached to them, are health and safety studies when they contain data that have been aggregated and/or analyzed in such a way as to provide insight into the possibility that the substance in question adversely affects or does not affect health or the environment. Thus, epidemiological studies and occupational or environmental exposure studies would be considered health and safety studies. Data reflecting individual measurements of occupational or environmental conditions or individual observations or examinations of employees would not be considered health and safety studies, unless they are aggregated or analyzed as described above or unless they constitue underlying data for studies which are subject to reporting. Manufacturers may, of course, contact OTS to resolve doubts about the status of particular studies.

In future § 8(d) rulemaking, EPA will review its experience with this first rule and consider at that time whether the Administrator should waive the requirement to submit every category and kind of health and safety study.

4. *MCA Comment: This rule should apply only to persons currently engaged in the manufacture, processing or distribution of chemicals. It should not apply retroactively to those who have done so since January 1, 1975.* We disagree with this comment. It is first necessary, though, to clarify that § 8(d) requires two kinds of reporting: (1) listing of health and safety studies, and (2) submission of copies of such studies. EPA's legal authority differs according to whether lists or copies are required to be submitted and, accordingly, it is essential to distinguish between the two types of requirements in this discussion.

Section 8(d)(2) clearly permits EPA to require *any person* to submit a *copy* of *any* study in his possession. Hence, there is no question that EPA can require anyone who has manufactured, processed, or distributed a chemical for commercial purposes since January 1, 1975 to submit studies in his files, Though we could have required anyone who has *ever* engaged in the above activities to comply with the reporting requirement (as was suggested by two commenters), EPA concluded that obtaining data from only those persons who have done so since January 1, 1975 would be sufficient.

Section 8(d) also permits EPA to require any person who manufactures, processes, distributes in commerce or proposes to manufacture, process, or distribute in commerce a chemical substance or mixture to *list* health and safety studies conducted or initiated by that person on that substance or mixture at any time, and studies known or reasonably ascertainable by such person. Section 730.5(a)(1) as promulgated in the July 18, 1978, FEDERAL REGISTER implemented this authority by requiring any person who has engaged in such activities since January 1, 1975 to submit lists for each chemical listed in § 730.4 which he has produced or distributed since January 1, 1975. This requirement was changed from proposal, at which time the requirement extended back to January 1, 1977.

V 43/233

MCA objects to the 1975 date on the grounds that this imposes a retroactive reporting requirement on persons who are not "currently" engaged in the manufacture, processing, or distribution in commerce of the listed chemicals (or "currently" proposing to do so). Since MCA did not comment on the proposed 1977 cut-off, we assume the objection is only to the inclusion of the January 1, 1975 to January 1, 1977 period in the requirement to list studies.

As was explained in the preamble for the final rule, the date in the final rule was changed to be consistent with the inventory reporting regulation issued under TSCA § 8(a), which covers all chemicals manufactured for commercial purposes since January 1, 1975. Since such chemicals are being manufactured now or could be manufactured at any time in the future without § 5 notification, knowledge of the existing data base on them is critical in order to decide whether to require testing now. We believe it is both necessary and reasonable to require any one who has recently produced or distributed, or proposed to produce or distribute, one of the named chemicals (i.e., since January 1, 1975) to submit studies to us.

Furthermore, we are not required to limit the requirement to list studies to only those persons engaging in production or distribution of the chemicals at this moment or this year. Though the present tense is used in both § 8(d) and § 8(b)(1), the fact that Congress found it necessary to exclude chemicals which ceased to be manufactured more than three years before the effective date of the inventory rule from the inventory demonstrates that the term "is manufactured" was not considered to apply only to the precise date of the publication of the inventory, and that, indeed without the special exclusion, the inventory would apply even further back. Similarly, we believe "manufactures, processes, and distributes" as used in § 8(d) includes, at a minimum, persons who have manufactured, processed, and distributed chemicals since January 1, 1975.

Finally, since § 8(d)(1) specifically provides that persons must list studies conducted or initiated for them "at any time," it seems unlikely that Congress gave EPA the authority to require listing of all studies ever conducted or initiated by or for such persons whatever their date of completion but yet sought to exempt persons who manufactured the chemical as recently as three years ago from having to list pertinent studies.

5. *MCA Comment: Respondents should be required to report only on those chemicals which they actually manufacture, process or distribute in commerce, and not all chemicals listed in § 730.4.* The proposed rule required persons to list and submit copies of studies for all chemicals subject to the rule, regardless of whether the respondent manufactured, processed, or distributed one, some, or all of the chemicals. The requirement for a person to list studies on chemicals he does not produce or distribute was dropped in the final rule, but the requirement to submit copies remained as proposed. We infer, therefore that MCA's concern is addressed to the latter requirement that a respondent who has manufactured, processed, or distributed any one of the ten chemicals or categories of chemicals on the ITC list since January 1, 1975 (see § 730.4) must submit copies of reports in his possession for all such chemicals.

This requirement is well within our authority. As discussed previously, § 8(d) authorizes the Administrator to obtain copies of studies from any person in possession of them, regardless of whether such person ever manufactured, processed, or distributed the chemical. See § 730.7 of the regulation and TSCA § 8(d(2). We are, however, not requiring everyone in possession of a study to submit a copy since many persons, particularly those in the academic community, are unlikely to be aware of an obligation to do so. Such persons must submit studies only if requested to do so by letter pursuant to § 730.7.

The requirement that firms already subject to the rule submit studies on all of the ITC chemicals should not be overly burdensome; industry representatives have indicated that relatively few studies will have to be unearthed. Moreover, it is reasonable to require persons who are already required to search their files for tests relating to one chemical to search for studies relating to additional chemicals. Such persons are already on notice of the rule, familiar with its requirements, and devoting resources to a search.

6. *MCA Comment: It is not clear from § 730.5 who must report. Persons who must report under this rule should not be required to make presumptions about other companies' reporting responsibilities, nor should they be required to make inquiries of those other companies.* The proposed rule required persons to submit all studies concerning the ITC chemicals contained or referenced in their files. The final rule offers a firm the alternative of not submitting studies in a firm's files not conducted or initiated by or for that firm which it knows will be submitted by another person subject to the rule. This option was suggested by Diamond Shamrock Corporation as a potential means of reducing the reporting burden and lessening duplication. There is no requirement to make presumptions or direct inquiries to another person; any firm may send in all the studies in its possession.

We believe § 730.5 is clear and accurately reflects our intent to require all persons described in § 730.3 to submit studies except as exempted under § 730.5(a)(2)(ii) and § 730.5(b).

7. *MCA comment: EPA should not require copies of health and safety studies from persons—such as universities, research firms, or consultants—that have contractual relationships with manufacturers, processors or distributors of a chemical, without first affording those manufacturers, processors or distributors the option of submitting the studies themselves. EPA should permit manufacturers, processors and distributors to make business confidentiality claims for such data.* This rule does afford manufacturers, processors and distributors the option of submitting the studies themselves. However, if the company does not possess a copy of the study or does not acquire and submit a copy to EPA in response to this regulation, we reserve the right to acquire the study directly from the contractor. As a courtesy, however, to the sponsoring firm, we will contact it by phone or letter to inform the firm that we intend to obtain the study from the contractor unless the firm furnishes it to EPA within a specified number of days. If the firm fails to do so, and we contact the contractor pursuant to § 730.7, the contractor is under an independent obligation to comply.

Any person submitting a health and safety study may make a business confidentiality claim for such data under § 730.8. However, if the manufacturer is concerned about preserving confidentiality, it is up to him either to submit the study himself with a claim of confidentiality or to arrange for the contractor to submit and substantiate such claims.

8. *MCA Comment: The phrase "propose to manufacture, process or distribute in commerce" appearing in § 730.3 is not sufficiently definite and could give the impression that persons engaging in wishful speculation must report.* The term "proposes to manufacture, . . ." appears in the statute and in both the proposed and final rules. The comments submitted on the proposed rule did not indicate that the term was considered confusing or in need of further clarification. Companies in doubt as to whether they are subject to the § 8(d) rule may contact EPA with any specific questions.

A company "proposes to manufacture . . ." a product before the ultimate decision is made to market it. That point at which a company may be said to enter the "proposal" period may require some subjective judgment. At this point in time we lack sufficient experience to further define when a company "proposes" to manufacture. In future rulemakings, we may be able to provide more specific guidance. However, companies are protected from arbitrary actions by EPA under this language since any enforcement action is reviewable by the courts. EPA has neither the intention nor the resources to bring actions where there is little or no hard evidence of proposal to manufacture.

It is also worthy of note that it is in a company's interest to submit a study under § 8(d) in order to avoid the possibility that a § 4 proceeding would be initiated that may duplicate such study.

9. *MCA Comment: Reports of health and safety studies should not be required for any chemicals within the listed categories that are not currently manufactured, processed or distributed in commerce.* We found MCA's comments to be very unclear and consequently had difficulty being responsive to the concerns MCA intended to raise. We are particularly confused about MCA's use of the undefined term "non-commerical." If this term is intended to imply that § 4 does not apply to "non-commerical chemicals," we disagree. Section 4(a) does not distinguish between, or utilize the concept of, commerical and non-commerical chemicals.

Additionally, even if MCA's undefined class of "non-commercial" chemicals were not covered by § 4, data on such chemicals are still pertinent for § 8(d) purposes since studies of the chemical and physical properties and exposure potential of one chemical (be it commercial or non-commerical) are often useful in evaluating other comparable chemicals, including other chemicals that are categorized in a similar manner. (For instance, information on one chemical can provide relevant information on bioactivity and the types of testing feasible for structurally related chemicals.)

10. *MCA Comment: The second sentence in the quoted material in the correction that appeared in the Federal Register on August 16, 1978—"Mixtures which contain only very small amounts of a substance whose effects are masked need not be submitted"—should be deleted. If it is not deleted, the words "Studies of" should be inserted before the first word.* We believe that the sentence you quote serves a useful purpose in further clarifying the circumstances under which studies of mixtures need not be submitted, and that additional guidance is not needed at this time. Moreover, since you say twice that you agree with the August 16 notice containing that sentence, we fail to understand why you have asked us to change the language.

The omission of "studies of" in the sentence you refer to was a typographical error and will be corrected in a FEDERAL REGISTER notice.

11. *MCA Comment: The definition of "substance" at § 730.1(c) removes the differentiation in § 4(a) of TSCA between a chemical substance and a mixture of chemical substances. The definition should be deleted. Further, reports concerning mixtures should not generally be required.* Studies concerning mixtures can be subject to this regulation on either of two grounds. First, the list of chemcials recommended by the ITC for testing includes both chemical substances and mixtures. Thus, mixtures designated by the ITC and listed in § 730.4 as chemicals to which the rule applies are subject to the identical requirements as chemical substances designated by the ITC and listed in § 730.4. However, mixtures which are *not* listed in § 730.4 but which contain chemical substances designated in § 730.4 are not covered by the rule unless the study of the mixture *relates* to a chemical substance listed in § 730.4 (see § 730.5(a)(1)) and reflects the effects of that substance. (It is to the latter obligation that the FEDERAL REGISTER clarification is addressed, and you have stated that you regard that policy as reasonable.)

MCA has expressed concern that EPA has obliterated the § 4(a) distinction between chemical substances and mixtures. However, the fact that we require the submission of some studies on mixtures under § 8(d) does not, by any means, necessarily indicate that EPA will require testing for those mixtures or treat them under § 4 in the same manner as chemical substances. Section 4(a)(2) permits us to promulgate test rules for mixtures only if the effect of the mixture on health and environment cannot be "reasonably and more efficiently determined or predicted by testing the chemical substances which comprise the mixture." The statutory prerequisites and considerations are different under § 8(d), however. There, submission of all pertinent data relating to the effects of a chemical substance, alone or in a mixture, is needed to decide what testing is necessary and under what circumstances.

The shorthand term "substance" to which you object is used in the rule only for convenience to avoid repeating "chemical substance and mixture" throughout the rule, and, as explained above, does not reflect a substantive policy decision to treat them the same. Since the two terms would have been used together throughout the rule, the Agency saw no reason not to use one word instead of four.

12. *MCA Comment: Failure to comply with the instructions for submitting confidential information should not constitute an automatic waiver of the opportunity to make a claim of confidentiality. This is overly punitive.* As was indicated in our response to Comment 8 in the Appendix to the rule, our FOIA procedures do not require us to double check with data submitters if they fail to comply with our submission procedures. However, as a matter of policy, EPA will check back with data submitters before disclosing or releasing data marked "confidential" when we discover that only a single copy of a study marked as confidential is available and that the required second copy with the confidential information deleted is missing.

13. *MCA Comment: Section 730.8(c)(1) incorrectly refers to § 14(b) of the TSCA. Section 14(b) does not require disclosure of information, but simply does not prohibit disclosure of certain information. The rule should leave open the possibility of maintaining confidentiality under provisions of FOIA § 552(b) other than § 552(b)(4).* By quoting the portion of the rule relating only to claims of confidentiality under the FOIA 5 U.S.C. § 552(b)(4) exemption (trade secrets, confidential commercial information), MCA erroneously implies that the final rule would not permit exemption claims under other sections of the FOIA. In fact, as the preamble indicates, EPA will duly consider claims under these other sections of the FOIA. This will be done in accordance with EPA's FOIA rules (40 CFR Part 2, as amended by 43 FR 39997, Sept. 8, 1978).

As you are undoubtedly aware, EPA must disclose health and safety studies upon request unless they would dislose confidential process information or the composition of a mixture, or unless they are exempted under an FOIA provision other than 5 U.S.C. § 552(b)(4). EPA has no discretion in this matter; Section 14 states that if data consist of health and safety studies as described in § 14(b)(1), EPA may not use § 552(b)(4) as a reason for not disclosing or permitting access to such data. Consequently, EPA's confidentiality policies reflect that statutory policy. We are bound, of course, to respect the confidentiality of information described in the last sentence of § 14(b)(1)(A) and will follow our FOIA procedures in doing do.

14. *MCA Comment: The section on confidential claims procedures is incorrectly referred to on page 30986 of the Federal Register notice, first column, second paragraph, fourth line. Section 730.8 should replace §730.7* This error will be corrected in a FEDERAL REGISTER notice.

CONCLUSION

The major points raised by MCA lack the substantive merit and/or timeliness to warrant repeal or substantial amendment of the rule. We have agreed, however, to respond to some of MCA's concerns about confidentiality and to correct two typographical errors that appeared in the FEDERAL REGISTER. The other points are minor and would not warrant reconsideration under any circumstance. We will, however, consider all of MCA's comments in drafting the next § 8(d) rule if MCA would like us to do so.

A formal publication of the denial of this petition will appear in the FEDERAL REGISTER shortly.

Sincerely,

DOUGLAS M. COSTLE,
Administrator.

Dated: November 22, 1978.

OFFICE OF THE FEDERAL REGISTER

PROPOSING EDUCATIONAL PROGRAM ON HOW REGULATIONS ARE MADE

Request for Comment

AGENCY: Office of the Federal Register.

ACTION: Request for comment.

SUMMARY: This Office is considering the development of an educational program that would explain how the Federal Government makes regulations. This program is proposed for people who need to know more about how Government agencies make regulations. The program would describe the process the Government uses to develop its regulations and would emphasize the opportunities members of the public have to participate in making the regulations.

DATE: Comments should be received on or before February 5, 1979.

ADDRESS: Send written comments to: Special Projects Unit, Office of the Federal Register, National Archives and Records Service, Washington, D.C. 20408.

FOR FURTHER INFORMATION:

Martha Girard, Director, Executive Agencies Division, Office of the Federal Register. Phone: 202-523-5240.

FEDERAL REGISTER NOTICE INVITING COMMENT ON PROPOSED PROGRAM ON THE RULEMAKING PROCESS

For the past three years the Office of the Federal Register has conducted an educational program for persons who must use the FEDERAL REGISTER as an information source and a separate program for persons who write regulations published in the FEDERAL REGISTER. Based on interest shown by participants in these programs, we are considering designing a new program with a primary focus on the elements of the rulemaking process.

The public is increasingly interested in the subject of regulations—not only with the quantity and quality of regulations, but intertested in *how* agencies make regulations and *how* the public can effectively participate and influence the process.

Tentative plans for a course in the rulemaking process include the following:

1. What are the procedures agencies use in their regulations development process?

2. How can the public follow what an agency is doing in a rulemaking proceeding?

3. How and when can the public get involved in a rulemaking proceeding?

DEC 4 1978 UMI

V 4 3 / 2 3 3 D E 4 7 8 UMI

4. What are some problems agencies face in making rules?

5. What trends are emerging (from Executive, Legislative, and Judicial actions) concerning the nature of rulemaking.

To evaluate the potential audience and the need for this type of program, we are seeking public comment. Commenters on this proposed program of instruction on how agencies make rules might address themselves to these and other issues:

1. What should the primary objectives of the course be?
2. What specific topics should the course include?
3. At whom should the course be directed?
4. What format should the course have?
5. Where should the course be conducted?
6. What materials should be used?
7. Should there be a general course with specific follow-on sessions devoted to specific agency procedures—if so which agencies?

Your comments on both the need for the program outlined above and the specifics of a program are welcome and will be carefully considered in our future planning.

FRED J. EMERY,
Director of the Federal Register.

NOVEMBER 27, 1978.

[FR Doc. 78-33733 Filed 12-1-78; 8:45 am]

[6820-34-M]

GENERAL SERVICES ADMINISTRATION

IMPLEMENTATION OF EXECUTIVE ORDER 12044, IMPROVING GOVERNMENT REGULATIONS

Developing, Simplifying, and Reviewing GSA Regulations

AGENCY: General Services Administration.

ACTION: Final report on GSA procedures.

SUMMARY: The General Services Administration (GSA) has revised its procedures for developing regulations. The changes follow the guidelines in Executive Order 12044 (43 FR 12661, March 24, 1978). We expect that our changed procedures will result in regulations that are written more clearly and that enable us to meet our legislative goals without unnecessarily burdening the public.

EFFECTIVE DATE: December 1, 1978.

FOR FURTHER INFORMATION CONTACT:

John T. Gilmartin, Director, Paperwork Management Division, 202-566-0857.

SUPPLEMENTARY INFORMATION: On May 25, 1978, GSA published for public comments (43 FR 22612) our plans for implementing Executive Order 12044. We requested that interested persons submit comments on the proposal by July 25, 1978.

EVALUATION OF COMMENTS

The Department of Justice was the only responder to the proposal. The Department recommended that:

1. No proposed regulation be considered non-significant if it will have a disparate impact on the basis of sex;
2. The criteria for review of existing regulations be modified to require the amendment of unnecessary or inappropriate gender-based terminology in existing regulations; and
3. All proposed new regulations be reviewed to eliminate unnecessary or inappropriate gender-based distinctions.

We agreed with these recommendations and have modified our report accordingly.

CHANGES TO GSA'S PROPOSAL

Section 1 of the report is modified to reflect organizational changes that took effect after the proposal was published. Sections 3, 4, and 6 are revised to incorporate recommendations from the Department of Justice.

The final report reads as follows.

FINAL REPORT

SECTION 1. GSA'S STRUCTURE AS IT PERTAINS TO REGULATIONS

GSA is the business manager for Government agencies. Our regulations are designed to help agencies by giving them procedures to follow in areas such as managing their computer operations, making sure that they are prepared to function during emergencies, using and disposing of their real and personal property, buying their supplies, managing their records, and getting office space in buildings.

The Administrator of General Services signs all GSA regulations. To help in handling administrative and legal questions are GSA's two staff offices, the Office of Controller-Administration and the Office of General Counsel. GSA's operating arms, which are called services, develop most of our regulations. The six services are the Automated Data and Telecommunications Service, the Federal Preparedness Agency, the Federal Property Resources Service, the Federal Supply Service, the National Archives and Records Service, and the Public Buildings Service.

Each service and staff office is headed by an official who is directly responsible to the Administrator for carrying out GSA's functions and missions. In this document we will be referring to the eight unit heads as Commissioners, to the eight units as services, and to each office within a service that develops or writes a regulation as the program office.

SECTION 2. PRESENT METHOD OF DEVELOPING REGULATIONS

Our basic philosophy in developing regulations is that experts in the subject matter should write the regulations, then experts in writing (directives analysts) should review and analyze the regulations before they are issued. Our directives analysts have no special knowledge in the technical fields of the regulations. We feel that the strong point of this type of a system is that the subject matter experts can make sure that the regulations are necessary and technically accurate, and the directives analysts can see whether the regulations are understandable to individuals who do not have a background in the field covered by the regulations.

We have set up a strict control system to make sure that we meet our target dates for issuing regulations. The heart of the system is a central control unit, which is a part of the Office of Controller-Administration. Each of the eight services has a corresponding control unit headed by a clearance officer. The central control unit and the clearance officers work together to help program offices develop and write regulations.

When employees in a program office are ready to start developing a regulation, they are required to discuss the proposal with representatives of each service that is responsible for a regulatory area that might be affected by the proposal. All proposed regulations must be discussed with the Office of General Counsel. After the program office has discussed the proposal with affected services and reached preliminary agreements on what should be included in the regulations, the program office drafts the proposed regulation and sends it to its clearance officer. At this stage of the process, clearance officers have a certain degree of latitude on how to proceed. The minimum requirements for clearance officers follow.

1. Set up a control record for the proposal.
2. Analyze the proposal to make sure that the regulation is necessary and that it does not conflict with or duplicate existing regulations.
3. Make sure that the proposal will be sent for review to affected services within GSA, to other agencies and the public if necessary, to the Office of General Counsel, and to the directives analysts in the central control unit.

4. If the proposal will require someone to fill out a report, make sure that background information and supporting documents have been prepared. (For example, if we want to start a new report that the public will fill out and return to us, we must request permission from the Office of Management and Budget (OMB). OMB will review our request to see whether the report is needed, whether it is unnecessarily burdensome, how many individuals are affected, and similar considerations.)
5. If the proposal calls for a new form, notify the forms experts in the central control unit. (The forms experts will review the proposed form for items similar to the ones for reports.)
6. If the proposal will have a major effect on the quality of the environment, contact our environmental affairs division so that they can make sure the proposal follows rules that have been set up to protect the environment.
7. If the proposal affects State or local governments, make sure that the affected governments are notified and have a chance to comment on the proposal in accordance with the Presidential Memorandum For The Heads Of Executive Departments And Agencies dated March 23, 1978, and with the Federal Advisory Committee Act.

NOTE.—Several services have gone a step further with these minimum requirements by setting up a regulation writing unit in the service. These writing units rewrite the rough draft before sending it to the central control unit and other services for review.

After completing steps 1 through 7, the clearance officer decides whether the proposal will be published for public comments in the FEDERAL REGISTER. (Most GSA regulations are exempt from the part of the Administrative Procedure Act that requires agencies to publish proposed rules. However, we have been publishing proposed rules voluntarily when we think that the public may be interested and when we are not required by the Congress or the courts to meet a specific deadline for our final rules.) If the proposal will be published for comments, the clearance officer sends it to the Commissioner. If he or she approves the proposal, the Commissioner signs it and sends it to the central control unit, which then forwards the document to the FEDERAL REGISTER.

After receiving and evaluating comments from other agencies and the public on its proposal, the program office makes the necessary changes to its draft regulation. The program office sends copies of the revised draft to the clearance officers of the services that might be affected by the regulation, to the Office of General Counsel, and to the central control unit.

Each clearance officer who receives a copy of the draft decides which units within the service should comment on the draft. The Office of General Counsel checks to see whether the program office has followed the advice from preliminary discussions and whether the draft has been changed to a point where we are violating a law. The central control unit has a professional editor, who checks the draft for correct word use, punctuation, understandability, and similar items. The editor then gives the draft to the directives analysts in the central control unit.

The directives analysts review regulations from all of the services. Therefore, they generally have an overview of GSA's policies, procedures, and functions that a program office, which is concerned mainly with only one regulatory area, cannot be expected to have. From this perspective, the directives analysts evaluate the draft to make sure that the proposal is necessary, does not violate basic GSA policies, does not duplicate or conflict with other GSA regulations or the regulations of other agencies, and can be expected to efficiently and effectively meet its intended objectives.

Each office that received a copy of the draft for review returns its written comments to the program office. The program office evaluates all comments it receives as a result of this clearance process. The program office connot by itself overrule a comment—if the program office disagrees with a comment, they must contact the commenting office and reach an agreement on the final wording. If the program office and the commenting office cannot reconcile their differences, the program office msut prepare a paper outlining the differences and send it to the Administrator for a decision.

After employees in the program office adopt or reconcile the clearance comments, they prepare the final draft of the regulation. The final draft is sent to the clearance officer, who again reviews the document to make sure that all outstanding issues have been settled. The clearance officer then sends the document to the Commissioner.

Before sending the document forward, the Commissioner must sign a letter that explains why his or her service has developed the regulation. The letter is addressed to the Administrator and contains the following minimum information: The purpose and intended effect of the regulation; its expected impact on GSA, other agencies, and the public; and a summary of comments from other services within GSA, from other agencies, and from the public.

Three top GSA officials must read and agree with both the letter and the regulation before they can recommend whether the Administrator should sign the regulation. The Controller-Director of Administration certifies that the regulation has undergone the clearance procedures and meets all administrative requirements. The General Counsel certifies that the regulation complies with the law. The Deputy Administrator certifies that the regulation is acceptable with respect to Government-wide policy considerations. The Administrator will not sign a regulation until this entire process has been completed.

To make sure that this system functions smoothly, the central control unit periodically visits each service and analyzes the service's regulatory program. The present schedule calls for each service to be evaluated once every 3 years. The central control unit evaluates and recommends improvements in the regulatory program from all paperwork aspects, including forms, reports, and records management. The final report for each evaluation is sent to the Commissioner of the service, who is required to prepare a plan for following recommendations made by the central control unit.

SECTION 3. CHANGES TO THE REGULATION PROCEDURES

For regulations that we determine are "not significant," we will follow our present procedures except that:

1. The regulation must follow the policy statements in section 1 of Executive Order 12044. These statements require that regulations be written simply and clearly, that they effectively and efficiently carry out their purposes, and that they do not impose unnecessary burdens.
2. The regulation must be reviewed periodically as explained in section 4 of Executive Order 12044.
3. Each time the regulation is published, it must provide a statement briefly explaining why the regulation is not significant for the purposes of Executive Order 12044.
4. Each proposed regulation will be reviewed to eliminate unnecessary or inappropriate gender-based distinctions.

For significant regulations, we have changed several of our present procedures. The first area that we changed is in providing both to the Administrator and to the public an early warning of proposed regulations. (When we refer to the public in this document we are referring not only to individuals but also to businesses, public and private organizations, and State and local governments.) Before a service begins to develop a significant new regulation, the Commissioner must

V 4 3 / 2 3 3

send to the Administrator a letter that covers the following points:

1. *Issues.* This section describes the important areas that the proposal will cover, such as the problem or circumstances that created the need for action, the objectives of the proposal, the constraints or limitations that might hinder us in effectively implementing the proposal, and whether there is enough money available in our budget to cover the expenses of the proposal.

2. *Alternatives.* The Commissioner will list the possible ways to solve the problem, including whether it might be possible to solve the problem without issuing a regulation.

3. *Plan for public comment.* The Commissioner will explain how we plan to give the public a chance to comment on the proposal or to help us draft the proposed regulation. The Commissioner may decide which methods to use but we expect that most plans will include one or more of the following methods: Publishing an advance notice of proposed rulemaking in the FEDERAL REGISTER, holding open conferences or public meetings, sending notices of proposals to publications that are likely to be read by individuals who will be affected, or notifying interested parties directly.

4. *Regulatory analysis.* If it is possible at this point in the process, the Commissioner will state whether an economic evaluation of the proposal will be necessary. The basis for determining whether an evaluation is necessary may be narrative statements of the qualitative aspects of the proposal if quantitative data are not available.

5. *Target dates.* The Commissioner will list each major step in the regulation's development process and the expected date for completing each step.

After notifying the Administrator of the plans, each Commissioner also must notify the public of proposals that we are considering. This notification will be in the form of semiannual agendas. On the first Monday in October of each year, we will publish in the FEDERAL REGISTER a schedule that shows the times during the coming year that our regulation agendas will be published. We expect to publish agendas during May (to cover our proposed actions from May through October) and November (covering November through April), but we will publish a special agenda at any time if a Commissioner feels that the public should be informed immediately of a significant regulatory action.

Each service will prepare its own portion of the overall GSA agenda. Each agenda will have four major areas: New regulations, changes to existing regulations, regulations scheduled for review, and status of agenda items previously published.

We expect that the first two areas of the agenda will be the ones in which the public is most interested. Therefore, for each proposed new significant regulation and for each substantive change to an existing significant regulation, the service will provide a description of the new regulation or the change; a summary explaining why we are considering issuing a new regulation or a change; our legal authority for issuing this type of regulation; the name, organizational unit, and telephone number of the person to contact for questions on the proposal; and whether a regulatory analysis will be prepared.

For the third major area, regulations scheduled for review, the service will describe the regulations that we will be reviewing, include a contact point for answering questions, and provide the date by which we expect to have finished the review. In the fourth area, status of agenda items previously published, the service will list significant accomplishments, deletions, and changes to individual items from the previous agenda and the contact point for each item.

After a service has developed its agenda, the Commissioner will send it to the Controller-Director of Administration. The Controller-Director of Administration will ensure that the central control unit consolidates the information from each service's agenda and sends the overall agenda to the Administrator, who will approve the agenda.

The program office will proceed to the discussion stage that is covered under our present method of developing regulations after notifying the Administrator of a proposed new significant regulation and preparing the necessary items for the agenda. The changes from our present method are that the discussions will be more highly structured and that the program office will include the public in these discussions as explained in the "plan for public comments" portion of the Administrator's notification letter. The program office will evaluate the alternative approaches that are available to solve the problem by listing the pros and cons for each alternative and will select the least burdensome alternative that will accomplish the regulatory objective.

The program office will then prepare a draft of the regulation. The draft must be written in plain English, it must not contain unnecessary or inappropriate gender-based distinctions, and it must be understandable to individuals who will be required to comply with the regulation. After drafting the regulation, the program office must evaluate the direct and indirect effects the regulation will have on the public.

The draft regulation will be published as a proposed rule in the FEDERAL REGISTER. The public will have a minimum of 60 days to comment on the proposal. If we cannot allow a full 60 days for comments, our FEDERAL REGISTER preamble will explain why we had to shorten the comment period. If we are required to prepare a regulatory analysis, the preamble will provide a brief description of the regulatory approach that we selected or that we favor, briefly explain the alternatives that we considered, and explain how interested individuals can get a copy of the draft regulatory analysis. At the end of the 60-day comment period, the program office must evaluate each comment on the proposed rule. When the final rule is published in the FEDERAL REGISTER, the preamble will summarize the comments that we received and will provide a response for each group of closely related comments.

The program office then returns to our current procedures by revising its draft and circulating the proposal for comments in our clearance process. When the final document is ready, the Commissioner will include the following additional information in the letter to the Administrator.

1. The Commissioner will include a statement that the regulation has been prepared in full compliance with GSA procedures for implementing Executive Order 12044.

2. If the regulation requires a new report or new recordkeeping requirements, an enclosure to the letter will summarize the new requirements and the estimated costs for each.

3. If a regulatory analysis was prepared, the Commissioner will provide a copy of the analysis. (The preamble to the FEDERAL REGISTER document will explain how the public may obtain a copy.) The program office will include the following information in each regulatory analysis:

(a) A statement of the problem.

(b) A brief description of each alternative that the program office considered to solve the problem.

(c) A detailed economic evaluation of each alternative, including an analysis of the major costs or other inflationary effects that the regulation will have on the economy, individual industries, geographical regions, or levels of government; and analysis of secondary costs and price effects; and an analysis of likely major changes in employment. If it is not possible to quantify the data, the program office will provide narrative statements explaining the qualitative aspects of the alternatives.

(d) A detailed explanation of the reasons for choosing one alternative over the others.

4. An enclosure to the letter will provide a plan for evaluating the regulation before its first scheduled review. The evaluation should focus on the effect the regulation has on the public and on the problem it was intended to solve.

For regulations that we have already issued, we have set up a review program. Under this program, each of our regulations will be reviewed at least once every 5 years. Each Commissioner is responsible for making sure that program offices in his or her service review regulations in their areas of responsibility. Each Commissioner will set up a timetable for completing reviews so that the service can schedule them to fit the workload.

After a service has reviewed a regulation or a set of regulations, the service will send a report of the review to the central control unit. The central control unit will check the report to make sure that the review was thorough. We will publish our review schedules for significant regulations in our semiannual agendas so that the public knows in which areas we are concentrating our regulatory efforts.

Several of our regulations are exempt from these new procedures. Our national security classified regulations are exempt under section 6(b)(2) of the Executive order. Our Federal Procurement Regulations, which are issued in 41 CFR Chapter 1, and our General Services Administration Procurement Regulations, which are issued in 41 CFR Chapters 5A and 5B, are exempt under section 6(b)(4) of the Executive order. Regulations issued by the Administrative Committee of the FEDERAL REGISTER (1 CFR Chapters I and II) are subject to procedures that the Committee develops and therefore are not covered by either our old system or our changes.

In an emergency, a Commissioner may waive any of the new requirements. However, if a Commissioner waives a requirement, the preamble of the FEDERAL REGISTER document will explain why we could not follow the procedures in Executive Order 12044, and the Commissioner's name and title will be provided.

SECTION 4. CRITERIA FOR DEFINING SIGNIFICANT REGULATIONS

1. A regulation is significant if the Administrator or the responsible Commissioner decides that it is significant even though it does not meet the criteria in paragraph 2, below. In making this determination, the deciding official will consider such factors as the expected public interest in the regulation and whether the regulation is likely to affect one sex more than the other.

2. A regulation is significant if the program office expects that it will cause an impact that meets or exceeds any of the criteria in subparagraphs (a) through (g), below. In making this determination, the program office will consider both direct (the regulation causes the impact) and indirect (the regulation requires other agencies to issue rules that will cause the impact) effects.

(a) *Costs.* A regulation is significant if it is likely to cause increased costs for consumers; businesses; or Federal, State, or local governments of more than:

(1) $100 million in any 1-year period or $150 million in any 2-year period for the national economy; or

(2) $50 million in any 1-year period or $75 million in any 2-year period for any economic sector, industry, level of government, or geographic region.

The program office also will apply cost impact criteria to proposed new regulations that set standards and specifications that are likely to impact the Federal construction or supply schedules at the dollar levels in subparagraphs (1) and (2), above.

(b) *Productivity.* A regulation is significant if it is likely to result in the cost impacts in subparagraph (a), above, through any of the following:

(1) Reducing or restricting industry (output) capacity or capital investment;

(2) Increasing labor person-hours per unit of output;

(3) Increasing barriers to the substitution of processed or raw material supplies: or

(4) Reducing or restricting the adoption of new technologies, equipment processes, or skills.

(c) *Competition.* A regulation is significant if it is likely to substantially: Lessen competition, restrain market information, increase concentration, or tend to create a monopoly or monopolistic market power in any line of commerce if commerce in the relevant market exceeds $100 million per year.

(d) *Important materials.* A regulation is significant if it is likely to cause in the year of enactment or implementation a substantial increase in demand for or a substantial decrease in supply availability of any important material, product, or service. A substantial change is one that involves more than 5 percent of supply or that is worth $100 million or more. Important materials, products, or services include:

(1) Components of the national stockpile;

(2) Materials or services that the National Security Council determines are critical; or

(3) Materials, services, or products that the Administrator determines are critical.

(e) *Employment.* A regulation is significant if it is likely to result in a change in employment in any one year of 185,000 workers (0.2 percent) at the national level or 10,000 workers at the sector, industry, or State level.

(f) *Energy.* A regulation is significant if it is likely to cause in any one year an increase in demand for or a decrease in supply of petroleum or other forms of energy by 35,000 barrels per day or the equivalent (0.1 percent of daily U.S. consumption).

(g) *Reporting burden.* A regulation is significant if it is likely to cause a public reporting burden for any one report that requires:

(1) Each respondent to spend more than 1 hour in filling out the report; and

(2) A total burden of more than 1 million person-hours per year for respondents to fill out the reports.

SECTION 5. CRITERIA FOR REGULATORY ANALYSES

The program office will prepare a regulatory analysis for each proposed regulation:

1. For which the Administrator or the responsible Commissioner decides a regulatory analysis is necessary; or

2. That is determined to be a significant regulation under the criteria in paragraph 2 of section 4.

SECTION 6. CRITERIA FOR SELECTING REGULATIONS FOR REVIEW

Each Commissioner will ensure that regulations covering material under his or her areas of responsibility are reviewed at least once every 5 years. The Commissioner may decide which regulations are most in need of review; or the responsible service will select the sequence for reviews by applying the following criteria:

1. The continued need for the regulation;

2. The type and number of complaints or suggestions received;

3. The burdens imposed on those directly or indirectly affected by the regulation;

4. The need to simply or clarify language;

5. The need to eliminate overlapping and duplicate regulations;

6. The existence of unnecessary or inappropriate gender-based terminology; and

7. The length of time since the regulation has been evaluated or the degree to which technology, economic conditions, or other factors have changed in the area affected by the regulation.

SECTION 7. REGULATION TO BE REVIEWED INITIALLY

Office of Controller-Administration

lations concerning agency management of real and personal property and records. Area covered are the structure of the system, how the regulations are published, and similar administrative details. Contact point: Stanley W. Bowers, Chief, Directives Management Branch (202-566-0666).

Payments to GSA for supplies and services furnished to Government agencies. General description, with some examples, of GSA's procedures for paying bills. Contact point: John Boyd, Accounting Policy and Programs Division (202-566-0187).

Annual real property inventories. Detailed instructions to Government agencies for reporting to GSA all real property owned or leased by the U.S. Government through the agencies. Contact point: Joseph M. Pacheco, Acting Director, Central Control Division. (202-566-1527).

Office of General Counsel

Nondiscrimination in programs receiving Federal financial assistance. GSA's procedures for ensuring that when we give financial assistance to a program or an activity, the program or activity does not discriminate against individuals. Contact point: Helen Maus, Administration and Records Division (202-566-1460).

Freedom of Information Act. Procedures that GSA uses in making our records and information available to the public. Contract point: Rebecca Thompson, Administration and Records Division (202-566-1460).

Privacy Act. Procedures that GSA follows to collect, use, and disseminate records that contain information about individuals. Contract point: Rebecca Thompson, Administration and Records Division (202-566-1460).

Automated Data and Telecommunications Service

Contact point for all items: John F. Stewart, Procurement Policy and Regulations Branch (202-566-0834).

Government-wide automatic data processing (ADP) policy. Covers management, acquisition, and use of automatic data processing by Federal agencies.

Agency payments to telecommunications common carriers. Instructs agencies to inform the common carriers they do business with to provide duplicate telephone bills to GSA.

Essential telephone service during emergencies. Provides for a telephone arrangement so that subscribers with essential emergency functions are not delayed when they make calls from their homes.

Future plans for ADP. Provides procedures and criteria for Federal agencies to follow in planning for automated data and telecommunications systems.

Management and control of computer rooms. Provides guidelines for Federal agencies to follow in managing and controlling their computer rooms.

Listening-in devices. Provides policies concerning the use of these devices by Federal agencies.

Federal Supply Service

Contact point for all items: John I. Tait, Director, Regulations and Management Control Division (202-557-1914).

Federal Travel Regulations. The Federal Government's policy governing Federal civilian employee travel and relocation allowances.

Criteria for determining method of supply. General criteria for selecting the best methods of supply for agencies to meet their planned requirements.

Use of self-service stores. General policy for agencies to buy their administrative, custodial, and maintenance supplies at stores operated by GSA. Interagency purchase assignments. Basic policy for interagency purchase assignments within the executive branch of the Government.

Emergency preparedness planning. Policies and procedures for agencies to follow in procuring personal property and nonpersonal services during national emergencies.

Preparation and control of U.S. Government National Credit Cards. Policies and procedures covering agency use of Government credit cards, which are used to get supplies and services for U.S. Government motor vehicles, boats, and small aircraft.

National Archaives and Records Service

Contact point for all items: Adrienne Thomas, Director, Planning and Analysis Division (202-523-3214).

Access to unclassified records. Description of the restrictions on the use of unclassified archival materials and procedures for requesting access to unclassified archives through the Freedom of Information Act.

Public requests for review of national security information. Description of the procedures for requesting access to national security information and material in the National Archives of the United States.

Access to materials that remain classified. Detailed procedures to be followed by researchers desiring access to classified archival material in NARS custody.

Mandatory review of White House classified materials. Description of the procedures NARS follows in reviewing White House classified archival materials.

Review of national security classified donated hsitorical materials under Executive Order 11652:

Mandatory review of White House classified materials. Information on procedures followed by NARS in responding to requests for White House classified donated historical materials.

Mandatory review of agency classified materials. Details on the procedures followed by NARS in responding to requests for declassification review of agency classified donated historical materials.

Mandatory review of agency classified materials. Details on the procedures followed by NARS in responding to requests for declassification review of agency classified donated historical materials.

Public Building Service

Contact point for all items: A Gary Barnes, Chief, Management Control Branch (202-566-0412).

Assignment of space. These regulations prescribe the responsibilities and procedures for the assignment of space to Federal agencies and other procedures for the assignment of space to Federal agencies and other entities entitled to occupy space in Government-owned and leased buildings.

Relocation assistance and payments. These regulations serve to ensure uniform, fair, and equitable treatment of persons diplaced from their homes, businesses, or farms by Federal or federally assisted programs designed for the benefit of the public.

Conduct on Federal property. These rules and regulations apply to all property under charge of GSA and to all persons entering such property. They forbid soliciting, vending, debt collection, gambling, illegal use of drugs and alcohol, and they control traffic, parking, and similar actions.

Utilization of excess real property. These regulations prescribe the policies and methods governing the reporting by executive agencies and utilization by Federal agencies of excess real property, including related personal property.

Surplus real property disposal. These regulations prescribe the policies and methods governing the disposal of real property other than that destroyed, abandoned, or donated to a public body.

Federal Preparedness Agency

Contact point for all items: Dorinda Lowery, Management Analysis Officer (202-566-1975).

Emergency stabilization regulations. Procedures for stabilizing prices, rents, wages, and salaries.

Civil rights. Procedures for ensuring that programs that receive Federal financial assistance do not discriminate against individuals.

Strategic and critical materials. Procedures and delegations of authority

to agencies for releasing vital materials from U.S. stockpiles during an attack on the United States.

Buying supplies and constructing buildings in areas of high unemployment. U.S. policies for placing contracts and facilities in regions of the United States with high unemployment rates.

Defense Mobilization Orders. Policies and procedures for: Building vital facilities in areas that will reduce the risk of damage if we are attacked; making sure our defense production facilities continue to operate if we are attacked or if there is a major disaster; selecting priorities for and allocating materials and facilities for defense production; setting priorities for using U.S. resources after we have been attacked; training and using scientists and engineers for national security purposes; developing programs covering civilian health manpower; setting up a national emergency blood program; supplying materials necessary for defense during a major disaster; providing materials under U.S. Government control to supplement commercial supplies during a major disaster; providing Government-owned industrial plant equipment for use by private industries; stockpiling strategic and critical materials; setting priorities for allocating common use items; and maximizing the use of domestic energy supplies.

Federal Preparedness Circulars and Bulletins. Permanent statements of preparedness policies and programs for Federal departments and agencies.

NOTE.—GSA is in the process of determining which of our existing regulations will become the responsibility of the newly formed Federal Property Resources Service. This determination will not affect the regulation reviews. The designated contact points will answer specific questions concerning regulation responsibility.

Dated: November 16, 1978.

JAY SOLOMON,
Administrator of General Services.

PRIVACY ACT OF 1974

Revised Routine Use

AGENCY: General Services Administration.

ACTION: Revision of routine use for the system of records Federal Information Center (FIC) Client Case Files GSA/AV-1 (23-000-0105).

SUMMARY: The purpose of this document is to give notice, pursuant to the provisions of the Privacy Act of 1974, 5 U.S.C 552, of the revision of the routine use section of the system of records Federal Information Center (FIC) Client Case Files.

FOR FURTHER INFORMATION CONTACT:

Mr. William Hiebert, Records Management Branch, Paperwork Management Division, 202-566-0673.

SUPPLEMENTARY INFORMATION: Pursuant to the provisions of the Privacy Act of 1974, GSA published in the FEDERAL REGISTER (43 FR 38623 and 38624) notification of a new system of records, Federal Information Center (FIC) Client Case Files GSA/AV-1. The routine use section of the notice incorporated by reference the general routine uses in the appendix following the GSA notices. The Office of Management and Budget raised a question as to whether the general routine uses should have been applicable to this system of records. After review of the system of records and the general routine uses, GSA has determined that the system of records GSA/AV-1 should not incorporate the general routine uses. Therefore, the routine use section of the system of records Federal Information Center (FIC) Client Case Files GSA/AV-1, system identification 23-00-0105, is revised to read as follows:

Routine uses of records maintained in the system, including categories of users and purposes of such uses.

Information in the records will be communicated to appropriate Government agency officials for the purpose of solving complaints, mediating disagreements, or eliciting information on behalf of clients. Statistical reports which will not contain personal identifying information will be produced from the records and analyzed by the FIC program staff and may also be analyzed by an outside expert.

Dated: November 21, 1978.

JANICE K. MENDENHALL,
Controller-Director of Administration.

[6820-23-M]

Public Buildings Service

GUIDELINES FOR ESTABLISHMENT OF PHYSICAL FITNESS FACILITIES IN FEDERAL SPACE

AGENCY: General Services Administration.

ACTION: Notice of requirements for establishment of physical fitness programs and facilities.

SUMMARY: GSA and the President's Council on Physical Fitness and Sports have developed criteria for evaluating Federal agency requests for installation of employee health/fitness facilities in federally controlled space. This notice is intended to inform Federal agencies of the guidelines regarding installing physical fitness facilities for Federal employees.

EFFECTIVE DATE: December 4, 1978.

FOR FURTHER INFORMATION CONTACT:

Mr. Paul H. Herndon III, Chief, Assignment Branch, Office of Space Management, Public Buildings Service, General Services Administration, Washington, DC 20405 (202-566-1872); or Dr. Richard O. Keelor, Director, Program Development, President's Council on Physical Fitness and Sports, Washington, DC 20201 (202-755-8800).

SUPPLEMENTARY INFORMATION: Increasingly, GSA is asked to provide various types of physical fitness facilities for Federal agencies. However, most of these requests are denied on the grounds that these facilities are too costly for the limited number of employees that would use them or because there is no specific program requirement that assures long term use. It has been, and will continue to be, GSA's policy that such facilities will be established on a space-available basis only, and that no additional leased or Government-owned space will be acquired or designed for such a purpose unless it can be shown that the facilities are essential to an agency's mission. However, while these considerations remain of primary importance in the evaluation of agency requests to install physical fitness facilities, GSA recognizes that they must be balanced with a concern for the physical well-being of Federal employees. Therefore, for those agencies interested in instituting physical fitness programs to benefit their employees, GSA, in cooperation with the President's Council on Physical Fitness and Sports, has developed guidelines for the establishment of physical fitness facilities within available federally controlled space. The guidelines will assist in defining the best program for their employees.

CRITERIA FOR ESTABLISHING FITNESS PROGRAMS: Before the submission of a Standard Form 81, Request for Space, to GSA, an agency should submit a plan for the proposed program to the President's Council on Physical Fitness and Sports for approval. The proposed plan should set forth the scope and aims of the proposed program, and should include the following components:

DEC 4 1978 UMI

for construction, operation and main-

WAPATO-SATUS UNIT

ternational Trade Commission on No-

V 4 3 / 2 3 3 D E 4 7 8 UMI

1. The results of a survey indicating employee interest in the program;
2. A 3 to 5 year implementation plan demonstrating long term commitment to physical fitness/health for employees;
3. A medical orientation, including screening procedures, individualized exercise programs, identification of high-risk individuals, and appropriate followup activities;
4. Provision for the establishment of a professional staff which would work under the supervision of the medical unit;
5. An approach which will consider key health behavior related to degenerative disease, including smoking and nutrition;
6. A description of the proposed facility (these proposals should be modest and only include the essentials necessary to conduct a program involving cardiovascular endurance work, strength activities, and flexibility); and
7. Provision for equal opportunities for men and women, and all full-time employees, regardless of grade level.

The above-mentioned endorsement of the President's Council on Physical Fitness and Sports should be provided with the request for space and supporting documentation to the appropriate General Services Administration regional office in accordance with the procedures listed in the Federal Property Management Regulations, 101-17. GSA will evaluate all proposals in terms of space availability, alterations feasibility and costs, and the long-range plan for the building involved. All costs connected with the installation, operation, and maintenance of a physical fitness facility shall be borne by the requesting agency.

Dated: November 24, 1978.

DAVID R. DIBNER,
Acting Commissioner,
Public Buildings Service.

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

IRRIGATION OPERATION AND MAINTENANCE CHARGES

Water Charges and Related Information on the Wapato Irrigation Project, Wash.

This notice of proposed operation and maintenance rates and related information is published under the authority delegated to the Assistant Secretary—Indian Affairs by the Secretary of the Interior in 230 DM 1 and redelegated by the Assistant Secretary—Indian Affairs to the Area Director in 10 BIAM 3.

This notice is given in accordance with § 191.1(e) of Part 191, subchapter T, Chapter I, of Title 25 of the Code of Federal Regulations, which provides for the Area Director to fix and announce the rates for annual operation and maintenance assessments and related information on the Wapato Irrigation Project for Calendar Year 1979 and subsequent years. This notice is proposed pursuant to the authority contained in the Acts of August 1, 1914 (38 Stat. 53) and March 7, 1938 (45 Stat. 210).

the purpose of this notice is to announce an increase in the assessment rates to correspond with actual operation and maintenance costs on the Wapato-Satus Unit of the Wapato Irrigation Project. The proposed assessment increase for 1979 amounts to $2.00 per acre on the Wapato-Satus Unit; the rates on the Toppenish-Simcoe and Ahtanum Units will remain the same.

The public is welcome to participate in the rule making process of the Department of the Interior. Accordingly, interested persons may submit written comments, views or arguments with respect to the proposed rates and related regulations to the Area Director, Portland Area Office, Bureau of Indian Affairs, Post Office Box 3785, Portland, Oregon 97208, no later than 30 days after publication of this notice in the FEDERAL REGISTER.

WAPATO IRRIGATION PROJECT—GENERAL ADMINISTRATION

The Wapato Irrigation Project, which consists of the Ahtanum Unit, Toppenish-Simcoe Unit, and Wapato-Satus Unit within the Yakima Indian Reservation, Washington, is administered by the Bureau of Indian Affairs. The Project Engineer of the Wapato Irrigation Project is the Officer-in-Charge and is fully authorized to carry out and enforce the regulations, either directly or through employees designated by him. The general regulations are contained in Part 191, Operation and Maintenance, Title 25—Indians, Code of Federal Regulations (42 FR 30362, June 14, 1977).

IRRIGATION SEASON

Water will be available for irrigation purposes from April 1 to September 30 each year. These dates may be varied as much as 15 days when weather conditions and the necessity for doing maintenance work warrants doing so.

DELIVERY TO PATENT IN FEE LANDS

No water will be delivered to a patent in fee farm unit until all irrigation charges assessed against the land for construction, operation and maintenance, and all penalties that may have accrued, are paid.

DELIVERY TO INDIAN LANDS UNDER LEASE

No water will be delivered to trust Indian lands under lease until the lessee has paid the irrigation charges and any penalties assessed under these regulations, or in cases where the lease provides that the landowners pay the operation and maintenance charges from the lease rental, no water shall be delivered until the Superintendent of the Reservation has issued a certificate to the Project Engineer certifying that the lessee has complied fully with the terms of the lease.

DELIVERY TO INDIAN LANDS BEING FARMED BY INDIAN FARMERS

No water will be delivered to land operated by an Indian farmer until the charges fixed in these regulations are paid, or until the Superintendent of the Reservation has issued a certificate to the Project Engineer, certifying that the Indian will pay the charges through the Superintendent, or that the Indian is financially unable to pay the charges.

TIME OF PAYMENT

The charges fixed by these regulations shall become due April 1 of each year and are payable on or before that date. To all charges assessed against lands in patent in fee ownership, and those paid by lessees of Indian lands direct to the project office, remaining unpaid on July 1 following the due date, there shall be added a penalty of one and one-half percent for each month, or fraction thereof, from the due date until the charges are paid.

AHTANUM UNIT

CHARGES

The operation and maintenance rate on lands of the Ahtanum Irrigation Unit for the Calendar Year 1979 and subsequent years until further notice, is fixed at $5.25 per acre per annum for land to which water can be delivered from the project works.

TOPPENISH-SIMCOE UNIT

CHARGES

The operation and maintenance rate for the lands under the Toppenish-Simcoe Irrigation Unit for the Calendar year 1979 and subsequent years until further notice, is fixed at $5.45 per acre per annum for land for which an application for water is approved by the Project Engineer.

WAPATO-SATUS UNIT

CHARGES

The basic operation and maintenance rate on assessable lands under the Wapato-Satus Unit is fixed for the Calendar Year 1979 and subsequent years until further notice as follows:

(1) Minimum charge for all tracts	$17.00
(2) Basic rate upon all farm units or tracts for each assessable acre except Additional Works lands	17.00
(3) Rate per assessable acre for all lands with a storage water right, known as "B" lands, in addition to other charges per acre	1.80
(4) Basic rate upon all farm units or tracts for each assessable acre of Additional Works lands	17.90

ASSESSABLE LANDS

The assessable lands of the Wapato-Satus Unit are classified under these regulations as follows:

(a) All Indian trust (A and B) land designated as assessable by the Secretary of the Interior, except land which has never been cultivated if in the opinion of the Project Engineer the cost of preparing such land for irrigation is so high as to preclude its being leased at this time for agricultural purposes.

(b) All Indian trust (A or B) land not designated as assessable by the Secretary of the Interior for which application for water is pending or on which assessments had been charged the preceding year.

(c) All patent in fee land covered by a water right contract, except on land that because of inadequate drainage is no longer productive. The adequacy of the drainage is determined by the Project Engineer.

(d) At the discretion of the Project Engineer and upon the payment of charges, patent in fee land for which an application for a water right or modification of a water right contract is pending.

RICHARD M. BALSIGER,
Acting Area Director.

INTERNATIONAL TRADE COMMISSION

[AA1921-190 and 191]

RAYON STAPLE FIBER FROM FRANCE AND FINLAND

Investigation and Hearing

Having received advice from the Department of the Treasury on November 13, 1978, that viscose rayon staple fiber from France and from Finland is being, or is likely to be, sold at less than fair value, the United States International Trade Commission on November 28, 1978, instituted investigation Nos. AA1921-190 and 191 under section 201(a) of the Antidumping Act, 1921, as amended (19 U.S.C. 160(a)), to determine whether an industry in the United States is being, or is likely to be injured, or is prevented from being established, by reason of the importation of such merchandise into the United States.

Hearing. A public hearing in connection with the investigations will be held on Thursday, January 4, 1979, in the Commission's Hearing Room, United States International Trade Commission Building, 701 E Street NW., Washington, D.C. 20436, beginning at 10:00 a.m., e.s.t. All persons shall have the right to appear in person or by counsel, to present evidence and to be heard. Requests to appear at the public hearing, or to intervene under the provisions of section 201(d) of the Antidumping Act, 1921, shall be filed with the Secretary of the Commission, in writing, not later than noon, Friday, December 29, 1978.

By order of the Commission.

Issued: November 29, 1978.

KENNETH R. MASON,
Secretary.

DEPARTMENT OF JUSTICE

U.S. CIRCUIT JUDGE NOMINATING COMMISSION, SEVENTH CIRCUIT PANEL

Meeting

The first meeting of the nominating panel for the Seventh Circuit of the United States Circuit Judge Nominating Commission will be held on December 15, 1978, at 11:00 a.m., in the Federal Building, U.S. Court of Appeals, Clerk's Office, 219 South Dearborn, Chicago, Illinois 60604.

The purpose of the meeting is to provide the panel members with a history of the Circuit Court system; an explanation of the merit selection process; and, the qualifications to be sought in nominating candidates for Circuit Court Judgeships.

This meeting will be open to the public.

JOSEPH A. SANCHES,
Advisory Committee
Management Officer.

Law Enforcement Assistance Administration

EVALUATION OF PROJECTS OF MAJOR CRIMINAL JUSTICE ACTION PROGRAMS

Solicitation Regarding Grants

The Office of Criminal Justice Programs is interested in obtaining information from organizations (profit making, not-for-profit, university) who desire to obtain grants to conduct evaluations of the projects of major criminal justice action programs.

Such grants will often require a 10 percent cash match; therefore, each responder should clearly indicate the extent of interest in those grants requiring match and readiness to provide such. Occasionally LEAA may be able to assist in identifying a match source.

Information as to organizational and staff capabilities and experience, as well as specific functional interest areas (i.e.—courts, police, corrections, defense, etc.), should be sent to:

Director, Program Development and Evaluation Staff, Office of Criminal Justice Programs, Law Enforcement Assistance Administration, 633 Indiana Avenue, NW., Washington, D.C. 20531.

J. ROBERT GRIMES,
Assistant Administrator, Office of Criminal Justice Programs.

NATIONAL TRANSPORTATION POLICY STUDY COMMISSION

OPEN MEETING

In accordance with section 10(a) of the Federal Advisory Committee Act, Pub. L. 92-463, the National Transportation Policy Study Commission announces the following meeting:

NAME: Meeting of the Commission.

DATE: December 14, 1978.

TIME: 9:00 a.m.

PLACE: 2167 Rayburn House Office Building, Washington, D.C. 20515.

TYPE OF MEETING: Open.

CONTACT PERSON:

Beth Singley, National Transportation Policy Study Commission, 20000 M Street, N.W. Suite 3000, Washington, D.C. 20036.

Purpose of the Commission: The National Transportation Policy Study Commission was established under section 154 of the Federal-Aid Highway Act of 1976 (Pub. L. 94-280) to report findings and recommendations with respect to the Nation's transportation needs, both national and regional, through the year 2000.

Tentative Agenda: Review of Draft Chapters; Review of Special Reports; Review of Staff Working Papers.

Dated: November 29, 1978.

EDWARD R. HAMBERGER,
General Counsel.

OFFICE OF MANAGEMENT AND BUDGET

CLEARANCE OF REPORTS

List of Requests

The following is a list of requests for clearance of reports intended for use in collecting information from the public received by the Office of Management and Budget on November 28, 1978, (44 U.S.C. 3509). The purpose of publishing this list in the FEDERAL REGISTER is to inform the public.

The list includes—

The name of the agency sponsoring the proposed collection of information;

The title of each request received;

The agency form number(s), if applicable;

The frequency with which the information is proposed to be collected;

An indication of who will be the respondents to the proposed collection;

The estimated number of responses;

The estimated burden in reporting hours; and

The name of the reviewer or reviewing division or office.

Requests for extension which appear to raise no significant issues are to be approved after brief notice through this release.

Further information about the items on this daily list may be obtained from the Clearance Office, Office of Management and Budget, Washington, D.C. 20503, 202-395-4529, or from the reviewer listed.

PRIVACY ACT

Notice of New Systems

The purpose of this notice is to give members of the public an opportunity to comment on Federal agency proposals to establish or alter personal data systems subject to the Privacy Act of 1974.

The Act states that "each agency shall provide adequate advance notice to Congress and the Office of Management and Budget of any proposal to establish or alter any system of records in order to permit an evaluation of the probable or potential effect of such proposal on the privacy and other personal or property rights of individuals * * *"

OMB policies implementing this provision require agencies to submit reports on proposed new or altered systems to Congress and OMB 60 days prior to the issuance of any data collection forms or instructions, 60 days before entering any personal information into the new or altered system, or 60 days prior to the issuance of any requests for proposals for computer and communications systems or services to support such systems—whichever is earlier.

The following reports on new or altered systems were received by OMB between October 30, 1978 and November 24, 1978. Inquiries or comments on the proposed new systems or changes to existing systems should be directed to the designated agency point-of-contact and a copy of any written comments provided to OMB. The 60 day advance notice period begins on the report date indicated.

DEPARTMENT OF JUSTICE

System name: Investigative Support Information System.
Report date: October 26, 1978.
Point-of-contact: Mr. William J. Snider, Administrative Counsel, Office of Management and Finance, Department of Justice, Washington, D.C. 20530.
Summary: This is a new system, to be maintained by the FBI as an adjunct to the FBI central records system. It will consist of computerized listings of individuals whose names appear on documents in active investigative case files. Those case files will be maintained in the Central Records System. The Investigative Support Information System records will be maintained, on computer tape for easy retrieval, only during the duration of an investigation, according to the report.

System name: Weekly Statistical Report.
Report date: November 3, 1978.
Point-of-contact: Mr. William J. Snider, Administrative Counsel, Office of Management and Finance, Department of Justice, Washington, D.C. 20530.
Summary: This is an existing system, maintained by the Criminal Division as a management tool for measuring and tracking the time spent by attorneys on various activities. It is proposed to expand the systems by including weekly statistical reports on criminal division paralegals.

FEDERAL COMMUNICATIONS COMMISSION

System name: Records of money received, refunded, and returned and personal checks destroyed.
Report date: October 31, 1978.
Point-of-contact: Mr. Richard D. Lichtwardt, Federal Communications Commission, Washington, D.C. 20554.

Summary: This is a revision to an existing system, used to track refunds to individuals for overpayment of fees for various FCC applications, or fees paid and later suspended by court order. The FCC has revised the system following questions raised by OMB and the Subcommittee on Government Information and Individual Rights.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

System name: Health Care Provider File.
Report date: October 31, 1978.
Point-of-contact: Ms. Nancy Seiler, HSA Privacy Act Coordinator, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, Md. 20857.
Summary: The Health Services Administration proposes this system in order to evaluate the "quality and efficacy" of medical care and utilization of services in eight Public Health Service general hospitals. The system will consist of a research data base of data about and obtained from all health care professionals who are associated with patient treatment in the relevant hospitals. The report notes that while the skills of health care providers will be verified, "no determination will be made regarding rights, benefits, or privileges of individuals."

NUCLEAR REGULATORY COMMISSION

System name: Property and Supply System.
Report date: November 1, 1978.
Point-of-contact: Ms. Betty L. Wagman, Privacy Act Officer, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555.
Summary: This is a new system of records intended to maintain inventory control over NRC-owned personal property signed out to employees, consultants and contractors. The only personal information included will be the names and office locations of those individuals.

SECURITIES AND EXCHANGE COMMISSION

System name: Acquisition, Tender Offer, and Solicitation Records Filed Under the Securities Exchange Act of 1934.
Report date: November 1, 1978.
Point-of-contact: Ms. Julie Allecta, Securities and Exchange Commission, 500 N. Capitol Street, Washington, D.C. 20549.
Summary: This is a proposed modification to an existing system. The SEC will add information on beneficial ownership which is required to be filed under 1977 amendments to the Securities Exchange Act. In addition, some of the information in the system will be computerized, and three filing schedules revised accordingly. The changes, taken together, will according to the report improve the SEC's analytical capability, and centralize reporting of securities ownership information, avoiding duplicative reporting.

DEPARTMENT OF DEFENSE

System name: General Legal Files.
Report date: November 9, 1978.
Point-of-contact: Mr. William Cavaney, Defense Privacy Board, Department of Defense, Washington, D.C. 20301.
Summary: The Department of the Army has proposed this new system of records to be maintained by the Judge Advocate General. It will include legal documents such as personnel actions, investigations, and petitions, involving military personnel.
System name: Defense Meritorious Service Medal Files.
Report date: November 9, 1978.
Point-of-contact: Mr. William Cavaney, Defense Privacy Board, Department of Defense, Washington, D.C. 20301.
Summary: This is a new system proposed by the Office of the Secretary of Defense "to track and insure issuance of approved award to appropriate individuals."

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

System names: (1) Disaster Recovery Assistance Files; (2) Disaster Assistance Personnel Reserve Files.
Report date: November 14, 1978.
Point-of-contact: Mr. Harold Rosenthal, Departmental Privacy Act Officer, Department of Housing and Urban Development, Washington, D.C. 20410.
Summary: The first system of records consist of records on applicants for disaster recovery assistance, including temporary housing, home loans, and grants, and will be used to make determinations of eligibility. HUD plans to use the second system as a file of individuals available for staffing disaster field offices during disasters and emergencies. The records will include the names, addresses, telephone number, and special skills, ability and experience of the personnel.
Waiver requests: OMB procedures permit a waiver of the advance notice requirement when the agency can show that the delay caused by the 60 day advance notice would not be in the public interest. It should be noted that a waiver of the 60 day advance notice period does not relieve an agency of the obligation to publish notice describing the system and to allow 30 days for public comment on the proposed routine uses of the personal information to be collected. A waiver of the 60 day advance notice provision was requested by agencies for the following reports received between October 30, 1978 and November 24, 1978. Public inquiries or comments on the proposed new or altered systems should be directed to the designated agency point-of-contact and a copy of any written comments provided to OMB. Comments on the operation of the waiver procedure should be directed to OMB.

DEPARTMENT OF DEFENSE

System name: Repromotion Eligibility Files.
Report date: November 13, 1978.
Point-of-contact: Mr. William Cavaney, Defense Privacy Board, Department of Defense, Washington, D.C. 20301.
Summary: This new system will be used by the Defense Mapping Agency to aid in placing employees who were downgraded "competitively and through no fault of their own" in positions at their former grade level or higher.

VELMA N. BALDWIN,
Assistant to the Director, Administration.

OFFICE OF THE SPECIAL REPRESENTATIVE FOR TRADE NEGOTIATIONS

ADVISORY COMMITTEE FOR TRADE NEGOTIATIONS

Meeting

Pursuant to the Federal Advisory Committee Act, 5 U.S.C. App. (the Act), notice is hereby given that a meeting of the Advisory Committee for Trade Negotiations will be held Monday, December 11, 1978, from 1:30 p.m. to 5:00 p.m. at the Office of the Special Representative for Trade Negotiations, 1800 G Street, N.W., Washington, D.C.

The purpose of this meeting will be to review and discuss the status of, and the United States strategy and objectives for, the multilateral trade negotiations currently underway in Geneva.

In accordance with section 10(d) of the Act, the meeting will not be open to the public because information falling within the purview of 5 U.S.C. 552b(c)(1) (the exception to the Government in the Sunshine Act for matters specifically required by Executive order to be kept secret in the interest of foreign policy) will be reviewed and discussed.

More detailed information can be obtained by contacting Phyllis O. Bonanno, Executive Director, Advisory Committee for Trade Negotiations, Office of the Special Representative

for Trade Negotiations, 1800 G Street, N.W., Washington, D.C. 20506, telephone (202) 395-5421.

Dated: November 29, 1978.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 10489; 812-4377]

INTERNATIONAL INVESTORS INC. AND I.I.I. SECURITIES CORP.

Filing of an Application

NOVEMBER 22, 1978.

Notice is hereby given that International Investors Incorporated ("International"), registered under the Investment Company Act of 1940 ("Act") as an open-end, diversified, management investment company, and I.I.I. Securities Corporation, its principal underwriter ("III") 122 East 42nd Street, New York, New York, 10017, filed an application on October 18, 1978, for an order of the Commission, pursuant to Section 6(c) of the Act, exempting from the provisions of Section 22(d) of the Act a proposed transaction ("Sale") pursuant to which shares of International will be issued at net asset value without a sales charge in exchange for certain gold mining company shares held by Mondial Commercial Limited, a Liechtenstein limited company ("Mondial"), through a subaccount at the Swiss Credit Bank, the Metric Accounting Unit Storage Agreement subaccount ("Subaccount"). All interested persons are referred to the application on file with the Commission for a statement of the representations made therein, which are summarized below.

International has been informed that approximately 1,926 persons ("Account Holders") have beneficial interests in the Subaccount, that the Subaccount concentrated its investments in gold bullion, gold coins and gold mining stocks and that Progress Foundation, a Swiss charitable institution, owns all of the stock of Mondial. In November, 1975, the Commission initiated enforcement proceedings in the United States District Court for the District of Columbia (the "District Court") against various individuals and entities, including Progress Foundation and Mondial. The District Court appointed a special counsel ("Special Counsel") on behalf of the Account Holders. Additionally, the Swiss Banking Commission issued a decree ("Swiss Decree") in June, 1976, providing that all assets of the various Mondial subaccounts, including the Subaccount, be distributed to the investors in a manner to be approved by the Swiss Banking Commission and satisfactory to the Commission.

International has been advised by the Special Counsel that in furtherance of the Swiss Decree, and in connection with settlement of the enforcement proceedings initiated by the Commission, two partial liquidation distributions, consisting of gold bullion and gold coins held by the Subaccount, have been made to the Account Holders and that a plan calling for a third partial liquidation distribution, consisting of shares of nine issues of gold mining stocks held by the Subaccount, was approved by the Swiss Banking Commission on September 26, 1978, and by the District Court on October 11, 1978. International has been advised by the Special Counsel that under the distribution plan the Account Holders will be given the option of receiving their pro rata portions of the gold mining stocks, to the nearest whole share based on the number of "metric accounting units" to which they are entitled according to the books and records of Mondial (i) "in kind" either by delivery directly to them of certificates for the shares representing such portions, by transfer of such shares to their individual accounts at a bank or other institution or by delivery to them of American Depository Receipts for the shares or (ii) with respect to seven of the nine issues of such shares ("Securities"), instructing the Subaccount to exchange their pro rata portions of the Securities for International shares and accepting American Depository Receipts for their pro rata portions of the remaining two issues. Account Holders who fail to make a timely election with respect to the Securities will be deemed to have elected the "in kind" option.

As of September 30, 1978, the Securities had an aggregate market value of approximately $5,253,918 and International had net assets of approximately $97,773,115. If all Account Holders elected to take their distributions in shares of International, the Sale of International shares on September 30, 1978, in exchange for all of the Securities would have resulted in the issuance to the Account Holders of $470,359.71 International shares having a net asset value of $11.17 each (assuming International had accepted all the Securities).

The Special Counsel has advised International that the documents to be delivered to the Account Holders pursuant to the distribution plan, as approved by both the District Court and the Swiss Banking Commission, include (i) a notice to all Account Holders, prepared by the Special Counsel and describing the distribution plan and the past operations of the Subaccount, (ii) a form for the Account Holder's use in electing to take his pro rata distribution of the Securities "in kind" or in International shares and (iii) International's prospectus and most recent report to its shareholders.

Applicants state that, ordinarily, sales of International's shares are made through its underwriter, III, at their net asset value plus a sales charge. According to International's prospectus, the maximum sales charge is 8.50%, which is applicable to purchases of less than $10,000 and the sales charge decreases to 1.25% on purchases of $500,000 or more. The sales charge is reduced on shares purchased by an investor who purchases under an accumulation plan and no sales charge is imposed on reinvestment of income dividends or on the sale of International shares for investment to officers, directors and bona fide, full-time employees of International, its investment adviser or III or on reinvestment of capital gains or on purchases made under exchange privileges with other open-end investment companies.

Applicants state that the Sale of International shares to the Subaccount will be made on the following basis. The Subaccount will deliver to International a written order for the purchase of International shares having an aggregate net asset value (as next computed following receipt of the order) equal to the net asset value of the Securities delivered with such order. In exchange for such Securities, International then proposes to issue its shares to the Subaccount at the net asset value thereof, without a sales charge. The number of International shares to be issued in exchange for the Securities delivered by the Subaccount will be determined by dividing the net asset value of such Securities by the net asset value per share of International's shares, both computed as of the time International's net asset value per share is next determined after the Subaccount's delivery to International of the purchase order.

For purposes of determining the number of International shares to be issued in the Sale, the Securities to be delivered to International by the Subaccount will be valued in accordance with Rule 2a-4(a)(1) under the Act and International's normal procedures for valuing its portfolio securities. The Board of Directors of International has determined that such valuation is appropriate. In making such determination the Board considered all factors which it deemed relevant, including (i) the amount and quality of the Securities which may be acquired, their markets and trading volumes and their compatibility with the investment policies and objectives of International, (ii) the fact that the Sale will

be consummated without expense to International, (iii) the benefits for the shareholders of International, (iv) the possible adverse effect on the issues now held by International if all the Securities held by the Subaccount were sold simultaneously at whatever prices might be obtainable on that basis, (v) the possibility that, as a result of Account Holders electing an "in kind" distribution of Securities, substantially less than all the Securities may be delivered to International, and (vi) the ability of International to process its normal expected level of redemptions.

Applicants state that no Sale will be made to the Subaccount unless (i) all Securities to be acquired by International are acceptable to it on the date of the Sale, (ii) the Subaccount offers to International all Securities held by it on the date of the Sale, and (iii) evidence satisfactory to International is presented that the person effecting the Sale on behalf of the Subaccount has the authority to do so. The Special Counsel has provided International with a list of the gold mining stocks held by the Subaccount and has indicated that he does not expect that the Subaccount will acquire or, except for the "in kind" distributions described above, dispose of any securities before the Sale. International will accept only Securities for which market quotations are readily available as of the date of the Sale. International has determined that as of September 30, 1978, such market quotations are readily available for all the Securities and, accordingly, presently intends to accept all the Securities. International has no present intention of selling any of the Securities within a relatively short period following their acquisition.

The Sale will be made only to the Subaccount or persons authorized to act for it, International understands that such persons will request that the International shares be issued directly to the Account Holders who elect to take their distributions in International shares. Accordingly, although International anticipates that its shares will be issued directly to the Account Holders (or to their nominees), no offer or sale will be made by International to the Account Holders in connection with the Sale. The consent of the Account Holders is not required for the implementation of the distribution plan, including the Sale, and their only discretion in connection with the distribution will be to elect to take International shares or an "in kind" portion of the Securities. In all cases the person to whom International shares are issued will become the record owner of such shares. Upon the issuance of International shares to the Account Holders, an appropriate confirmation will be delivered to each Account Holder who has become a record holder of International's shares. International has been advised that together with International's confirmation each Account Holder will receive a report from the Special Counsel concerning the distribution of International shares to the Account Holder.

The Securities do not include two of the issues of gold mining stocks held by the Subaccount because the acquisition of them by International, when combined with the shares thereof already held by International, would cause its holdings of such issues to exceed the maximum permitted by its investment policies. International has determined, on the basis of the market prices of the Securities as of September 30, 1978, that International's acquisition of the Securities would not, on a pro forma basis giving effect to the completion of the Sale, cause (a) International to hold more than 10% of the outstanding shares of any one issuer (b) securities of any one issuer to constitute more than 5% of the net assets of International, or (c) International to be in violation of any of its internal policies.

For federal income tax purposes, the Sale will be treated as a taxable transaction for the Subaccount and its Accounts Holders, to the extent each is subject to such taxes. Because International will not acquire the Securities pursuant to a plan of reorganization or liquidation, it will not be entitled to any loss carryover which may have been available to the Subaccount. The tax basis of the Securities in International's hands will be their fair market value, computed as provided above, at the close of business on the date the Subaccount delivers its purchase order. Because the Securities will be acquired by International at their fair market value, no unrealized appreciation or depreciation will carry over to International.

Section 22(d) of the Act provides, in pertinent part, that no registered investment company or principal underwriter thereof shall sell any redeemable security issued by such company except at a current offering price described in the prospectus. The current public offering price of the shares of International, as described in its prospectus, is net asset value per share plus a sales charge. As noted above, such sales charge will not be applicable to the Sale. Applicants state that without an exemption from Section 22(d) of the Act International would be prohibited from issuing its shares to the Subaccount without a sales charge.

Applicants state that the Subaccount will pay any transfer taxes imposed on the transfer of the Securities to International and that neither III nor International will bear any expenses in connection with the proposed sale, except that International will bear the ongoing transfer agent expenses customarily borne by it in connection with sale of any of its outstanding shares and III will bear the cost of confirmations, Prospectuses and shareholder reports to be distributed to the Account Holders. All other expenses, including fees and out-of-pocket costs of counsel, which arise in connection with the Sale will be incurred by International's investment adviser, which will be reimbursed therefor by the Subaccount up to a maximum of $10,000.

Applicants further state that there is no connection between International and the Subaccount. The management of International considers the proposed acquisition by it of the Securities in exchange for its shares to be at a fair price, arrived at by arms length bargaining, and believes that the Sale will be beneficial to the shareholders of International for the following reasons:

(a) Those expenses of International which do not rise proportionately with an increase in portfolio size will be spread over a larger number of shares and therefore will be a smaller amount per share to the benefit of existing shareholders;

(b) The proposed acquisition will enable International to acquire at one time additional securities for its existing portfolio without affecting the market in such securities; and

(c) The Securities will be acquired by International at less expense than would be the case if securities of the same issuers were purchased in the open market, for the reason that there will be no brokers' commissions or dealer mark-ups in connection with the Sale.

In addition, Applicants point out that no sales effort will be involved, and no sales costs or other costs (except the ongoing transfer agent expenses customarily borne by International in connection with sale of any of its outstanding shares) will be incurred by International in connection with the Sale. Applicants maintain that it is only fair to recognize such cost savings and to pass them along to the Subaccount. Applicants submit that, even assuming that 100% of the Account Holders should instruct the Subaccount to exchange their portion of the Securities for International shares and redeem their shares promptly after the Sale, the ability of International to process both such redemptions and its normal expected level of redemptions would not be jeopardized since International has sufficient cash on hand to be able to handle them.

Section 6(a) of the Act provides, in [8010-01-M]

The existing Tolland Service Center

nancials and reflect the lease pay- assume all costs of operating and that a hearing be held in respect of

V 43/233

Section 6(c) of the Act provides, in pertinent part, that the Commission, by order upon application, may conditionally or unconditionally exempt any person, security or transaction or any class or classes of persons, securities, or transactions from any provision or provisions of the Act and the Rules promulgated thereunder, if and to the extent such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Applicants state that in their opinion the terms of the Sale are fair and reasonable and in the best interests of International and its shareholders, and, therefore, that granting of the requested exemption is consistent with the general purposes of the Act, and is appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Notice is further given that any interested person may, not later than December 13, 1978, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the application accompanied by a statement as to the nature of his interest, the reasons for such request and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission should order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon Applicants at the address stated above. Proof of such service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. As provided by Rule 0-5 of the Rules and Regulations promulgated under the Act, an order disposing of the application herein will be issued as a matter of course following said date unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

SHIRLEY E. HOLLIS,
Assistant Secretary.

[8010-01-M]

[Release No. 20785; 70-6219]

CONNECTICUT LIGHT & POWER CO. ET AL.

Proposed Sale and Leaseback of Utility Assets and Lease Financing

NOVEMBER 20, 1978.

Notice is hereby given that The Connecticut Light and Power Company ("CL&P"), The Hartford Electric Light Company ("HELCO"), Selden Street, Berlin, Connecticut 06037, and Western Massachusetts Electric Company ("WMECO"), 174 Brush Hill Avenue, West Springfield, Massachusetts 01089, public-utility subsidiary companies of Northeast Utilities ("NU"), a registered holding company, have filed an application-declaration with this Commission pursuant to the Public Utility Holding Company Act of 1935 ("Act"), designating Sections 9(a), 10, and 12(d) of the Act as applicable to the following proposed transactions. The proposed transactions involve the sale and leaseback of certain utility assets consisting of land, buildings, and equipment, and the lease financing of a new building and additions and improvements to existing buildings and equipment. All interested persons are referred to the application-declaration, which is summarized below, for a complete statement of the transactions proposed.

It is proposed that the following facilities be sold to real estate subsidiaries of Interet Corporation, a nonaffiliated lease broker, (Interet Corporation and its subsidiaries are herein referred to as "Interet") and simultaneously leased back: (a) The Tolland, Connecticut Service Center ("Tolland") owned by CL&P, consisting of a service center building, garage, and site improvements situated on 13.3 acres of land. The estimated fair market value of these facilities is $1,600,000. The original cost, including land, was $1,571,332, and the current book value is $1,471,774. The sale price of these facilities will be the book value. (b) The Convex dispatching building owned by CL&P located in Southington, Connecticut ("Convex"), consisting of a building situated on approximately 1 acre of land. The estimated fair market value of this facility is $927,000. The original cost, excluding land, was $546,927, and the current book value is $368,072. The sale price of these facilities will be the book value. The land will not be sold but will be leased by CL&P to Interet. (c) In addition, CL&P, HELCO, and WMECO, as owners of the Millstone nuclear plant site in Waterford, Connecticut, propose to lease a small parcel of land at the site to Interet, on which will be constructed a refuel outage building to be leased to such companies ("Millstone").

The existing Tolland Service Center is being substantially renovated and expanded. It is estimated that the total cost of the addition to Tolland will not exceed $3,528,226, and the total amount to be financed by Interet will be not more than $5,000,000 (being the sum of the purchase price for the existing facilities and the total estimated cost of the addition). The Convex dispatching building houses all dispatch facilities and equipment for Convex, which is a satellite dispatching center of the New England Power Exchange. New computer equipment (including the AGC/SCADA system described below) is to be installed at Convex, and additional improvements to the building are necessary to accommodate the new equipment and otherwise improve the facility. Because the CL&P Southington property contains the Southington transmission substation as well as the Convex building, CL&P proposes to lease to Interet the land on which the Convex building is located at a nominal rent rather than sell any land with the building. The Ground Lease will be coterminous with the lease of the building to CL&P. It is estimated that the total cost of the addition to Convex will not exceed $931,928, and the total amount to be financed by Interet will be not more than $1,300,000 (being the sum of the purchase price of the existing facilities and the total estimated cost of the addition).

Refueling operations at the Millstone site require the construction of a refuel outage building which is to be constructed on land leased to Interet by the applicants-declarants at a nominal rent. The Ground Lease will be coterminous with the lease of the building to the applicants-declarants. It is estimated that the total cost of the construction of the refuel outage building will not exceed $2,000,000, and the amount to be financed by Interet will not exceed this amount.

In connection with such proposed transactions, the applicants-declarants will enter into Sale and Leaseback Agreements with Interet as lessor. The base term of the Tolland lease will be for 30 years, for Convex 20 years, and for Millstone 25 years. All leases will be "net leases" in that the lessee will assume all costs of operating and maintaining the facilities, including the payment of property taxes and insurance. The companies will capitalize the leases for ratemaking purposes unless the Connecticut Public Utilities Control Authority directs that the lease payments be treated as operating expenses pursuant to the addendum to APB Opinion No. 2. If the operating expense treatment is so directed, and if the payments are material, the companies will reflect the leases in a footnote disclosure in the appropriate financials and reflect the lease payments as an expense in the statements of income. In terms of annual interest charges, the average simple interest cost to the lessee embodied in the rentals will be approximately 9.75% per annum for Tolland, 9.80% per annum for Convex, and 10.01% per annum for Millstone. Interet will finance the acquisition of the facilities through a first mortgage or mortgages on the facilities from institutional lenders.

It is stated that the proposed transactions will enable the applicants-declarants to obtain necessary financing for the facilities on favorable terms in the light of existing conditions. The companies, with the exception of WMECO, are unable at the present time to sell first mortgage bonds and are limited in their ability to issue preferred stock because of inadequate coverage ratios. Lease financing therefore offers a favorable alternative for the long-term financing of needed new facilities at this time.

In addition to the foregoing, CL&P proposes to lease not more than $6,000,000 worth of the data processing equipment and software and accessory equipment ("System") which will together comprise all or part of a new Automatic Generation Control/Supervisory Control and Data Acquisition (AGC/SCADA) system to be installed in the Convex dispatching building described above. The proposed transaction is being arranged by Interet Corporation. CL&P is to enter into a Participation Agreement with The Connecticut Bank and Trust Company, as Trustee ("Trustee"), Ford Motor Credit Company, and Manufacturers Detroit Leasing Company ("Equity Participants") and Bankers Life Company ("Institutional Investor"). Pursuant to the Participation Agreement and prior to putting any part of the System into service, CL&P will either arrange for the Trustee to acquire such part from the vendor or will itself purchase such part and resell it to the Trustee. The Trustee will hold legal title to the System for the benefit of the Equity Participants and the Institutional Investor pursuant to a Trust Agreement. When the System is delivered to and accepted by the Trustee, the Trustee will simultaneously lease back the System to CL&P pursuant to a Lease Agreement ("Lease"). The base term of the Lease will be eight years, which term will not exceed 75% of the estimated economic useful life of the System. CL&P will have the right either to purchase or to renew on a fair market or fair rental value basis. If CL&P neither purchases nor renews the Lease at the end of the base term, the System will be returned to the Trustee. The Lease will be a "net lease" in that CL&P will assume all costs of operating and maintaining the System, including the payment of property taxes and insurance. It is stated that the AGC/SCADA system lease does not meet any of the FASB-13 tests for capitalized leases and that, therefore, it will be accounted for by CL&P as an operating lease and will not appear on its balance sheet. The lease rentals will be treated as an operating expense for ratemaking purposes.

The Trustee will finance its acquisition of the System through a combination of an investment of approximately 25% of the Trustee's cost by the Equity Participants and of an issuance of secured notes to the Institutional Investor at an interest rate of not more than 9.5% per annum in an amount equal to approximately 75% of the Trustee's cost. The rental payments are premised upon the availability of certain tax benefits to the Equity Participants. In the event that such tax benefits prove to be unavailable, the Lease rentals will be adjusted. Such adjustments could, in the aggregate, increase the effective interest cost up to a maximum of 10% per annum.

CL&P believes that the net lease approach is the most reasonable and least expensive method now available to it for the acquisition of the System. It is estimated that the annual cost to CL&P to purchase the System by conventional methods would be approximately 12% as opposed to approximately 8% for the rental charge.

It is represented that the Connecticut Public Utilities Control Authority ("PUCA") has jurisdiction over certain of the proposed transactions. It is further stated that CL&P may seek a ruling from the PUCA that the Trustee, the Equity Participants, and the Institutional Investor will not be deemed an "electric company" under Title 16 of the Connecticut General Statutes; that the Trustee and the Equity Participants may also file a petition for a declaratory ruling with the Federal Energy Regulatory Commission seeking a determination that none of such parties is a "public utility" under the provisions of Part II of the Federal Power Act; that it is expected that the Lessor, the institutional lender, the Trustee, and the Equity Participants will seek an exemption pursuant to Rule 7(d) under the Act; and that no other regulatory approvals, except that of this Commission, will be required in connection with the real estate and equipment transactions. A complete statement of the fees and expenses to be incurred in connection with the proposed transactions is to be filed by amendment.

Notice is further given that any interested person may, not later than December 14, 1978, request in writing that a hearing be held in respect of such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said application-declaration which he desires to controvert; or he may request that he be notified should the Commission order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail upon the applicants-declarants at the above-stated addresses, and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date, the application-declaration, as filed or as it may be amended, may be granted and permitted to become effective as provided in Rule 23 of the General Rules and Regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in Rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[8120-01-M]

TENNESSEE VALLEY AUTHORITY

IMPROVING GOVERNMENT REGULATIONS

Semiannual Agenda of Significant Regulations

AGENCY: Tennessee Valley Authority (TVA).

ACTION: Semiannual notice of agenda of significant regulations under development or review.

SUMMARY: This document satisfies the requirements of Executive Order No. 12044, "Improving Government Regulations" (the "order"), by informing the public of the determination made by the Board of Directors of TVA that TVA currently has no regulations under development or review which qualify as "significant" under the order.

EFFECTIVE DATE: The determination of which this document gives notice was made at a public meeting of TVA's Board of Directors on November 16, 1978, and covers the period through April 2, 1979.

DEC 4 1978 UMI

10 city areas. The observations were Part 245, Beer, belong at and should accurate depiction of the process; and

V 4 3 / 2 3 3 DEC 78 UMI

ADDRESS: Herbert S. Sanger, Jr., General Counsel, Tennessee Valley Authority, 400 Commerce Avenue, E11B33, Knoxville, Tennessee 37902.

FOR FURTHER INFORMATION CONTACT:

Lynn G. Morehous, Assistant General Counsel, 400 Commerce Avenue, E10D76, Knoxville, Tennessee 37902, 615-632-3081.

SUPPLEMENTARY INFORMATION: On June 15, 1978, TVA published in the FEDERAL REGISTER (43 FR 25951) its draft report implementing Executive Order No. 12044. That report made clear that TVA is essentially a program agency. It issues few rules and regulations and makes a concerted effort to minimize the number which it must issue. TVA's regulations generally follow the form of standard government-wide regulations usually developed under the supervision of a "lead agency" or Executive orders requiring uniform government action. All TVA regulations are personally approved by TVA's Board of Directors. Under these circumstances, elaborate criteria to determine which future regulations are "significant" would be counterproductive to the goal of the order to simplify regulations and their developmental process.

TVA currently has under development or review three regulations which are subject to the order. These are an amendment to its regulations under Section 26a of the TVA Act, which would increase public participation in the process for issuing permits under that section, and proposed procedural regulations implementing the Public Utility Regulatory Policies Act of 1978 and sections 504 and 505 of the Rehabilitation Act of 1973, as amended by the Rehabilitation, Comprehensive Services, and Developmental Disabilities Amendments of 1978. On November 16, 1978, based on the criteria set forth in the order, the TVA Board of Directors determined that none of the regulations subject to the order which are under development or review are "significant" within the meaning of the order.

SEMIANNUAL AGENDA OF REGULATIONS

No significant regulations are expected to be developed or reviewed in the period covered by this notice.

Dated November 16, 1978.

H. N. STROUD, JR.,
Acting General Manager.

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

[Docket Nos. RMB-79-1 and 2]

MINORITY BUSINESS RESOURCE CENTER

Purchase of Redeemable Preferred Stock

Proposed Program: By notice of July 25, 1978, published in the FEDERAL REGISTER of July 31, 1978 (43 FR 33358), the Federal Railroad Administration ("FRA") advised that it had solicited applications from each of five small business investment companies ("MESBICs"), licensed by the Small Business Administration ("SBA") under section 301(d) of the Small Business Investment Act of 1958 (15 U.S.C. 681), for the purchase by the United States of their redeemable preferred stock ("stock") under section 11 of the Department of Transportation Act, 49 U.S.C. 1657a. The names and addresses of the MESBICs, and the amounts of the purchases were contained in the notice. Notice is hereby given that FRA has received and has under review two additional applications in connection with a separate solicitation. These applications are:

DOCKET NUMBER AND NAME

RMB 79-1—Fulcrum Venture Capital Corporation, 2021 K Street, NW., Washington, D.C 20006.

RMB 79-2—Innercity Broadcasting Corporation, 801 2nd Avenue, New York, N.Y. 10017.

Fulcrum Venture Capital Corporation is a licensed MESBIC. Innercity Broadcasting Corporation has agreed to proceed as quickly as possible to form a MESBIC and to secure an SBA license under the Small Business Investment Act of 1958. Each applicant proposes that the United States purchase MESBIC stock having an aggregate par value not in excess of $3,000,000.

Justification for program. The proceeds of the sale of the stock are to be used by each MESBIC to make investments in minority entrepreneurs and businesses to engage in business opportunities related to the maintenance, rehabilitation, restructuring, improvement, and revitalization of the Nation's railroads. Simultaneous with the purchase of stock in each MESBIC, the SBA will be participating by an investment in the MESBIC under its regulations governing SBA investments in MESBIC's (13 CFR pt. 107).

Comments. Interested persons may submit written comments on the separate applications to the Executive Director of the Minority Business Resource Center, Federal Railroad Administration, 400 Seventh Street, SW., Washington, D.C. 20590, not later than the comment closing date shown below. Such submission shall indicate the docket number shown on this notice and state whether the commenter supports or opposes the application and the reasons therefor.

Each application will be made available for inspection during normal business hours in room PL-413 at the above address of the FRA, subject to the regulations of the Office of the Secretary of Transportation set forth in 49 CFR Part 7.

The FRA is in the process of conditionally approving the two applications. Such approvals will be subject to the receipt by FRA of all necessary materials from the applicants, the execution of a financing agreement, and with respect to Innercity Broadcasting Corporation, the creation and licensing of a MESBIC. Comments will be considered by the FRA in completing its evaluation of the applications. However, formal acknowledgements of comments will not be provided.

(Sec. 11, Department of Transportation Act, as amended (49 U.S.C. 1657a))

Dated: November 29, 1978.

Comment closing date: December 30, 1978.

KENNETH E. BOLTON,
Executive Director, Minority Business Resource Center, Federal Railroad Administration.

[FR Doc. 78-33760 Filed 12-1-78; 8:45 am]

[4910-59-M]

National Highway Traffic Safety Administration

SAFETY BELTS; CONTRACT RESEARCH STUDIES RESULTS

Public Meeting

The National Highway Traffic Safety Administration (NHTSA) will hold a public meeting on December 15, 1978, to present the results of two contracted research studies. One study assessed safety belt usage in the U.S. and the second evaluated the comfort and convenience of safety belts in 1979 model cars.

The meeting will be held in Room 2230 at the DOT (Nassif Building) at 400 Seventh Street, S.W., beginning at 9:30 a.m. and should be over about noon.

First, each contractor will give a short overview of his findings and then answer questions from the press. After the overviews, more technical and detailed briefings will be given.

The first contractor to present his findings will be Opinion Research, Inc. from Princeton, New Jersey. During this study observations were made of safety belt usage in about 70,000 cars that were stopped for traffic signals in

19 city areas. The observations were made between November 1977 and June 1978. Some of the factors associated with belt usage to be discussed are: type of belt system; model year of car; car manufacturer; car size and model; type of road; and driver age and sex.

The second study to be presented was conducted by Verve Research Corporation Rockville, Maryland. The purpose of this study was to evaluate safety belt comfort and convenience aspects in 30 representative 1979 model cars including two passive belt systems. More than 100 subjects used the safety belts in the 30 cars and were asked to evaluate various aspects of the belts related to comfort and convenience. The presentation will show how the 30 cars compared to each other and will also include various subscores for selected aspects of comfort and convenience. The discussion will also cover factors that may influence ratings of comfort and convenience, such as type of belt system, height, weight, age and vehicle configuration.

All tables presented, including a summary of the studies, will be available at the end of the meeting.

Additional information may be obtained from Mr. Peter Ziegler, Office of Driver and Pedestrian Research, Room 3202, Trans Point Building, 2100 Second Street, S.W., Washington, D.C. 20590, telephone 202-755-8753.

Issued on November 28, 1978.

WM. H. MARSH,
Executive Secretary.

DEPARTMENT OF THE TREASURY

Bureau of Alcohol, Tobacco and Firearms

[Notice No. 79-2; Reference: ATF O 1100.99]

DELEGATION TO THE ASSISTANT DIRECTOR (REGULATORY ENFORCEMENT) OF AUTHORITIES OF THE DIRECTOR IN 27 CFR PART 245, BEER

Delegation Order

1. *Purpose.* This order delegates certain authorities, now vested in the Director by regulations in 27 CFR Part 245, Beer, to the Assistant Director (Regulatory Enforcement), and permits redelegation to Regulatory Enforcement personnel, Headquarters and field.

2. *Background.* Under current regulations, the Director has authority to take final action on matters relating to the approval of activities at regulated breweries and pilot brewing plants. It has been administratively determined that certain authorities now vested in the Director by regulations in 27 CFR Part 245, Beer, belong at and should be delegated to a lower organizational level.

3. *Delegations.* Under the authority vested in the Director, Bureau of Alcohol, Tobacco and Firearms, by Treasury Department Order No. 221, dated June 6, 1972, and by 26 CFR 301.7701-9, there is hereby delegated to the Assistant Director (Regulatory Enforcement) the authority to take final action on the following matters relating to 27 CFR Part 245, Beer:

a. To prescribe all forms required by regulations including bonds, applications, notices, reports, returns, and records, under 27 CFR 245.2.

b. To approve applications by a brewer to use a brewery for other purposes not involving the production of alcoholic beverages when such use will not jeopardize the revenue nor impede the effective administration of the regulations and is not contrary to the specific provisions of law, under 27 CFR 245.12.

c. To approve other materials and methods found acceptable for use in the preparation of plats, under 27 CFR 245.66.

d. To determine the similarity of a container to a bottle or can and the similarity of a container to a barrel or keg, under 27 CFR 245.111a.

e. To approve other methods for durably marking each barrel or keg of beer, under 27 CFR 245.125.

f. To require the actual place of production to be shown on labels when the brewer's name, trade name, or brand name includes the name of the city which is not the place where the beer was produced, under 27 CFR 245.126.

g. To approve letterhead applications for exceptions to construction, equipment, and methods of operation requirements, under 27 CFR 245.221 and 27 CFR 245.222.

h. To cancel any approved exception or variation to regulatory requirements and, if necessary to protect the revenue, to require brewers to conform to construction, equipment, or methods of operation requirements specified in regulations, under 27 CFR 245.221.

i. To require the maintenance of ATF F 2051 (5130.5) Sheets 1 and 2, Record of Brewery Operations, by any brewer when the interests of the United States so demand, under 27 CFR 245.225.

j. To approve the types of records to be reproduced and the reproduction processes to be employed, under 27 CFR 245.233.

k. To approve applications on ATF F 3019 (5130.13), Process for Concentration or Reconstitution of Beer, of processes to produce concentrates from beer; to require with the application a flow diagram, drawing, or other accurate depiction of the process; and to require the brewer to submit samples and additional information relating to the operation, under 27 CFR 245.236 and 27 CFR 245.237.

l. To withdraw approval of a concentration process in any case where the brewer fails to comply with the provisions of the regulations, under 27 CFR 245.237.

m. To approve applications on ATF F 3019 (5130.13) of processes to be used to reconstitute beer from concentrates; to require with the application a flow diagram, drawing, or other accurate depiction of the process; and to require the brewer to submit samples and additional information relating to the operation, under 27 CFR 245.238 and 27 CFR 245.239.

n. To withdraw approval of a reconstitution process in any case where the brewer fails to comply with the provisions of the regulations, under 27 CFR 245.239.

4. *Redelegation.* a. The authorities in paragraphs 3a, 3h, 3l, and 3n above may be redelegated to Regulatory Enforcement personnel in Bureau Headquarters not lower than the position of branch chief.

b. The authorities in paragraphs 3b through 3g and in paragraphs 3i, 3j, 3k, and 3m above may be redelegated to Regulatory Enforcement personnel in Bureau Headquarters not lower than the position of ATF specialist.

c. The authorizations that follow may be redelegated to regional regulatory administrators, who may redelegate these authorizations to regional Regulatory Enforcement personnel not lower than the position of chief, technical services, or area supervisor:

(1) The authority in paragraph 3b above to approve applications for use of brewery for other purposes which are in the public interest because of emergency conditions, and the authorities in paragraphs 3c and 3i above.

(2) The authorities in paragraphs 3b or 3e or 3g or 3j above to approve requests by a brewer may be redelegated to regional officials to approve only those requests, without submission of the applications to Headquarters for approval, which are identical to those previously approved by Bureau Headquarters.

(3) The authority in paragraph 3h above to cancel or withdraw any approved exceptions or variations authorized by Bureau Headquarters; and the authorities in paragraphs 3l and 3n above to withdraw approval of concentration or reconstitution processes. Where regional officials cancel or withdraw approval, the regional regulatory administrator will notify the Assistant Director (Regulatory Enforcement) of the cancellation or withdrawal.

Comptroller of the Currency

FAIR HOUSING LENDING ENFORCEMENT

Public Meeting

AGENCY: Comptroller of the Currency.

ACTION: Notice of Public Meeting.

SUMMARY: Settlement of *National Urban League, et al.* v. *Office of the Comptroller of the Currency, et al.* (Civil Action No. 76-0718) provides that a semi-annual meeting will be held to review the fair housing lending enforcement program of the Office of the Comptroller of the Currency. Members of the public are invited to attend this meeting.

DATE: December 14, 1978, 2:00 p.m.

ADDRESS: 490 L'Enfant Plaza, SW., Washington, D.C. 20219. Individuals who plan to attend this meeting should report to the 6th floor reception desk prior to 2:00 p.m.

FOR FURTHER INFORMATION CONTACT:

Zina G. Greene, Director, Civil Rights Program, Office of the Comptroller of the Currency, Washington, D.C. 20219, phone 202-447-0934.

SUPPLEMENTARY INFORMATION: Settlement of *National Urban League, et al. v. Office of the Comptroller of the Currency, et al.* (Civil Action No. 76-0718) provides that a semi-annual meeting will be held to review the fair housing lending enforcement program of the Office of the Comptroller of the Currency. Representatives of the Comptroller of the Currency will discuss their fair housing program and any changes made or proposed therein and will receive and consider suggestions from the National Urban League.

Members of the public are invited to attend this meeting and will be given an opportunity to make comments and suggestions with respect to the enforcement program of the Comptroller of the Currency.

Dated: November 24, 1978.

ZINA G. GREENE,
Director,
Civil Rights Program.

Customs Service

BROMINE AND BROMINATED COMPOUNDS FROM ISRAEL

Final Countervailing Duty Determination

AGENCY: United States Customs Service, Treasury Department.

ACTION: Final Countervailing Duty Determination.

SUMMARY: This notice is to advise the public that an investigation has resulted in a determination that the Government of Israel has not given benefits considered to be "bounties or grants" within the Countervailing Duty Law to manufacturers or exporters of bromine and brominated compounds.

EFFECTIVE DATE: December 4, 1978.

FOR FURTHER INFORMATION CONTACT:

Holly A. Kuga, Operations Officer, Duty Assessment Division, United States Customs Service, 1301 Constitution Avenue NW., Washington, D.C. 20229, telephone 202-566-5492.

SUPPLEMENTARY INFORMATION: On June 5, 1978, a "Preliminary Countervailing Duty Determination" was published in the FEDERAL REGISTER (43 FR 24395). The notice stated that it preliminarily had been determined that benefits had been received by the Israeli manufacturers/exporters of bromine and brominated compounds which might constitute bounties or grants within the meaning of section 303 of the Tariff Act of 1930, as amended (19 U.S.C. 1303) (referred to in this notice as "the Act").

Bromine is a chemical element of the halogen family used in production of a great variety of chemical products. Bromine is provided for in the Tariff Schedules of the United States under item 415.05. Brominated compounds are classified under various item numbers including items 429.28, 420.82 and 403.60.

Programs preliminarily determined to be bounties or grants included:

1. Rebate of property taxes when companies achieve a required level of exportation of their manufactured articles.

2. Refund of a portion of export insurance premiums for one firm which utilized this program.

3. Subsidization of research and development expenses on export-related products for one firm which utilized this program.

4. Regional development assistance including:

(A) Grants and loans for approved firms.

(B) Reduced rents and preferential mortgage rates on buildings and equipment.

(C) Tax concessions and accelerated depreciation for approved firms.

(D) Exemption from payment of Customs duties and purchase taxes on imported machinery and equipment.

This investigation involves two Israeli firms, Dead Sea Bromine Company, Ltd. (Dead Sea) and Bromine Compounds, Ltd. (Bromine Compounds). Both firms received benefits in the form of property tax rebates and regional development assistance while Bromine Compounds also utilized research and development grants and received certain rebates of export insurance premiums. Subsequent to our preliminary determination, it was found that the research and development grants were erroneously identified as a separate program; actually they are administered as a part of the regional development assistance program.

That preliminary determination stated in part:

"The Government of Israel has submitted that payments and bestowals made under the various regional development programs enumerated above are significantly less than the net increased costs actually incurred in establishing and maintaining facilities in areas eligible for such benefits by the firms making the merchandise under investigation. The net *ad valorem* benefit from these programs would therefore be zero and no bounty or grant would be deemed to exist despite the preponderance of production for export. However, further information is necessary to determine the basis on which the dislocation costs were computed so that the precise net *ad valorem* benefit, if any, can be verified."

Based upon an analysis of information submitted by the Government of Israel, certain "net" dislocation costs incurred by Dead Sea and Bromine Compounds were identified and verified. These additional costs related primarily to increased labor costs and electricity costs incurred by the firms by virtue of locating in a less commercially advantageous part of Israel. These net "dislocation costs" have been determined to exceed the regional development assistance received by each of these companies and therefore it has been determined that the net benefit from the regional assistance programs is zero and no bounty or grant exists.

It has also been determined that the export insurance program, which was only utilized by Bromine Compounds, covers its claims from operating income (primarily premiums charged to the policyholders themselves); there is no evidence of ongoing government funding of the program and therefore it does not operate in such a way as to be considered a "bounty or grant".

Both Dead Sea and Bromine Compounds do receive rebates of property taxes as a result of the degree to which they export. In the most recent business year, Dead Sea received rebates which conferred an *ad valorem* benefit 0.06 percent, while rebates received by Bromine Compounds were 0.12 percent *ad valorem*.

On the basis of information supplied subsequent to the preliminary determination, it is hereby determined that benefits have been paid by the Government of Israel on the manufacture/exportation of bromine and brominated compounds in the form of partial rebates of property taxes depending upon export performance, but that the benefits involve an aggregate amount considered to be *de minimis* in size, and that therefore no bounty or grant is being paid or bestowed, directly or indirectly, within the meaning of section 303, Tariff Act of 1930, as amended (19 U.S.C. 1303) upon the manufacture, production or exportation of bromine and brominated compounds from Israel.

This notice is published pursuant to section 303, Tariff Act of 1930, as amended (19 U.S.C. 1303).

Pursuant to Reorganization Plan No. 26 of 1950 and Treasury Department Order 190 (Revision 15), March 16, 1978, the provisions of Treasury Department Order No. 165, Revised, November 2, 1954, and § 159.47 of the Customs Regulations (19 CFR 159.47), insofar as they pertain to the issuance of a final countervailing duty determination by the Commissioner of Customs, are hereby waived.

ROBERT H. MUNDHEIM,
General Counsel of the Treasury.

INTERSTATE COMMERCE COMMISSION

[Notice 748]

ASSIGNMENT OF HEARINGS

NOVEMBER 29, 1978.

Cases assigned for hearing, postponement, cancellation or oral argument appear below and will be published only once. This list contains prospective assignments only and does not include cases previously assigned hearing dates. The hearings will be on the issues as presently reflected in the Official Docket of the Commission. An attempt will be made to publish notices of cancellation of hearings as promptly as possible, but interested parties should take appropriate steps to insure that they are notified of cancellation or postponements of hearings in which they are interested. No amendments will be entertained after the date of this publication.

MC 143296 (Sub-2F), Peach State Bus Lines, Inc., now assigned December 6, 1978, at Atlanta, Ga., will be held in Room 202 North Annex, 7741 Roswell Road, instead of Room 305, 1252 W. Peachtree St., N.W.

MC 118859 (Sub-11F), Bullock Trucking Company, Inc., now assigned for hearing December 7, 1978 at Atlanta, Ga., and will be held in Room 212 North Annex, 7741 Roswell Road instead of Room 202 North Annex, 7741 Roswell Road.

MC 105813 (Sub-241), Belford Trucking Co., Inc., now assigned December 6, 1978, at Atlanta, Georgia will be held in Court Room 212, North Annex, 7741, Roswell Road, N.E., instead of Room 202.

MC 125433 (Sub-149F), F-B-Truck Line Company, now assigned December 11, 1978, at Los Angeles, California is canceled and application dismissed.

MC 138713 (Sub-3F), R & G Transit Corp., now assigned December 4, 1978, at St. Louis, Mo., is postponed indefinitely.

MC 144232 (Sub-1F), Contract Distribution System, Inc., now assigned pre-hearing conference is transfered to a hearing December 19, 1978, at the offices of the Interstate Commerce Commission, Washington, D.C.

MC 121658 (Sub-11F), Steve D. Thompson, now assigned, December 4, 1978, at Baton Rouge, La., is postponed indefinitely.

MC 141532 (Sub-33F), Pacific States Transport Corp., now being assigned January 10, 1979 (3 days), in Room No. 324, U.S. Courthouse, 312 North Spring Street, Los Angeles, Calif.

MC 119789 (Sub-424F), Caravan Refrigerated Cargo, Inc., now assigned continued hearing January 15, 1979, at Washington, D.C., is postponed to February 13, 1979, at the offices of the Interstate Commerce Commission, Washington, D.C.

H. G. HOMME, Jr.,
Secretary.

[No. MC 141600]

BARKER'S SCHOOL BUS SERVICE, INC., GARY, IND.

Common Carrier Application

NOVEMBER 9, 1978.

I. Applicant will provide the public with a more economical type of service which protestants are not offering. The benefits to the public from the availability of this type of service outweigh the potential harm to protestants. The application will be granted.

II. The proposed restriction to transportation in school buses will not be imposed on the grant of authority. The restriction is unenforceable, serves only to make the operations more difficult, does not describe the service needed, and does not protect any legitimate interests of existing carriers.

Donald W. Smith for applicant.

D. I. Harfeld, Harry J. Harman, and *Harold M. Olsen* for protestants.

DECISION

Applicant seeks irregular-route motor common carrier authority to transport passengers and their baggage, in interstate or foreign commerce, in round-trip charter operations, beginning and ending at points in Lake, LaPorte, and Porter Counties, IN, and extending to points in Ohio, Kentucky, Illinois, Missouri, Michigan, and Wisconsin, restricted to service to be performed in school buses. The application is opposed by Shoup Buses, Inc., Keeshin Charter Service, Inc., and Indiana Motor Bus Company, a corporation.

In his initial decision, the Administrative Law Judge granted the application, finding that (1) the supporting witnesses have established a need for a more spartan service than is provided by protestants, and (2) by restricting the grant of authority to service to be performed in "school buses", any adverse effects on existing carriers will be prevented.

Division 1 affirmed the initial decision finding that the supporting witnesses have established a need for a passenger service which is substantially different from the service currently offered by protestants. The restriction limiting service to the use of school buses was deleted as unnecessary, administratively undesirable, and difficult to enforce. A subsequent petition for reconsideration was denied by Appellate Division 1.

Protestants Indiana Motor Bus Company and Shoup Buses, Inc., instituted an action in the United States Court of Appeals for the Seventh Circuit. By decision of May 31, 1978, the Commission reopened the proceeding for further consideration on the present record subject to approval of the Court of Appeals. On July 7, 1978, the Court granted the motion to remand the proceeding to the Commission for further consideration.

We have considered the evidence, the initial decision, the decision and order of Division 1, and the pleadings. We agree with the division's conclusion with regard to the equipment restriction but believe, in light of the Administrative Law Judge's reliance on this restriction, that additional explanation is appropriate. We find the detailed summary of facts contained in the initial decision as adopted by division 1 to be correct in all material respects. As modified and supplemented in this decision, we adopt that factual summary as our own. Only those facts necessary for an understanding of the issues will be restated.

V 4 3 / 2 3 3 D E 4 7 8 UMI

PERTINENT FACTS

The supporting witnesses are involved with organizations which have extremely limited funds for purposes of charter trips outside of Indiana. These trips are made predominantly by children or young people. A few trips are also sponsored for elderly and disadvantaged patrons. Each public witness testifies that its motive for supporting the application is to obtain a more economical service. It is for this reason that school buses, rather than more luxurious equipment, are sought. The witnesses generally have not used the services of protestants. Two witnesses did testify that protestant Shoup did not have equipment available when needed and that its rates were too high.

Indiana Motor Bus Company holds regular route authority, embracing incidental charter rights, to transport passengers and their baggage, over a route extending between various points in Indiana, including most of Lake County, the southwestern part of Porter County, and portions of La Porte County, on the one hand, and, on the other, points in numerous States, such as Chicago, IL, and Kalamazoo, MI. Protestant operates 42 buses, all described as deluxe intercity, parlor type coaches with air conditioning. It indicates that it is willing to provide a charter service to meet the witnesses' needs.

Keeshin Charter Service is authorized to transport passengers and their baggage, in charter operations, from points in Cook and Will Counties, IL, and Lake County, IN, to all States sought in this proceeding, and return, restricted to traffic originating in the territory indicated. Protestant operates a fleet of 21 buses, 17 of which are equipped with lavoratories, stereo music, reclining seats, air conditioning, public address systems, radios, and oversized luggage storage compartments. It does not operate ordinary school buses. Keeshin indicates that during the first 5 months of 1976, it operated at only 50 percent capacity.

Shoup Buses is authorized to transport passengers and their baggage, in charter service, from points in Indiana to points in Illinois, Ohio, and Michigan, and return. Protestant has 15 buses utilized for charter operations.

DISCUSSION AND CONCLUSIONS

I. Equipment Restriction. The proposed restriction to transportation in school buses should not be imposed on the grant of authority. It is unenforceable, it would make the operations more difficult, it does not describe the service needed, and it would not protect any legitimate interests of existing carriers. The general criteria which may be used to determine whether given restrictions are acceptable in grants of authority are set forth in *Fox-Smythe Transp. Co. Extension—Oklahoma*, 106 M.C.C. 1 (1967). The three most common reasons why restrictions are found unacceptable were stated at 106 M.C.C. 10 to be (1) that the proposed restriction serves no useful purpose, (2) that the proposed restriction is unclear or confusing, or (3) that the proposed limitation is unduly restrictive. The restriction we are considering here falls to some extent in each of these three categories.

A. *The restriction is unenforceable.* There is no clear definition available for what a "school bus type vehicle" is. The "Schoolbus Exemption" set forth in Section 203 (b)(1) of the Interstate Commerce Act refers to "motor vehicles employed solely in transporting school children and teachers to and from school." Our regulations concerning this exemption provide, in 49 CFR 1047.2, that the exemption is applicable even if the vehicle is used at other times for transportation which is beyond the scope of the exemption. See also *Fox River Bus Lines, Inc., Investigation of Operations*, 110 M.C.C. 423, 429-431 (1969), and *Schoolbus Exemption*, 113 M.C.C. 258, 275-288 (1971) and 114 M.C.C. 531 (1971). Accordingly, there is no limitation at all on the *type* of vehicle which may be used under this exemption, and so there is no guidance here toward defining what is a "school bus."

On the other hand, those regulations of the Department of Transportation which deal with the safety aspects of school bus operations provide a definition which appears to be much more restrictive than applicant intends. The definition which appears at 49 CFR 605.3(b) states:

"School bus operations" means transportation by bus exclusively for school students, personnel and equipment in type I and type II school vehicles as defined in Highway Safety Program Standard No. 17.

Highway Program Standard No. 17, "Pupil Transportation Safety," appears at 24 CFR 1204.4 and defines school vehicles in this manner:

• • • • •

III. *Definitions.* "Type I school vehicle" means any motor vehicle with motive power, except a trailer, used to carry more than 16 pupils to and from school. This definition includes vehicles that are at any time used to carry schoolchildren and school personnel exclusively, and does not include vehicles that only carry schoolchildren along with other passengers as part of the operations of a common carrier.

"Type II school vehicle" means any motor vehicle used to carry 16 or less pupils to or from school. This does not include private motor vehicles used to carry members of the owner's household.

• • • • •

Part IV of the standard requires, in general, that Type I school vehicles (a) be identified with the words "School Bus" on front and back, (b) be painted school bus yellow, (c) have glossy black bumpers, (d) be equipped with certain signaling devices, and (e) have a described system of mirrors. Type I school vehicles owned by a local transit system and used for regular common carrier transit route service as well as school route service, however, need not be painted yellow and black, shall have temporary "school bus" signs, and need not be equipped with the signaling devices. When a school vehicle is permanently converted to other uses, it must be painted another color, and the signaling devices must be removed. When a school vehicle is used to transport passengers other than school pupils, the words "School Bus" must be concealed and the signaling devices made inoperative. Type II school vehicles must comply either with all of these requirements or with none of them, as determined by the individual States.

Although applicant does operate school bus services, it does not appear that it intends that its operations be limited to the use of equipment which complies with all the requirements of Highway Program Standard No. 17. It is also clear that these requirements have very little, if anything, to do with the needs of the supporting witnesses.

In his initial decision, the Administrative Law Judge attempted to define a school bus "as a vehicle of a model manufactured primarily for use as a school bus, whether or not the particular vehicle has ever been or is used as a school bus within the exemption of section 203(b) of the act or not, and that such vehicle must not be equipped with air conditioning, restrooms or reclining seats." It must be acknowledged that there is a clear common conception of what a typical school bus would be, but this is not the issue. Rather, in looking toward the problem of enforcing the proposed restriction if it is imposed on the grant of authority, we must consider what range of variations from the typical would be acceptable. For example, it does not seem impossible for air-conditioning and reclining seats to be installed in a typical school bus body. The resulting vehicle might not be outwardly readily distinguishable from the original, and yet passengers would find these extra comforts quite similar to those of the more usual coaches which protestants provide.

Applicant has offered no suggestion as to how the proposed restriction could reliably be enforced, and we perceive none ourselves.

B. *The restriction would serve only to make the operations more difficult.* In substance, the proposed restriction says that applicant shall not permit its passengers to be too comfortable. Restrictions having similar effects were condemned in *Fox-Smythe* at 106 M.C.C. 20, on the grounds that they are, in most cases, "of the pure nuisance type".

In this case, the attempt clearly is to enforce a distinction in the class of service provided: relegating applicant to what might well be described as a 4th-class service. We do not believe this result is in the public interest since it would impose an arbitrary and inflexible standard, unresponsive to the needs or desires of prospective patrons. To deny the public the use of an available service unless it is willing to put up with inferior accommodations is not the proper role of this Commission. For such a situation to result from economic factors or applicant's choice of what type of equipment it will operate is one thing; for a regulatory body to enforce such a limitation is, in our opinion, inappropriate.

C. *The restriction does not describe the service needed.* The overwhelming majority of the supporting witnesses have described their needs primarily as for a more economical service. These witnesses have generally identified school bus type equipment as a means of satisfying that need. It is not apparent that this is the only possible means of satisfying that need, however, since it is our experience that numberous small or locally-based carriers across the country are able to provide comparatively economical services by operating older or second-hand conventional equipment, among other possibilities. An example of this type of situation may be found in *City Transit Co., Common Carrier Application*, 113 M.C.C. 471, 472 (1971) in which the applicant proposed to add "better (though not new)" buses to its fleet to accommodate increased business.

Further, we do not feel it is necessary to impose a restriction of any sort to ensure that applicant will actually provide the type of service it proposes. This conclusion is supported by the fact that, although applicant's present authority is not restricted in the manner proposed, it operates 80 school buses and a few service vehicles. As a result, we conclude that the proposed restriction neither describes the service needed nor is necessary to ensure that the type of service needed will actually be provided.

D. *The restriction would not serve to protect the legitimate interests of existing carriers.* Protestants, despite their general duty as common carriers to serve the entire public, have been unwilling or unable to offer the type of service applicant will provide. This lack of service detracts substantially from the weight we have given to their interests in opposing the application. The same conclusion is warranted with respect to their interests which mght be protected if the proposed equipment restriction were imposed in the grant of authority. We would perhaps be more inclined to protect protestants' interests if they were in fact providing the type of service applicant proposes, but they are not.

Existing carriers are not entitled to limit new carriers to providing only those services they themselves do not choose to provide, even though authorized to do so. We believe that it would be contrary to the public interest to protect protestants' interests in existing traffic when they are not providing some of the services which they are authorized to provide. Protestants are free to choose not to provide the more economical type of service applicant proposes, but we will not restrict applicant to providing a less commodious service on this ground. To do so would in part, benefit protestants even though they have been unresponsive to the needs of a significant segment of the public. In this context, their interests which the proposed restriction would protect are not legitimate.

E. *Summary.* Section B of Appendix II to the report in *Fox-Smythe, supra*, aptly summarizes the proper treatment of equipment restrictions:

> Acceptable equipment restrictions • • • usually tend to achieve the positive "purpose" of describing the service authorized, the transportation characteristics of the commodity to be transported, and/or of protecting the legitimate interests of existing carriers. (106 M.C.C. at 44.)

The purposed restriction here, to transportation in school buses, satisfies none of these criteria. Accordingly, the grant of authority will not include the proposed restriction.

II. Public Convenience and Necessity. The Administrative Law Judge found that the supporting witnesses have established a need for a low-cost service, and that imposition of a restriction to service in school buses assures the rendition of such a service. He also concluded that a grant of authority without such a restriction is not supported by the public convenience and necessity. The restriction, it was believed, would prevent any adverse effect on protestants' operations. Division 1 affirmed the finding of need for a different service than offered by protestants, but deleted the restriction.

We affirm the finding in prior orders on the issue of the supporting witnesses needs for a different service but must consider whether a grant of unrestricted authority is required by the public convenience and necessity. We conclude that it is.

In applications for motor common carrier authority, the Commission has consistently followed the criteria set forth in *Pan-American Bus Lines Operation*, 1 M.C.C. 190, 203 (1936). As a consequence, whether or not the present or future public convenience and necessity require the proposed operation depends, in substance, on whether the new operation or service will serve a useful public purpose, responsive to a public demand or need; whether this purpose can and will be served as well by existing lines or carriers; and whether it can be served by applicant with the new operation or service proposed without endangering or impairing the operations of existing carriers contrary to the public interest. In essence, the question is whether the advantages to those members of the public that would use the proposed service outweigh the disadvantages, real or potential, to existing services that may result. *All American Bus Lines, Inc., Common Carrier Application*, 18 M.C.C. 755, 776-777 (1939).

The deletion of the restriction does not affect the Administrative Law Judge's conclusions with respect to the first and second criteria defined above. It is the effect of a grant of unrestricted authority on protestants' operations which is now at issue.

A grant of authority, with or without the proposed restriction to school buses, may result in diversion of some traffic from protestants. We do not doubt there are groups who would prefer to use applicant's less expensive service, even though they may now be using one of protestants' services. Similarly, if applicant is not limited to the type of equipment it uses, it is apparent that it would be able to handle the transportation of some groups that desire the more comfortable equipment such as protestants operate.

On the other hand, we perceive that most of the groups supporting the application either are not using protestants' services or are using those services only infrequently. This situation is similar to that which arose in *City Transit, supra*, where it was found that the difference between protestants' and applicant's services was "one of deluxe as opposed to less glamorous service rather than a difference solely of rates." It must also be recognized that the limited territorial scope of the application generally could ensure that protestants' services will still be used on longer trips where applicant's less commodious equipment is not as appropriate.

We conclude that the benefits which would accrue to the public from the availability of the more economical

'tween Clinton, NJ and Somerville, NJ,

V 4 3 / 2 3 3

type of service applicant proposes amply outweigh the potential adverse effects on protestants. The fact that none of the three protestants has seen fit to provide this type of service up until now suggests that the addition of some competition to this market is appropriate and detracts substantially from the weight which we give to the potential adverse impacts on protestants' operations. Therefore, granting the application can be expected to result in better service to the public by meeting the needs of those groups which have needs which cannot be met by the standard services protestants now provide.

The proposed restriction to transportation in school bus type vehicles will not be imposed on the grant of authority. Since that restriction was included in the notice of the application published in the FEDERAL REGISTER, however, we feel that it is appropriate that a notice of the authority actually granted be published in the FEDERAL REGISTER before a certificate is issued. Therefore, issuance of a certificate will be withheld for thirty days after publication. During that time, any interested person not a party to this proceeding may file a petition seeking leave to intervene in this proceeding. The petition must demonstrate in specific detail the manner in which the petitioner has been materially adversely affected by the deletion of the equipment restriction, or else the petition will be rejected.

We find, on reconsideration:

The present and future public convenience and necessity require operation by applicant, in interstate or foreign commerce, as a common carrier by motor vehicle, over irregular routes, of passengers and their baggage, in round-trip charter operations, beginning and ending at points in Lake, La Porte, and Porter Counties, IN, and extending to points in IL, KY, the Lower Peninsula of MI, OHo, WI, and those points in MO on and east of U.S. Highway 63 and on and north of U.S. Highway 60. Applicant is fit, willing, able properly to perform this service and to conform to the requirements of the Interstate Commerce Act and the Commission's regulations. This decision does not significantly affect the quality of the human environment. An appropriate certificate should be issued, subject to republication of the grant of authority in the FEDERAL REGISTER. The application in all other respects should be denied.

It is ordered:

The decision entered October 6, 1977 in this proceeding, to the extent inconsistent with this decision, is vacated.

The application is granted to the extent set forth in the findings.

After publication of the grant authority in the FEDERAL REGISTER, a certificate will be issued if applicant complies with the appropriate requirements set forth in the Code of Federal Regulations (49 CFR 1043, 1044, and 1306). Applicant must comply within 90 days after the date of service of this decision or the grant of authority will be void.

By the Commission, Chairman O'Neal, Vice Chairman Christian, Commissioners Brown, Stafford, Gresham, and Clapp. Commissioner Stafford dissenting.

H. G. HOMME, Jr.,
Acting Secretary.

Commissioner Stafford, dissenting:

I would deny the application. I agree with the majority that the equipment restriction should not be imposed; however, without any restriction applicant can offer any type of service. In view of the limited origin territory, I believe that the potential financial harm to protestants far outweighs the need for an unenforceable and speculative "economical" service.

[7035-01-M]

FOURTH SECTION APPLICATIONS FOR RELIEF

NOVEMBER 29, 1978.

This application for long-and-short-haul relief has been filed with the I.C.C.

Protests are due at the I.C.C. on or before December 19, 1978.

FSA No. 43634, Southwestern Freight Bureau, Agent's No. B-783, Trailer-on-Flat-Car Rates on various commodities, between stations in Southwestern and Southern Territories, in Sup. 227 to its Tariff SW/S-84-H, ICC 5012, to become effective December 30, 1978. Grounds for relief—revised rate structure. By the Commission.

H. G. HOMME, Jr.,
Secretary.

[FR Doc. 78-33792 Filed 12-1-78; 8:45 am]

[7035-01-M]

[Decision No. 36634 (Sub-No. 1)]

MONTANA INTRASTATE GRAIN RATES

Decided November 16, 1978.

On November 14, 1978, the Commission required the Montana railroads to increase their intrastate rates by the same amount as was authorized in Ex Parte Nos. 305-RE, 318, 330, and 336. However, the increase insofar as it pertained to grain was stayed.

Upon the petition of the Montana Department of Agriculture (MDOA) the Commission also ordered that an investigation into Montana intrastate rates and charges on grain be instituted.

It is ordered: This investigation is instituted to determine whether the Montana intrastate rates on grain should be ordered increased to the Ex Parte No. 336 level.

The Commission will consider any relevant evidence and arguments. The Commission seeks evidence, in particular, relevant to whether transportation conditions for grain within Montana are more favorable than interstate transportation conditions for grain, whether the existing intrastate grain rates in Montana are abnormally low, and whether the stayed increases applicable to Montana intrastate grain rates are just and reasonable.

All common carriers by railroad operating in Montana subject to the Commission's jurisdiction are made respondents.

All persons who wish to actively participate in this proceeding shall make known that fact by notifying the Office of Proceedings, Room 5342, Interstate Commerce Commission, Washington, D.C. 20423, on or before 15 days from the Federal Register publication date. Persons having common interests should consolidate their presentations to the greatest extent possible.

The Commission will serve a list of names and addresses of all persons upon whom service of pleadings must be made. Thereafter, this proceeding will be assigned for oral hearing or handling under modified procedure.

A copy of this decision shall be served on MDOA and copies shall be sent by certified mail to the Governor of Montana and to the Montana Public Service Commission. A copy shall also be served on the respondents, The Chicago, Milwaukee, St. Paul and Pacific Railroad Company, Union Pacific Railroad Company, and The Burlington Northern Inc. Copies shall also be deposited in the Office of the Secretary of the Commission at Washington, D.C.,and filed with the Director, Office of the Federal Register, for publication in the Federal Register.

This is not a major Federal action significantly affecting the quality of the human environment.

By the Commission, Chairman O'Neal.

H. G. HOMME, Jr.,
Acting Secretary.

[FR Doc. 78-33793 Filed 12-1-18; 8:45 am]

[7035-01-M]

[Notice No. 137]

MOTOR CARRIER BOARD TRANSFER PROCEEDINGS

The following publications include motor carrier, water carrier, broker, and freight forwarder transfer applications filed under section 212(b), 206(a), 211, 312(b), and 410(g) of the Interstate Commerce Act.

Each application (except as otherwise specifically noted) contains a statement by applicants that there will be no significant effect on the quality of the human environment resulting from approval of the application.

Protests against approval of the application, which may include request for oral hearing, must be filed with the Commission on or before January 3, 1979. Failure seasonably to file a protest will be construed as a waiver of opposition and participation in the proceeding. A protest must be served upon applicants' representative(s), or applicants (if no such representative is named), and the protestant must certify that such service has been made.

Unless otherwise specified, the signed original and six copies of the protest shall be filed with the Commission. All protests must specify with particularity the factual basis, and the section of the Act, or the applicable rule governing the proposed transfer which protestant believes would preclude approval of the application. If the protest contains a request for oral hearing, the request shall be supported by an explanation as to why the evidence sought to be presented cannot reasonably be submitted through the use of affidavits.

The operating rights set forth below are in synopses form, but are deemed sufficient to place interested persons on notice of the proposed transfer.

MC-FC-77845, filed September 5, 1978. Transferee: JOEL SCHAEFER, doing business as SCHAEFER TRUCKING, Route 4, Platteville, WI 53818. Transferor: Bloomington Produce, Inc., Box 67 (Wall Street), Bloomington, WI 53804. Representative: Michael S. Varda, 121 South Pinckney Street, Madison, WI 53703. Authority sought for purchase of a portion of the operating rights of transferor set forth in Certificate No. MC-124417, issued August 16, 1977, as follows: Animal and poultry feed (except liquid commodities), in bulk, and in bags, in mixed shipments, from specified points in IA to points in a specified portion of WI, restricted to transportation in vehicles equipped with mechanical or pneumatic unloading systems; livestock and poultry feed, from Davenport, IA to points in the Towns of Fennimore and Potosi, Grant County, WI; and animal and poultry feed, from Dubuque and Iowa Falls, IA to points in Crawford, Grant, IA, and Richland Counties, WI, restricted against service from Dubuque to points in Paris and Potosi Townships, Grant County, WI. Transferee presently holds no authority from this commission; it does not seek section 210a(b) authority.

MC-FC-77900, filed October 18, 1978. Transferee: ULS, INC., doing business as UNITED LIMOUSINE SERVICE, P.O. Box 114, Raritan, NJ 08869. Transferor: Louis Santora, Jr., doing business as AAA United Limousine Service, P.O. Box 114, Raritan, NJ 08869. Representative: L. C. Major, Jr., Suite 400, Overlook Building, 6121 Lincolnia Road, Alexandria, VA 22312. Authority sought for purchase of the operating rights of transferor as set forth in Certificates Nos. MC-138141 (Sub-No. 2), (Sub-No. 3), and (Sub-No. 4), issued October 25, 1974, June 8, 1976, and March 7, 1978, respectively, as follows: Passengers and their baggage, in special operations in nonscheduled door-to-door service, limited to the transportation of not more than 7 passengers in any one vehicle, but not including the driver thereof, between in Somerset and Hunterdon Counties, NJ on the one hand, and, on the other, LaGuardia Airport and John F. Kennedy International Airport, NY, NY; passengers and their baggage, in the same vehicle with passengers in charter limousine operations, in nonscheduled, door-to-door service, limited to the transportation of not more than six (6) passengers in any one vehicle, not including the driver, between specified points in NJ on the one hand, and, on the other, NY, NY, and points in Nassau, Westchester and Putnam Counties, NY, and points in Philadelphia, Bucks, Montgomery and Delaware Counties, PA, restricted against the transportation of passengers and their baggage moving between points in Mercer County, NJ, on the one hand, and, on the other, LaGuardia Airport, John F. Kennedy International Airport at NY, NY and the Piers in the NY, NY commercial zone, as defined by the Commission, and North East Philadelphia Airport and Philadelphia International Airport at Philadelphia, PA; and passengers and their baggage and express and newspapers in the same vehicle with passengers, limited to the transportation of not more than ten (10) passengers in any one vehicle, not including the driver, between Clinton, NJ and John F. Kennedy Airport, NY, serving all intermediate points (except those on, east or north the junction of U.S. Hwy 1 and Interstate Hwy 287, near Edison, NJ, New Brunswick, NJ and the town of Somerset, NJ, on NJ Hwy 27, over specified routes, and between Clinton, NJ and Somerville, NJ, serving all intermediate points, over specified routes, restricted to traffic either originating at or destined to LaGuardia or John F. Kennedy Airports. Transferee presently holds no authority from this commission; it does not seek section 210a(b) authority.

MC-FC-77911, filed October 26, 1978. Transferee: LLOYD M. BRETT and GARY L. BRETT, a Partnership, doing business as BRETT FREIGHT SERVICE, 764 Jennifer Street, East Wenatchee, WA 98801. Transferor: Waterville Transfer Co., Waterville, WA 98858. Representative: Robert H. Scott, Jr., 530 North Main, Wenatchee, WA 98801. Authority sought for purchase of the operating rights of transferor as set forth in Certificates Nos. MC-33925, and MC-33925 (Sub-No. 7), issued March 29, 1957 and May 5, 1967, respectively, as follows: General commodities, with the usual exceptions, between specified points in WA. Transferee presently holds no authoirty from this commission; it does seek section 210a(b) authority.

MC-FC-77921, filed November 2, 1978. Transferee: LIVINGSTON TRANSPORTATION, LTD., 264 Tillson Avenue, Tillsonburg, ON, Canada N4G 3B6. Transferor: Waddick Transport Ltd., R. R. 6, Chatham, ON, Canada N7M 5J6. Representative: Miss Wilhelmina Boersma, Clark, Klein, Winter, Parsons & Prewitt, 1600 First Federal Building, Detroit, MI 48226. Authority sought for purchase by transferee of the operating rights of transferor set forth in Permit No. MC-139846 issued January 10, 1977, as follows: Liquid protein supplements, not intended for human consumption, in bulk, in tank vehicles, from Adrian, MI and Arcade, NY to ports of entry on the U.S.-Canada Boundary line located in Michigan and New York. Transferee presently holds authority in No. MC-112991 issued by the Commission. Application for temporary authority under Section 210a(b) has not been filed.

MC-FC-77924, filed November 6, 1978. Transferee: CARL S. ROSENBAUM, doing business as COAL TRANSPORT CO., 1509 Mart Drive, Little Rock, AR 72205. Transferor: Harrison W. Wood and Carl S. Rosenbaum, doing business as Coal Transport Co., (Susan Hearne Wood, Executrix), 1509 Mart Drive, Little Rock, AR 72205. Representative: Thomas B. Staley, 1550 Tower Building, Little Rock, AR 72201. Authority sought for purchase by transferee of the operating rights of transferor as set forth in Certificates No. MC-135885 (Sub-No. 1), issued May 1, 1973, as follows: Coal, between points in Franklin, Johnson, Logan and Pope Counties, AR, and from points in Franklin, Johnson,

DE 4 78 UMI

Logan and Pope Counties, AR to Fort ... in the vicinity of Roseville, California

V 43/233 DEC 4 78 UMI

Logan and Pope Counties, AR to Fort Smith and Van Buren, AR. Transferee presently holds no authority from this commission; it does not seek section 210a(b) authority.

H. G. HOMME, Jr.,
Secretary.

[7035-01-M]

[Third Rev. Exception No. 2]

ST. LOUIS SOUTHWESTERN RAILWAY CO. AND SOUTHERN PACIFIC TRANSPORTATION CO.

Exception Under Section (a), Paragraph (1), Part (v) Second Revised Service Order No. 1332

Decided: November 21, 1978.

By the Board: Because of recent work stoppages on the St. Louis Southwestern Railway Company (SSW) and on other connections of the Southern Pacific Transportation Company (SP), and due to derailments at Pine Bluff, Arkansas, New Orleans, Louisiana, Klamath Falls, Oregon, and in the vicinity of Roseville, California, the SP and the SSW are temporarily unable to forward all cars within 60-hours as required by Section (a)(4)(i) of Second Revised Service Order No. 1332.

It is ordered, Pursuant to the authority vested in the Railroad Service Board by Section (a)(1)(v) of Second Revised Service Order No. 1332, the SSW and the SP are required to forward loaded cars or empty foreign or private cars from the points named below within 72-Hours.

SSW: Pine Bluff, Arkansas.

SP: Eugene, Oregon, Roseville, California, West Colton, California.[1]

Effective November 24, 1978.

Expires 11:59 p.m., November 30, 1978.

JOEL E. BURNS,
Chairman,
Railroad Service Board.

1

[M-181, amdt. 1; Nov. 28, 1978]

CIVIL AERONAUTICS BOARD.

TIME AND DATE: 10 a.m., November 30, 1978.

PLACE: Room 1011, 1825 Connecticut Avenue NW., Washington, D.C. 20428.

SUBJECT: 28. Docket 31977, Application of International Developers, Inc. (Japan) d.b.a. Toyo World Enterprises of California, Inc., for indirect foreign air carrier permit (Memo 8097-A, BIA, OGC).

STATUS: Closed.

PERSON TO CONTACT:

Phyllis T. Kaylor, the Secretary, 202-673-5068.

SUPPLEMENTARY INFORMATION: An application for an indirect foreign air carrier prmit (foreign tour operator) was filed by International Developers, Inc. (Japan) d.b.a. Toyo World Enterprises of California, Inc., and was originally included on the agenda for November 16, 1978. It was deleted from that agenda because the Board wanted to consider whether to hold a closed or open meeting prior to discussion on the item. Through a misunderstanding, consideration of the application was not included in the agenda for November 30, 1978. Accordingly, the following Members have voted that item 28 be added to the November 30, 1978, agenda and that no earlier announcement of this addition was possible:

Chairman, Marvin S. Cohen
Member, Richard J. O'Melia
Member, Elizabeth E. Bailey
Member, Gloria Schaffer

This item will concern the development of Board policy toward charter operations of U.S. and foreign air carrier, both direct and indirect, operating between the United States and Japan. Premature public disclosure of opinions and evaluations could seriously compromise the ability of the United States to achieve an agreement which would be in the best interest of the United States. Accordingly, the following Members have voted that the meeting on this subject would involve matters the premature disclosure of which would be likely to significantly frustrate implementation of agency action within the meaning of the exemption provided under 5 U.S.C. 552b(c)(9)(B) and 14 CFR 3106.5(9)(B) and that the meeting on this item be closed:

Chairman, Marvin S. Cohen
Member, Richard J. O'Melia
Member, Elizabeth E. Bailey
Member, Gloria Schaffer

PERSONS EXPECTED TO ATTEND

Board Members.—Chairman, Marvin S. Cohen; Member, Richard J. O'Melia; Member, Elizabeth E. Bailey; and Member, Gloria Schaffer.

Assistants to Board Members.—Mr. Sanford Rederer, Mr. Elias Rodriguez, and Mr. Steve Lachter.

Office of the General Counsel.—Mr. Philip J. Bakes, Jr., Mr. Gary J. Edles, Mr. William Adler, Mr. Michael Schopf, Mr. Peter B. Schwarzkopf, and Ms. Carol Light.

Bureau of Pricing and Domestic Aviation.—Ms. Barbara Clark.

Bureau of Consumer Protection.—Mr. Howard Schmeltzer, and Mr. Glenn Wienhoff.

Bureau of International Aviation.—Mr. Richard M. Loughlin, Ms. Sandy Gerson, Mr. Dean L. Johnson, Mr. Ronald Miller, and Mr. Edward Wilbur.

Office of the Secretary.—Mrs. Phyllis T. Kaylor and Ms. Deborah Lee.

GENERAL COUNSEL CERTIFICATION

I certify that this meeting may be closed to the public under 5 U.S.C. 552b(c)(9)(B) and 14 CFR 3106.5(9)(B) and that the meeting be closed to public observation.

PHIL BAKES, Jr.,
General Counsel.

[S-2445-78 Filed 11-30-78; 3:56 pm]

[6320-01-M]

2

[M-181, Amdt. 2; Nov. 28, 1978]

CIVIL AERONAUTICS BOARD.

Notice of deletion of item from the November 30, 1978, meeting agenda.

TIME AND DATE: 10 a.m., November 30, 1978.

PLACE: Room 1027, 1825 Connecticut Avenue NW., Washington, D.C. 20428.

SUBJECT: 25. Petition of British Caledonian Airways, Ltd., for review of staff action denying its request for special tariff permission to file a one-way cargo charter charge from Houston to Singapore (Memo 8305, BPDA, BIA, OGC).

STATUS: Open.

PERSON TO CONTACT:

Phyllis T. Kaylor, the Secretary, 202-673-5068.

SUPPLEMENTARY INFORMATION: Item 25 is being deleted in order to improve the draft after further staff consultation. Accordingly, the following Members have voted that agency business requires the deletion of item 25 from the November 30, 1978, agenda and that no earlier announcement of this change was possible:

Chairman, Marvin S. Cohen
Member, Richard J. O'Melia
Member, Elizabeth E. Bailey
Member, Gloria Schaffer

eration of Order 78-9-2 to add Los Angeles as a coterminal point to the exemption giving World authority to serve the terminal point Amsterdam, the Netherlands and various U.S. coterminal points. (Memo 8303, BIA, BPDA, OGC, OEA, BCP).

STATUS: Closed.

PERSON TO CONTACT:

Phyllis T. Kaylor, the Secretary, 202-673-5068.

SUPPLEMENTARY INFORMATION: A formal Office of General Counsel request for closed meeting was not communicated to the Bureau of International Aviation until Friday, November 24, 1978, i.e., after the meeting agenda was typed by the Office of the Secretary. There was insufficient staff available on November 24 to draft the required notice. Accordingly, the following Members have voted that agency business requires that the Board vote that this Item be closed and to meet on less than 7 days' notice and that earlier announcement of the meeting was not possible:

Chairman, Marvin S. Cohen
Member, Richard J. O'Melia
Member, Elizabeth E. Bailey
Member, Gloria Schaffer.

Consideration of these applications will involve aspects of our relationships with France and our negotiations with that country. Public disclosure, particularly to foreign governments with whom the United States is or will be negotiating, of the opinions, evaluations, and strategies of the Board and its staff could seriously compromise the ability of the United States Delegations to achieve agreements which would be in the best interests of the United States. Accordingly, the following Members have voted that public observation of this item would involve matters the premature disclosure of which would be likely to significantly frustrate implementation of proposed agency action within the meaning of the exemption provided under 5 U.S.C. 552b(c)(9)(B) and 14 CFR 310b.5(9)(B) and that the meeting on this item will be closed:

Chairman, Marvin S. Cohen
Member, Richard J. O'Melia
Member, Elizabeth E. Bailey
Member, Gloria Schaffer.

PERSONS EXPECTED TO ATTEND

Board Members.—Chairman, Marvin S. Cohen; Member, Richard J. O'Melia; Member, Elizabeth E. Bailey; and Member, Gloria Schaffer.

Assistants to Board Members.—Mr. Sanford Rederer, Mr. Elivas Rodriguez, and Mr. Steve Lachter.

Office of the General Counsel.—Mr. Philip J. Bakes, Jr., Mr. Gary J. Edles, Mr. William Adler, Mr. Michael Schopf, Mr. Peter B. Schwarzkopf, and Ms. Carol Light.

Bureau of Pricing and Domestic Aviation.—Ms. Barbara Clark.

Bureau of Consumer Protection.—Mr. Howard Schmeltzer and Mr. Glenn Wienhoff.

Bureau of International Aviation.—Mr. Richard M. Loughlin, Ms. Sandy Gerson, Mr. Dean L. Johnson, Mr. Ronald Miller, and Mr. Edward Wilbur.

Office of the Secretary.—Mrs. Phyllis T. Kaylor and Ms. Deborah Lee.

GENERAL COUNSEL CERTIFICATION

I certify that this meeting may be closed to the public under 5 U.S.C. 552b(c)(9)(B) and 14 CFR 310b.5(9)(B) and that the meeting be closed to public observation.

PHIL BAKES, Jr.,
General Counsel.

[S-2447-78 Filed 11-30-78; 3:56 pm]

[6320-01-M]

4

[M-181, Amdt. 4; Nov. 29, 1978]

CIVIL AERONAUTICS BOARD.

Notice of addition of items to the November 30, 1978, meeting agenda.

TIME AND DATE: 10 a.m., November 30, 1978.

PLACE: Room 1027, 1825 Connecticut Avenue, Washington, D.C. 20428.

SUBJECT:

4a. Docket 33013, ACTOA petition for regulation over all ground packages sold in conjunction with air transportation (OGC)

20a. Docket 33634; Petition of Aeroamerica, Inc., for reconsideration of Order 78-10-106 which denied Aeroamerica exemption authority to operate in the Seattle-Portland-Honolulu market pending resolution of certain consumer protection issues (BPDA, BCP).

STATUS: Open.

PERSON TO CONTACT:

Phyllis T. Kaylor, the Secretary, 202-673-5068.

SUPPLEMENTARY INFORMATION: In order to ensure that the Board have sufficient time to review the issues and still comply with the 120-day rule for disposing of petitions for rulemaking item 4a is being added to the November 30, 1978, agenda and no earlier announcement of this addition was possible:

Chairman, Marvin S. Cohen
Member, Richard J. O'Melia
Member, Elizabeth E. Bailey
Member, Gloria Schaffer

On October 26, the Board granted a request by Pan American to suspend service between a number of points, including the Seattle-Portland-Honolulu market. In granting the suspension, the Board also granted exemption authority in that market to United, Braniff, and Hawaiian because of the immediate need for replacement air service. Aeroamerica had requested similar exemption authority, but the Board denied its request because the carrier had not provided adequate financial security for its passengers. Aeroamerica has worked to correct this problem, and has requested reconsideration of the denial. In order to facilitate the replacement of air service in this market, we believe that Aeroamerica's petition should come before the Board as soon as possible. Accordingly, the following Members have voted that agency business requires the addition of this item and that no earlier announcement of this addition was possible:

Chairman, Marvin S. Cohen
Member, Richard J. O'Melia
Member, Elizabeth E. Bailey
Member, Gloria Schaffer

5

[M-181, Amdt. 5; Nov. 29, 1978]

CIVIL AERONAUTICS BOARD.

Notice of addition of item to the November 30, 1978, agenda.

TIME AND DATE: 10 a.m., November 30, 1978.

PLACE: Room 1027, 1825 Connecticut Avenue NW., Washington, D.C. 20428.

SUBJECT: 19a. Docket 33889—Procedures for handling dormant authority applications (BPDA).

STATUS: Open.

PERSON TO CONTACT:

Phyllis T. Kaylor, the Secretary, 202-673-5068.

SUPPLEMENTARY INFORMATION: The staff has been informed that certain markets will become dormant next week, and the Board has to have procedures to handle multiple applications in effect prior to that time. In view of the large volume of work on dormant authority the staff was unable to prepare an order any earlier. Accordingly, the following Members have voted that agency business requires the addition of item 19a to the November 30, 1978, agenda and that no earlier announcement of this addition was possible:

Chairman, Marvin S. Cohen
Member, Richard J. O'Melia
Member, Elizabeth E. Bailey
Member, Gloria Schaffer

[M-181, Amdt. 6; Nov. 29, 1978]

CIVIL AERONAUTICS BOARD.

Notice of deletion of item from the November 30, 1978, meeting agenda.

TIME AND DATE: 10 a.m., November 30, 1978.

PLACE: Room 1027, 1825 Connecticut Avenue NW., Washington, D.C. 20428.

SUBJECT: 20. Docket 32774, Norfolk's Petition for an Investigation of United's Service Cuts in the Norfolk-Washington market. (Memo 8290, BPDA, OCCR).

STATUS: Open.

PERSON TO CONTACT:

Phyllis T. Kaylor, the Secretary, 202-673-5068.

SUPPLEMENTARY INFORMATION: In view of some questions raised by the Office of General Counsel, the staff would like to reevaluate the memorandum before it is discussed at a Board Meeting. Accordingly, the following Members have voted that item 20 be deleted from the November 30, 1978, agenda and that no earlier announcement of this change was possible:

Chairman, Marvin S. Cohen
Member, Richard J. O'Melia
Member, Elizabeth E. Bailey
Member, Gloria Schaffer

PERSONS EXPECTED TO ATTEND

Board Members.—Chairman, Marvin S. Cohen; Member, Richard J. O'Melia; Member, Elizabeth E. Bailey, and Member, Gloria Schaffer.

Assistants to Board Members.—Mr. Sanford Rederer, Mr. Elias Rodriguez, and Mr. Steve Lachter.

Office of the General Counsel.—Mr. Philip J. Bakes, Jr., Mr. Gary J. Edles, Mr. William Adler, Mr. Michael Schopf, Mr. Peter B. Schwarzkopf, and Ms. Carol Light.

Bureau of Pricing and Domestic Aviation.—Ms. Barbara Clark.

Bureau of Consumer Protection.—Mr. Howard Schmeltzer and Mr. Glenn Wienhoff.

Bureau of International Aviation.—Mr. Richard M. Loughlin, Ms. Sandy Gerson, Mr. Dean L. Johnson, Mr. Ronald Miller, and Mr. Edward Wilbur.

Office of the Secretary.—Mrs. Phyllis T. Kaylor and Ms. Deborah Lee.

GENERAL COUNSEL CERTIFICATION

I certify that this meeting may be closed to the public under 5 U.S.C. 552b(c)(9)(B) and 14 CFR 310b.5(9)(B) and that the meeting be closed to public observation.

PHIL BAKES, Jr.,
General Counsel.

CUMULATIVE LIST OF PUBLIC LAWS APPROVED BY THE PRESIDENT DURING THE SECOND SESSION OF THE 95TH CONGRESS

Approval	Bill No.	Public	U.S. Statutes	Subject Matter	Price

V 43/233 DEC 4 78 UMI

Public Laws

The following is a cumulative list of all public laws for the second session of the 95th Congress. Each law as it was received by the Office of the Federal Register was announced in the Reminders section of the daily Federal Register.

This cumulative list gives the Presidential approval date, bill number, public law number, permanent citation to the future U.S. Statutes at Large volume in which the law will appear, subject matter, and current price. In citing to a law in the U.S. Statutes at Large volume, the word "Stat." should be used between the volume number and page number shown below. For example: 92 Stat. 3.

The text of these laws is not printed in the Federal Register. Copies of the laws in individual pamphlet form, called "slip laws," may be ordered from the Superintendent of Documents, U.S. Government Printing Office. An order blank is printed at the end of this list for your convenience.

Approval Date	*Bill No.*	*Public Law No.*	*U.S. Statutes at Large*	*Subject Matter*	*Price*
Feb. 3	H.R. 7691	95-224	92:3	Federal Grant and Cooperative Agreement Act of 1977.	$.50
Feb. 6	S. 1585	95-225	92:7	Protection of Children Against Sexual Exploitation Act of 1977.	.50
Feb. 7	H.R. 10532	95-226	92:10	Emergency drought relief measures, construction extension.	.50
Feb. 10	H.R. 5322	95-227	92:11	Black Lung Benefits Revenue Act of 1977.	.80
	H.R. 5054	95-228	92:25	Executive agencies, apportionment requirements, elimination.	.50
Feb. 14	H.J. Res. 386	95-229	92:26	Historic event or personality during 1777, Bicentennial commemorative medals.	.50

COMMENTS REQUESTED

The Office of the Federal Register is considering publishing in the Federal Register periodic cumulative listings of public laws. These listings would be in addition to the "Reminder" entries which announce laws as they are signed. These listings would follow the same format as shown above and would be cumulative each time they are published. The last listing would be cumulative for an entire session of a particular Congress.

We would appreciate comments from the users of the Federal Register on the usefulness, frequency, and desirability of printing these listings and on the arrangement of and information in the listings.

Please send your comments to Fred J. Emery, Director, Office of the Federal Register, Washington, D.C. 20408.

CHAPTER I—COAST GUARD, DEPARTMENT OF TRANSPORTATION

[CGD 73-251]

REQUIREMENTS FOR MOBILE OFFSHORE DRILLING UNITS

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: These regulations govern the inspection and certification, design and equipment, and operation of mobile offshore drilling units. Mobile offshore drilling units have previously been subject to various regulations depending on whether they float while engaged in drilling operations, or whether they drill while bearing on the seabed. These regulations will bring all mobile offshore drilling units under one set of uniform, comprehensive regulations, and will provide that all units be inspected and certificated by the Coast Guard.

EFFECTIVE DATE: January 3, 1979.

FOR FURTHER INFORMATION CONTACT:

Lieutenant Commander Edward A. Harmes, Office of Merchant Marine Safety, Room 8300, Department of Transportation, Nassif Building, 400 Seventh Street, S.W., Washington, D.C. 20590, 202-426-2183.

SUPPLEMENTARY INFORMATION: On May 2, 1977, the Coast Guard published a proposed rule (42 FR 22296) concerning these amendments. Interested persons were given until June 29, 1977, to submit comments, and a public hearing was held on June 1, 1977, in New Orleans, Louisiana. A total of 79 written comments were received from 58 commenters. A significant amount of duplication was noted. Commenters included private individuals; companies; industry associations; Federal, State, and local government agencies; and labor unions. Eight persons made oral comments at the public hearing.

The regulations governing electrical engineering requirements for mobile offshore drilling units were proposed in the FEDERAL REGISTER of June 27, 1977 (42 FR 32700). Interested persons were given until August 11, 1977, to comment on these proposals. Eight comments were received which related specifically to the requirements for mobile offshore drilling units.

This rule has been reviewed under the Department of Transportation's "Policies and Procedures for Simplification, Analysis, and Review of Regulations" (43 FR 9582, March 8, 1978). A final evaluation has been prepared, and has been included in the public docket.

DRAFTING INFORMATION

The principal persons involved in drafting this rule are: Commander Peter Cronk and Lieutenant Commander Edward Harmes, Project Managers, Office of Merchant Marine Safety, and Edward J. Gill, Jr., Project Attorney, Office of the Chief Counsel.

The letter designations of the Subparts in Part 108 have been changed in order to make them consecutive. Both the new and old designations are set out below:

Proposal	*Final Rule*
Subpart A	Subpart A
Subpart C	Subpart B
Subpart D	Subpart C
Subpart E	Subpart D
Subpart F	Subpart E
Subpart G	Subpart F
Subpart J	Subpart G
Subpart K	Subpart H

DISCUSSION OF COMMENTS

Many revisions have been made to the proposed regulations to improve clarity without changing the substance of the regulations. These revisions are made as a result of comments received, and Coast Guard review of the proposal.

Those changes that significantly alter the proposed regulations, and those items that received considerable comment, but have not been revised, are discussed below.

Concurrent with the development of these National regulations has been an international effort to draft a Code for Mobile Offshore Drilling Units through the International Maritime Consultative Organization (IMCO). The draft Code is near completion and is expected to be submitted for adoption procedures through the Maritime Safety Committee by the end of 1978. Where it has been possible, the National regulations have been developed to reflect the proposed resolution. However, because of the fluid state of the IMCO effort and the need for National regulations prior to adoption of the IMCO standard, some differences between these two are anticipated.

GENERAL COMMENTS

The Environmental Protection Agency expressed concern that the establishment of Subchapter I-A would remove all mobile offshore drilling units from the provisions of 33 CFR Part 147, which provides for the establishment of safety zones around offshore installations. The Coast Guard does not intend to modify the applicability of the safety zone regulations.

Numerous commentors objected to the inclusion in Subchapter I-A of references to other regulations applicable to mobile offshore drilling units, and suggested that all of these regulations be set out in the final rule. The Coast Guard Mobile Offshore Drilling Unit Subcommittee of the National Offshore Operations Industry Advisory Committee considered the inclusion of all applicable regulations in one set of regulations during the early stages of the development of these regulations and rejected the concept as impractical.

Several commentors expressed concern that, regardless of the Memorandum of Understanding (MOU) signed by the Coast Guard and the U.S. Geological Survey (USGS) on 11 April 1977, (42 FR 20198, April 18, 1977), the proposed rulemaking presented apparent areas of regulatory conflict between the Coast Guard and the USGS for those units operating on the Outer Continental Shelf of the United States. Particular concern was directed at those portions of the proposed rule addressing industrial systems; cranes; and riveting, welding, and burning operations. The Coast Guard does not agree that this is a problem. The USCG-USGS Memorandum of Understanding was developed with full consideration given to the proposed rulemaking. In accordance with the provisions of the MOU, a standing committee composed of representatives of each agency has been established to coordinate its implementation. The USGS has also, in their recent revisions to the OCS Orders, referred to the Memorandum of Understanding and applicable Coast Guard regulations.

Although the preamble to the proposed rule indicated that the proposal did not address personnel qualifications or manning standards for mobile offshore drilling units, several commentors made suggestions and recommendations in this area.

The Coast Guard has contracted the services of an independent research firm to conduct a survey, and an analysis of industrial/maritime mobile offshore drilling unit personnel training and qualification requirements. The task, which is anticipated to be completed shortly, will assist the Coast Guard in developing regulations to assure that drilling unit personnel have the skill and knowledge necessary for safe navigation, and operation of the units when they are in the marine mode.

SUBCHAPTER I-A

PART 107—INSPECTION AND CERTIFICATION

One commentor suggested that the word "drilling" be deleted from § 107.01 in order to make the regulations applicable to other types of units engaged in the offshore oil industry. At this time, it is the Coast Guard's intent to only make the regulations applicable to mobile offshore drilling units. Those portions of the regulations which may be applicable to other vessels of similar configuration will be evaluated for possible future rulemaking action.

Another commentor recommended that the definition of Industrial Personnel in § 107.113 be revised to limit the industrial personnel category to those persons directly engaged in the drilling process. The Coast Guard feels that the definition, as proposed, is accurate, as it states that industrial personnel are those on board for the sole purpose of carrying out the industrial business or function of the unit, which is drilling. The unit's Certificate of Inspection will set forth the required crew and the total number of persons allowed on board the unit.

Seven commentors, apparently relying on the language in 46 CFR 30.10-11, requested that a new paragraph be added to § 107.115 stating that non-self-propelled units normally operating in the waters of any ocean or the Gulf of Mexico 20 nautical miles or less offshore are not seagoing barges. After careful consideration, the Coast Guard has determined that it cannot adopt this comment since it would be inconsistent with previous administrative determinations as to the application of the Seagoing Barge Act, 46 U.S.C. 395. 46 CFR 30.10-11 relates only to tank barges and is not applicable to mobile offshore drilling units. However, the same language appears in 46 CFR 90.10-25. The regulation in 46 CFR 90.10-36 contains the Coast Guard's interpretation of the application of the Seagoing Barge Act. It states that the phrase "every seagoing barge of one hundred gross tons or over in subsections 395(a) and 395(b), Title 46, U.S.C. (sec. 10, 35 Stat. 428, as amended) includes every non-self-propelled vessel of 100 gross tons or over, if such vessel will navigate the high seas or ocean." The terms "high seas or ocean", in 46 CFR 90.10-36 means any area of the ocean seaward of the headlands. Although 46 CFR 90.10-25 is entitled "ocean," it does not define that term. It is merely a statement of what is included in a route designation on a Certificate of Inspection.

In *United States* v. *Gahagan Dredge Corp.* (289 F. 2d 639 (2d Cir. 1961)), the Court adopted the interpretation of the Seagoing Barge Act placed on that Act by the Coast Guard. The interpretation was that the Act applied to barges which navigate seaward of the headlands. This interpretation continues to be the interpretation of the Coast Guard as to the application of the inspection and certification requirements in the Act.

Eleven commentors requested that a paragraph be added to § 107.115 to read that "non-self-propelled units which in fact in the usual course of their operations do not pass outside the line of demarcation dividing inland waters from the high seas, as defined in Section 151 of Title 33, U.S. Code, are not considered 'seagoing barges' for the purpose of this chapter." The line authorized by 33 U.S.C. 151 relating to the application of certain marine safety statutes has no application to the Seagoing Barge Act.

Since a determination and classification of a vessel as to whether or not it is a seagoing barge is within the administrative discretion of the Coast Guard, these barges will be subject to inspection when, in the judgment of the cognizant Officer-in-Charge, Marine Inspection, their operations carry them into waters which are essentially outside of the sheltered waters, and exposed to the effect of the open seas.

Section 107.115 has been deleted because the definition of "Mobile Offshore Drilling Unit" in § 107.111 adequately covers seagoing barges.

Eighteen commentors recommended that the requirement for a biennial inspection in § 107.201, and several other sections of Part 107, be changed to a quadrennial inspection. The Coast Guard's position is that a biennial inspection is required by law, and that these sections cannot be modified. Specifically, 46 U.S.C. 399, states in part "when the inspection of a steam vessel is completed and the Secretary of the department in which the Coast Guard is operating approves the vessel and her equipment throughout he shall make and subscribe a certificate to that effect." The provisions of 46 U.S.C. 391 and 395 require that these inspections be conducted at least once in every two years.

Seventeen commentors thought that the wording of § 107.211(c) did not accurately describe the requirements that would apply to existing uncertificated mobile offshore drilling units for an original Certificate of Inspection. Several versions of alternative wording were suggested.

The Coast Guard agrees that the wording in the proposed rule was not clear, and has modified § 107.211(c) to clarify that existing uncertificated mobile offshore drilling units are subject only to the applicable portions of Subchapter I-A Specified in the Navigation and Vessel Inspection Circular, "Inspection of Existing Mobile Offshore Drilling Units." The Circular is published as Appendix A to Subchapter I-A.

One commentor submitted that the 90 day notification for biennial inspections and drydock examinations for units operating in international service was excessive, and proposed a 30 day notification. On the basis of recent experience in overseas inspections, the Coast Guard agrees that the 90 day notification is not necessary, but feels that 30 days does not allow for enough lead time. Section 107.215(b) has been revised to provide for a 60 day notification.

Fifteen commentors suggested alternative wording for § 107.215(c)(2) addressing biennial inspection for certification of those units previously issued a Certificate of Inspection under 46 CFR Subchapter I. The main thrust of these comments were similar to those addressed to § 107.211(c) and suggested deletion of the reference to the Navigation and Vessel Inspection Circular, "Inspection of Existing Mobile Offshore Drilling Units." The Coast Guard feels that reference to the Circular is necessary because it contains guidance for the application of certain equipment and operating requirements of Subchapter I-A to units that are certificated under Subchapter I. This section has been re-written to clarify its intent.

Nineteen commentors suggested adding a footnote to § 107.231(a)(4) to state that the load line requirements are not applicable to bottom supported units when they are in an operating mode. The Coast Guard agrees, and an appropriate footnote has been added.

Several commentors suggested numerous changes, both editorial and technical, to § 107.235. These comments were accepted, in part, and § 107.235 has been completely rewritten to make it easier to understand. The servicing requirements for hand portable fire extinguishers has been put in a tabular format, and testing requirements for foam systems clarified by the inclusion of a provision that the manufacturer may evaluate the sample of the foam liquid.

Seven comments pointed out the apparent regulatory conflict with the U.S. Geological Survey (USGS) in regard to cranes. The conflict between the Coast Guard regulations and the USGS Gulf of Mexico OCS Order 8, regarding the applicability of crane operation requirements to mobile offshore drilling units, is resolved in the new proposed USGS National Orders. The National Orders will not include crane requirements for mobile offshore drilling units thereby eliminating the regulatory conflict.

Two comments were received concerning § 107.260(c)(3). Requiring a rated load test after repairs or alterations to structural components remains desirable even though they are made under the direct supervision of the manufacturer according to his repair specifications. The addition of the "main hoist" to this requirement would not be appropriate since repairs can be made which do not involve load bearing components of the main hoist

and the possibility of a blowout. The

means of escape that allows a rapid

the regulations to provide for this type of helicopter. In the development

V 4 3 1 2 3 3 D E 4 7 8 UMI

but whose structural integrity should be verified. It is intended that any structural component or mechanism for which a load test is appropriate would require such a test to insure that repairs or alterations are satisfactory.

One comment was concerned with the effect of referring to the API Standards for cranes as opposed to writing specific regulations. The API Standards have the effect of regulation when adopted by reference. Any change to the Standard would have the benefit of Coast Guard review. Any exceptions or modifications to the standards may be made by the Coast Guard by publishing regulations which would preempt the standard.

A suggested revision to § 107.259(b) was accepted. The revised language states that inspectors *conduct* inspections and *witness* tests.

The Coast Guard partially concurred with a recommendation concerning the most appropriate boom angles which should be used for the rated load test in § 107.260(a). This paragraph was revised to include a requirement to conduct the rated load test at the minimum and maximum boom angles usually employed to insure that all structural components were proof tested within the operating range of the crane. Also the Coast Guard did not concur with the recommendation that the crane should be rotated while suspending the proof load. Though there is technical merit to this approach, there are other safety considerations involving physical constraints, danger to the installation and the manner in which proof loads are applied.

Seven comments on § 107.260(c) stated that the rated load test requirements exceed the API RP 2D requirements and are unnecessary. The API Recommended Practice provides for a rated load test after extensive repairs or alterations. The Coast Guard regulations go further by requiring the rated load test after installation, after repairs or alterations (of any kind) to any structural component of the crane (one comment was received in support of this), and after each four years of service. This approach insures that the structural integrity of the crane is verified after the crane is shipped from the factory to the construction site of the vessel and installed. Also, the periodic rated load test helps to determine if there has been any excessive wear and tear on load bearing components brought about by use.

Twelve commentors stated that, in view of present day technology and improved materials, the 24 month drydocking interval specified in § 107.261(a) should be changed to 48 months. A complete examination of the hull structure is required, by law, every two years.

One commentor suggested modifications to §§ 107.261 and 107.265 to provide for a special examination in lieu of drydocking for surface type units when specifically authorized by the Commandant. While the Coast Guard continues to be of the opinion that a conventional drydock examination provides for a more comprehensive inspection for surface type units, it is agreed that under certain conditions a special examination in lieu of drydocking is a viable alternative. Sections 107.261 and 107.265 have therefore been modified to allow surface type units to be specially examined in lieu of drydocking when specifically authorized by the Commandant.

Eleven commentors recommended that the descriptive term "submersible" be added to § 107.265. The Coast Guard does not consider it necessary, for the purpose of this rulemaking, to differentiate between units of the submersible and semi-submersible configurations. Of the small number of seagoing submersible units in operation, the great majority fit the defined category of "Column Stabilized."

One commentor suggested that the provisions of § 107.305(hh) could be misinterpreted as having regard only to "high strength" or "notch tough" steels, and not give adequate consideration to cold temperature properties. After considerable review, the regulation has been rewritten to provide for the inclusion of appropriate information concerning steels in the construction portfolio.

Seven comments suggested that § 107.305(o) read "Location of cranes" instead of "arrangement of cranes". The term arrangement encompasses consideration of location. In this context, it provides for additional information relative to the location of each crane and includes the proximity of other features such as the helicopter deck, lifesaving equipment, structural foundations and effects of loads and moments on the unit.

Paragraph 107.309(b)(1) was believed by eleven commentors to be inappropriate as applied to cranes since they considered cranes to be industrial equipment. This is not concurred with since cranes used for handling the general services of the unit, i.e., materials, supplies and personnel transfer, are the unit's equipment. Cranes or material handling gear used exclusively in an industrial system susch as the derrick or BOP gantry crane will be inspected as industrial equipment.

Seven commentors believed the submittal of crane plans and information in § 107.309(a)(1) would be a burden to the manufacturer. The concept of plan review is fundamental in approval and certification of cranes. To facilitate this process, type approval for manufacturer's models of cranes will apply, in practice, to subsequent orders of the same model, thus substantially reducing the need for repeated plan submittals.

The Coast Guard has revised § 107.309(b) (2) and (3) to clarify the intent of plan review regarding crane hydraulic and pneumatic systems. Cranes with these systems must meet certain requirements in Subpart 58.30 of Title 46 concerning fluid power control systems. Sections 58.30-40 and 58.30-50 describe the plans required to be submitted.

Eleven comments which were rejected affecting §§ 107.258, 107.259, and 107.309 included wording revisions and recommendations to provide for certification of cranes by qualified personnel in addition to Coast Guard inspectors and ABS and International Cargo Gear Bureau (ICGB) certifying authorities. Crane certification was provided to allow inspection by authorities whose certificates are recognized internationally. This would facilitate acceptability of a unit's cranes when it was operating under foreign jurisdictions. For many years, ABS and ICGB have been authorized by the Coast Guard to inspect cargo gear on cargo vessels. It is impracticable for the Coast Guard, at this time, to review, approve, and monitor any other organizations or qualified third parties which may have the capability of certifying cranes according to the requirements of Subchapter I-A.

PART 108—DESIGNS AND EQUIPMENT

Subpart B—Construction and Arrangement

Several commentors apparently misunderstood § 108.114. With regard to internal openings, the intent of this regulation is to provide remote controls or an alarm system for each opening in a watertight deck or bulkhead which is assumed to remain intact in any damage stability calculations. No standards are proposed for those internal openings which are in decks or bulkheads which are not considered watertight for damage stability purposes.

Many of the same commentors stated that it is unreasonable to demand internal closures to be remotely controlled from a normally manned control station. The regulations do not require this. Section 108.114(c)(1) is written to allow either remote controls or an alarm system. Where an alarm system is fitted, remote controls are not necessary.

One commentor, apparently referring to recent IMCO work addressing tank vessels, advocated additional structural fire protection requirements stressing the danger of external fires

and the possibility of a blowout. The Coast Guard does not agree that additional requirements are necessary in this area. The basic purpose of a mobile offshore drilling unit is the exploration and discovery of petroleum resources. It might be argued that the potential for an uncontrolled hydrocarbon flow "blowout" fire makes a unit different than a cargo vessel, however, it has been the experience of U.S. operators that this type of occurrence is best handled in a "preventive" manner. A blow-out fire and its consequences cannot be handled by state-of-the-art on-board fire protection devices. It should be noted that in the rare occurrence of an uncontrolled well flow and fire, the initial reaction of a crew is to abandon the vessel due to their familiarity with the fact that little can be done to save the unit. Lifesaving requirements therefore appear to play a much more important role than the incremental time possibly afforded by increased fixed fire protection systems.

Eight commentors stated that it was not appropriate to include § 108.131(f), of the proposal under the general heading of *Structural Fire Protection* since the purpose of classification of areas is for the design, selection, and installation of electrical equipment. Seven of these commentors also submitted suggested new wording describing the classified locations. These comments have been accepted in part. This section has been removed from the general heading of *Structural Fire Protection* and relocated at § 108.170. An introductory paragraph has also been added. The final wording of this section has been modified from the proposal to be in conformance with the final wording developed in the IMCO Design and Equipment Subcommittee.

Twenty-five commentors addressed the clarity of § 108.151, and several comments cited examples of situations where compliance with the proposed requirements would be impractical, or would impose other safety hazards. Most of these examples were of ballast pumprooms or propulsion spaces in column stabilized units. It was not the intent of the proposal to require two means of escape from these spaces. This section has been completely rewritten to improve clarity. The requirements for general areas and accommodation spaces were separated from the requirements for other spaces in which personnel are normally employed. Paragraphs (b) and (c) were rewritten to eliminate reference to watertight doors and quick acting doors since doors similar to these types of doors are often provided in locations that do not require a watertight door. The intent of the regulation is to provide a suitable primary means of escape that allows a rapid means of evacuation if an emergency should occur.

Twelve commentors recommended that § 108.160 be modified to include the actual requirements, and not refer to ANSI Code A14.3. Another commentor suggested that the issue date of the ANSI Code be included for clarification. Section 108.160 was intended to reference ANSI A14.3 for all features of fixed ladders not just width. The Coast Guard currently reviews fixed vertical ladders on inspected vessels to that standard. The text of this section has been revised to include excerpts from ANSI A.14.3(1956), referring to the code only in regard to the requirement for a protective cage or ladder safety device.

Two commentors expressed different opinions in addressing § 108.201(a). One suggested deletion of the provision allowing six industrial personnel not regularly employed on the unit to be accommodated in one space, and the other suggesting that the six person provision be expanded to cover all personnel. This section has not been changed in the final rule. The Coast Guard feels that there should be no difference in accommodation spaces for a units' regular complement of industrial personnel and the required crew; the only exception being those industrial personnel onboard for short periods to conduct specialized operations. The four person per space standard is identical to the regulations applied to other types of vessels inspected and certificated by the Coast Guard.

One commentor, in addressing § 108.209, recommended that a requirement for specific medical gear and a medically trained crewmember be set forth in the regulations. While this section has not been revised, the Coast Guard agrees that the subject of specific medical equipment and personnel training needs to be addressed not just for mobile offshore drilling units but for all vessels. A Notice of Proposed Rulemaking is currently being prepared, with the assistance of the U.S. Public Health Service, that will propose requirements in these areas.

Thirteen commentors noted that the provision of § 108.219 was not consistent with the requirements for guardrails in 46 CFR Subchapter I. This discrepancy was not intended, and this section has been revised to be consistent with existing regulations.

Two commentors stated that the requirement for helicopter deck size in § 108.233(a), being based on rotor diameter, would result in an inordinately large deck for a tandem rotor helicopter. Both commentors submitted extensive data on these aircraft, and requested that the Coast Guard revise the regulations to provide for this type of helicopter. In the development of the Notice of Proposed Rulemaking, the Coast Guard did not consider tandem rotor helicopters in specifying minimum landing deck size. The Coast Guard has received relevant information from the Federal Aviation Administration, and the question of tandem rotor helicopters was discussed at length at the IMCO Design and Equipment Subcommittee. The final regulations have been modified to include specification for minimum helicopter deck size if tandem rotor helicopters are utilized.

Seven commentors felt that the structural requirements for helicopter decks in § 108.235 should be more clearly stated, and should be consistent with classification society rules. The Coast Guard has rewritten this section to clarify the intended loading conditions, and they are generally based on classification society standards. The Coast Guard feels, however, that there is a need to investigate this requirement further to ensure that the currently used standard of 75 percent maximum helicopter weight on each main landing gear adequately matches the design capability of the helicopters used in offshore operations. If considered necessary, the Coast Guard will address this question again in future rulemaking. The revised regulations cross reference the FAA limit drop test which is used to define the design impact loading capability for each helicopter model. This replaces the previous reference to the collapse load of the landing gear.

One commentor was of the opinion that the 1.5 meter wide safety net proposed in § 108.235(f) was more than adequate and could itself possibly constitute an obstruction. To make this regulation more specific, and ensure that the safety net does not constitute an obstruction, the maximum height that the outer edge of the net may extend above the deck surface has been specified in the final rule.

Nine commentors suggested that the Coast Guard revise § 108.235(g) to require both a main and an emergency access route to the helicopter deck in lieu of the proposal of two access routes. It was stated that it may not be practical to provide two routes of equal construction and that this recommendation was consistent with present IMCO work. The Coast Guard agrees and has revised § 108.235(g) as suggested.

The Federal Aviation Administration considered the language in § 108.237 as being too vague and unenforceable. It was suggested that if the space available on a unit prevents compliance with National Fire Protection Association Bulletins #407, Aircraft Fuel Servicing, and #30, Flam-

mable and Combustible Liquid Code,

Ten commentors suggested that § 108.303 require "positive stability" in

V 4 3 / 2 3 3 D E 4 7 8 UMI

mable and Combustible Liquid Code, "safe" storage location distances to the landing area or sources of vapor ignition should be specified. The Coast Guard does not agree with these observations. The referenced NFPA Standards were reviewed and are intended for land based aircraft operations, and not entirely appropriate for mobile offshore drilling units. Coast Guard regulations already incorporate much of the subject matter in NFPA #30 such as fire protection, tank design and testing, piping systems, and venting. The provisions of NFPA #407 addressing aircraft fueling hose have been adopted by the Coast Guard (§ 108.239(g)). The regulations, as presently written, will allow the Coast Guard to review and evaluate each helicopter fueling facility proposed for installation on a mobile offshore drilling unit.

One commentor suggested that the reference to the FAA Helicopter Design Guide (AC 150/5390-1A, November 5, 1969) be deleted from § 108.241 since it did not contain significant information pertaining to mobile offshore drilling units. It was further suggested that specific requirements on visual aids for helicopter facilities be inserted in the regulations. The commentor suggested the wording which has been developed at IMCO as of June 1977 be used. Since the publication of the proposed rule, the Federal Aviation Administration has updated and republished their Heliport Design Guide (AC No. 150/5390-1B August 22, 1977). The revised design guide includes the IMCO wording as submitted by the commentor, and makes reference to U.S. Coast Guard regulations for mobile offshore drilling units. Based on the aforementioned developments, the Coast Guard agrees with the commentor and has included in the final rule the agreed upon IMCO wording addressing the lighting and marking of helicopter facilities.

Subpart C—Stability

One commentor suggested that Subpart C of Part 108 be eliminated because future revisions of the American Bureau of Shipping (ABS) rules may not agree with this Subpart. The Coast Guard does not agree. The stability regulations of Subpart D prescribe minimum standards of intact and damage stability for certification. Should changes to these regulations become necessary or desirable, appropriate Notices of Proposed Rulemaking will be issued. The Coast Guard cannot anticipate possible changes to the ABS rules, nor the acceptability or unacceptability of future ABS rules for Coast Guard certification purposes.

Ten commentors suggested that § 108.303 require "positive stability" in lieu of "positive metacentric height in the upright equilibrium position" for the full range of drafts. The commentors believe that the word "stability" provides for a more comprehensive and universal requirement, and that having positive metacentric height is insufficient. The Coast Guard does not agree. The basic intact stability requirement for all units in all anticipated drafts and loading conditions is that positive metacentric height (GM) be maintained. Use of the term "positive stability" could be misinterpreted to mean other stability parameters such as positive righting arm or positive righting moment. However, after careful consideration of this comment, the Coast Guard does believe that § 108.303 needs to be modified to more clearly indicate the basic metacentric height requirements. Section 108.303 has been rewritten to indicate the minimum metacentric height requirements of 51 mm (2 inches) at all drafts.

Eleven commentors suggested that a new section be added to Subpart C to allow the use of alternate stability requirements if approved by the Commandant. Since § 108.105 allows substitutions which insure a degree of safety consistent with the minimum standards of Subchapter I-A, it is not necessary to specifically indicate the treatment of alternate stability criteria. All such proposals would be considered in accordance with § 108.105(b).

One commentor noted that the determination of the downflooding angle and the meaning of the term "small openings" under § 108.305(c) are inexact and subject to varied individual interpretations. The commentor believes that openings fitted with the weathertight appliances specified in § 108.114(b), except ventilation intakes and outlets for engine rooms, crew spaces, and other spaces where ventilation is required at all times, should not be considered as downflooding openings provided they immerse after the point of wind-heeled static equilibrium (angle of the first intercept of the righting movement curve). The Coast Guard agrees. New § 108.301 (c) and (d) have been added to define downflooding and downflooding angle more precisely. Section 108.305(c) has been modified accordingly, and the first intercept has been indicated on graph 108.305.

Several commentors suggested that use of a reduced wind velocity of 25.8 meters per second (50 knots) be allowed in the calculation of wind heeling moment (Hm) for certain operating conditions. Some commentors believe that is necessary for units certificated for operation only in lakes, bays, and sounds beyond the coastline. Some commentors believe this is necessary for short field moves and special operations of existing units, such as drilling or repairing in shallow or sheltered waters. Other commentors believe this necessary for a number of existing units which are designed to allow the legs to be raised above the normal towing position to transit extremely shallow water areas. The Coast Guard has considered these comments in depth and does not agree that a reduced wind velocity should be allowed for special operating conditions or geographical areas. Prior experience indicates that mobile offshore drilling units may be subject to unexpected severe weather while in transit. Under the provisions of these regulations, new mobile offshore drilling units must be certificated for full ocean service.

Existing units will be certificated in accordance with the provisions of the Navigation and Vessel Inspection Circular, "Inspection and Certification of Existing Mobile Offshore Drilling Units". The acceptability of a reduced wind velocity stability criteria for field transit and other special operating conditions of existing units will be determined on an individual basis when requested by the owner during the certification process.

Several commentors suggested that wind heeling moments determined from wind tunnel test data be permitted as an alternative to the wind heeling moment calculations of § 108.311. The Coast Guard agrees. Proposed § 108.105(a) indicates that substitutes may be accepted if they provide an equivalent level of safety. Since wind tunnel test data and results would be subject to the same review as the calculations of § 108.311, the Coast Guard can determine whether the data and results show that an equivalent level of safety is provided. Some commentors suggested that § 108.311 be revised to include wind tunnel tests; however, since this would be a substitution for required calculations, the Coast Guard finds it more appropriate to clarify § 108.105(a) by adding "calculations," to the list of acceptable alternatives.

One commentor observed that § 108.315(a) prohibits progressive flooding which a unit might be able to endure. The commentor believes that progressive flooding should be permitted if the unit arrives at a satisfactory final equilibrium waterline. The commentor indicated that only additional flooding which would cause the unit to be unstable should be prohibited. The Coast Guard does not agree. The damage stability requirements provide minimum standards which the Coast Guard feels should be met or exceeded, not barely met. In case of severe damage, a prudent operator must attempt to control the extent of damage

and flooding to the best of his ability without delay. Since the equilibrium waterline permitted by § 108.315 can be above the main deck, a vessel may be in such a condition that flooding, with attendant increase in draft and heel and reduction in metacentric height, would endanger an already vulnerable vessel. Additional flooding must be prevented, therefore § 108.315(a) remains unchanged.

Two commentors indicated that the damage envisioned by proposed § 108.321(a) is extremely unlikely to occur. The Coast Guard agrees, and proposed § 108.321(a) has been deleted.

One commentor noted that the "uppermost deck" of proposed § 108.321(b) will probably be interpreted to mean uppermost continuous deck, and thus superstructures would not be subject to flooding. The commentor suggested that "uppermost deck" be changed to "uppermost continuous deck or first superstructure deck, where superstructures are fitted." The Coast Guard agrees that the first tier or superstructure would be assumed subject to flooding, and has incorporated the proposed wording.

One commentor interpreted proposed § 108.321(c) to exempt compartments in way of mat bottoms from the flooding assumptions. The intent of the proposed regulation was to require the assumption that each mat compartment be subject to flooding in a manner similar to the hull. Since the mat of a self-elavating unit is not subdivided into as many compartments as the hull and since the mat compartments generally are bounded by sides, top, and bottom of the mat, proposed § 108.321(c) has been revised to more clearly indicate the requirement for assuming each mat compartment to be subject to flooding.

One commentor noted that the permeability of 0.60 for cargo and storage spaces is not realistic and suggested the use of 0.95 for these spaces. The Coast Guard agrees. In those cases where the permeability may be less than 0.95, the actual permeability of the space may be calculated and used in lieu of the values given in Table 108.325. Since this option is provided, and since the tabular values are conservative, the permeability of cargo and storage spaces indicated in Table 108.325 has been changed to 0.95.

Subpart D—Fire Extinguishing Systems

Numerous commentors suggested that the Coast Guard limit the application of § 108.403(a) (3), (4), and (5) to propulsion related or marine systems machinery only. The primary concern was the possible loss of power during critical drilling operations. It was also stated that there was a vast difference between a marine engine room and an industrial engine room. the Coast Guard feels that the fire potential is the same regardless of whether the machinery is utilized for marine or industrial systems, and does not agree with the comments. Coast Guard marine casualty files contain records of internal combustion engine fires that could not be controlled by portable or semiportable equipment. Additionally, the shutdown of drilling equipment can be controlled by the use of manually activated fixed systems. If not promptly combated by adequate firefighting equipment, the fire itself would most likely result in failure of the machinery.

The National Transportation Safety Board (NTSB) commented that the 1,000 BHP limit be removed from § 108.403, and suggested that fixed fire extinguishing systems be required in all internal combustion machinery spaces. The Coast Guard does not agree, and the regulation is published as proposed. The potential of a fire is primarily dependent upon the amount of fuel present. Smaller fires can usually be extinguished using portable or semiportable extinguishers without unreasonable danger to firefighters. A large fire, of course, would present a serious danger to both the personnel and the unit. Regulations for other types of vessels, as well as international conventions, use 1,000 BHP as the division point for fixed extinguishing systems.

The NTSB also stated that, in their opinion, due to the hazardous operational conditions and number of personnel aboard mobile offshore drilling units, § 108.404 should be modified to require fire detection systems in high risk areas (e.g. machinery spaces, paint lockers, lamp lockers, galley and accommodation spaces). As stated in the preceding discussion of structural fire protection, the Coast Guard feels that mobile offshore drilling units closely resemble cargo vessels with respect to relative hazard, and it should be noted that a fire detection system is not required on either a tank vessel or a cargo vessel. Another consideration applicable to mobile offshore drilling units is that the industrial operation requires 24 hour active employment of substantial numbers of personnel. Such personnel are alert and in position to act in an emergency. Therefore, the Coast Guard does not agree that a fixed fire detection system is necessary.

Seven commentors addressing § 108.425(c) recommended deletion of the reference to 46 CFR 162.027, the Coast Guard approval specification for combination nozzles. the Coast Guard does not agree. Other nozzle designs have been tested but have been found unsuitable in the marine environment. If other suitable nozzles are developed, they may be submitted to the Coast Guard for approval, or accepted for installation on a unit under the general equivalency clause in § 108.105.

Sixteen commentors suggested deletion of the requirement in § 108.425(d) for low velocity spray applicator at certain fire stations stating that this equipment was outdated and that a combination nozzle is equally effective and can be put into operation instantly. The Coast Guard feels that while the combination of nozzle does provide a spray pattern, the applicator provides an option to the firefighter of attacking a fire from a greater distance or from around a corner. Approved combination nozzles may be equipped with optional low velocity spray heads if they meet the requirements in 46 CFR 162.027. However, this does not replace the applicator, if required.

Twelve commentors suggested revision of § 108.427, stating that the proposed requirement was in excess of the SOLAS Convention. Taking into consideration the fact that mobile offshore drilling units are in port only on rare occasions, the Coast Guard agrees with the commentors and has revised the regulation to be in conformance with the SOLAS Convention requirements for cargo vessels.

One commentor suggested that § 108.458 be amended to include references to National Fire Protection Association (NFPA) Standards 12-A and 12-B. The Coast Guard is presently working on detailed requirements for halogenated gas extinguishing systems. Portions of applicable NFPA Standards may be referenced in those regulations which will be published in a separate Notice of Proposed Rulemaking applicable to other types of vessels as well as mobile offshore drilling units. Until those regulations are finalized, the Coast Guard will continue to approve halogenated gas extinguishing systems on a case by case basis.

A total of twenty-two commentor suggested insertion into the regulations of a new section providing for the installation of aqueous film forming foam (AFFF) systems for use other than for helicopter facilities as provided for in § 108.487 and § 108.489. Many of the comments suggested AFFF application rates and various extinguishing system details. All of the commentors felt that AFFF was at least as effective as protein foam, and that by not including AFFF systems in the regulations, the Coast Guard was precluding the use of an effective type of fire extinguishing system. The Coast Guard agrees in part with the general philosophy presented by the commentors. AFFF systems are foam systems and may be approved as such on an individual basis. Foam rate and other details may be varied on the

basis of equivalency if variations are

that the number of lifeboats should be

eliminate most of the problems experi-

ered necessary for safety. These sec-

minimum requirements regardless of

Eighteen commentors questioned the proposed requirements for testing

V 4 3 / 2 3 3

basis of equivalency if variations are justified. A new § 108.474 has been added to the final rule providing that AFFF systems may be installed if approved by the Commandant. This does not alter the intent of § 108.487 and § 108.489 which contain specific requirements for AFFF systems to protect helicopter facilities.

Nineteen commentors recommended complete deletion of the fire protection requirements for helicopter decks equipped with fueling facilities contained in § 108.487. The commentors were of the opinion that these regulations are unnecessary and not justified by actual experience. the Coast Guard does not agree. The requirement for protection of helicopter decks equipped with fueling facilities is based upon the potential hazard.

One commentor felt that the foam application rate required by § 108.487(b)(2) was a carry-over from foam systems for tank protection and was excessive for helicopter protection. The Coast Guard position is that the size of an extinguishing system should be related to the magnitude of the hazard. The application rates in the proposed rule are generally accepted rates for systems using hoses and monitor nozzles.

Three commentors suggested that Table 108.495(b) be amended to include fire extinguishers utilizing Halon 1211. The Coast Guard agrees and has amended Table 108.495(b) to include Halon 1211 fire extinguishers of the classifications presently recognized by the Coast Guard.

Nineteen commentors questioned the purpose of Note 3 to Table 108.495(a). Most of the commentors felt the proposed requirement was excessive and several interpreted the proposal as doubling the number of extinguishers required. In the proposed rule, Note 3 was inadvertently applied to the wrong table. It has been relocated in Table 108.495(b) where it applies to B-V extinguishers that are affected by wind or other environmental conditions. The note requires a doubling in the quantity of agent, not in the number of fire extinguishers, and is applicable to dry chemical and carbon dioxide extinguishers, but not to foam extinguishers. Rather than create a new Class B-VI semiportable fire extinguisher, the Coast Guard feels that the footnote to Table 108.495(b) is adequate.

Subpart E—Lifesaving Equipment

Several commentors questioned the necessity for mobile offshore drilling units to be equipped with covered lifeboats for 100% of the personnel on board as proposed in § 108.503. Two of the commentors felt that the standby boat commonly employed negated the need for lifeboats, while another felt that the number of lifeboats should be determined by the size of the transit crew. Other commentors felt that the requirements were not supported by experience in the Gulf of Mexico or that the requirements should be in accordance with existing regulations for cargo vessels.

The Coast Guard does not agree and the basic requirement remains unchanged. There is no guarantee that a standby boat will be available 100 percent of the time in case of a casualty. Furthermore, during some casualties, personnel have had to enter the water in life preservers at night thus making recovery extremely difficult. The requirement for 100 percent lifeboatage includes both the drilling and transit modes of operation. Redundancy is considered necessary inasmuch as a casualty, such as fire or explosion while on location, or heavy weather while in transit, may cause a lifeboat to become unusable. As the primary escape system, there should be one lifeboat available even if one becomes inoperable. If half of the complement of personnel must use liferafts, there would then still be a powered boat available to pick up persons in the water or to tow liferafts out of danger. An exception has been made only for those units with a small complement of personnel.

One commentor suggested that provisions for lifeboats be minimized and the reference in § 108.503(d) to Subpart 94.20-10 for lifeboat equipment be eliminated. The Coast Guard agrees and has added paragraphs (d) through (g) to § 108.503. These new regulations eliminate certain items of equipment, and include provisions for units not in international service.

The preamble to the proposed rule stated that although the proposal would require either davit launched or throw-over type inflatable liferafts for 100 percent of the persons on board, further consideration was being given to require davit launching equipment for the required inflatable liferafts. Comments on this subject were specifically requested. Four comments addressing the requiring of davit launched liferafts were received, and were all in favor of the installation of davit launched liferafts on mobile offshore drilling units. The commentors pointed out problems in utilizing throw-over type rafts on mobile offshore drilling units such as height above the water, and the probability of entering the water to board the raft, including the possibility of having to jump from a considerable height. It was further pointed out by the commentors that the davit launched liferaft in allowing personnel to board the raft at deck level and be lowered to the water would thereby eliminate most of the problems experienced with throw-over type rafts.

The Coast Guard feels that the shortcomings cited for conventional rafts are accurate. In addition, further testing of a davit launched system has been conducted in the Gulf of Mexico. These tests have shown the davit launched concept to be sound, and the Coast Guard is now approving davit launched systems for installation on vessels. Therefore, § 108.505 and § 108.508 have been modified to require davit launched liferafts where the raft can be launched from more than 3 meters above the water. This provision has been included because anything above that height is considered to be too far to jump and swim to the raft.

Several commentors felt that specific words should be added to § 108.505 allowing for the substitution of inflatable liferafts for the required lifeboats when approved by the Commandant. The Coast Guard feels that the general equivalency clause in § 108.105 makes adequate allowance for the substitution of required equipment providing an equivalent level of safety is maintained.

Ten commentors recommended that the words "against the unit" be deleted from § 108.508(a)(5) stating that these words could pose a compliance problem because of the configuration of some units. The Coast Guard agrees, and has replaced the words "against the unit" with the words "in a location."

Ten commentors suggested limiting the requirement for whistles on life preservers in § 108.514(d) to those units on an international voyage and they seriously questioned the effectiveness of the whistles under any circumstances. The Coast Guard does not agree, and feels that whistles can effectively assist in the location of persons in the water regardless of whether or not the unit is on an international voyage.

Section 108.521 has been revised to require distress signals on all units. This change incorporates the recommendation of the Coast Guard Marine Board of Investigation that investigated the capsizing and sinking of the *Ocean Express* on April 15, 1976.

Subpart F—Cranes and Power Operated Industrial Trucks

Four commentors recommended that the proposed requirements for power operated industrial trucks in §§ 108.611, 108.613, and 108.615 be deleted because power operated industrial trucks are rarely used on mobile offshore drilling units. The Coast Guard does not agree. Power operated industrial trucks are used routinely on mobile drilling units, and the minimum regulations proposed are considered necessary for safety. These sections have therefore been adopted as proposed.

One commentor questioned the proposed requirement for each truck to be approved by a nationally recognized testing laboratory since the Occupational Safety and Health Administration standards in 29 CFR 1910.178 require approved trucks only in hazardous locations. The Coast Guard feels that testing laboratory certification of all trucks used on mobile offshore drilling units is necessary since the trucks may be utilized in classified areas as defined in § 108.170.

Subpart G—Equipment Markings and Instructions

Two commentors pointed out that the requirements for the marking of lifeboats contained in § 108.645 were not appropriate for the type of survival craft known as a "capsule." One of these commentors also suggested that the marking of the cubic capacity on survival craft was not appropriate for totally enclosed boats. The Coast Guard agrees with both commentors, and has added wording to the regulations to address "survival capsules". The Coast Guard also agrees that lifeboat cubic capacity is an obsolete concept for totally enclosed boats, and has deleted this requirement. Proposed § 108.645(b)(2) has also been deleted because it duplicated requirements of Coast Guard approval specification contained in 46 CFR Subpart 160.033.

Nine commentors felt that the proposed requirements for marking appliances for watertight integrity in § 108.665 were unreasonable in that they would require marking of fittings such as bolted manhole covers. The Coast Guard agrees and has modified the text to specify which appliances must be marked.

Seventeen commentors suggested that § 108.709 be revised to require a litter, of an unspecified type, capable of being used on helicopters. The Coast Guard agrees that the litter provided should be transportable by helicopter. The word "stokes" has therefore been deleted and the section rewritten in its entirety.

One commentor, in addressing § 108.705, stated that many units, especially the self elevating type, are constructed without the circle E designation of the American Bureau of Shipping because this designation is voluntary. The commentor further stated that in such cases, the classification society will normally accept mooring and anchoring equipment of a size somewhat less than the sizes required by the classification rules, and requested that the Coast Guard do likewise. The Coast Guard feels that the requirements, as proposed, are the minimum requirements regardless of what classifications the unit is constructed to. The regulation is adopted as proposed.

Two commentors suggested that alternatives be provided to the proposed requirement for the Mining Enforcement Safety Administration approved first aid kit in § 108.707. As previously stated, the Coast Guard feels that the general equivalency class in § 108.105 makes adequate provision for the substitution of required equipment. One of the commentors also stated that the use of smaller kits should be allowed where accommodation spaces and work areas may be widely separated. The Coast Guard has no objection to the use of smaller approved kits which together would provide for the total number of persons on board.

PART 109—OPERATIONS

Seven commentors recommended the addition of a second sentence to § 109.107 to provide for the master or person in charge to take whatever action he may deem necessary in emergency conditions. The Coast Guard agrees that inclusion of a provision expressing the philosophy contained in the comment is desireable. Therefore, wording similar to that contained in other vessel inspection regulations has been added to § 109.109.

Ten commentors suggested modification of § 109.121(c) by the addition of the words "under normal and emergency conditions" at the end of this section to assure that all operating and emergency aspects are covered in the operating manual. The Coast Guard agrees and has modified § 109.121(c) as suggested.

Twenty-two commentors, in addressing § 109.203(b), pointed out that there is no "chief engineer" in the accepted marine understanding of that term on board many units to ensure the cleanliness of engineering spaces. This is true especially on those units which have no propulsion machinery. The Coast Guard agrees and has modified this section to place the responsibility on the master or person in charge if the unit does not have a "chief engineer" in its complement.

Twenty commentors suggested modification of § 109.205. The main point of the comments was that the Coast Guard does not have a legitimate interest in whether or not a unit's industrial machinery is operative. These comments have been accepted in part and the words "other than industrial machinery" have been added to this section. Coast Guard responsibility regarding "industrial machinery" is considered to be limited to the safety aspects of that machinery. The requirement to report *all* unsafe machinery is retained in § 109.419.

Eighteen commentors questioned the proposed requirements for testing of storage batteries for emergency lighting and power systems in § 109.211(c). Most of the commentors felt that the proposed duration of the tests was excessive. The Coast Guard agrees that the full 12 hour test would not be satisfactory since the battery would not be available for use at the end of the test. This section has been revised, specifying the testing interval as 6 months, and the test duration as two hours with the test results to be extrapolated to approximate the values that would result following a 12 hour test period. A short circuit breakdown test, suggested by some of the commentors, is not considered a suitable test of the battery capacity.

Eleven commentors suggested revision of § 109.215(c) stating that weekly launching of a lifeboat was impractical and could be dangerous particularly during recovery of the boat. The Coast Guard agrees in part with the commentors and has modified § 109.215(c) to read "weather permitting at least one lifeboat is partially lowered and its engine started and operated." Section § 109.217(a) has also been modified to ensure that the lowering of the lifeboat to the water, required by that section, is accomplished during one of the required boat drills. These changes are consistent with other vessel regulations.

Eleven commentors felt that the proposed requirement in § 109.323(b) for the person assigned to command a lifeboat or liferaft to have a list of the persons assigned seats in that survival craft was unreasonable. Most of these commentors felt that it should be the responsibility of each person to take their assigned seat. The Coast Guard feels that the person in charge of the lifeboat or liferaft should have a list indicating all persons assigned to his survival craft for the simple purpose of making a head count. However, this section has been modified so that the list may be by job titles or station bill numbers. This is considered reasonable due to the constant rotation of personnel aboard mobile offshore drilling units.

Seven commentors addressed the qualifications of persons assigned to command lifeboats or liferafts, and recommended the addition of "a qualified person designated by the master or person in charge" to the provisions of § 109.323(a). The Coast Guard does not agree and remains of the opinion that all persons assigned to command survival craft must be licensed deck officers, able seamen, or certified lifeboatmen.

Twenty commentors felt that the figure $1,500 as one of the criteria in § 109.411 for a reportable marine casualty was unrealistic. Nineteen of the

D E 4 7 8 UMI

which are to be used in the design, ma-

dicate that piping for industrial sys-

that the addition of a definition for this existing term is unnecessary.

V 4 3 / 2 3 3 DEC 78 UMI

commentors felt that the figure $15,000.00 should be substituted, while one commentor suggested that the paragraph on property damage be deleted entirely. The Coast Guard is in partial agreement with the commentors in that the existing monetary figure is not realistic. The amount of $5,000.00 has been inserted into § 109.411(a)(1). The figure is consistent with a pending regulatory change that will affect other inspected vessels. A property damage figure is considered necessary to provide for analysis of casualties which may affect the unit and its personnel. Also, the damage might not be to the unit but to other property.

Section 109.411(a)(2) has been corrected by adding the words "or efficiency" after the word "seaworthiness" to conform with applicable statutes. Explanatory language has been added to more clearly indicate the types of incidents required to be reported.

Section 109.411(a)(5) has been revised in order to not exclude harbor workers who might suffer an incapacitating injury while on board a mobile offshore drilling unit. Though an incapacitating injury resulting from a unit casualty, or failure of unit equipment is currently reportable, it is intended that incapacitating injuries resulting from other causes be investigated. Also, personal injuries include not only those to harbor workers, but also those to subcontractors or visitors. Provisions concerning hospitalization have also been added.

Twenty commentors felt that the provisions of § 109.419 and § 109.121 should be limited to marine oriented machinery only. All commentors apparently felt that the Coast Guard's interest was limited to those instances which affect the safety and seaworthiness of the unit. This is not the case. Coast Guard responsibility also extends to the safety of personnel on the unit, regardless of whether they are engaged in industrial or marine related activities. The proposed regulation is therefore adopted without change.

Seven of the same commentors on the previous section suggested the addition of the words "on marine systems and components" to the title of § 109.423. The commentors apparently did not realize that this regulation is applicable only to required safety valve seals and that Coast Guard seals are required only on boilers. For clarification, the word "boiler" has been added to the first sentence of § 109.423(a).

A total of 13 commentors suggested numerous revisions to § 109.433. Most of the comments were apparently due to a lack of understanding of the proposed rules. The Coast Guard has rewritten this section to clarify "applicable" log entries, and to indicate when certain data on draft, load line marks, and appliances for watertight integrity must be logged.

Seventeen comments were received concerning § 109.437(i). They recommended that the records and original certificates, or certified copies of certificates, for loose gear, wire rope and the annealing of wrought iron gear be maintained by the owner for safekeeping rather than on the unit with the crane record book. This recommendation was not adopted since these records and certificates must be available to the Coast Guard inspector or certifying agency officials during any crane inspection. More important, they should be available to the unit's personnel for the identification of the tested gear. These documents can be kept on the unit with other records maintained for the cranes.

Those provisions of proposed § 109.437 relating to crane certificates has been placed in a new § 109.439 in order to separate the requirement to maintain a crane record book from the requirement of maintaining crane certificates.

One comment recommended that § 109.437(a)(2) be revised to provide for a load rating chart for each boom length which may be utilized. This is consistent with API RP 2D 2.1.3L and API Spec 2C 2.4, and the recommendation has been included.

Seventeen commentors felt that § 109.501 should be modified in view of the continuous movement of personnel on and off the unit and the regular presence of temporary personnel such as visitors and contractor's representatives. The Coast Guard agrees that some clarification is desirable regarding assignments of temporary personnel and visitors, and therefore has added a new paragraph to § 109.505. Section 109.501 is considered adequate and has not been changed.

Ten commentors were of the opinion that the references in § 109.557(b) regarding portable tanks were incorrect inasmuch as the Coast Guard had cancelled 46 CFR 98.30, and that the provisions of 49 CFR 170 to 189 are not applicable. The Coast Guard does not agree. 46 CFR 98.30 has not been cancelled, and certain portions of the reference regulations in 49 CFR are applicable to portable tanks. This section has, however, been revised to make the reference to 49 CFR more specific.

One commentor suggested that § 109.559(b) be deleted entirely since the referenced 46 CFR Part 147 does not provide for storage of explosives or radioactive materials as ships stores and supplies. The commentor is correct, and § 109.559(b) has been deleted. The Coast Guard is currently reviewing all of the ship stores regulations in 46 CFR 147, and will address this subject in a future Notice of Proposed Rulemaking.

Seven commentors felt that the provisions of § 109.573 would result in a duplication and overlapping regulatory requirements between the Coast Guard and the U.S. Geological Survey. The commentors referenced the provisions of USCGS, OCS Order No. 8 for the Gulf of Mexico which contain certain requirements for welding or burning operations on Federal Leases on the Outer Continental Shelf. The commentors suggested that the words "on marine systems and components" be added to the title of § 109.573. The Coast Guard feels that there is no conflict between *revised* OCS Order No. 8 and § 109.573. The Memorandum of Understanding addressing regulation of mobile offshore drilling units on the Outer Continental Shelf, signed by the Coast Guard and the U.S. Geologic Survey on 11 April 1977, addresses welding or burning operations in the following manner: The U.S.G.S. will exercise proper control of arc or acetylene welding or cutting during drilling operations (considering the possible gas hazards). The Coast Guard is responsible for standards for arc or acetylene welding or cutting operations affecting structural integrity or installed equipment. Also, Coast Guard regulations are applicable to a U.S. flag unit in any geographical location, while OCS Order No. 8 is applicable only on the Outer Continental Shelf of the United States.

Thirteen commentors suggested deletion of § 109.587. All of the commentors felt that there was no justifiable reason for this section which would prohibit the use of sleeping spaces below the main deck of a self-elevating unit while the unit is afloat.

The proposed § 109.587 was based on past capsizings of small self-elevating units where personnel were trapped below decks. The Coast Guard has considered the comments and feels that since these rules apply operating requirements to self-elevating units not previously subject to such requirements, this section as proposed is not necessary. Section 109.587 has therefore been deleted, and § 108.195 has been modified to address all types of units.

SUBCHAPTER F

Because of numerous comments received, the Coast Guard has added an equivalency section to Subart 58.60 for industrial systems on mobile offshore drilling units. This section is the same as § 108.105 in Subchapter I-A.

Eleven commentors recommended that a new section be added to the regulations at § 50.15-25 to read as follows:

"The standards of organizations listed or referenced to in this chapter

which are to be used in the design, material and fabrication of industrial systems are accepted without specific adoption provided the standards apply to the industrial use intended." The Coast Guard does not agree with the recommendation. Standards other than those specifically adopted must be reviewed by the Coast Guard to determine applicability for the service intended. This is considered necessary for maintenance of an acceptable level of safety.

Twenty-one commentors addressed the proposed revisions to § 54.01-16. In general, all of the commentors were of the opinion that the proposed regulation was unduly restrictive, would put excessive burdens on unit owners in obtaining acceptable equipment, and that the need for such a requirement was not indicated by past experience. The Coast Guard feels that the proposal was not fully understood by some of the commentors.

Section 54.01-16 as it presently exists provides for acceptance of ASME Code pressure vessels, other than those used for storage of compressed air (gas), for installation in industrial systems. Under the existing regulation, all industrial pressure vessels which contain compressed air (gas) are subject to full Coast Guard plan review and shop inspection. The proposal would eliminate Coast Guard plan review or shop inspection for any pressure vessel, except those of class I-L and II-L, installed in an industrial system. The regulation has been revised to clarify this point. Although several of the commentors suggested that the proposed Coast Guard requirements constitute a standard both independent and different from industry standards commonly used, the regulations are, in fact, based on the most widely accepted industrial consensus standard for pressure vessels, the ASME Code. Coast Guard regulations for pressure vessels, although patterned after the ASME Code requirements, have always provided for specific marine application of that general service code. Since ASME Code requirements do not include specific or complete consideration of product stored, pressure, and temperature, the requirements of 46 CFR Part 54 co-ordinate the specific application with the selection of design details, level and type of nondestructive testing, and heat treatment of welds. Since those Coast Guard requirements which may exceed the ASME Code for industrial pressure vessels represent typical owner-option alternatives under the Code, the requirements of § 54.01-16, as proposed, are not considered unduly restrictive, and are adopted.

Eleven commentors suggested that proposed § 56.01-1(c) be revised to indicate that piping for industrial systems need not fully comply with the requirements of Part 56 but must meet Subpart 58.60. Another commentor suggested that proposed § 56.01-1(c) be deleted in its entirety stating that Coast Guard regulation in this area is unnecessary. The Coast Guard agrees with the proposed revision of paragraph (c) and has modified it accordingly.

Regarding the suggestion to delete this subsection entirely, the Coast Guard is tasked with the responsibility of ensuring that a minimum level of safety is maintained. To this end, the Coast Guard has adopted ANSI B31.3, API RP 53 and API RP 14C as the minimum requirements for industrial piping systems.

In addressing the provisions of § 56.50-50(d)(1), one commentor recommended that the Coast Guard give consideration to allowing the use of the average breadth (B) of a unit rather than the maximum breadth (B) when calculating the internal diameter of bilge suction pipes for triangular shaped units. The commentor submitted extensive data supporting the recommendation. After review of the submitted data, the Coast Guard agrees with the recommendation and has added a note 5 under § 56.50-50(d)(2) providing that for mobile offshore drilling units employing unusual hull forms, "B" may be modified to the average breadth rather than the maximum breadth.

Eleven commentors recommended that a new paragraph (f)(7) be added to § 56.50-50 to state that an emergency bilge suction is not required in multihulled and column stabilized mobile offshore drilling units where pump rooms are located below the water line if more than one pump also serves as a bilge pump through interconnecting piping or manifolding, and where a bilge suction is provided at each end of the pump room bilge. The Coast Guard does not agree. Emergency bilge suctions provide a last line of defense and are considered necessary. The multiple pumps and multiple bilge suctions are already required under existing regulations for bilge systems.

Eleven commentors felt that the note inserted below table 56.50-55(b)(1) should be deleted since there is no definition for a "machinery space" on any type of vessel.

This note was inadvertently misplaced in the Notice of Proposed Rulemaking and is applicable to § 56.50-50(f)(6), not to the table. The term "Machinery space," as used throughout Subchapter "F" generally refers to those spaces containing propulsion equipment, with the proposed clarification for mobile offshore drilling units included. The Coast Guard feels that the addition of a definition for this existing term is unnecessary.

Eleven commentors suggested, that for clarity, a new subparagraph § 56.50-55(a)(6)(i) be added stating that one of the required bilge pumps may be attached to a propelling engine in each hull. The Coast Guard agrees with the intent of the commentors and, in lieu of a new subparagraph, has added a second sentence to existing § 56.50-55(a)(3).

Eighteen commentors addressed § 58.60-1. One of the commentors recommended that entire Subpart 58.60 be deleted since self regulation of the industrial systems on mobile offshore drilling units has been eminently successful. Another commentor felt that Coast Guard involvement should be strictly limited to the high pressure piping of the mud and cement systems. The Coast Guard does not agree with these comments. The Coast Guard is required to oversee industrial systems from the safety aspect. It is considered necessary to prescribe regulations adequate to provide a level of safety equivalent to that which exists in other safety-sensitive systems aboard vessels. The proposed regulation is based on industry standards with modification to those standards where considered necessary. Nine commentors suggested that the words "shale shakers; desanders, and degassers" be deleted from § 58.60-1(b) since they are not industrial systems and are of no interest to the Coast Guard. The same commentors also suggested that § 58.60-1(c) be deleted since the oversight of blowout preventer control systems lies with the U.S. Geological Survey. The Coast Guard does not agree. Shale shakers, desanders, and degassers are components of the circulation system and meet the definition of industrial systems in § 107.111 in that they perform an industrial function. The Coast Guard's main area of interest regarding blowout preventer (BOP) control systems is in regard to safety of pressure vessels and pressure piping, and is not considered to be duplicative of that done by the U.S. Geological Survey which specifies the make-up and performance standards for BOP Systems on the Outer Continental Shelf of the United States.

Twenty commentors suggested major revisions to § 58.60-7. One of the commentors simply suggested that the reference to ANSI B 31.3 be deleted as not applicable. The other nineteen commentors recommended that the Coast Guard adopt ANSI B 31.4 and B 31.8 (pipeline standards) as well as any applicable American Petroleum Institute (API) requirements for industrial system piping. The same nineteen comments also suggested that the reference to API RP53 be deleted inas-

much as the oversight of blowout preventer control systems lies with the U.S. Geological Survey. The Coast Guard does not agree. Shale shakers, desanders, and degassers are components of the circulation system and meet the definition of industrial systems in § 107.111 in that they perform an industrial function. The Coast Guard's main area of interest regarding blowout preventer (BOP) control systems is in regard to safety of pressure vessels and pressure piping, and is not considered to be duplicative of that done by the U.S. Geological Survey which specifies the make-up and performance standards for BOP Systems on the Outer Continental Shelf of the United States.

Twenty commentors suggested major revisions to § 58.60-7. One of the commentors simply suggested that the reference to ANSI B 31.3 be deleted as not applicable. The other nineteen commentors recommended that the Coast Guard adopt ANSI B 31.4 and B 31.8 (pipeline standards) as well as any applicable American Petroleum Institute (API) requirements for industrial system piping. The same nineteen comments also suggested that the reference to API RP53 be deleted inasmuch as the Coast Guard has adopted API RP 53 and API RP 14C as the minimum requirements for industrial piping systems.

In addressing the provisions of § 56.50-50(d)(1), one commentor recommended that the Coast Guard give consideration to allowing the use of the average breadth (B) of a unit rather than the maximum breadth (B) when calculating the internal diameter of bilge suction pipes for triangular shaped units. The commentor submitted extensive data supporting the recommendation. After review of the submitted data, the Coast Guard agrees with the recommendation and has added a note 5 under § 56.50-50(d)(2) providing that for mobile offshore drilling units employing unusual hull forms, "B" may be modified to the average breadth rather than the maximum breadth.

Eleven commentors recommended that a new paragraph (f)(7) be added to § 56.50-50 to state that an emergency bilge suction is not required in multihulled and column stabilized mobile offshore drilling units where pump rooms are located below the water line if more than one pump also serves as a bilge pump through interconnecting piping or manifolding, and where a bilge suction is provided at each end of the pump room bilge. The Coast Guard does not agree. Emergency bilge suctions provide a last line of defense and are considered necessary. The multiple pumps and multiple bilge suctions are already required under existing regulations for bilge systems.

Eleven commentors felt that the note inserted below table 56.50-55(b)(1) should be deleted since there is no definition for a "machinery space" on any type of vessel.

This note was inadvertently misplaced in the Notice of Proposed Rulemaking and is applicable to § 56.50-50(f)(6), not to the table. The term "Machinery space," as used throughout Subchapter "F" generally refers to those spaces containing propulsion equipment, with the proposed clarification for mobile offshore drilling units included. The Coast Guard feels that the addition of a definition for this existing term is unnecessary.

Eleven commentors suggested, that for clarity, a new subparagraph § 56.50-55(a)(6)(i) be added stating that one of the required bilge pumps may be attached to a propelling engine in each hull. The Coast Guard agrees with the intent of the commentors and, in lieu of a new subparagraph, has added a second sentence to existing § 56.50-55(a)(3).

Eighteen commentors addressed § 58.60-1. One of the commentors recommended that entire Subpart 58.60 be deleted since self regulation of the industrial systems on mobile offshore drilling units has been eminently successful. Another commentor felt that Coast Guard involvement should be strictly limited to the high pressure piping of the mud and cement systems. The Coast Guard does not agree with these comments. The Coast Guard is required to oversee industrial systems from the safety aspect. It is considered necessary to prescribe regulations adequate to provide a level of safety equivalent to that which exists in other safety-sensitive systems aboard vessels. The proposed regulation is based on industry standards with modification to those standards where considered necessary. Nine commentors suggested that the words "shale shakers; desanders, and degassers" be deleted from § 58.60-1(b) since they are not industrial systems and are of no interest to the Coast Guard. The same commentors also suggested that § 58.60-1(c) be deleted since the oversight of blowout preventer control systems lies with the U.S. Geological Survey. The Coast Guard does not agree. Shale shakers, desanders, and degassers are components of the circulation system and meet the definition of industrial systems in § 107.111 in that they perform an industrial function. The Coast Guard's main area of interest regarding blowout preventer (BOP) control systems is in regard to safety of pressure vessels and pressure piping, and is not considered to be duplicative of that done by the U.S. Geological Survey which specifies the make-up and performance standards for BOP Systems on the Outer Continental Shelf of the United States.

Twenty commentors suggested major revisions to § 58.60-7. One of the commentors simply suggested that the reference to ANSI B 31.3 be deleted as not applicable. The other nineteen commentors recommended that the Coast Guard adopt ANSI B 31.4 and B 31.8 (pipeline standards) as well as any applicable American Petroleum Institute (API) requirements for industrial system piping. The same nineteen comments also suggested that the reference to API RP53 be deleted inas-

several sections of Part 107 of the pro-

3. By adding a new § 50.05-10(b) to

Table 54.01-5(b) in full and are not ac-

V 4 3 / 2 3 3 DEC 4 78 UMI

much as the oversight of blowout preventer control systems rests with the U.S. Geological Survey. The Coast Guard does not agree and the regulation has been adopted as proposed. ANSI B 31.4 and ANSI B 31.8 are intended for oil and gas transportation (pipeline) and are not considered applicable to industrial systems in the marine environment. The Coast Guard feels that B 31.3 will provide the required measure of safety that B 31.4 and B 31.8 do not provide. While B 31.3 is not written specifically for these systems, it will provide an adequate design standard for industrial piping systems. The Coast Guard interest in blowout preventer control systems has been already covered in addressing the comments on § 58.60-1(c).

Eleven commentors suggested that § 58.60-9 be revised inasmuch as API 14C was not intended for use with mobile offshore drilling units. All of the commentors agreed, however, that the principles of API 14C could be applied in conducting the proposed analysis. The Coast Guard agrees, and has rewritten § 58.60-9 to require that the industrial systems be designed and analyzed in accordance with the principles of API 14C.

Eighteen commentors recommended that the provision in § 58.60-11 for certification of the required analysis by a registered professional engineer be deleted, and that certification by the owner be allowed. The Coast Guard feels that an engineering review consistent with that employed for standard shipboard systems is necessary. Owner certification is not considered a suitable alternative for piping system design, but analysis and certification in conjunction with the engineer registration program should provide the required objectivity.

SUBCHAPTER J

Numerous commentors noted that the proposal made reference to certain parts of 46 CFR Subchapter J *Electrical Engineering Regulations* which could not be located in that subchapter. The proposal was drafted using the numbering from completely revised Subchapter J which was scheduled to be published in the FEDERAL REGISTER as a proposed rule simultaneously with proposed Subchapter I-A. However, the Subchapter J proposal was not published until June 27, 1977 (42 FR 3200) which was after most comments on Subchapter I-A had been submitted. Those portions of the Subchapter J proposal which addressed mobile offshore drilling units were the subject of considerable comment by the offshore industry. These comments have been evaluated and, simultaneously with this rulemaking, those amendments to the Electrical Engineering regulations which address mobile offshore drilling units are being published as amendments to the existing Subchapter J. All references contained in Subchapter I-A have been corrected.

Section 110.25-1(j) of the proposed rules has been changed to § 111.05-5(d)(22) for insertion in the existing rules. Three commentors indicated that plans showing the location of electrical equipment that is in hazardous locations should be required for all vessels with a fourth commentor suggesting the requirement should be applicable to LNG vessels. The Coast Guard agrees. The provision has been changed to require the plan to be submitted for all vessels carrying hazardous products in bulk. This requirement basically formalizes present policy.

One commentor suggested that all parts of the mud circulating system including open portions of the system downstream of the final degassing should be considered as Division 1 Locations. This suggestion was based on the premise that degassers cannot be assumed to be 100 percent efficient or working at all times. This point has been discussed with the oil industry at both a national and an international level. It is felt that the hazard downstream of the final degassing station is such as to justify a minimum safety classification of Division 2 spaces. It is pointed out that such spaces would be upgraded to Division 1 spaces if they do not have a good ventilation system under the requirements of § 111.92-3(c)(4).

One commentor suggested that loss of ventilation overpressure should automatically disconnect electrical power to nonessential equipment that is unsuitable for use in Division 1 areas. The Coast Guard agrees that nonessential equipment should not be located in a space that is a hazardous space. This is also contained in the proposed IMCO regulations for mobile offshore drilling units. This is inferred in Article 500-1 of the National Electrical Code referenced by § 111.105-5 of the proposed regulations and § 111.80-5(a)(4) of the existing rules. This intent has been clarified by adding a paragraph to include spaces made nonhazardous by means of ventilation.

One commentor felt that proposed § 111.105-33 provided a substantial relaxation from present policy in the areas that were considered Class I Division 1 locations. The present hazardous area classification requirements were based on API RP 500B, First edition. As more experience was gained in the operation of mobile offshore drilling units, the hazardous area classifications were changed to those appearing in API RP 500B Second edition published in 1973. This latter edition's guidelines basically parallel the requirements of these rules. The hazardous areas indicated in the proposed rules were contained in an early report of the IMCO Mobile Offshore Drilling Units Ad Hoc Group on Machinery and Electrical Installations. These guidelines have undergone some changes and are reflected in the rules as written. The evaluation of the classification of the various spaces on a mobile offshore drilling unit has been an international effort involving governmental agencies, the oil industry, and the classification societies. It is felt that the hazardous areas, as defined, present a realistic assessment of the flammable vapor hazard.

Two commentors felt that the industrial systems of a mobile offshore drilling unit should not be regulated and that the application of Subchapter J or the National Electrical Code, as provided, will preclude some present industry practices. One particular example is the contention that the amp capacity tables referenced in Subchapter J and those in the National Electrical Code would require increased conductor cross sections of up to three times current practice. The amp capacity tables contained in this Subchapter and those in the National Electrical Code represent the national standards for shipboard and industrial installations respectively and are applicable to mobile offshore drilling units. The Coast Guard and the Maritime Administration are presently funding a research project with the intent to produce a standard which would establish performance requirements. However, until this project is completed, it will be necessary to use one of the above national amp capacity tables.

One commentor questioned why the standard of safety was not the same for "industrial" systems as for "ship" systems. The NEC, coupled with the additional requirements of § 111.94-1, provide an acceptable level of safety for personnel and the unit. A failure of an industrial function means the mission of the unit will not be carried out whereas a failure of a steering gear, fire pump, bilge pump, etc could endanger the unit. This subpart, as written, provides for protection of the equipment operators and safety from fire, shock, or other injury associated with the electrical installation but not the additional redundancy and protection required for "ship" systems.

NAVIGATION AND VESSEL INSPECTION CIRCULAR

A total of eight commentors addressed the draft Navigation and Vessel Inspection Circular (NVC) which was discussed in the preamble to the proposed rule and referenced in several sections of Part 107 of the proposal.

Several of the commentors questioned the legality of the references to the draft NVC, since the contents of the draft NVC were not included in the proposed rule. The draft NVC was made a part of the public rulemaking docket, therefore making it available to the public for comment. Thus, the requirements of the Administrative Procedures Act have been met. Under 5 U.S.C. 552(a) and 1 CFR Part 51, "matter reasonably available to the class of persons affected thereby is deemed published in the FEDERAL REGISTER when incorporated by reference therein . . ."

One of the commentors submitted an alternative draft of the NVC for consideration. The remaining commentors suggested minor revisions to various sections of the draft. Upon evaluation of the comments the Coast Guard feels that some portions of the draft NVC were not fully understood by the commentors. The NVC has been rewritten to clarify its application and highlight its intent to be as flexible as possible and still provide for an acceptable level of safety on all existing units. The Coast Guard also re-evaluated the draft NVC to determine the best method of presenting it in relation to the final rule on mobile offshore drilling units. As a result of this re-evaluation, the Coast Guard is, in addition to promulgating the document as an NVC, publishing the entire NVC as Appendix "A" to Subchapter I-A, ensuring its availability to all persons concerned.

Accordingly, Chapter I of Title 46 of the Code of Federal Regulations is amended as follows:

SUBCHAPTER F—MARINE ENGINEERING

PART 50—GENERAL PROVISIONS

1. By adding a new § 50.01-1(j) to read as follows:

§ 50.01-1 Authority for regulations.

. . . . . .

(j) *Mobile offshore drilling units.* The citation regarding authority to prescribe requirements for mobile offshore units is in Subchapter IA of this chapter.

2. By adding a new § 50.05-1(e) to read as follows:

§ 50.05-1 General.

. . . . . .

(e) Industrial systems and components on mobile offshore drilling units must meet § 54.01-16 and Subpart 58.60 of this chapter.

3. By adding a new § 50.05-10(b) to read as follows:

§ 50.05-10 Alterations or repairs.

. . . . . .

(b) When alterations or repairs are made to a U.S. flag vessel in a port or place not in the United States, a notice containing details of the proposed alterations or repairs must be submitted to the appropriate Officer in Charge, Marine Inspection.

4. By revising § 50.05-15(a) to read as follows:

§ 50.05-15 Vessels subject to regulations in this subchapter.

(a) Passenger vessels, tank vessels, cargo and miscellaneous vessels, nuclear vessels, nautical schoolships, mobile offshore drilling units, and oceanographic vessels are subject to the regulations in this subchapter to the extent prescribed by various laws and regulations as described in § 50.01-1. The applicable provisions in this subchapter shall apply to all such U.S. flag vessels, and to all such foreign vessels which carry passengers from any port in the United States except as follows:

. . . . . .

5. By adding a new § 50.15-20(a)(13) to read as follows:

§ 50.15-20 Additional standards.

(a) * * *

(13) American Petroleum Institute (API), 1201 L Street, Washington, D. C. 20037.

. . . . . .

PART 54—PRESSURE VESSELS

6. By revising § 54.01-16 to read as follows:

§ 54.01-16 Mobile offshore drilling units: pressure vessels for industrial systems.

(a) A Class I, II, or III pressure vessel which is a component in an industrial system under Subpart 58.60 of this chapter is accepted by the Coast Guard for installation on a mobile offshore drilling unit if it meets the requirement of Table 54.01-5(b) in full, or if it—

(1) is stamped "U" under Section VIII of the ASME Code;

(2) meets the postweld heat treatment and the minimum joint and radiographic requirements of Table 54.01-5(b); and

(3) has pressure-relief devices that meet Subpart 54.15 of this chapter.

(b) Class I-L and II-L pressure vessels must meet the requirements of Table 54.01-5(b) in full and are not accepted under § 154.01-16.

PART 56—PIPING SYSTEMS AND APPURTENANCES

7. By revising § 56.01-1(c) to read as follows:

§ 56.01-1 Scope (replaces 100.0).

. . . . . .

(c) Piping for industrial systems on mobile offshore drilling units need not fully comply with the requirements of this part but must meet Subpart 58.60 of this subchapter.

8. By adding a new paragraph (d-1) to follow paragraph (d) in § 56.01-10 to read as follows:

§ 56.01-10 Plan approval.

. . . . . .

(d-1) Plans of piping for industrial systems on mobile offshore drilling units must be submitted under Subpart 58.60 of this subchapter.

. . . . . .

9. By revising § 56.50-10(b) to read as follows:

§ 56.50-10 Special gaging requirements.

. . . . . .

(b) Fuel oil service, fire, cargo and fuel oil transfer and boiler feed pumps must be provided with a pressure gage on the discharge side of the pump. Additional information pertaining to fire pumps is in § 34.10-5 of Subchapter D (Tank Vessels), § 76.10-5 of Subchapter H (Passenger Vessels), § 95.10-5 of Subchapter I (Cargo and Miscellaneous Vessels), and § 108.417 of Subchapter IA (Mobile Offshore Drilling Units) of this Chapter.

10. By revising § 56.50-15(h) to read as follows:

§ 56.50-15 Steam and exhaust piping.

. . . . . .

(h) Steam piping with the exception of the steam heating system must not be led through passageways, accommodation spaces, or public spaces unless the arrangement is approved by the Commandant. Steam pressure for space heating must not exceed 45 pounds per square inch. High temperature hot water may be used for heating systems above this pressure, but not to exceed 375° F. Such systems should be designed as a complete unit and submitted for approval to the Commandant.

. . . . . .

11. By revising § 56.50-50 (d) and (e) pump manifold may be considered to be independent of the bilge main can be operated from the ballast control room.

§ 58.03-35 American Petroleum Institute (API).

The standards of the American Petroleum Institute (API) listed in this section are incorporated by reference in this subchapter. They are available from the American Petroleum Institute, 1201 L Street, Washington, D. C. 20037.

(2) Shale shakers;
(3) Desanders; and
(4) Degassers.

(1) Appear on all diagrams and analyses; and
(2) Be submitted under § 50.20-5 of

V 4 3 / 2 3 3 3

D E 4

7 8

UMI

11. By revising § 56.50-50 (d) and (e) and adding new § 56.50-50(f) (5) and (6) to read as follows:

§ 56.50-50 Bilge and ballast piping.

• • • • • •

(d) • • •

(1) For suctions to each main bilge pump:

$$d=1+\sqrt{\frac{(L(B+D)}{2500}} \qquad (1)(4)(5)$$

(2) For branch suctions to cargo and machinery spaces:

$$d=1+\sqrt{\frac{c\ (B+D)}{1500}} \qquad (2)(3)(5)$$

where:

L=Length of vessel on loadwater line, in feet.
B=Breadth of vessel, in feet. (5)
D=Molded depth of bulkhead deck, in feet.
c=Length of compartment, in feet.
d=Required internal diameter of suction pipe, in inches.

NOTE 1.—For tankers "L" may be reduced by the combined length of the cargo oil tanks.

NOTE 2.—For bulk carriers with full depth wing tanks served by a ballast system where the beam of the vessel is not representative of the breadth of the compartment, "B" may be appropriately modified to the breadth of the compartment.

NOTE 3.—In the calculation for a vessel with more than one hull, such as a catamaran, the breadth of the unit is the breadth of one hull.

NOTE 4.—In the calculation for a mobile offshore drilling unit, "L" is reducible by the combined length of spaces that can be pumped by another piping system meeting §§ 56.50-50 and 56.50-55, where "L" is the length of the unit at the waterline.

NOTE 5.—For mobile offshore drilling units employing unusual hull forms, "B" may be modified to the average breadth rather than the maximum breadth.

• • • • •

(e) *Independent bilge suction.* One of the independent bilge pumps must have a suction of a diameter not less than that given by Formula (2) in paragraph (d) of this section that is led directly from the engine room bilge entirely independent of the bilge main, and on passenger vessels each independent bilge pump located in the machinery spaces must have such direct suctions from these spaces, except that not more than two pumps are required to have direct suctions from any one space. A suction that is led directly from a suitably located pump manifold may be considered to be independent of the bilge main. Where two direct suctions are required in any one compartment on passenger vessels, one suction must be located on each side of the compartment. If watertight bulkheads separate the engine and boiler rooms, a direct suction or suctions must be fitted to each compartment unless the pumps available for bilge service are distributed throughout these compartments, in which case at least one pump in each such compartment must be fitted with direct suction in its compartment. In a vessel with more than one hull, there must be one bilge pump that has an independent bilge suction in each hull. In a column stabilized mobile offshore drilling unit, the independent bilge suction must be from the pumproom bilge.

(f) • • •

(5) Each vessel with more than one hull must have an emergency bilge suction in each hull.

(6) Each column stabilized mobile offshore drilling unit must have—

(i) An emergency bilge suction in each hull; and

(ii) A remote control for the emergency pump and associated valves that can be operated from the ballast control room.

• • • • •

NOTE: For the purposes of this section, a pumproom is a machinery space on a column stabilized mobile offshore drilling unit.

12. By adding a fourth category of vessel to Table 56.50-55(a) to read as follows:

TABLE 56.50-55(a).—*Power Bilge Pumps Required for Self-Propelled Vessels*

Vessel length, in feet	• • •	Mobile offshore drilling units, all waters
180' or more	• • •	2
Below 180' and exceeding 65'	• • •	2
65' or less	• • •	2

• • • • •

13. By adding a fourth category of vessel to Table 56.50-55(b)(1) to read as follows:

TABLE 56.50-55(b)(1).—*Bilge Pumps Required for Nonself-Propelled Vessels*

Type of vessel	Waters navigated	Power pumps [1]	Hand pumps
• • • • •	• • • • •	•	•
Mobile offshore drilling units	All waters	2	None
• • • • •	• • • • •	•	•

14. By revising § 56.50-55(a)(3) and by adding a new § 56.50-55 (a)(6), (b)(3), and (e)(4) to read as follows:

§ 56.50-55 Bilge pumps.

(a) • • •

(3) One of the required power bilge pumps may be attached to the propelling engine. For vessels with more than one hull, one of the required bilge pumps in each hull may be attached to a propelling engine.

• • • • •

(6) Each hull of a vessel with more than one hull, such as a catamaran, must meet Table 56.50-55(a).

(b) • • •

(3) Each hull of a vessel with more than one hull, such as a catamaran, must meet Table 56.50-55(b).

• • • • •

(4) Each hull of a vessel with more than one hull must have at least two means for pumping the bilges in each hull. No multi-hulled vessel may operate unless one of these means is available to pump each bilge.

• • • • •

15. By adding a new § 56.50-90(d) to read as follows:

§ 56.50-90 Sounding devices.

• • • • •

(d) On mobile offshore drilling units where installation of sounding pipes may not be practicable for some tanks, alternate means of determining liquid level may be used if approved by the Commandant.

PART 58—MAIN AND AUXILIARY MACHINERY AND RELATED SYSTEMS

16. By adding a new § 58.03-35 to read as follows:

§ 58.03-35 American Petroleum Institute (API).

The standards of the American Petroleum Institute (API)[1] that are referred to in this part are hereby adopted.

17. By adding a new § 58.10-10 (c) and (d) to read as follows:

§ 58.10-10 Diesel engine installations.

• • • • •

(c) A diesel engine air intake on a mobile offshore drilling unit must not be in a classified location.[1]

(d) A diesel engine exhaust on a mobile offshore drilling unit must not discharge into a classified location.[1]

18. By adding a new § 58.10-15(c)(4) and revising § 58.10-15(d) to read as follows:

§ 58.10-15 Gas turbine installations.

• • • • •

(c) • • •

(4) A gas turbine exhaust on a mobile offshore drilling unit must not discharge in a classified location.[1]

(d) *Air inlets:* Air inlets must be designed as follows:

(1) Each air inlet must have means to protect the safety of life and to prevent the entrance of harmful foreign material, including water, into the system.

(2) A gas turbine air inlet must not be in a classified location.[1]

• • • • •

19. By adding a new Subpart 58.60 to read as follows:

Subpart 58.60—Industrial Systems and Components on Mobile Offshore Drilling Units (MODU)

Sec.
58.60-1 Applicability.
58.60-2 Alternatives and substitutions.
58.60-3 Pressure vessel.
58.60-5 Industrial systems: locations.
58.60-7 Industrial systems: piping.
58.60-9 Industrial systems: design.
58.60-11 Analyses, plans, diagrams and specification: submission.
58.60-13 Inspection.

§ 58.60-1 Applicability.

This subpart applies to the following industrial systems on board a mobile offshore drilling unit (MODU):

(a) Cementing systems.
(b) Circulation systems, including—
(1) Pipes and pumps for mud;
(2) Shale shakers;
(3) Desanders; and
(4) Degassers.
(c) Blow out preventor control systems.
(d) Riser and guideline tensioning systems.
(e) Motion compensation systems.
(f) Bulk material storage and handling systems.
(g) Other pressurized systems designed for the MODU's industrial operations.

§ 58.60-2 Alternatives and substitutions.

(a) The Coast Guard may accept substitutes for fittings, material, apparatus, equipment, arrangements, calculations, and tests required in this Subpart if the substitute provides an equivalent level of safety.

(b) In any case where it is shown to the satisfaction of the Commandant that the use of any particular equipment, apparatus, arrangment, or test is unreasonable or impracticable, the Commandant may permit the use of alternate equipment, apparatus, arrangement, or test to such an extent and upon such condition as will insure, to his satisfaction, a degree of safety consistent with the minimum standards set forth in this subpart.

§ 58.60-3 Pressure vessel.

A pressure vessel that is a component in an industrial system under this subpart must meet § 54.01-16.

§ 58.60-5 Industrial systems: locations.

An industrial system under this subpart must not be in a space that is—

(a) Concealed; or
(b) Inaccessible to industrial personnel.

§ 58.60-7 Industrial systems: piping.

The piping for industrial systems under this subpart must meet ANSI B31.3 (1977), with June 1978 addenda, except that blow out preventor control systems must also meet API RP 53, *Recommended Practice for Blowout Protection Equipment Systems, (1976).*

§ 58.60-9 Industrial systems: design.

Each system under this subpart must be designed and analyzed in accordance with the principles of API RP 14C, *Analysis, Design, Installation and Testing of Basic Surface Safety Systems on Offshore Production Platforms, (1978).*

§ 58.60-11 Analyses, plans, diagrams and specifications: submission.

(a) Each industrial system must be analyzed by a registered professional engineer to certify that the system has been designed in accordance with applicable standards.

(b) The certification must—

(1) Appear on all diagrams and analyses; and

(2) Be submitted under § 50.20-5 of this chapter.

(c) Standards or specifications for non-pressurized, mechanical or structural systems, and components such as derricks, drawworks, and rotary tables which comply with standards or specifications not referenced in this subchapter must be referenced on the plans or in the specifications of the unit.

§ 58.60-13 Inspection.

An industrial system is accepted by the Coast Guard if the inspector finds—

(a) The system meets this subpart;

(b) There are guards, shields, insulation or similar devices for protection of personnel; and

(c) The system is not manifestly unsafe.

PART 61—PERIODIC TESTS AND INSPECTIONS

20. By revising § 61.10-1(a) to read as follows:

§ 61.10-1 Scope.

(a) All pressure vessels aboard ships, mobile offshore drilling units, and barges are subject to periodic inspection.

• • • • •

21. By revising § 61.10-5(b) and (h)(1) to read as follows:

§ 61.10-5 Periodic inspections.

• • • • •

(b) *Internal and external examination and tests.* Pressure vessels that required initial shop inspection and pressure vessels that are accepted under § 54.01-16 which are fitted with manholes or other inspection openings, so they can be satisfactorily examined internally, must be opened biennially at the regular inspection for certification and thoroughly examined internally and externally. Such pressure vessels are not required to be hydrostatically tested unless defects are found, which in the marine inspector's opinion, may impair the safety of the pressure vessel. Where such defects are found, a hydrostatic test must be applied at a pressure equal to 1¼ times the maximum allowable working pressure.

• • • • •

(h) *Pneumatic tests.* (1) Pressure vessels which have been pneumatically tested during shop inspection must be thoroughly examined internally and externally biennially at the regular inspection for certification except in

[1] See § 50.15-20(a)(13) for the address of API.

[1] Sections 108.171 to 108.175 of this Chapter define classified locations for mobile offshore drilling units.

[1] Sections 108.171 to 108.175 of this Chapter define classified locations for mobile offshore drilling units.

those instances where the inspection

107.257 Testing of fire hoses.
107.258 Crane certification.

mobile offshore drilling unit for use in the industrial function of the unit.

(1) A unit contracted for on or after

V 4 3 / 2 3 3 D E 4 7 8 UMI

those instances where the inspection interval is prescribed otherwise, by the specific regulations applicable to the product carried, in Subchapter D (Tank Vessels), Subchapter I (Cargo and Miscellaneous Vessels), Subchapter IA (Mobile Offshore Drilling Units), or Subchapter N (Dangerous Cargoes) of this Chapter. For those tanks whose design precludes a thorough internal or external examination, the thickness must be determined by a nondestructive method acceptable to the Officer in Charge, Marine Inspection.

• • • • • •

22. By adding a new § 61.20-15(b)(4) to read as follows:

§ 61.20-15 Tailshaft survey.

• • • • • •

(b) • • •

(4) A mobile offshore drilling unit that has a tailshaft is not subject to specified periods for drawing the tailshaft if the tailshaft is—

(i) Drawn for inspection during regularly scheduled drydocking; or

(ii) Regularly inspected in a manner acceptable to the Commandant.

• • • • • •

---

23. By adding a new Subchapter I-A to read as follows:

SUBCHAPTER I-A—MOBILE OFFSHORE DRILLING UNITS

PART 107—INSPECTION AND CERTIFICATION

Subpart A—General

Sec.

107.01 Purpose of subchapter.
107.111 Definitions.
107.113 Industrial personnel.
107.115 Incorporation by reference.
107.117 Coast Guard addresses.

Subpart B—Inspection and Certification

107.201 Purpose.
107.211 Original Certificate of Inspection.
107.215 Biennial inspection for certification.
107.219 Permit to proceed to another port for repairs.
107.223 Temporary Certificate of Inspection: period in effect.
107.227 Certificate of Inspection Amendment.
107.231 Inspection for certification.
107.235 Servicing of hand portable fire extinguishers, semi-portable fire extinguishers and fixed fire-extinguishing systems.
107.239 Weight testing of lifeboats, lifeboat launching systems, and davit launched life raft systems.
107.243 Testing of winch electrical control apparatus for lifeboats.
107.251 Testing of the fire main.
107.257 Testing of fire hoses.
107.258 Crane certification.
107.259 Crane inspection and testing.
107.260 Rated load test for cranes.
107.261 Drydock or special examination.
107.265 Special examination in lieu of drydocking for column stabilized units or surface type units when specifically approved by the Commandant.
107.267 Special examination in lieu of drydocking for self-elevating units.
107.269 Reinspection.
107.271 Inspection: alterations.
107.275 Other inspections.
107.279 Certificate of Inspection: failure to meet requirements.

Subpart C—Plan Approval

107.301 Purpose.
107.305 Plans and information.
107.309 Crane plans and information.
107.317 Addresses for submittal of plans, specifications, and calculations.

Subpart D—Certificates Under International Convention for Safety of Life at Sea, 1960

107.401 Purpose and definition.
107.405 Safety Equipment Certificate.
107.409 Safety Construction Certificate.
107.413 Exemption certificate.

AUTHORITY: Sec. 2, 87 Stat. 418 (46 U.S.C. 86); sec. 3, 82 Stat. 341, as amended (46 U.S.C. 367); R.S. 4405, as amended (46 U.S.C. 375); sec. 10, 35 Stat. 428 (46 U.S.C. 395); R.S. 4423, as amended (46 U.S.C. 400); R.S. 4429, as amended (46 U.S.C. 407); R.S. 4430, as amended (46 U.S.C. 408); 88 Stat. 423 (46 U.S.C. 411); R.S. 4434, as amended (46 U.S.C. 412); R.S. 4462, as amended (46 U.S.C. 416); sec. 1, 73 Stat. 475 (46 U.S.C. 481); sec. 4, 67 Stat. 462 (43 U.S.C. 1333(d)); sec. 6(b)(1), 80 Stat. 937 (49 U.S.C. 1655(b)(1)); 49 CFR 1.46(b) and (n)(6).

Subpart A—General

§ 107.01 Purpose of subchapter.

This subchapter prescribes rules for the design, construction, equipment, inspection and operation of mobile offshore drilling units operating under the U.S. flag.

§ 107.111 Definitions.

As used in this subchapter:

"Approved" means approved by the Commandant.

"Column stabilized unit" means a unit with the main deck connected to the underwater hull of footings by columns or caissons.

"Commandant" means the Commandant of the Coast Guard or his authorized representative.

"District Commander" means an officer of the Coast Guard who commands a Coast Guard District described in 33 CFR Part 3 or his authorized representative.

"Headquarters" means Office of the Commandant, U.S. Coast Guard, Washington, D.C. 20590.

"Industrial systems and components" means any machinery or equipment except diving systems on board a mobile offshore drilling unit for use in the industrial function of the unit.

"International service" means operation of a mobile offshore drilling unit on an international voyage or in waters under the jurisdiction of foreign nations or the United Nations.

"Marine inspector" means any person designated by an Officer in Charge, Marine Inspection, as a marine inspector.

"Master" or "Person in charge" means a person designated under § 109.107.

"Mobile offshore drilling unit" or "unit" means a vessel, except a public vessel of the United States, capable of engaging in drilling operations for the exploration or exploitation of subsea resources that is—

(1) Seagoing and 300 or more gross tons and self-propelled by motor;

(2) Seagoing and 100 or more gross tons and non-self-propelled; or

(3) More than 65 feet in length and propelled by steam.

"Non-self-propelled unit" means a unit which is not self-propelled.

"Officer in Charge, Marine Inspection" means an officer of the Coast Guard who commands a Marine Inspection Zone described in 33 CFR Part 3 or his authorized representative.

"Self-elevating unit" means a unit with moveable legs capable of raising its hull above the surface of the sea.

"Self-propelled unit" means a unit that has propulsion machinery that provides for independent underway navigation.

"Surface type unit" means a unit with a ship shape or barge type displacement hull of single or multiple hull construction intended for operation in the floating condition.

"Watertight" means designed and constructed to withstand a static head of water without any leakage, except that "watertight equipment" means enclosed equipment so constructed that a stream of water from a hose (not less than 1 inch in diameter) under head of about 35 feet from a distance of about 10 feet, and for a period of 5 minutes, can be played on the apparatus without leakage.

"Weathertight" means that water will not penetrate into the unit in any sea condition, except that "weathertight equipment" means equipment so constructed or protected that exposure to a beating rain will not result in the entrance of water.

§ 107.113 Industrial personnel.

Industrial personnel are all persons, exclusive of the required crew as set forth in the Certificate of Inspection, carried on board a mobile offshore drilling unit for the sole purpose of carrying out the industrial business or functions of the unit.

§ 107.115 Incorporation by reference.

(a) The standards referred to in this subchapter are incorporated by reference. The incorporation by reference was approved by the Director of the Federal Register under the provisions of 1 CFR Part 51 on November 7, 1978.

(b) The standards are on file in the FEDERAL REGISTER library and are available from the appropriate organizations whose addresses are listed below:

(1) American Bureau of Shipping, 45 Broad Street, New York, New York 10004.
(2) American National Standards Institute Standards (ANSIS), American Society of Mechanical Engineers, 345 East 47th Street, New York, New York 10017.
(3) American Petroleum Institute, 2101 L Street, N.W., Washington, D.C. 20037.
(4) International Cargo Gear Bureau, 17 Battery Place, New York, New York 10004.
(5) National Fire Protection Association, 470 Atlantic Avenue, Boston, Massachusetts 02210.
(6) Underwriters Laboratory, 333 Pfingsten Road, Northbrook, Illinois 60062.

§ 107.117 Coast Guard addresses.

When approval of the Commandant is required under this Subchapter, the following addresses are to be used:

(a) For approval by Commandant (G-MVI)—

Commandant (G-MVI/83), U.S. Coast Guard, Washington, D.C. 20590.

(b) For approval by Commandant (G-MMT)—

Commandant (G-MMT/82), U.S. Coast Guard, Washington, D.C. 20590.

Subpart B—Inspection and Certification

§ 107.201 Purpose.

This subpart prescribes rules for the—

(a) Original inspection and issuance of an original Certificate of Inspection required by 46 U.S.C. 367, 391, 395, and 399;

(b) Biennial inspection for certification and renewal of a Certificate of Inspection required by 46 U.S.C. 367, 391, 395, and 399;

(c) Reinspection required by 46 U.S.C. 435;

(d) Inspection after an accident required by 46 U.S.C. 435; and

(e) Inspection of repairs or alterations, or both, required by 46 U.S.C. 435;

(f) Amendments to Certificates of Inspection;

(g) Issuance of Temporary Certificate of Inspection; and

(h) Issuance of Permit to Proceed to Another Port for Repairs.

§ 107.211 Original Certificate of Inspection.

(a) The owner or builder of a unit applies for an inspection for an original Certificate of Inspection by submitting before construction is started—

(1) a completed Application for Inspection of U.S. Vessel, Form CG-3752, to the Officer in Charge, Marine Inspection, of the marine inspection zone in which the unit is to be constructed; and

(2) plans and information indicating the proposed arrangement and construction of the unit to the Coast Guard in accordance with Subpart C of this Part.

(b) An original Certificate of Inspection is issued if the Coast Guard finds, during the inspections conducted while the unit is being constructed, that a unit contracted for on or after January 3, 1979 meets § 107.231.

(c) An original Certificate of Inspection is issued if the Coast Guard finds that an uncertificated unit contracted for before January 3, 1979 meets the applicable requirements of this Subchapter as specified in the Navigation and Vessel Inspection Circular, *"Inspection and Certification of Existing Mobile Offshore Drilling Units"* (Appendix A). Existing structure, arrangements, materials, equipment, and facilities will be considered satisfactory so long as they are maintained in good condition to the satisfaction of the Officer in Charge, Marine Inspection. Repairs and minor alterations may be made to the same standards as originally used. Major alterations and conversions shall be in compliance with the provisions of each subpart of this part to the satisfaction of the Officer in Charge, Marine Inspection.

(d) A Certificate of Inspection expires 24 months after the date of issue.

§ 107.215 Biennial inspection for certification.

(a) The master, owner, or agent of a certificated unit may apply for a biennial inspection for the renewal of a Certificate of Inspection by submitting a completed Application for Inspection of U.S. Vessel, Form CG-3752, to the Officer in Charge, Marine Inspection, in or nearest to the port where the inspection will be made.

(b) The master, owner, or agent of a certificated unit operating in international service may apply for renewal of a Certificate of Inspection by submitting a completed Application for Inspection of U.S. Vessel Form CG-3752, to the appropriate Officer in Charge, Marine Inspection, at least 60 days before the expiration date that appears on the unit's unexpired Certificate of Inspection.

(c) A Certificate of Inspection is renewed if the Coast Guard finds, during the biennial inspection, that—

(1) A unit contracted for on or after January 3, 1979 meets the requirements of this Subchapter; or

(2) A unit contracted for before January 3 1979, and issued a Certificate of Inspection under Subchapter I of this Chapter, continues to meet the requirements of that subchapter and meets the applicable requirements of this subchapter as specified in Navigation and Vessel Inspection Circular, *"Inspection and Certification of Existing Mobile Offshore Drilling Units"* (Appendix A).

§ 107.219 Permit to proceed to another port for repairs.

(a) If a unit fails to meet the requirements in § 107.231, and the Coast Guard withholds reissuance of a Certificate of Inspection, or suspends an unexpired Certificate of Inspection, as described in § 107.279, a Permit to Proceed to Another Port for Repairs (Form CG-948) is issued by the Coast Guard if—

(1) The owner, master, person in charge, or agent makes a written request for a permit to the Officer in Charge, Marine Inspection, that includes—

(i) The reason the permit is requested;

(ii) The port in which the repairs are to be made; and

(iii) The period of time for the voyage;

(2) The Officer in Charge, Marine Inspection finds that the unit is seaworthy for the voyage.

(b) A Permit to Proceed to Another Port for Repairs states the conditions under which it was issued and is in force for the period of the voyage to the port in which the repairs are to be made.

§ 107.223 Temporary Certificate of Inspection: period in effect.

A Temporary Certificate of Inspection, issued under 46 U.S.C. 399, is effective until a Certificate of Inspection is issued to the unit.

§ 107.227 Certificate of Inspection Amendment.

The Coast Guard issues a Certificate of Inspection Amendment, Form CG-858, to a certificated unit if a requirement for equipment and data listed on the unexpired Certificate of Inspection is changed.

§ 107.231 Inspection for certification.

A unit is issued a Certificate of Inspection under § 107.211 or § 107.215(c) if the inspector finds the following:

(a) The unit and its equipment comply with—

(1) Part 108 of this subchapter;

(2) Subchapter J of this chapter, Electrical Engineering;[1]

---

[1] Requirements for industrial systems and components are in Subpart 111.94 of this Chapter.

(3) Subchapter F of this chapter,

(q) Each valve with a remote control

winch meets the installation tests in

(3) Removing the pressure cartridge of each premix aqueous film forming

Coast Guard as crane certifying authorities:

(3) After repairs or alterations to any structural component of the

V 4 3 / 2 3 3

(3) Subchapter F of this chapter, Marine Engineering;[2]

(4) Subchapter E of this chapter, Load Lines;[3]

(5) Part 64 or Part 98 of this chapter, or both, if the unit carries marine protable tanks or portable tanks;

(6) The vessel design and equipment requirements of the oil pollution regulations (33 CFR Part 155, Subpart B);

(7) The Rules of the Road requirements for the waters in which the unit navigates, contained in—

(i) 33 U.S.C. Chapters 3, 4, 5, or 21; and

(ii) 33 CFR Parts 80, 85, 9r 86.

LIFESAVING EQUIPMENT

(b) Each lifeboat and its equipment are serviceable.

(c) Each lifeboat, each lifeboat launching system, and each davit launched liferaft launching system passes the test in § 107.239.

(d) Each winch electrical control apparatus for lifeboats meets the testing requirements in § 107.243.

(e) Each inflatable liferaft is serviceable and meets the servicing requirement in § 160.051-6 of this chapter.

(f) Each hydraulic release for inflatable liferafts meets the periodic servicing and testing requirements in § 160.062-4 of this chapter.

(g) Each life preserver is serviceable.

(h) A life preserver that is cleaned or repaired meets Subpart 160.006 of this chapter.

(i) Each buoyant work vest is serviceable.

FIRE FIGHTING EQUIPMENT

(j) Each hand portable fire extinguisher and each semiportable fire extinguisher is inspected, and serviced if required, in accordance with § 107.235(a).

(k) Each fixed fire-extinguishing system is inspected, and serviced if required, in accordance with § 107.235(b).

(l) Each fire main system meets the testing requirements in § 107.251.

(m) Each fire hose meets the testing requirements in § 107.257.

CRANES

(n) The rated load test for cranes in § 107.260 is met.

(o) Each crane is inspected and tested in accordance with § 107.258.

MISCELLANEOUS

(p) Each watertight door is operative.

(q) Each valve with a remote control is operative.

(r) Each means of escape on the unit is safe for the intended service.

(s) There is not an accumulation of oil which might create a fire hazard on tank tops, decks, in drip pans, machinery spaces, and pumproom bilges.

(t) Each accommodation space is sanitary.

(u) The unit meet the drydocking requirement in § 107.261 or the special examination in § 107.265.

(v) The unit meets the equipment and data information requirements on its certificate of inspection.

(w) Each record in Subpart D of part 109 is maintained as prescribed.

(x) A unit that engages on international voyages has on board the appropriate certificates issued under 47 U.S.C. 360:

(1) Safety Radiotelegraph Certificate or Safety Radiotelephony Certificate.

(2) Exemption Certificate, if an exemption has been granted.

INSTALLATION TESTS

(y) Each lifeboat, lifeboat davit, lifeboat winch, liferaft davit, and liferaft winch meets the installation tests in § 94.35-5(b) of this chapter.

(z) Each davit launched liferaft meets the installation test in § 95.37-5 of this chapter.

(aa) Piping for each carbon dioxide extinguishing system meets the installation test in § 108.449 of this chapter.

(bb) Each sliding watertight door meets the installation tests in § 163.001-6(b) of this chapter.

OTHER TESTS AND INSPECTIONS

(cc) The unit and its equipment meet any other test or inspection deemed necessary by the inspector to determine if they are suitable for the service in which they are to be employed.

§ 107.235 Servicing of hand portable fire extinguishers, semi-portable fire extinguishers and fixed fire-extinguishing systems.

(a) Each hand portable fire extinguisher and each semi-portable fire extinguisher on board the unit must be serviced as setout in Table 107.235 and examined for excessive corrosion and general condition.

TABLE 107.235

Type extinguisher	Test and servicing required
Soda Acid	Discharge, clean hose and inside of extinguisher thoroughly. Recharge.
Foam	Discharge, clean hose and inside of extinguisher thoroughly. Recharge.
Pump Tank (water or antifreeze)	Discharge, clean hose and inside of extinguisher thoroughly. Recharge with clean water or antifreeze.
Cartridge operated (water, antifreeze or loaded stream).	Examine pressure cartridge and replace if end is punctured or if cartridge is otherwise determined to have leaked or to be in unsuitable condition. Remove liquid, clean hose and inside of extinguisher thoroughly. Recharge with clean water, solution, or antifreeze. Insert charged cartridge.
Carbon Dioxide	Weigh cyclinders. Recharge if weight loss exceeds 10 percent. Inspect hose and nozzle to be sure they are clear.
Dry chemical (cartridge-operated type)	Examine pressure cartridge and replace if end is punctured or if cartridge is otherwise determined to have leaked or to be in unsuitable condition. Inspect hose and nozzle to see if they are clear. Insert charged cartridge. Be sure dry chemical is free-flowing (not caked) and chamber contains full charge.
Dry chemical (stored pressure type)	See that pressure gage is in operating range. If not, or if seal is broken, weigh or otherwise determine that full charge of dry chemical is in extinguisher. Recharge if pressure is low or if dry chemical is needed.

(b) Each fixed fire-extinguishing system must be examined for excessive corrosion and general condition and be serviced by—

(1) Recharging the cylinders of each carbon dioxide system, if the weight loss is more than 10% of the weight of the charge;

(2) Testing each foam system, except premix systems by—

(i) Discharging foam for approximately 15 seconds from a nozzle designated by the marine inspector;

(ii) Discharging water from all other lines and nozzles; and

(iii) Taking a sample of the foam liquid and submitting it to the manufacturer or his authorized representative for determination of its specific gravity, PH, percentage of water dilution, and solid content, and certification as a suitable firefighing foam;

(3) Removing the pressure cartridge of each premix aqueous film forming foam system and replacing the cartridge if the seal is punctured, sampling the premix solution in accordance with the manufacturer's instructions, and replacing cylinders that are discharged.

NOTE.—All carbon dioxide cylinders and discharge hoses of semi-portable carbon dioxide systems must be tested and marked in accordance with § 147.04-1 of this Chapter.

§ 107.239 Weight testing of lifeboats, lifeboat launching systems, and davit launched liferaft systems.

(a) Each lifeboat must be loaded to the deadweight equivalent of the allowed capacity, lowered, stopped using the winch brake during descent, lowered into the water by releasing the winch brake, and released from the falls;

(b) The davit and winch for each davit launched liferaft must be tested by suspending a test weight from the releasing hook and lowering the weight to near the water;

(c) The automatic disengaging device for each davit launched liferaft must be tested by a spring weight to assure the applied force at which the hook will release is within the design specification; and

(d) The launching equipment for each lifeboat or davit launched liferaft must be tested with a weight equal to the weight of the lifeboat or raft plus the full complement of persons and equipment.

NOTE.—In making these tests, deadweight is equivalent to 165 pounds for each person in the allowed capacity.

§ 107.243 Testing of winch electrical control apparatus for lifeboats.

Each winch electrical control apparatus for lifeboats must be opened and inspected. When the inspection is completed the control apparatus must be operated.

107.251 Testing of the fire main.

Each fire main system must be opened and the pressure checked at—

(a) The most remote outlet; and

(b) The highest outlet.

§ 107.257 Testing of fire hose.

Each fire hose must be subjected to a test pressure equivalent to the maximum pressure to which it may be subjected during operation. However, each fire hose must be subjected to a pressure of at least 100 p.s.i.

§ 107.258 Crane certification.

(a) The Coast Guard may accept current certificates issued by approved organizations as evidence of condition and suitability of cranes. The following organizations are approved by the Coast Guard as crane certifying authorities:

(1) American Bureau of Shipping, 45 Broad St., New York, N.Y., 10004.

(2) International Cargo Gear Bureau, Inc., 17 Battery Place, New York, N.Y. 10004.

(b) Crane certification must be based upon—

(1) A review of plans submitted under § 107.309; and

(2) The continuing program of tests and inspections in § 107.259.

(c) Each load test and inspection by the certifying authority must be recorded in the unit's Crane Record Book required in § 109.437.

§ 107.259 Crane inspection, and testing.

(a) Each crane must be inspected and tested in accordance with Section 3 of the American Petroleum Institute (A.P.I.) *Recommended Practice for Operation and Maintenance of Offshore Cranes*, API RP 2D, First Edition (October 1972) with supplement 1, except that the rated load test must be performed in accordance with § 107.260.

(b) The tests are witnessed and the inspections are conducted by—

(1) A Coast Guard marine inspector; or

(2) The American Bureau of Shipping (A.B.S.), or the International Cargo Gear Bureau, Inc. (I.C.G.B.) for cranes under certification by these organizations.

(c) If the tests and inspections are conducted by the A.B.S. or the I.C.G.B., the surveyor shall certify that the tests and inspections were conducted in accordance with the A.P.I. specification; or modified by § 107.260.

§ 107.260 Rated load test for cranes.

(a) To meet the requirements in § 107.231(n), each crane must meet the following rated load test at both the maximum and minimum boom angles usually employed in material transfers over the side of the unit:

Rated load of assembled gear	Proof load
Less than or equal to 20 tons.	25 pct in excess.
Greater than 20 tons but less than or equal to 50 tons.	5 tons in excess.
Greater than 50 tons	10 pct in excess.

(b) The weight of the hook, hook blocks, slings, rib, and other rigging, except the hoist rope, must be considered part of the load for the rated load test.

(c) The rated load test must be performed—

(1) When the crane is installed;

(2) Each 48 months; and

(3) After repairs or alterations to any structural component of the crane.

§ 107.261 Drydock or special examination.

(a) Except as provided in paragraphs (b), (c), and (d), each unit must be drydocked in the presence of a Coast Guard inspector at least once during each 24 month period after it is issued a Certificate of Inspection.

(b) If a unit is column-stabilized, it may be specially examined in lieu of drydocking in accordance with § 107.265 in the presence of a Coast Guard inspector.

(c) If a unit is self-elevating, it may be specially examined in lieu of drydocking in accordance with § 107.267 in the presence of a Coast Guard inspector.

(d) If a unit is a surface type, it may be specially examined in lieu of drydocking in accordance with § 107.265 in the presence of a Coast Guard inspector if the examination is specifically approved by the Commandant.

(e) The master, person in charge, owner, or agent of a certificated unit must notify the appropriate Officer in Charge, Marine Inspection before the unit is drydocked, or specially examined.

(f) The master, person in charge, owner, or agent of a certificated unit operating in international service must notify the appropriate Officer in Charge, Marine Inspection at least 60 days before the unit is drydocked or specially examined under § 107.265 or § 107.267.

§ 107.265 Special examination in lieu of drydocking for column stabilized units or surface type units when specifically approved by the Commandant.

(a) A column stabilized unit, or surface type unit when approved by the Commandant, must be specially examined in accordance with a plan—

(1) Submitted in accordance with paragraph (b); and

(2) Accepted by the Commandant (G-MVI).

(b) To meet the requirements in paragraph (a), the owner or operator of the unit must submit a plan to the Coast Guard that provides the methods used to determine the condition of the hull and that contains the following information:

(1) The planned location where the unit is to be examined.

(2) The draft at which the unit is to be examined.

(3) The names of the diver or diving company selected for the examination.

(4) The method of visual presentation for the examination.

(5) The method used to clean the underwater portion of the hull.

[2] Requirements for industrial systems and components are in Subpart 58.60 of this Chapter.

[3] Requirements for load lines are not applicable to bottom supported units when they are being supported by, or being lowered to or raised from the seabed.

HULL STRUCTURE[1]

ELECTRICAL ENGINEERING

ing calculations for all structural components listed in API Spec. 2C, Second

NOTE.—For classed vessels, the American Bureau of Shipping will, upon request by

V 4 3 / 2 3 3

(6) The method and location of gauging the underwater portion of the hull.

(7) The number of underwater hull fittings and number of compartments to be opened.

(8) The underwater high stress areas and the welds in those areas to be examined.

§ 107.267 Special examination in lieu of drydocking for self-elevating units.

(a) A self-elevating unit must be specially examined in accordance with a plan—

(1) Submitted in accordance with paragraph (b); and

(2) Approved by the Commandant (G-MVI).

(b) To meet the requirements in paragraph (a), the owner or operator of the unit must submit a plan to the Commandant (G-MVI) that provides for—

(1) Examination of the unit's hull while it is in the elevated position; and

(2) Examination of the supporting mat, spud cans, or footings while the unit is afloat.

(c) The plan required in paragraph (b) must contain the following information:

(1) The planned location where the unit is to be examined.

(2) The methods to be used to conduct the hull examination.

(3) The method of visual presentation for examination of the underwater components.

(4) The methods of determining the condition of the underwater components.

(5) The underwater high stress areas and the welds in those areas that are to be examined.

(6) The names of the diver or diving company selected for the examination.

§ 107.269 Reinspection.

The Coast Guard reinspects a unit within the period between the 10th and 14th months after the month in which the certificate is issued to determine if the unit meets the requirements in § 107.231, except § 107.231(y), (z), (aa), and (bb).

§ 107.271 Inspection: alterations.

After plans are approved for alterations affecting the safety of the unit the Coast Guard conducts inspections of the affected—

(a) Hull;

(b) Machinery; or

(c) Equipment.

§ 107.275 Other inspections.

When the Coast Guard receives the report required in § 109.411 or § 109.425, the Coast Guard conducts the following inspections of a unit to determine if the unit meets the requirements under which it was issued its original Certificate of Inspection:

(a) An inspection after an accident.

(b) An inspection after a defect is found that affects—

(1) The seaworthiness of the unit; or

(2) The safety or efficiency of a life-saving device, or firefighting device.

(c) An inspection of repairs made because of an accident or a defect.

§ 107.279 Certificate of Inspection: failure to meet requirements.

If a unit fails to meet the requirements in § 107.231, the Coast Guard may—

(a) Withhold issuance of an original Certificate of Inspection after an original inspection for certification, until the unit meets the requirements in § 107.231;

(b) Withhold renewal of a Certificate of Inspection after a biennial inspection for certification until the unit meets the requirements in § 107.231, except § 107.231(y), (z), (aa), and (bb);

(c) Suspend an unexpired Certificate of Inspection after a reinspection, until the unit meets the requirements in § 107.231, except § 107.231(y), (z), (aa), and (bb);

(d) Revoke an unexpired Certificate of Inspection after a reinspection if the unit operates without complying with Coast Guard orders to correct unlawful conditions;

(e) Revoke or suspend an unexpired Certificate of Inspection;

(f) Withhold issuance of a safety equipment certificate;

(g) Withhold renewal of safety equipment certificate;

(h) Suspend an unexpired safety equipment certificate;

(i) Revoke an unexpired safety equipment certificate; and

(j) Withhold, suspend, or revoke an exemption certificate.

Subpart C—Plan Approval

§ 107.301 Purpose.

This subpart prescribes procedures for submitting plans and specifications for plan approval and describes the information that must be submitted.

§ 107.305 Plans and information.

Each applicant for approval of plans must submit three copies of each of the following described plans, specifications, and structural calculations concerning the construction, arrangement, required equipment, and safety features of the unit:

GENERAL

(a) Specifications.

(b) General arrangement plan of decks, holds, inner bottoms, etc. including inboard and outboard profile.

HULL STRUCTURE [1]

(c) *Inner bottom plating and framing.

(d) *Midship section.

(e) *Shell plating and framing.

(f) *Stern, stern frame, and rudder.

(g) *Structural deck plans for strength decks.

(h) *Pillars and girders.

(i) *Watertight and oiltight bulkheads.

(j) *Foundations for main machinery and boilers.

(k) *Arrangement of ports, doors, and airports in shell plating.

(l) *Hatch coamings and covers in weather and watertight decks.

(m) *Details of watertight doors and operating gear.

(n) *Scuppers and drains penetrating shell plating.

(o) Arrangement of cranes.

(p) For self-elevating units, column stabilized units, and units with special hull configuration, structural calculations and plans showing special structural features.

STABILITY

(q) Lines.

(r) Curves of form and cross curves of stability.

(s) Capacity plan showing capacities and vertical, longitudinal, and transverse centers of gravity of stowage spaces.

(t) Tank sounding tables.

(u) Draft mark locations.

(u-1) Intact stability and damage stability data.

FIRE CONTROL

(v) General arrangement plans showing, for each deck, the control stations, fire sections enclosed by fire resisting bulkheads, alarm and extinguishing systems, fire extinguishers, means of access to compartments and other decks, and the ventilation system, including location of ventilation shut downs, positions of dampers, and the numbers identifying each system.

(w) Ventilation diagram, including dampers and other fire control features.

(x) Details of fire alarm systems.

(y) Details of fixed fire extinguishing systems.

MARINE ENGINEERING

(z) Plans required for marine engineering equipment and systems by Subchapter F of this chapter.

[1] The asterisk (*) indicates items that are approved by the American Bureau of Shipping for vessels classed by it. Items approved by the American Bureau of Shipping are generally accepted as satisfactory unless the law or Coast Guard regulations contain requirements that are not covered by the American Bureau of Shipping.

D E 4 7 8 UMI

ELECTRICAL ENGINEERING

(aa) Plans required for electrical engineering equipment and systems by Subchapter J of this chapter.

LIFE SAVING EQUIPMENT

(bb) The location and arrangement of each life saving system including each embarkation deck, showing each overboard discharge, and projections in the way of launching lifeboats and liferafts.

(cc) The weight of each lifeboat when fully equipped and loaded.

(dd) Working loads of davits and winches.

(ee) Types and sizes of falls.

(ff) Manufacturer's name and identification of each item of equipment.

PERSONNEL ACCOMMODATIONS

(gg) Arrangement plans showing each accommodation space, ventilation, and means of escape.

CONSTRUCTION PORTFOLIO [2]

(hh) A construction portfolio must be prepared for each unit and must be approved by the Coast Guard. The portfolio must document the location and extent of application of different grades and strengths of materials and include a description of the materials and welding procedures employed and any other relevant construction information. The portfolio must contain the following:

(1) Structural plans showing areas incorporating different grades and strengths of materials. A simplified plan may be included in the portfolio if it adequately defines the different areas of application.

(2) A list of different grades or strengths of material that conform to American Bureau of Shipping (ABS) or American Society of Testing and Materials (ASTM) specifications. For materials that do not conform to ABS or ASTM specifications, complete specifications, including chemical and physical properties, special testing and any heat treatment.

(3) Each approved weld procedure for the fabrication of each structure using different grades or strengthen of material and each approved weld test procedure.

(4) Information, restrictions or prohibitions regarding repairs or modifications.

OPERATING MANUAL

(ii) The operating manual required in § 109.121.

§ 107.309 Crane plans and information.

(a) Three copies of each of the following must be submitted:

(1) Stress and arrangement diagrams, bill of materials, and supporting calculations for all structural components listed in API Spec. 2C, Second Edition, February 1972 (with supplement 2).

(2) Drawings of foundations and substructures with supporting calculations for support and stability of each crane under its rated load.

(3) Plans showing the installation of the safety features required in § 108.601.

(4) Drawings of the means provided to stop motion and set brakes during a power failure.

NOTE.—These plans must be submitted to the Coast Guard, if the crane is not certified. If the crane is to be certified, four copies must be sent to the American Bureau of Shipping or the International Cargo Gear Bureau.

(b) In addition to the plans and information required in paragraph (a), the following plans and information must be submitted to the Coast Guard only:

(1) One line diagrams of the electrical power circuits of the electric power crane overload protection required in Subpart 111.50 of this chapter.

(2) Diagrams of the hydraulic or pneumatic power and control systems, as required by Subpart 58.30-40 or 58.30-50 of this Chapter, as applicable.

§ 107.317 Addresses for submittal of plans, specifications, and calculations.

The copies of each plan, specification, and calculation required under § 107.305 and § 107.309 must be submitted to one of the following as applicable:

(a) The Officer in Charge, Marine Inspection, in the zone in which the unit is to be built or altered.

(b) One of the following field technical offices:

(1) Commander(mmt), 3rd Coast Guard District, Governors Island, New York, NY 10004, for the geographical area covered by the 1st and 3rd Coast Guard Districts.

(2) Commander(mmt), 5th Coast Guard District, Federal Bldg., 431 Crawford St., Portsmouth, VA 23705.

(3) Commander(mmt), 8th Coast Guard District, Hale Boggs Federal Building, 500 Camp Street, New Orleans, LA 70130, for the geographical area covered by the 2nd, 7th, and 8th Coast Guard District.

(4) Commander(mmt), 9th Coast Guard District, 1240 East 9th St., Cleveland, OH 44199.

(5) Commander(mmt), 12th Coast Guard District, 630 Sansome St., San Francisco, CA 94126, for the geographical area covered by the 11th, 12th, 13th, 14th, and 17th Coast Guard Districts.

(c) The American Bureau of Shipping, (ABS) 45 Broad St., New York, NY 10004.

NOTE.—For classed vessels, the American Bureau of Shipping will, upon request by the submitter, arrange to forward the plans indicated with an asterisk in § 107.305 to the Coast Guard indicating ABS's action thereon.

(d) International Cargo Gear Bureau, Inc., 17 Battery Place, New York, NY 10004.

Subpart D—Certificates Under International Convention for Safety of Life at Sea, 1960

§ 107.401 Purpose and definition.

(a) The International Convention for Safety of Life at Sea, 1960, requires one or more of the certificates described in this subpart to be carried on self-propelled vessels of 500 gross tons or over engaged in international voyages. This subpart prescribes rules for the issuance of these certificates to mobile offshore drilling units.

(b) "International voyage" has the same meaning as stated in Regulation 2(d) of Part A, Chapter I in the *International Convention for the Safety of Life at Sea, 1960*, June 17, 1960, 16 UST 185, TIAS 5780, 536 UNTS 27 (SOLAS 60), which is: "a voyage from a country to which the present Convention applies to a port outside such country, or conversely; and for this purpose every territory for the international relations of which a Contracting Government is responsible or for which the United Nations are the administering authority is regarded as a separate country." The Coast Guard has interpreted this definition to include the following:

(1) A voyage from a country to which SOLAS 60 applies, to a port outside that country or the reverse;

(2) A voyage from any territory, including the Commonwealth of Puerto Rico, the Canal Zone, all possessions of the United States, and all lands held by the United States, and all lands held by the United States under a protectorate or mandate, whose international relations are the responsibility of a contracting SOLAS 60 government, or which is administered by the United Nations, to a port outside that territory or the reverse;

(3) A voyage between the contiguous states of the United States and the states of Hawaii or Alaska or between the states of Hawaii and Alaska.

The Coast Guard has interpreted this definition to not include a "Great Lakes voyage" which means a voyage solely on the Great Lakes of North America and the St. Lawrence River west of a straight line drawn from Capedes Rosiers to West Point, Anticosti Island and, on the north side of Anticosti Island, the 63rd Meridian.

[2] This portfolio may be included in the operating manual required in § 109.121.

V

§ 107.405 Safety equipment certificate.

§ 107.407 Safety construction certificate.

§ 107.409 Safety radio certificate.

§ 107.411 Exemption certificate.

§ 107.413 Conformity with treaty requirements.

§ 107.415 Equivalents.

§ 107.419 Issuance of certificates.

§ 107.421 Duration of certificates.

§ 107.423 Posting of certificates.

§ 107.425 Report of accidents, casualties, and repairs.

§ 107.427 Withholding, revocation, suspension of certificates.

Subpart E—Load Lines

§ 108.101 Purpose.

This subpart prescribes load lines for mobile offshore drilling units.

§ 108.103 Incorporation by reference.

(a) Certain material is incorporated by reference into this subpart with the approval of the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR Part 51. To enforce any edition other than that specified in paragraph (b) of this section, notice of change must be published in the FEDERAL REGISTER and the material made available to the public. All approved material is available for inspection at the Office of the Federal Register, 1100 L Street NW., Room 8401, Washington, DC, and at the Coast Guard Headquarters, 2100 Second Street SW., Washington, DC 20593, and may be obtained from the sources indicated in paragraph (b) of this section.

(b) The material approved for incorporation by reference in this subpart and the sections affected are:

(1) American Petroleum Institute (API), 2101 L Street NW., Washington, DC 20037:

API RP 2A, Recommended Practice for Planning, Designing and Constructing Fixed Offshore Platforms, Seventeenth Edition, August 1, 1987, 108.141, 108.321, 108.477.

(2) American Society for Testing and Materials (ASTM), 1916 Race Street, Philadelphia, PA 19103:

ASTM A 123-84, Standard Specification for Zinc (Hot-Dip Galvanized) Coatings on Iron and Steel Products, 108.477.

ASTM A 153-82, Standard Specification for Zinc Coating (Hot-Dip) on Iron and Steel Hardware, 108.477.

ASTM A 307-87, Standard Specification for Carbon Steel Bolts and Studs, 60,000 PSI Tensile Strength, 108.477.

ASTM A 325-87, Standard Specification for High-Strength Bolts for Structural Steel Joints, 108.477.

ASTM A 490-86, Standard Specification for Heat-Treated Steel Structural Bolts, 150 ksi Minimum Tensile Strength, 108.477.

ASTM A 563-84a, Standard Specification for Carbon and Alloy Steel Nuts, 108.477.

ASTM A 780-83, Standard Practice for Repair of Damaged and Uncoated Areas of Hot-Dip Galvanized Coatings, 108.477.

ASTM B 695-84, Standard Specification for Coatings of Zinc Mechanically Deposited on Iron and Steel, 108.477.

ASTM F 436-86, Standard Specification for Hardened Steel Washers, 108.477.

ASTM F 959-86, Standard Specification for Compressible-Washer-Type Direct Tension Indicators for Use with Structural Fasteners, 108.477.

(3) International Maritime Organization (IMO), 4 Albert Embankment, London SE1 7SR, England:

V 4 3 / 2 3 3

§ 107.405 Safety equipment certificate.

(a) A self propelled unit of at least 500 gross tons that engages in international voyages is issued a safety equipment certificate if the inspector issues it a certificate of inspection under § 107.211 or § 107.215 and it meets Chapter 3 of the International Convention for the Safety of Life at Sea, 1960, June 17, 1960, 16 UST 185, TIAS 5780, 536 UNTS 27.

(b) A Safety Equipment Certificate expires 24 months after the date of issue.

§ 107.409 Safety Construction Certificate.

(a) Application for a Safety Construction Certificate is made by indicating in the space provided on the Application for Inspection Form CG-3752 whether the American Bureau of Shipping or the Coast Guard is to issue the certificate.

(b) The American Bureau of Shipping or the Coast Guard may issue a self-propelled unit of at least 500 gross tons that engages on international voyages a Safety Construction Certificate if the unit meets the requirements in Regulation 12(a)(ii), Chapter I of the *International Convention for the Safety of Life at Sea, 1960*, June 17, 1960, 16 UST 185, TIAS 5780, 536 UNTS 27.

(c) A Safety Construction Certificate expires 60 months after the date of issue.

(d) If a unit fails to meet the requirements in Regulation 12(a)(ii), the Coast Guard may—

(1) Suspend an unexpired Safety Construction Certificate; and

(2) Revoke an unexpired Safety Construction Certificate.

§ 107.413 Exemption certificate.

(a) An owner or operator of a unit may request an exemption from the requirements of the *International Convention for the Safety of Life at Sea, 1960*, June 17, 1960, 16 UST 185, TIAS 5780, 536 UNTS 27 (SOLAS 60) by writing to the appropriate OCMI.

(b) The Commandant (G-MVI) may exempt a self-propelled unit of at least 500 gross tons on an international voyage from any of the requirements in the *International Convention for the Safety of Life at Sea, 1960*, June 17, 1960, 16 UST 185, TIAS 5780, 536 UNTS 27 (SOLAS 60) if the unit meets the conditions of Regulation 4 of Part A, Chapter I, of SOLAS 60 which states the following:

A ship which is not normally engaged on international voyages but which, in exceptional circumstances, is required to undertake a single international voyage may be exempted by the Administration from any of the requirements of the present Regulations provided that it complies with safety requirements which are adequate in the opinion of the Administration for the voyage which is to be undertaken by the ship.

(c) The Commandant (G-MVI) may exempt a self-propelled unit of at least 500 gross tons on an international voyage from the requirements of Chapter III (Lifesaving Appliances, & C.) of SOLAS 60 if the unit meets the conditions of Regulation 3 of Chapter III which states in part:

The Administration, if it considers that the sheltered nature and conditions of the voyage are such as to render the application of the full requirements of this chapter (Chapter III) unreasonable or unnecessary, may to that extent exempt from the requirements of this chapter individual ships or classes of ships which, in the course of their voyage, do not go more than 20 miles from the nearest land. . . .

(d) The Commandant (G-MVI) may exempt a unit from the requirements of Chapter II (Construction) of SOLAS 60 if the unit meets the conditions of Regulation 1(c) of Part A of Chapter II of SOLAS 60 which states the following: The Administration may, if it considers that the sheltered nature and conditions of the voyage are such as to render the application of any specific requirements of this chapter (Chapter II) unreasonable or unnecessary, exempt from those requirements individual ships or classes of ships belonging to its country which, in the course of their voyage, do not proceed more than 20 miles from the nearest land.

(e) An Exemption Certificate is in force for the period of validity of the certificate to which it refers.

PART 108—DESIGN AND EQUIPMENT

Subpart A—General

Sec.

108.103 Equipment not required on a unit.
108.105 Substitutes for required fittings, material, apparatus, equipment, arrangements, calculations, and tests.
108.109 Classification society standards.

Subpart B—Construction and Arrangement

HULL STRUCTURE

108.113 Structural standards.
108.114 Appliances for watertight and weathertight integrity.
108.115 Sliding watertight doors.

FIRE PROTECTION: GENERAL

108.127 Storage lockers for combustibles.

STRUCTURAL FIRE PROTECTION

108.131 Definitions.
108.133 Hull superstructure, structural bulkheads, decks, and deckhouses.
108.135 Boundary bulkheads, decks of galleys, and combustible material lockers.
108.137 Bulkhead and deck separations of accommodation spaces.
108.139 Boundary bulkheads and decks of a space containing emergency power.
108.141 Boundary bulkheads and decks between the emergency power source and service generators.
108.143 Accommodation space.
108.145 Hatches and tonnage openings.
108.147 Certain paints prohibited.

MEANS OF ESCAPE

108.151 Two means required.
108.153 Location of means of escape.
108.155 Restrictions on means of escape utilized.
108.157 Locked doors.
108.159 Stairways and exterior inclined ladders.
108.160 Vertical ladders.
108.161 Dead end corridors.
108.165 Access to lifeboats and liferafts.
108.167 Weather deck ladders.

CLASSIFIED LOCATIONS

108.170 Definitions.
108.171 Class I, Division 1 locations.
108.173 Class I, Division 2 locations.
108.175 Contiguous locations.
108.177 Electrical equipment in classified locations.

VENTILATION

108.181 Ventilation for enclosed spaces.
108.185 Ventilation for enclosed classified locations.
108.187 Ventilation for brush type electrical motors in classified spaces.

ACCOMMODATION SPACES

108.193 Restrictions.
108.195 Location of accommodation spaces.
108.197 Construction of accommodation spaces.
108.199 Arrangement of sleeping spaces.
108.201 Size of sleeping spaces.
108.203 Berths and lockers.
108.205 Wash spaces; toilet spaces; and shower spaces.
108.207 Messrooms.
108.209 Hospital spaces.
108.210 Hospital space not required.
108.211 Miscellaneous accommodation spaces.
108.213 Heating requirements.
108.215 Insect screens.

RAILS

108.217 Guardrails and bulkwarks.
108.219 Guardrails.
108.221 Storm rails.
108.223 Guards on exposed equipment.

HELICOPTER FACILITIES

108.231 Application.
108.233 Location and size.
108.235 Construction.
108.237 Fuel storage facilities.
108.239 Fuel transfer equipment.
108.241 Visual aids.

Subpart C—Stability

108.301 Stability: definitions.
108.303 Stability requirements: general.
108.305 Intact stability requirements.
108.309 Stability on bottom.
108.311 Calculation of wind heeling moment [Hm].
108.313 Submission of intact stability data.
108.315 Damage stability requirements.
108.317 General damage stability assumptions.
108.319 Compartments assumed flooded: general.

108.321 Flooding on self-elevating and surface type units.
108.323 Flooding on column stabilized units.
108.325 Permeabilities.
108.329 Submission of damage stability data and calculations.
108.335 Stability test.
108.337 Plans and information required at the stability test.
108.339 Stability test preparations.
108.341 Stability test deviation.
108.343 Stability: alterations.

Subpart D—Fire Extinguishing Systems

108.401 Fire main system.
108.403 Fire extinguishing systems: general.
108.403a Fire extinguishing systems: nonvital services.
108.404 Selection of fire detection system.
108.405 Fire detection system.
108.407 Detectors for electrical fire detection system.
108.409 Location and spacing of tubing in pneumatic fire detection system.
108.411 Smoke detection system.
108.413 Fusible element fire detection system.

FIRE MAIN SYSTEM

108.415 Fire pump: general.
108.417 Fire pump components and associated equipment.
108.419 Fire main capacity.
108.421 Location of fire pumps and associated equipment.
108.423 Fire hydrants and associated equipment.
108.425 Fire hoses and associated equipment.
108.427 International shore connection.
108.429 Fire main system protection.

FIXED CARBON DIOXIDE FIRE EXTINGUISHING SYSTEMS

108.431 CO_2 systems: general.
108.433 Quantity of CO_2: general.
108.435 CO_2 for enclosed ventilation systems for rotating electrical equipment.
108.437 Pipe sizes and discharge rates for enclosed ventilation systems for rotating electrical equipment.
108.439 Quantity of CO_2 for protection of spaces.
108.441 Piping and discharge rates for CO_2 systems.
108.443 Controls and valves.
108.445 Alarm and means of escape.
108.447 Piping.
108.449 Piping tests.
108.451 CO_2 storage.
108.453 Discharge outlets.
108.455 Enclosure openings.
108.457 Pressure release.

HALOGENATED GAS EXTINGUISHING SYSTEMS

108.458 General.

FOAM EXTINGUISHING SYSTEMS

108.459 Number and location of outlets.
108.461 Coamings.
108.463 Foam rate: protein.
108.467 Water supply.
108.469 Quantity of foam producing materials.
108.471 Water pump.
108.473 Foam system components.
108.474 Aqueous film forming foam systems.
108.475 Piping.
108.477 Fire hydrants.

FIRE PROTECTION FOR HELICOPTER FACILITIES

108.486 Helicopter decks.
108.487 Helicopter deck fueling operations.
108.489 Helicopter fueling facilities.

HAND PORTABLE AND SEMI-PORTABLE FIRE EXTINGUISHING SYSTEM

108.491 General.
108.493 Location.
108.495 Spare charges.

MISCELLANEOUS FIREFIGHTING EQUIPMENT

108.497 Firemen's outfits.
108.499 Fire axes.

Subpart E—Lifesaving Equipment

108.501 Survival capsule.
108.503 Lifeboats.
108.505 Liferafts.
108.506 Lifeboat and lifeboat launching capability.
108.507 Launching equipment for lifeboats.
108.508 Launching equipment for davit launched inflatable liferafts.
108.509 Wire fall fleet angle.
108.510 Hydrostatic releases.
108.511 Lifeboat and lifecraft arrangement.
108.514 Life preservers.
108.515 Ring life buoys.
108.517 Line throwing appliance.
108.519 Portable radio apparatus.
108.521 Distress signals.
108.523 EPIRB.
108.525 Means of embarkation.
108.527 Additional means of abandonment.

Subpart F—Cranes and Power Operated Industrial Trucks

CRANES

108.601 Crane design.

POWER OPERATED INDUSTRIAL TRUCKS

108.611 Power operated industrial trucks: definition.
108.613 Power operated industrial trucks.
108.615 Charging facilities for battery powered industrial trucks.

Subpart G—Equipment Markings and Instructions

108.621 Equipment markings: general.
108.623 General alarm bell switch.
108.625 General alarm bell.
108.627 Carbon dioxide alarm.
108.629 Fire extinguishing system branch line valve.
108.631 Fixed fire extinguishing system controls.
108.633 Fire stations.
108.635 Self-contained breathing apparatus.
108.636 Work vests.
108.637 Hand portable fire extinguishers.
108.639 Emergency lights.
108.641 Instructions for changing steering gear.
108.643 Rudder orders.
108.645 Lifeboats.
108.647 Inflatable liferafts.
108.649 Life preservers and ring life buoys.
108.651 Portable magazine chests.
108.653 Helicopter facilities.
108.655 Lifeboat and liferaft instructions.
108.657 Unit markings.
108.659 Breeches buoy and lifesaving signal instructions.
108.661 Unit markings: draft marks.
108.663 Unit markings: load line.
108.665 Appliances for watertight integrity.

Subpart H—Miscellaneous Equipment

108.697 Buoyant work vest.
108.699 Substitution of life preservers.
108.701 Sounding equipment.
108.703 Self-contained breathing apparatus.
108.705 Anchors, chains, wire rope, and hausers.
108.707 First aid kit.
108.709 Litter.
108.711 Pilot ladders.
108.713 International code of signals.
108.715 Magnetic compass and gyrocompass.
108.717 Radar.

AUTHORITY: Sec. 2, 87 Stat. 418 (46 U.S.C. 86); sec. 3, 82 Stat. 341, as amended (46 U.S.C. 367); R.S. 4405, as amended (46 U.S.C. 375); sec. 10, 35 Stat. 428 (46 U.S.C. 395); R.S. 4423, as amended (46 U.S.C. 400); R.S. 4429, as amended (46 U.S.C. 407); R.S. 4430, as amended (46 U.S.C. 408); 88 Stat. 423 (46 U.S.C. 411); R.S. 4434, as amended (46 U.S.C. 412); R.S. 4462, as amended (46 U.S.C. 416); sec. 1, 73 Stat. 475 (46 U.S.C. 481); sec. 4, 67 Stat. 462 (43 U.S.C. 1333(d)); sec. 6(b)(1), 80 Stat. 937 (49 U.S.C. 1655(b)(1)); 49 CFR 1.46(b) and (n)(6).

Subpart A—General

§ 108.103 Equipment not required on a unit.

Each item of lifesaving and firefighting equipment that a unit has in addition to those required by this part must meet the requirements of this subchapter for that item of equipment.

§ 108.105 Substitutes for required fittings, material, apparatus, equipment, arrangements, calculations and tests.

(a) Substitutes for fittings, material, apparatus, equipment, arrangements, calculations, and tests required in this Subchapter may be accepted by the Commandant (G-MMT), if the substitute provides an equivalent level of safety.

(b) In any case where it is shown to the satisfaction of the Commandant that the use of any particular equipment, apparatus, arrangement, or test is unreasonable or impracticable, the Commandant may permit the use of alternate equipment, apparatus, arrangement, or test to such an extent and upon such condition as will insure, to his satisfaction, a degree of safety consistent with the minimum standards set forth in this subchapter.

§ 108.109 Classification society standards.

(a) Any person who desires to use the rules of a classification society, other than the American Bureau of Shipping, to meet requirements in this Subchapter must request recognition of that society from the Commandant (G-MMT). The relevant rules must be submitted with the request.

D E 4 7 8 UMI

FIRE PROTECTION: GENERAL

108.123 Isolation of combustible material.
108.127 Storage lockers for combustibles.

STRUCTURAL FIRE PROTECTION

108.131 Definitions.
108.133 Hull superstructure, structural bulkheads, decks, and deckhouses.
108.135 Boundary bulkheads, decks of galleys, and combustible material lockers.
108.137 Bulkhead and deck separations of accommodation spaces.
108.139 Boundary bulkheads and decks of a space containing emergency power.

(4) "C class bulkhead or deck"

an emergency electric power source must be an A class bulkhead and A class deck.

commodation space must be made of an approved material that is non-com-

tle if a stairway would be impracticable.

V 4 3 / 2 3 3

Subpart B—Construction and Arrangement

Hull Structure

§ 108.113 Structural standards.

Except as provided in § 108.109, each unit must meet the structural standards of the American Bureau of Shipping's *Rules for Building and Classing Offshore Mobile Drilling Units, 1978.*

§ 108.114 Appliances for watertight and weathertight integrity.

(a) Appliances to ensure watertight integrity include watertight doors, hatches, scuttles, bolted manhold covers, or other watertight closures for openings in watertight decks and bulkheads.

(b) Appliances to ensure weathertight integrity include weathertight doors and hatches, closures for air pipes, ventilators, ventilation intakes and outlets, and closures for other openings in deckhouses and superstructures.

(c) Each internal opening fixed with appliances to ensure watertight integrity which are used intermittently during operation of the unit while afloat must meet the following:

(1) Each door, hatch, and scuttle must—

(i) Be remotely controlled from a normally manned control station, and be operable locally from both sides of the bulkhead; or

(ii) If there is no means of remote control there must be an alarm system which signals whether the appliance is open or closed both locally at each appliance and in a normally manned control station.

(2) Each closing appliance must remain watertight under the design water pressure of the watertight boundary of which it is a part.

(d) Each external opening fitted with an appliance to ensure weathertight integrity must be located so that it would not be submerged below the final equilibrium waterline if the unit is subjected simultaneously to—

(1) Damage causing flooding described in §§ 108.319 through 108.323; and

(2) A wind heeling moment calculated in accordance with § 108.311 using a wind velocity of 25.8 meters per second (50 knots).

§ 108.115 Sliding watertight doors.

If a unit is equipped with sliding watertight doors, each sliding watertight door must be approved under Subpart 163.001 of Subchapter Q of this chapter.

Fire Protection: General

§ 108.123 Isolation of combustible material.

Each internal combustion engine exhaust, boiler and galley uptake, and similar heat source must be separated or insulated from combustible materials.

§ 108.127 Storage lockers for combustibles.

Each oil and paint locker must be made of steel or an equivalent material or be completely lined with steel or an equivalent material as described in § 108.131(c) of this subpart.

Structural Fire Protection

§ 108.131 Definitions.

(a) "Standard Fire Test" means the test in which specimens of the relevant bulkheads or decks, having a surface of approximately 4.65 square meters (50 square feet) and a height of 2.44 meters (8 feet) resembling as closely as possible the intended construction and including, where appropriate, at least one joint, are exposed in a test furnace to a series of temperature relationships approximately as follows:

(1) At the end of 5 minutes—538°C. (1,000°F.)

(2) At the end of 10 minutes—704°C. (1,300°F.)

(3) At the end of 30 minutes—843°C. (1,550°F.)

(4) At the end of 60 minutes—927°C. (1,700°F.).

(b) Bulkheads and decks are defined and classed as follows:

(1) "A class bulkhead or deck" means a bulkhead or deck that—

(i) Is made of steel or other equivalent material; and

(ii) Prevents the passage of flame and smoke for 60 minutes if subjected to the standard fire test.

(2) "A 60 bulkhead or deck" means an A class bulkhead or deck that—

(i) Is insulated with approved insulation, bulkhead panels, or deck covering;

(ii) If subjected to the standard fire test for 60 minutes, has an average temperature rise on the unexposed side of the insulated bulkhead or deck of less than 139°C. (250°F.) above the temperature before the standard fire test and has a temperature rise at any point on the unexposed surface, including any joint, of less than 180°C. (325°F.) above the temperature before the standard fire test.

(3) "B class bulkhead or deck" means a bulkhead or deck that—

(i) Is made of approved noncombustible material;

(ii) Prevents flame from passing through it for 30 minutes if subjected to the standard fire test.

(4) "C class bulkhead or deck" means a bulkhead or deck made of approved noncombustible material.

(c) "Equivalent material" means a material that by itself or with insulation has smoke and fire retardant properties equal to that of the steel required for "A" or "B" class bulkheads or decks and has structural qualities equivalent to steel at the end of the applicable fire exposure.

(d) "Approved material" means a material approved under one of the following subparts of Subchapter Q of this chapter:

(1) Deck coverings, Subpart 164.006.

(2) Structural insulation, Subpart 164.007.

(3) Bulkhead panel, Subpart 164.008.

(4) Noncombustible materials, Subpart 164.009;

(5) Interior finishes, Subpart 164.012.

(e) "Stairtower" means a stairway that penetrates more than one deck within the same enclosure, or two or more stairways that—

(1) Are arranged vertically one above the other; or

(2) Penetrate both the deck and the overhead within the same enclosure.

(f) "Accommodation space" includes, sleeping, mess, hospital, recreational, toilet, washing and shower spaces, and corridors.

§ 108.133 Hull superstructure, structural bulkheads, decks, and deckhouses.

Each hull superstructure, structural bulkhead, deck, and deckhouse must be made of steel or an equivalent material.

§ 108.135 Boundary bulkheads, decks of galleys, and combustible material lockers.

Each boundary bulkhead and deck of each galley, each combination galley and messroom, and each combustible material storage locker must be an A class bulkhead and A class deck respectively.

§ 108.137 Bulkhead and deck separations of accommodation spaces.

Each boundary bulkhead and deck that separates an accommodation space or control station from the following must be an A class bulkhead and A class deck respectively—

(a) Machinery space;

(b) Galley or combination galley and messroom;

(c) Main pantry;

(d) classified space;

(e) Store room.

§ 108.139 Boundary bulkheads and decks of a space containing emergency power.

Each boundary bulkhead and deck of a space containing an emergency electric power source or components of

an emergency electric power source must be an A class bulkhead and A class deck respectively. When separate but adjoining spaces are provided for such equipment, boundary bulkhead type construction is not required for the separating partitions common to each space.

§ 108.141 Boundary bulkheads and decks between the emergency power source and service generators.

Each boundary bulkhead and deck of a space containing an emergency electric power source or components of an emergency electric power source that adjoins a space containing a ship's service generator, the components of a ship's service generator, or a classified space must be an A-60 bulkhead and A-60 deck.

§ 108.143 Accommodation space.

(a) Each corridor bulkhead in an accommodation space must be an A class or B class bulkhead except if an A class bulkhead is specifically required by this Part.

(b) No door in a corridor bulkhead in an accommodation space may have a louver, except that a stateroom, lounge, or recreation room door may have louvers in its lower half.

(c) Each stairtower, elevator, and dumbwaiter, and other trunk must be enclosed by A class bulkheads.

(d) Each bulkhead not described under paragraph (a) of this section must be either A class, B class, or C class bulkheads.

(e) At least one opening to each stairway must be enclosed by either A class or B class bulkheads and doors.

(f) Each stairtower must have doors at all levels and each must be an A class door.

(g) Each door required by paragraphs (e) and (f) of this section—

(1) Must be self-closing;

(2) May not have any means to permanently hold the door open, except for magnetic holdbacks that are operated from the bridge or other remote location.

(h) Interior stairs, including stringers and treads, must be made of steel or an equivalent material.

(i) Except in washrooms and toilet spaces, each deck covering in an accommodation space must be made of an approved material, except an overlay on a deck for leveling or finishing that is not more than 9.375 millimeters (¾ inch) thick.

(j) Except as provided in paragraph (1), each ceiling, lining, insulation, and pipe and duct lagging in an accommodation space must be made of an approved material that is noncombustible.

(k) Each sheathing, furring, or holding piece used to secure a bulkhead, ceiling, lining, or insulation in an accommodation space must be made of an approved material that is non-combustible.

(l) No bulkhead, lining, or ceiling in an accommodation space may have a combustible veneer greater than 2 millimeters (1/12 inch) in thickness.

(m) Each corridor or hidden space in an accomodation space may be covered by an approved interior finish or a reasonable number of coats of paint. However, no corridor or hidden space may have combustible veneer, trim, or decoration except material approved under Subpart 164.012 of this Chapter.

§ 108.145 Hatches and tonnage openings.

Each hatch, except a hatch between storage spaces and each tonnage opening closure, must be made of steel or an equivalent material of the same class as the bulkhead or deck where the opening occurs.

§ 108.147 Certain paints prohibited.

No nitrocellulose or other highly flammable or noxious fume-producing paint or lacquer may be used on a unit.

Means of Escape

§ 108.151 Two means required.

(a) Each of the following must have at least 2 means of escape:

(1) Each accommodation space with a deck area of at least 27 sq. meters (300 sq. ft.).

(2) Each space, other than an accommodation space, that is continuously manned or used on a regular working basis except for routine security checks.

(3) Weather deck areas where personnel may be normally employed.

(b) When two means of escape are required from a space below the main deck, one the means of escape must provide for a rapid escape through openings that are not required to be watertight by damage stability considerations.

(c) When two means of escape are required from a space above the main deck, one of the means of escape must provide for a rapid escape to a weather deck.

§ 108.153 Location of means of escape.

The required two means of escape must be through exits that minimize the possibility of having both exits blocked if a fire or other casualty occurs in the area.

§ 108.155 Restrictions on means of escape utilized.

A required means of escape may not be a vertical ladder or deck scuttle, except that one of the means of escape may be a vertical ladder or deck scuttle if a stairway would be impracticable.

§ 108.157 Locked doors.

No door to the required means of escape may be designed to lock except—

(a) A crash door or a door that has a locking device that can be easily forced, if on both sides of the door a permanent and easily seen instruction is placed; or

(b) An outside door to a deckhouse if the door can be locked by key only and if the master or person in charge has control of the key to the door's lock.

§ 108.159 Stairways and exterior inclined ladders.

Each stairway, except a stairway in a machinery or storage space, and each exterior inclined ladder must be at least 70 centimeters (28 inches) wide with an angle of inclination from the horizontal of not more than 50 degrees, except that special consideration may be given to the installation if a 70 centimeters (28 inch) width is impracticable.

§ 108.160 Vertical ladders.

(a) Each vertical ladder must have rungs that are—

(1) At least 41 centimeters (16 inches) in length;

(2) Not more than 30 centimeters (12 inches) apart, uniform for the length of the ladder; and

(3) At least 18 centimeters (7 inches) from the nearest permanent object in back of the ladder.

(b) Except when unavoidable obstructions are encountered, there must be at least 11.5 centimeters (4½ inches) clearance above each rung.

(c) Except as provided in § 108.525(e), each exterior vertical ladder more than 6 meters (20 ft.) in length must be fitted with a cage or ladder safety device meeting ANSI Standard 14.3 (1974) for fixed ladders.

(d) No vertical fixed ladders may be made of wood.

§ 108.161 Dead end corridors.

No dead end corridor may be more than 13 meters (43 feet) long.

§ 108.165 Access to lifeboats and liferafts.

Each unit must be designed to provide direct access to the lifeboat and liferaft embarkation areas.

§ 108.167 Weather deck ladders.

Each unit must have at least one permanent, inclined ladder between each weather deck.

D E 4 7 8 UMI

Classified Locations

(2) Below the drill floor and within a

by the methods indicated in § 108.175

accesses and sounding tubes may open

(c) Each sleeping space must have at

toilet, one shower, and one washbasin for each eight persons who occupy

V 4 3 / 2 3 3

D E 4 7 8

UMI

CLASSIFIED LOCATIONS

§ 108.170 Definitions.

(a) Classified locations are those in which flammable hydrocarbon gas or vapors, resulting from the drilling operations, may be present in quantities sufficient to produce an explosive or ignitable mixture. Location of these areas affect the design of the units' machinery, electrical, and ventilation systems. (See notes 1 and 2).

(b) For the purpose of this subpart "semi-enclosed location" means a location where natural conditions of ventilation are notably different from those on open decks due to the presence of structures such as roofs, windbreaks, or bulkheads.

NOTE.—1. Hazardous atmospheres are further defined in § 111.80 of this Chapter.

2. For specific requirements for machinery and electrical installations on mobile offshore drilling units see Subchapters "F" and "J" of this Chapter.

§ 108.171 Class I, Division 1 locations.

The following are Class I, Division 1 locations:

(a) An enclosed space that contains any part of the mud circulating system that has an opening into the space and is between the well and final degassing discharge.

(b) An enclosed or semi-enclosed location that is below the drill floor, and contains a possible source of gas release.

(c) An enclosed space that is on the drill floor, and is not separated by a solid, gas-light floor from the spaces specified in paragraph (b).

(d) A space that would normally be considered a Division 2 location under § 108.173 but where combustible or flammable gases might accumulate.

(e) A location in the weather, or a semi-enclosed location, except as provided in paragraph (b) that is within 1.5 m (5 ft.) of the boundary of any—

(1) Equipment or opening specified in paragraph (a);

(2) Ventilation outlet, access, or other opening to a Class I, Division 1 space; or

(3) Gas vent outlet.

(f) Except as provided in § 108.175, an enclosed space that has an opening into a Class I, Division 1 location.

§ 108.173 Class I, Division 2 locations.

The following are Class I, Division 2 locations:

(a) An enclosed space that has any open portion of the mud circulating system from the final degassing discharge to the mud suction connection at the mud pit.

(b) A location in the weather that is—

(1) Within the boundaries of the drilling derrick up to a height of 3 m (10 ft.) above the drill floor;

(2) Below the drill floor and within a radius of 3 m (10 ft.) of a possible source of gas release; or

(3) Within 1.5 m (5 ft.) of the boundaries of any ventilation outlet, access, or other opening to a Class I, Division 2 space.

(c) A location that is—

(1) Within 1.5 m (5 ft.) of a semi-enclosed Class I, Division 1 location indicated in § 108.171(b); or

(2) Within 1.5 m (5 ft.) of a Class I, Division 1 space indicated in § 108.171(e).

(d) A semi-enclosed area that is below and contiguous with the drill floor to the boundaries of the derrick or to the extent of any enclosure which is liable to trap gasses.

(e) A semi-enclosed derrick to the extent of its enclosure above the drill floor or to a height of 3 m (10 ft.) above the drill floor, whichever is greater.

(f) Except as provided in § 108.175 an enclosed space that has an opening into a Class I, Division 2 location.

§ 108.175 Contiguous locations.

An enclosed space that has direct access to a Division 1 or Division 2 location is the same division as that location, except—

(a) An enclosed space that has direct access to a Division 1 location is not a hazardous location if—

(1) The access has self-closing gastight doors that form an air lock;

(2) The ventilation causes greater pressure in the space than in the Division 1 location; and

(3) Loss of ventilation overpressure activates an alarm at a manned station;

(b) An enclosed space that has direct access to a Division 1 location can be considered as a Division 2 location if—

(1) The access has a self-closing, gastight door that opens into the space and that has no hold-back device;

(2) Ventilation causes the air to flow with the door open from the space into the Division 1 location; and

(3) Loss of ventilation activates an alarm at a manned control station; and

(c) An enclosed space that has direct access to a Division 2 location is not a hazardous location if—

(1) The access has a self-closing, gastight door that opens into the space and that has no hold-back device;

(2) Ventilation causes the air to flow with the door open from the space into the Division 2 location; and

(3) Loss of ventilation activates an alarm at a manned control station.

§ 108.177 Electrical equipment in classified locations.

Electrical equipment and devices installed in spaces made non-hazardous by the methods indicated in § 108.175 must only be essential equipment.

VENTILATION

§ 108.181 Ventilation for enclosed spaces.

(a) Each enclosed space must be vented or ventilated.

(b) There must be a means to close each vent or ventilating system.

(c) Each fan in a ventilating system must have remote controls installed in accordance with Subpart 111.80-13 of this chapter.

(d) There must be a means to close each doorway, ventilator, and annular space around each funnel or other opening to machinery, stowage, or working spaces. The means must be located outside the space.

(e) Each intake in a ventilating system must be located so as to prevent, as far as practicable, the intake of noxious fumes.

§ 108.185 Ventilation for enclosed classified locations.

(a) The ventilation system for each enclosed classified location must be designed to maintain a pressure differential between the enclosed classified location and each non-classified location adjacent to the enclosed classified location, so as to prevent the discharge of ignitable gases into the non-classified adjacent locations.

(b) Each air intake must be outside of enclosed classified locations.

(c) Each unit must have alarms at a continuously manned station that signal when—

(1) Gas is present in a enclosed classified location; or

(2) The ventilation system for the space is not working.

(d) Each ventilation system for enclosed classified locations must provide a complete change of air every five minutes.

§ 108.187 Ventilation for brush type electric motors in classified spaces.

Ventilation for brush type electric motors in classified locations must meet N.F.P.A. 496-1974 "Standard for Purged and Pressurized Enclosures for Electrical Equipment in Hazardous Locations", except audible and visual alarms may be used if shutting down the motors may cause unsafe conditions.

ACCOMMODATION SPACES

§ 108.193 Restrictions.

(a) There must be no direct communication between the accommodation spaces and any chainlocker, stowage, or machinery space, except through solid, close-fitted doors or hatches.

(b) No access, vent, or sounding tube from a fuel or oil tank may open into any accommodation space, except that

accesses and sounding tubes may open into corridors.

§ 108.195 Location of accommodation spaces.

(a) On surface type units, accommodation spaces must not be located forward of a vertical plane located at 5 percent of the unit's length aft of the stem, at the designed summer load line.

(b) On all units, the deckhead of each accommodation space must be above the deepest load line.

§ 108.197 Construction of accommodation spaces.

(a) Each sleeping, mess, recreational, or hospital space that is adjacent to or immediately above a stowage or machinery space, paint locker, drying room, washroom, toilet space, or other odor source must be made odorproof.

(b) Each accommodation space that is adjacent to or immediately above a galley, machinery space, machinery casing, boiler room, or other noise or heat source, must be protected from the heat and noise.

(c) Where the shell or an unsheathed weather deck forms a boundary of an accommodation space, the shell of deck must have a covering that prevents the formation of moisture.

(d) The deckheads of each accommodation space must be a light color.

(e) Each accommodation space in which water may accumulate must have a drain scupper located in the lowest part of the space, considering the average trim of the unit.

(f) Each public toilet space must be constructed and located so that its odors do not readily enter any sleeping, mess, recreational, or hospital space.

§ 108.199 Arrangement of sleeping spaces.

To the extent practicable, each occupation group must be berthed together in sleeping spaces arranged to minimize disturbance created by personnel leaving for or arriving from a working period.

§ 108.201 Size of sleeping spaces.

(a) No sleeping space may berth more than four persons, except that a sleeping space for personnel not regularly employed on a unit may berth up to six persons if the space meets § 108.199 and berthing of six persons in that space is authorized by the Commandant (G-MMT).

(b) Without deducting any equipment used by the occupants, each sleeping space must have for each occupant—

(1) 2.8 square meters (approximately 30 square feet) of deck area; and

(2) 6 cubic meters (approximately 210 cubic feet) of volume.

(c) Each sleeping space must have at least 191 centimeters (approximately 6 feet 3 inches) of headroom over clear deck areas.

§ 108.203 Berths and lockers.

(a) Each sleeping space must have a separate berth for each occupant.

(b) No more than one berth may be placed over another.

(c) Each berth must have a framework of hard, smooth material that is not likely to corrode or harbor vermin.

(d) Each berth must be arranged to provide ample room for easy occupancy.

(e) Each berth must be at least 76 centimeters (approximately 30 inches) wide by 193 centimeters (approximately 76 inches) long.

(f) Adjacent berths must be separated by a partition that extends at least 46 centimeters (approximately 18 inches) above the sleeping surface.

(g) The bottom of a lower berth must be at least 30 centimeters (approximately 12 inches) above the deck.

(h) The bottom of an upper berth must be at least 76 centimeters (approximately 2 feet 6 inches) from the bottom of the berth below it and from the deck or any pipe, ventilating duct, or other overhead installation.

(i) Each berth must have a berth light.

(j) Each occupant of a sleeping space must have a readily accessible locker of hard, smooth material.

(k) Each locker must be at least .194 square meters (approximately 300 square inches) in cross section and 1.53 meters (approximately 60 inches) high.

§ 108.205 Wash spaces; toilet spaces; and shower spaces.

(a) For the purposes of this section—

(1) "Private facility" means a toilet, washing, or shower space that is accessible only from one single or double occupancy sleeping space;

(2) "Semi-private facility" means a toilet, washing or shower space that is accessible from either of two one-to-four person occupancy sleeping spaces; and

(3) "Public facility" means a toilet, washing, or shower space that is not private or semi-private.

(b) Each private facility must have one toilet, one shower, and one washbasin, all of which may be in a single space.

(c) Each semi-private facility must have at least one toilet and one shower, which may be in a single space.

(d) Each room adjoining a semi-private facility must have a washbasin if a washbasin is not installed in a semi-private facility.

(e) Each unit must have enough public facilities to provide at least one toilet, one shower, and one washbasin for each eight persons who occupy sleeping spaces that do not have private or semi-private facilities.

(f) Urinals may be installed in toilet rooms, but no toilet required in this section may be replaced by a urinal.

(g) Each public toilet space and washing space must be convenient to the sleeping space that it serves.

(h) No public facility may open into any sleeping space.

(i) Each washbasin, shower, and bathtub must have hot and cold running water.

(j) Adjacent toilets must be separated by a partition that is open at the top and bottom for ventilation and cleaning.

(k) Public toilet facilities and shower facilities must be separated.

(l) Each public facility that is a toilet space must have at least one washbasin unless the only access to the toilet space is through a washing space.

(m) Each toilet must have an open front seat.

(n) Each washing space and toilet space must be so constructed and arranged that it can be kept in a clean and sanitary condition and the plumbing and mechanical appliances kept in good working order.

(o) Washbasins may be located in sleeping spaces.

§ 108.207 Messrooms.

(a) Each messroom that is not adjacent to the galley that serves it must be equipped with a steamtable.

(b) Each messroom must seat the number of persons expected to eat in the messroom at one time.

§ 108.209 Hospital spaces.

(a) Each unit carrying twelve or more persons on a voyage of more than three days must have a hospital space.

(b) Each hospital space must be suitably separated from other spaces.

(c) No hospital space may be used for any other purpose, when used for care of the sick.

(d) An entrance to each hospital space must be wide enough and arranged to readily admit a person on a stretcher.

(e) Each berth in a hospital space must be made of metal.

(f) Each upper berth must be hinged and arranged so that it can be secured clear of the lower berth.

(g) Each hospital space must have at least one berth that is accessible from both sides.

(h) Each hospital space must have one berth for every 12 persons or portion thereof on board, who are not berthed in single occupancy rooms, but the number of berths need not exceed six.

(i) Each hospital space must have a

normal operation of the unit, a lesser

§ 108.235 Construction.

(b) Integral tanks must meet Sub-

columns of an undamaged unit due to heel, trim, or submergence of the unit.

V 4 3 / 2 3 3

(i) Each hospital space must have a toilet, washbasin, and bathtub or shower accessible from the hospital space.

(j) Each hospital space must have clothes lockers, a table, and seats.

§ 108.210 Hospital space not required.

The hospital space required under § 108.209 is not required on a unit if one single or double occupancy sleeping space, designated and equipped as a treatment or isolation room or both is available for immediate medical use, and has—

(1) An entrance that is wide enough and arranged to readily admit a person on a stretcher;

(2) A single berth or examination table that is accessible from both sides; and

(3) A washbasin in or immediately adjacent to it.

§ 108.211 Miscellaneous accommodation spaces.

(a) Each unit must have enough facilities for personnel to wash their own clothes, including at least one tub or sink that has hot and cold running water.

(b) Each unit must have enough equipment or space for the personnel to dry their own clothes.

(c) Each unit must have an accommodation space that can be used for recreation.

§ 108.213 Heating requirements.

(a) Each accommodation space must be heated by a heating system that can maintain at least 20°C. (68°F.).

(b) Radiators and other heating apparatuses must be constructed, located or shielded so as to avoid risk of—

(1) Fire;

(2) Danger; and

(3) Discomfort

to the occupants of each accommodation space.

(c) Each exposed pipe in an accommodation space, leading to a radiator or other heating apparatus must be insulated.

§ 108.215 Insect screens.

(a) Accommodation spaces must be protected against the admission of insects.

(b) Insect screens must be installed when natural ventilation is provided.

RAILS

§ 108.217 Guardrails and bulwarks.

(a) Each unit must have guardrails or bulwarks along the edge of the bridge, of each deck, and of each deck opening.

(b) Each guardrail and bulwark must extend at least one meter (39.37 inches) above the deck except where this height may interfere with the normal operation of the unit, a lesser height may be approved.

(c) Removable guardrails may be installed where operating conditions warrant their use.

§ 108.219 Guardrails.

(a) Except for exposed peripheries of a freeboard or superstructure deck, each guardrail must have at least two evenly spaced courses.

(b) At exposed peripheries of a freeboard or superstructure deck, each guardrail must have at least three courses not more than 38 centimeters (15 in.) apart with the lowest course not more than 23 centimeters (9 in.) above the deck.

(c) For a rounded gunwale, the guardrail must be at the edge of the flat of the deck.

§ 108.221 Storm rails.

Each unit must have a storm rail in the following locations:

(a) On each deckhouse side that is normally accessible.

(b) On each side of each passageway that is wider than 1.83 meters (6 feet).

(c) On at least one side of each passageway that is less than 1.83 meters (6 feet) wide.

§ 108.223 Guards on exposed equipment.

Each unit must have hand covers, guards, or rails installed on all belts, gears, shafts, pulleys, sprockets, spindles, flywheels or other reciprocating, rotating or moving parts of machinery or equipment normally exposed to contact by personnel.

HELICOPTER FACILITIES

§ 108.231 Application.

Sections 108.231 through 108.241 apply to each unit with a helicopter landing facility.

§ 108.233 Location and size.

(a) Each helicopter deck must be—

(1) At least the size of the rotor diameter of the largest single main rotor helicopter that will be used on the facility; or

(2) If tandem main rotor helicopters use the facility, at least of a size to provide a longitudinal axis of $\frac{9}{10}$ the overall length of the helicopter, and a width of $\frac{3}{4}$ of the overall length of the helicopter.

NOTE.—For the purpose of paragraph (a)(2) the overall length is measured across both main rotors in the fore and aft line.

(b) Each helicopter deck must be located so as to provide clear approach/departure paths to enable the largest helicopter using the facility to operate in all weather conditions which allow helicopter operations.

§ 108.235 Construction.

(a) Each helicopter deck must be designed to accommodate the loadings (static and dynamic) imposed by operation and stowage of helicopters intended to use the facility as well as environmental loadings (wind, wave, water, snow, etc.) anticipated for the unit.

(b) The adequacy of each helicopter deck for the loadings required in paragraph (a) must be shown by design calculations. Where the placement of a load affects the suitability of a structural member, the load must be evaluated in the most unfavorable position for each member.

(c) The analysis required in paragraph (b) must be based on the dead load of the structure, existing stresses in the deck when it is an integral part of a unit's structure, and each of the following loading conditions:

(1) *Uniform distributed loading.* A loading of 2kg/m² (42 lb/ft²) applied to the helicopter deck area.

(2) *Helicopter landing impact loading.* The limit load established by the limit drop test in 14 CFR 29.725, or a load of not less than 75 percent of the helicopter maximum weight taken on a square area of 0.3×0.3 m (1 ft.×1 ft.) under each main landing gear unit applied anywhere on the helicopter deck area.

(3) *Stowed helicopter loading.* The helicopter maximum weight plus inertial forces from the helicopter due to anticipated unit motions, and applicable environmental loadings including wind loads.

(d) The landing area of each helicopter facility must—

(1) Have a non-skid surface;

(2) Have drainage facilities that prevent the collection of liquids and prevent liquids from spreading to or falling on other parts of the unit;

(3) Have recessed tie-down points; and

(4) Be free of projections, except that landing lights or other projections may be installed around the periphery of the landing deck provided they do not interfere with landing and take-off operations.

(e) The unprotected perimeter of each helicopter facility must have a safety net at least 1.5 meters (4.92 ft.) wide. The outer edge of the net must not extend more than 15 centimeters (6 in.) above the surface of the deck.

(f) Each helicopter facility must have both a main and an emergency access/egress route located as far apart from each other as practicable.

§ 108.237 Fuel storage facilities.

(a) Helicopter fuel storage tanks must be installed as far as practicable from—

(1) The landing area; and

(2) Each source of vapor ignition.

(b) Integral tanks must meet Subpart 58.50 of this Chapter.

(c) Marine portable fuel stowage tanks must meet Part 64 of this Chapter.

(d) Each marine portable fuel stowage tank must have a means to contain fuel spills or leaks.

§ 108.239 Fuel transfer equipment.

(a) Each nozzle must be a "deadman" type.

(b) Each hose must have a storage reel.

(c) Each hose must have a static grounding device.

(d) Each electric fuel transfer pump must have a control with a fuel transfer pump operation indicator light at the pump.

(e) There must be a fuel pump shut off at each of the access routes required by § 108.235(f).

(f) Each fuel transfer pump and each hose reel must have a means to contain fuel spills or leaks.

(g) Each hose must meet chapter 3 "Aircraft Fueling Hose" of National Fire Protection Association Standard for Aircraft Fuel Servicing (N.F.P.A. No. 407-1975).

§ 108.241 Visual aids.

(a) Each helicopter deck must—

(1) Have a wind direction indicator located in an unobstructed area readily visible to helicopter pilots approaching the deck;

(2) Be fitted around the perimeter with yellow and blue lights in alternate order, not more than 3 meters (10 ft.) apart; and

(3) Be marked with—

(i) The unit's identification;

(ii) A continuous line 40 centimeters (16 in.) wide on the perimeter; and

(iii) Aiming circles as may be appropriate considering deck configuration, helicopter type, and operational requirements.

(b) All markings must be in a contrasting color to the surface of the deck.

Subpart C—Stability

§ 108.301 Stability: definitions.

For the purposes of this subpart:

(a) "Normal operating condition" means a condition of a unit when loaded or arranged for drilling, field transit, or ocean transit.

(b) "Severe storm condition" means a condition of a unit when loaded or arranged to withstand the passage of a severe storm.

(c) "Downflooding" means the entry of seawater through any opening which cannot be rapidly closed watertight, into the hull, superstructure, or columns of an undamaged unit due to heel, trim, or submergence of the unit.

(d) "Downflooding angle" means the static angle from the calm seawater surface at a unit's waterline to the first opening through which downflooding could occur, considering heel, trim, and submergence of the unit when subjected to a wind heeling moment (Hm) calculated in accordance with § 108.311.

§ 108.303 Stability requirements: general.

Each unit must be designed to have at least 5 cm (2 inches) of positive metacentric height in the upright equilibrium position for the full range of drafts, whether at the operating draft for navigation, towing, or drilling afloat, or at a temporary draft when changing drafts.

§ 108.305 Intact stability requirements.

(a) Each unit must be designed so that the wind heeling moments (Hm) and righting moments calculated for each of its normal operating conditions and severe storm conditions, when plotted on graph 108.305, define areas that satisfy the equation [Area (A)]≥[K]×[Area (B)] where—

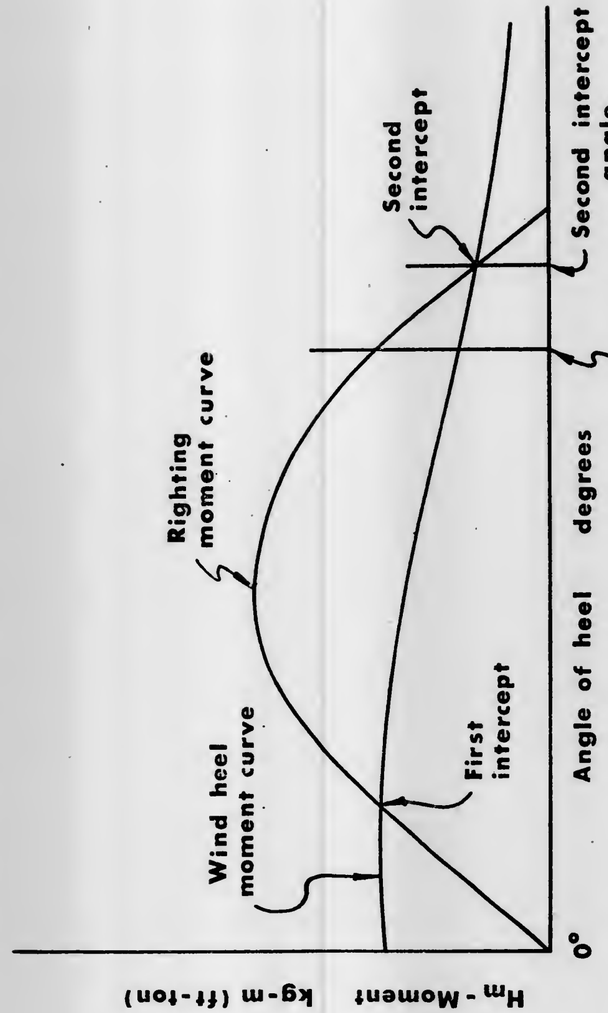
(1) K=1.4, except that if the unit is a column stabilized unit K=1.3;

(2) Area (A) is the area on graph 108.305 under the righting moment curve between 0° and the second intercept angle or the angle of heel at which downflooding would occur, whichever angle is less; and

(3) Area (B) is the area on graph 108.305 under the wind heeling moment curve between 0° and the second intercept angle or the angle of heel at which downflooding of the unit would occur whichever angle is less.

(b) Each righting moment on graph 108.305 must be positive for all angles greater than 0° and less than the second intercept angle.

(c) For the purposes of this section, openings fitted with the weathertight closing appliances specified in § 108.114(b) are not considered as openings through which downflooding could occur if they can be rapidly closed and would not be submerged below the units' waterline prior to the first intercept angle, except that ventilation intakes and outlets for machinery spaces, crew spaces, and other spaces where ventilation is normally required are considered as openings through which downflooding could occur regardless of location.



(d) Each unit must be designed so that it can be changed from each of its normal operating conditions to a severe storm condition within a minimum period of time consistent with the operating manual required in § 109.121.

D E 4 7 8 UMI

§ 108.309 Stability on bottom.

(iii) 25.8 meters per second (50 ating conditions and severe storm con-

Graph 108.305 - Intact Stability Curves for a Given Normal Operating or Severe Storm Mode

[4910-14-C]

FEDERAL REGISTER, VOL. 43, NO. 233—MONDAY, DECEMBER 4, 1978

§ 108.309 Stability on bottom.

Each bottom bearing unit must be designed so that, while supported on the sea bottom with footings or a mat, it continually exerts a downward force on each footing or the mat when subjected to the forces of wave and current and to wind blowing at the velocities described in § 108.311(b)(3).

§ 108.311 Calculation of wind heeling moment (Hm).

(a) The wind heeling moment (Hm) of a unit in a given normal operating condition or severe storm condition is the sum of the individual wind heeling moments (H) calculated for each of the exposed surfaces on the unit; i.e., $Hm=\Sigma H$.

(b) Each wind heeling moment (H) must be calculated using the equation $H=kv^2C_hC_sAh$, where—

(1) H=wind heeling moment for an exposed surface on the unit;

(2) k=0.0623 kilograms (kg-sec^2)/m^4 (0.00338 lb/(ft^2-knots^2));

(3) v=wind velocity of—

(i) 36 meters per second (70 knots) for normal operating conditions.

(ii) 51.5 meters per second (100 knots) for severe storm conditions.

(iii) 25.8 meters per second (50 knots) for damage conditions.

(4) A=projected area of an exposed surface on the unit;

(5) C_h=height coefficient for "A" from Table 108.311(a);

(6) C_s=shape coefficient for "A" from Table 108.311(b); and

(7) h=the vertical distance from the center of lateral resistance of the underwater hull to the center of wind pressure on "A".

(c) When calculating "A" in the equation described in paragraph (b) of this section—

(1) The projected area of each column or leg, if the unit has columns or legs, must not include shielding allowances;

(2) Each area exposed as a result of heel must be included;

(3) the projected area of a cluster of deck houses may be used instead of the projected area of each individual deck house in the cluster; and

(4) The projected area of open truss work may be calculated by taking 30% of the projected areas of both the front and back sides of the open truss work rather than by determining the projected area of each structural member of the truss work.

TABLE 108.311(a).—C_h Values

Height				C_h
Meters		Feet		
Over	*Not exceeding*	*Over*	*Not exceeding*	
0	15.3	0	50	1.00

183.0	198.0	600	650	1.70
198.0	213.5	650	700	1.72
213.5	228.5	700	750	1.75
228.5	244.0	750	800	1.77
224.0	256.0	800	850	1.79
Above 256		Above 850		1.80

NOTE: The "C_h" value in this table used in the equation described in section 108.311(b) corresponds to the value of the vertical distance in meters (feet) from the water surface at the design draft of the unit to the center of area of the "A" value used in the equation.

TABLE 108.311(b).—C_s Values

Shape	C_s
Cylindrical shapes	0.5
Hull (surface type)	1.0
Deckhouse	1.0
Cluster of deckhouses	1.1
Isolated structural shapes (cranes, angles, channels, beams, etc.)	1.5
Under deck areas (smooth surfaces)	1.0
Under deck areas (exposed beams and girders)	1.3
Rig derrick (each face and open truss works)	1.25

NOTE.—The value of C_s in this table used in the equation described in § 108.311(b) corresponds to the shape of the projected Area "A" in the equation.

§ 108.313 Submission of intact stability data.

Intact stability data submitted under § 107.305 of this subchapter must contain the righting moment curves and wind heeling moment curves described in graph 108.305 of this subpart, each with supporting calculations, for each of the unit's normal operating conditions and severe storm conditions.

§ 108.315 Damage stability requirements.

(a) Each unit must be designed so that, while in each of its normal operating conditions and severe storm conditions, its final equilibrium waterline would remain below the lowest edge of any opening through which additional flooding could occur if the unit were subjected simultaneously to—

(1) Damage causing flooding described in §§ 108.319 through 108.323; and

(2) A wind heeling moment calculated in accordance with § 108.311(b) using a wind velocity of 25.8 meters per second (50 knots).

(b) Each unit must have a means to close off each pipe, ventilation system, and trunk in each compartment described in § 108.321 or § 108.323 if any portion of the pipe, ventilation system, or trunk is within 1.5 meters (5 feet) of the hull.

§ 108.317 General damage stability assumptions.

For the purpose of determining compliance with § 108.315 of this subpart, the assumptions are made that during flooding and the resulting change in the unit's waterline—

(a) The unit is not anchored or moored; and

(b) No compartment on the unit is ballasted or pumped out to compensate for the flooding described in §§ 108.319-108.323 of this subpart.

§ 108.319 Compartments assumed flooded: general.

The individual flooding of each of the compartments described in § 108.321 and § 108.323 of this subpart must be assumed for the purpose of determining compliance with § 108.315(a) of this subpart. Simultaneous flooding of more than one compartment must be assumed only when indicated in § 108.321 and § 108.323.

§ 108.321 Flooding on self-elevating and surface type units.

(a) On a surface type unit or self-elevating unit, all compartments within 1.5 meters (5 feet) of the hull of the unit between two adjacent main watertight bulkheads, the bottom shell, and the uppermost continuous deck or first superstructure deck where superstructures are fitted must be assumed to be subject to simultaneous flooding.

(b) On the mat of a self-elevating unit, all compartments of the mat must be assumed to be subject to individual flooding.

an aggregate power of at least 1000

ed and any other obstructions do not

least 3.5 kilograms per square centi-

V 4 3 / 2 3 3 D E 4 7 8 UMI

V 43/233 DE 4 78 UMI

§ 108.323 Flooding on column stabilized units.

(a) Watertight compartments that are outboard of, or traversed by, a plane which connects the vertical centerlines of the columns on the periphery of the unit, and within 1.5 meters (5 feet) of an outer surface of a column or footing on the periphery of the unit, must be assumed to be subject to flooding as follows:

(1) When a column is subdivided into watertight compartments by horizontal watertight flats, all compartments in the column within 1.5 meters (5 feet) of the unit's waterline before damage causing flooding must be assumed to be subject to simultaneous flooding.

(2) When a column is subdivided into watertight compartments by vertical watertight bulkheads, each two adjacent compartments must be assumed subject to simultaneous flooding if the distance between the vertical watertight bulkheads, measured at the column periphery, is equal to or less than one-eighth of the column perimeter at the draft under consideration.

(3) When a column is subdivided into watertight compartments by horizontal watertight flats and vertical watertight bulkheads, those compartments that are within the bounds described in paragraph (a)(2) and within 1.5 meters (5 feet) of the unit's waterline before damage causing flooding must be assumed to be subject to simultaneous flooding.

(b) Each compartment in a footing must be assumed to be subject to individual flooding when any part of the compartment is within 1.5 meters (5 feet) of the unit's waterline before damage causing flooding.

§ 108.325 Permeabilities.

The calculations submitted in accordance with § 108.329 of this subpart must show the permeability of each space considered in the calculations. The calculation of each permeability used must also be shown unless the value used is listed in Table 108.325.

TABLE 108.325—*Permeability Values*

Space	Permeability
Cargo or storage space	[1]0.95
Accommodation space	0.95
Machinery space	0.85
Tank intended for liquids	[2]0.0 or 0.95

[1]Actual value may be calculated and used.
[2]Use the value which results in the greatest change in the unit's waterline.

§ 108.329 Submission of damage stability data and calculations.

Damage stability data must be submitted for approval before the unit's original inspection for certification. These data must contain residual righting moment curves, wind heeling moment curves, and plans or sketches showing the unit's final equilibrium waterline, with supporting calculations for each, for each of the unit's normal operating conditions and severe storm conditions. These data must show compliance with § 108.315.

§ 108.335 Stability test.

(a) Except as provided in paragraph (c) of this section, the owner of a unit must—

(1) Conduct a stability test of the unit to determine the location of its center of gravity and lightship displacement; and

(2) Submit the results of the test for approval by the Coast Guard before the unit's original inspection for certification.[1]

(b) An authorized Coast Guard representative must be present at each stability test conducted under this section

(c) A stability test is not required for a unit if the owner provides the Coast Guard with the Coast Guard approved results of a stability test of a sister unit and the Commandant determines that reliable stability information for the unit not tested is obtainable from the test results of the sister unit.

§ 108.337 Plans and information required at the stability test.

The owner of a unit must provide the following plans and information to the authorized Coast Guard representative prior to the stability test:

(a) Lines.

(b) Curves of form.

(c) Capacity plans showing capacities and vertical and longitudinal centers of gravity of stowage spaces and tanks.

(d) Tank sounding tables.

(e) Draft mark locations.

(f) General arrangement plan of decks, holds, and inner bottoms.

(g) Inboard and outboard profile.

(h) A complete list of material or equipment to be installed, removed, or relocated after the test, including the weight and location of each item on the list.

§ 108.339 Stability test preparations.

The following preparations must be made before conducting a stability test:

(a) The unit must be as complete as practicable at the time of the test.

(b) Each tank must be either empty and dry or full and without air pockets, except that a tank may be partially filled if the Commandant (G-MMT) determines that compliance with this requirement is impracticable and that the effect of partial filling on the location of the center of gravity and the displacement of the unit can be accurately determined.

(c) All dunnage, tools, and other items extraneous to the complete unit must be removed from the unit.

(d) The water depth at the mooring site must provide ample clearance against grounding.

(e) Each mooring line must be arranged so that it does not interfere with the free inclination of the unit during the test.

(f) The draft and axis of rotation selected for the test must be those that result in acceptable accuracy in calculating the unit's displacement and location of center of gravity.

(g) At least two weeks prior to the date of the test, a stability test procedure must be submitted for approval. The procedure must include:

(1) Identification of the unit to be tested.

(2) Date and location of the test.

(3) Inclining weight data.

(4) Pendulum locations and lengths.

(5) Approximate draft and trim of the unit.

(6) Condition of each tank.

(7) Estimated items to be installed, removed, or relocated after test, including the weight and location of each item.

(8) Schedule of events.

§ 108.341 Stability test deviation.

The authorized Coast Guard representative present at a stability test may allow a deviation from the requirement of § 108.337 of this subpart if he determines that the deviation will not affect the accuracy of the test results.

§ 108.343 Stability: alterations.

Where alterations are made which materially affect the stability of a unit, amended stability information must be approved by the Coast Guard. The Coast Guard may require the unit to have a new stability test.

Subpart D—Fire Extinguishing Systems

§ 108.401 Fire main system.

Each unit must have a fire main system.

§ 108.403 Fire extinguishing systems: General.

(a) Each of the following on a unit must have an approved fixed gaseous type extinguishing system:

(1) Each paint locker, oil room, and similar space.

(2) Each enclosed space containing internal combustion or gas turbine main propulsion machinery.

(3) Each enclosed space containing internal combustion machinery with an aggregate power of at least 1000 B.H.P.

(4) Each enclosed space containing a fuel oil unit, including purifiers, valves, or manifolds for main propulsion machinery or internal combustion machinery with an aggregate power of at least 1000 B.H.P.

(5) Each enclosed ventilation system for electric motors or generators used for vital services including bilge pumps, fire pumps, or propulsion.

(b) Each space containing an oil fired boiler, the fuel oil unit or valves for the boiler, or manifolds in the line between the fuel settling tanks and the boiler on a unit must have a fixed gas type, foam, water spray, or other approved fire extinguishing system.

§ 108.403a Fire extinguishing systems: non-vital services.

Each enclosed ventilating system for electric motors or generators not used for vital services must have an access into the system for firefighting or be protected by a fixed fire protection system.

§ 108.404 Selection of fire detection system.

(a) If a fire detector is in a space, it must provide effective detection of fires most likely to occur in the space.

(b) The fire detection system must be designed to minimize false alarms.

§ 108.405 Fire detection system.

(a) Each fire detection system and each smoke detection system on a unit must—

(1) Be approved by the Commandant; and

(2) Have a visual alarm and an audible alarm in the pilothouse or at a normally manned control station for the system.

(b) Each fire detection system must be divided into zones to limit the area covered by any particular alarm signal.

(c) Each visual alarm must—

(1) Have a chart or diagram next to the alarm that shows the location of the zones in the system and that contains the instructions for operating, and testing the system;

(2) When activated show the zone in the system where fire has been detected; and

(3) Be in a noticeable location in the pilothouse or control station.

§ 108.407 Detectors for electric fire detection system.

(a) Each detector in an electric fire detection system must be located where—

(1) No portion of the overhead of a space protected is more than 3 meters (10 feet) from a detector;

(2) Beams and girders extending below the ceiling of the space protected and any other obstructions do not detract from the effectiveness of the detector; and

(3) Damage to the detector is unlikely to occur if it is not protected.

(b) Each detector must be set to activate at not less than 57° C (135° F) and at not more than 73° C (165° F), except that if a space normally has a high ambient temperature each detector may be set to activate at not less than 80° C (175° F) and not more than 107° C (225° F).

§ 108.409 Location and spacing of tubing in pneumatic fire detection system.

(a) All tubing in a pneumatic fire detection system must be on the overhead or within 300 millimeters (12 inches) of the overhead on a bulkhead in a location where—

(1) No portion of the overhead is more than 3.6 meters (12 feet) from the nearest point of tubing;

(2) Beams or girders extending below the ceiling or other obstructions do not detract from the effectiveness of the tubing; and

(3) Damage to the tubing, is unlikely to occur if it is not protected.

(b) If tubing in a tubing circuit is installed in an enclosed space, at least 5% of the tubing in the circuit must be exposed in the space, except that at least 7.6 meters (25 feet) of tubing must always be exposed in the space.

(c) A pneumatic fire detection system must be set to activate after approximately a 22°C. (40°F.) per minute increase in temperature at the center of the circuit in the system.

§ 108.411 Smoke detection system.

Each smoke accumulator in a smoke detection system must be located on the overhead of the compartment protected by the system in a location—

(a) Where no portion of the overhead of the compartment is more than 12 meters (40 feet) from an accumulator;

(b) That is no closer to the opening of a ventilator than 3 times the diameter or equivalent size of the opening.

(c) Where damage to the accumulator is unlikely to occur if it is not protected.

§ 108.413 Fusible element fire detection system.

(a) A fusible element fire detection system may be installed.

(b) The arrangements for the system must be acceptable to the Commandant.

FIRE MAIN SYSTEM

§ 108.415 Fire pump: general.

A fire main system must have at least two independently driven fire pumps that can each deliver water at a continuous pitot tube pressure of at least 3.5 kilograms per square centimeter (approximately 50 pounds per square inch) at at least two fire hose nozzles that are connected to the highest two fire hydrants on the unit. Alternative designs that meet the pressure requirement of this paragraph will be considered for column stabilized and self elevating units.

§ 108.417 Fire pump components and associated equipment.

(a) Each fire pump in a fire main system must have a relief valve on its discharge side that is set to relieve at 1.75 kilograms per square centimeter (approximately 25 pounds per square inch) in excess of the pump discharge pressure necessary to meet the pressure required in § 108.415 for the pump or 8.6 kilograms per square centimeters (approximately 125 pounds per square inch), whichever is greater. A relief valve may be omitted if the pump operating under shut off condition is not capable of developing the pressure described in § 108.415 plus 1.75 kilograms per square centimeter (25 pounds per square inch).

(b) Each fire pump in a fire main system must have a pressure gauge on its discharge side.

(c) Fire pumps may be used for other purposes. One of the required pumps must be kept available for use on the fire system at all times. If a fire pump is used in a system other than the fire main system, except for branch lines connected to the fire main for deck washing, each pipe connecting the other system must be connected to the pump discharge through a shut off valve at a manifold near the pump. If the fire pump exceeds the pressure in § 108.417(a), the pipe leading from the discharge manifold to other portions of the fire main system must have a reducing station and a pressure gauge in addition to the pressure gauge required by paragraph (b) of this section.

(d) If a fire pump has a reducing station, the relief valve required by paragraph (a) of this section for the pump and the additional pressure gauge required in paragraph (c) of this section must not be located on the discharge side of the reducing station.

(e) An oil line must be connected to a fire pump.

§ 108.419 Fire main capacity.

The diameter of the fire main must be sufficient for the effective distribution of the maximum required discharge from two fire pumps operating simultaneously.

§ 108.421 Location of fire pumps and associated equipment.

Each fire pump required by § 108.415, and the source of power, controls, sea connections for the fire

[1]A stability letter is issued by the Coast Guard after approval of the test results and of the information required in § 109.121.

the supply pipe, whichever is smaller.

type box that is next to and visible

tional gas introduced into the system,

V 4 3 / 2 3 3

pump, and booster pumps, if installed, must be installed in locations where, if a fire occurs in an enclosed space, all of the fire pumps on the unit are not made inoperative, except that if compliance with this requirement is impracticable, a gas type extinguishing system may be installed to protect at least one of the fire pumps, its source of power, and controls.

§ 108.423 Fire hydrants and associated equipment.

(a) A fire main system must have enough fire hydrants so that each accessible space may be sprayed with at least two spray patterns of water.

(b) In a main machinery space, except a shaft alley with no assigned space for stowage of combustibles, each spray pattern of water must be from one length of fire hose and each must be from a separate outlet. In all other spaces at least one spray pattern of water must be from one length of fire hose.

(c) No outlet on a fire hydrant may point above the horizontal.

(d) Each fire hydrant must have at least one spanner and at least one fire hose rack or reel.

§ 108.425 Fire hoses and associated equipment.

(a) Each length of fire hose in a fire main system must be—

(1) Of 1½ or 2½ inch nominal hose size diameter;

(2) Of 50 foot nominal hose size length; and

(3) Lined commercial fire hose that meets Standard 19 of the Underwriters' Laboratories, Inc., (1971 edition) or Federal Specification ZZ-H-451f.

(b) Each fire hose coupling must—

(1) Be made of brass, bronze, or material that has corrosion resistant properties at least equal to those of brass or bronze; and

(2) Have 9 National Standard Fire-hose Coupling (NSFC) threads per inch for 1½ inch hose or 7½ NSFC threads per inch for 2½ inch hose.

(c) Each nozzle for a fire hose in a fire main system must be a combination solid stream and water spray fire hose nozzle that is approved under Subpart 162.027 of this chapter.

(d) A low velocity spray applicator approved under Subpart 162.027 of this chapter is required at each fire hydrant serving—

(1) Machinery spaces containing oil fired boilers, internal combustion machinery or oil fuel units; and

(2) Helicopter decks.

§ 108.427 International shore connection.

A fire main system on a unit in international service must have—

(a) at least one international shore connection that meets the requirements in Subpart 162.034 of this Chapter;

(b) a cutoff valve and check valve for each connection; and

(c) facilities available enabling the connection to be used on either side of the unit.

§ 108.429 Fire main system protection.

(a) Each pipe and fire hydrant in a fire main system must be installed to the extent practicable in locations that are not exposed to damage by materials that are moved on or onto the deck.

(b) Each part of the fire main system located on an exposed deck must either be protected against freezing or be fitted with cutout valves and drain valves to shut off and drain the entire exposed system in freezing weather.

Fixed Carbon Dioxide Fire Extinguishing Systems

§ 108.431 CO_2 systems: general.

(a) Sections 108.431 through 108.457 apply to high pressure carbon dioxide fire extinguishing systems.

(b) Low pressure systems, that is, those in which the carbon dioxide is stored in liquid form at low temperature, must be approved by the Commandant.

§ 108.433 Quantity of CO_2: general.

Each CO_2 system must have enough gas to meet the quantity requirements of § 108.439 for the space requiring the greatest amount of CO_2.

§ 108.435 CO_2 for enclosed ventilation systems for rotating electrical equipment.

(a) The number of pounds of CO_2 required for the initial charge to protect enclosed ventilation systems for rotating electrical equipment must be equal to the gross volume measured in cubic feet of the system divided by—

(1) 10 systems having a volume less than 57 cubic meters (2,000 cubic feet), or

(2) 12 for systems having a volume of 57 cubic meters (2,000 cubic feet) or more.

(b) In addition to the CO_2 required for the intial charge, the system must have enough CO_2 for delayed charges to maintain at least a 25 percent concentration until the equipment can be stopped, unless the initial charge is enough to maintain a 25 percent concentration.

§ 108.437 Pipe sizes and discharges rates for enclosed ventilation systems for rotating electrical equipment.

(a) The minimum pipe size for the initial charge must meet table 108.441 and the discharge of the required amount of CO_2 must be completed within 2 minutes.

(b) The minimum pipe size for the delayed discharge must be at least 1.25 centimeters (½ inch) standard pipe.

(c) The pipe used for the initial discharge must not be used for the delayed discharge, except systems having a volume of less than 57 cubic meters (2,000 cubic feet).

§ 108.439 Quantity of CO_2 for protection of spaces.

(a) The number of pounds of CO_2 required to protect a space must be equal to the gross volume of the space divided by the appropriate factor from Table 108.439.

(b) If a machinery space includes a casing, the gross volume of the space may be calculated using the reductions allowed in 46 CFR 95.10-5(e).

(c) If fuel can drain from a space to an adjacent space or if two spaces are not entirely separate, the requirements for both spaces must be used to determine the amount of CO_2 to be provided and the CO_2 system must be arranged to discharge into both spaces simultaneously.

TABLE 108.439.—*CO_2 Supply Factors*

[Gross volume of space in cubic feet]

Over	Not over	Factor
0	500	15
500	1,600	16
1,600	4,500	18
4,500	50,000	20
50,000		22

§ 108.441 Piping and discharge rates for CO_2 systems.

(a) The size of branch lines to spaces protected by a CO_2 system must meet Table 108.441.

(b) Distribution piping within a space must be proportioned from the supply line to give proper distribution to the outlets without throttling.

(c) The number, type, and location of discharge outlets must distribute the CO_2 uniformly throughout the space.

TABLE 108.441.—*CO_2 System Pipe Size*

CO_2 supply in system, kilograms (pounds)	Minimum pipe size (inches), millimeters (inches)
45 (100)	12.7 (½).
104 (225)	19.05 (¾).
136 (300)	25.4 (1).
272 (600)	31.75 (1¼).
450 (1,000)	38.10 (1½).
1,110 (2,450)	50.80 (2).
1,130 (2,500)	63.5 (2½).
2,023 (4,450)	76.2 (3).
3,229 (7,100)	88.9 (3½).
4,750 (10,000)	101.6 (4).
6,818 (15,000)	114.3 (4½).

(d) The total area of all discharge outlets must be more than 35 percent and less than 85 percent of the nominal cylinder outlet area or the area of

the supply pipe, whichever is smaller. The nominal cylinder outlet area in square centimeters is determined by multiplying the factor 0.0313 by the number of kilograms of CO_2 required. (The nominal cylinder outlet area in square inches is determined by multiplying the factor 0.0022 by the number of pounds of CO_2 required). The nominal cylinder outlet area must not be less than 71 square millimeters (0.110 square inches).

(e) A CO_2 system must discharge at least 85 percent of the required amount within 2 minutes.

§ 108.443 Controls and valves.

(a) At least one control for operating a CO_2 system must be outside the space or spaces that the system protects and in a location that would be accessible if a fire occurred in any space that the system protects. Control valves must not be located in a protected space unless the CO_2 cylinders are also in the protected space.

(b) A CO_2 system that protects more than one space must have a manifold with a stop valve, the normal position of which is closed, that directs the flow of CO_2 to each protected space.

(c) A CO_2 system that protects only one space must have a stop valve installed between the cylinders and the discharge outlets in the system, except on a system that has a CO_2 supply of 136 kilograms (300 pounds) or less.

(d) At least one of the control stations in a CO_2 system that protects a machinery space must be as near as practicable to one of the main escapes from that space.

(e) All distribution valves and controls must be of an approved type.

(f) Each CO_2 system that has a stop valve must have a remote control that operates only the stop valve and must have a separate remote control for releasing the required amount of CO_2 into the space protected by the system.

(g) Each CO_2 system that does not have a stop valve must be operated by a remote control that releases the required amount of CO_2 into the space protected by the system.

(h) Remote controls to each space must be in an enclosure.

(i) Each system must have a manual control at its cylinders for releasing CO_2 from the cylinders, except that if the system has pilot cylinders, a manual control is not required for other than pilot cylinders.

(j) If gas pressure is used to release CO_2 from a system having more than 2 cylinders, the system must have at least 2 pilot cylinders to release the CO_2 from the remaining cylinders.

(k) If the entrance to a space containing the CO_2 supply or controls of a CO_2 system has a lock, the space must have a key to the lock in a break-glass type box that is next to and visible from the entrance.

§ 108.445 Alarm and means of escape.

(a) Each CO_2 system that has a supply of more than 136 kilograms (300 pounds) of CO_2, except a system that protects a tank, must have an alarm that sounds for at least 20 seconds before the CO_2 is released into the space.

(b) Each audible alarm for a CO_2 system must have the CO_2 supply for the system as its source of power and must be in a visible location in the spaces protected.

§ 108.447 Piping.

(a) Each pipe, valve, and fitting in a CO_2 system must have a bursting pressure of at least 420 kilograms per square centimeter (6,000 pounds per square inch).

(b) All piping for a CO_2 system of nominal size of 19.05 millimeters (¾ inch) inside diamater or less must be at least Schedule 40 (standard weight) and all piping of nominal size over 19.05 millimeters (¾ inch) inside diameter must be at least Schedule 80 (extra heavy).

(c) Each pipe, valve, and fitting made of ferrous materials in a CO_2 system must be protected inside and outside from corrosion.

(d) Each CO_2 system must have a pressure relief valve set to relieve between 168 and 196 kilograms per square centimeter (2,400 and 2,800 pounds per square inch) in the distribution manifold or other location that protects the piping when all branch line shut off valves are closed.

(e) The end of each branch line in a CO_2 system must extend at least 50 millimeters (2 inches) beyond the last discharge outlet and be closed with a cap or plug.

(f) Piping, valves, and fittings in a CO_2 system must be securely supported and protected from damage.

(g) Each CO_2 system must have drains and dirt traps located where dirt or moisture can accumulate in the system.

(h) Discharge piping in a CO_2 system may not be used for any other purpose except as part of a fire detection system.

(i) Piping in a CO_2 system that passes through accommodation spaces must not have drains or other openings within these spaces.

§ 108.449 Piping tests.

(a) Each test prescribed in (b), (c), and (d) of this section must be performed upon completion of the piping installation.

(b) When tested with CO_2 or other inert gas under a pressure of 70 kilograms per square centimeter (1000 pounds per square inch), with no additional gas introduced into the system, the leakage in the piping from the cylinders to the stop valves in the manifold must not allow a pressure drop of more than 10.5 kilograms per square centimeter (150 pounds per square inch) per minute for a 2 minute period.

(c) When tested with CO_2 or other inert gas under a pressure of 42 kilograms per square centimeter (600 pounds per square inch), with no additional gas introduced into the system, the leakage in each branch line must not allow a pressure drop of more than 10.5 kilograms per square centimeter (150 pounds per square inch) per minute for a 2-minute period. The distribution piping must be capped within the protected space.

(d) Small independent systems protecting emergency generator rooms, lamp lockers and similar small spaces need not meet the tests prescribed in paragraphs (a) and (b) of this section if they are tested by blowing out the piping with air at a pressure of at least 7 kilograms per square centimeter (100 pounds per square inch).

§ 108.451 CO_2 storage.

(a) Except as provided in paragraph (b) of this section, each cylinder of a CO_2 system must be outside each space protected by the system and in a location that would be accessible if a fire occurred in any space protected by the system.

(b) A CO_2 system that has a CO_2 supply of 136 kilograms (300 pounds) or less may have one or more cylinders in the space protected by the system if the space has a heat detection system to activate the system automatically in addition to the remote and manual controls required by this subpart.

(c) Each space that contains cylinders of a CO_2 system must be ventilated and designed to prevent an ambient temperature of more than 54° C. (130° F.)

(d) Each cylinder in a CO_2 system must be securely fastened, supported, protected from damage, in an accessible location, and capable of removal from that location.

(e) Each unit must have a means for weighing cylinders of a CO_2 system.

(f) A cylinder in a CO_2 system may not be mounted in a position that is inclined more than 30° from a vertical position, except that a cylinder having flexible or bent siphon tubes may be mounted in a position that is inclined up to 80° from the vertical. The bottom of each cylinder when mounted must be at least 5 centimeters (2 inches) from the deck.

(g) If a cylinder does not have a check valve on its independent cylinder discharge, it must have a plug or cap to close the outlet when the cylinder is moved.

D E 4 7 8 UMI

V 4 3 / 2 3 3

(h) Each CO_2 system cylinder must be made, tested, and marked in accordance with 46 CFR 147.04-1.

§ 108.453 Discharge outlets.

Each discharge outlet must be of an approved type.

§ 108.455 Enclosure openings.

(a) Mechanical ventilation for spaces protected by a CO_2 system must be designed to shut down automatically when the system is activated.

(b) Each space that is protected by a CO_2 system and that has natural ventilation must have a means for closing that ventilation.

(c) Each space protected by a CO_2 system must have the following means for closing the openings to the space from outside the space:

(1) Doors, shutters, or dampers for closing each opening in the lower portion of the space.

(2) Doors, shutters, dampers or temporary means such as canvas or other material normally on board a unit may be used for closing each opening in the upper portion of the space.

§ 108.457 Pressure release.

Each air tight or vapor tight space, such as a paint locker, that is protected by a CO_2 system must have a means for releasing pressure that accumulates within the space if CO_2 is discharged into the space.

Halongenated Gas Extinguishing System

§ 108.458 General.

Halongenated gas extinguishing systems may be installed if approved by the Commandant.

FOAM EXTINGUISHING SYSTEMS

§ 108.459 Number and location of outlets.

(a) A foam extinguishing system in a space must have enough outlets to spread a layer of foam of uniform thickness over the deck or bilge areas of the space.

(b) A foam extinguishing system in a space that has a boiler on a flat that is open to or can drain into a lower portion of the space must have enough outlets to spread a layer of foam of uniform thickness over the—

(1) Flat; and

(2) Deck or bilge areas of the space.

(c) A foam extinguishing system for a tank must have enough outlets to spread a layer of foam of uniform thickness over the surface of the liquid in the tank.

§ 108.461 Coamings.

Each machinery flat in a space that has a foam extinguishing system must have coamings that are high enough to retain spilled oil and foam on the flat on all openings except deck drains.

§ 108.463 Foam rate: Protein.

(a) If the outlets of a protein foam extinguishing system are in a space, the foam rate at each outlet must be at least 6.52 liters per minute for each square meter (.16 gallons per minute for each square foot) of area covered by the systems.

(b) If the outlets of a protein foam extinguishing system are in a tank, the foam rate at each outlet must be at least 4.07 liters per minute for each square meter (.1 gallon per minute for each square foot) of liquid surface in the tank.

§ 108.467 Water supply.

The water supply of a foam extinguishing system must not be the water supply of the fire main system on the unit unless when both systems are operated simultaneously—

(a) The water supply rate to the foam production equipment meets the requirements of this section; and

(b) Water supply rate to the fire hydrants required by § 108.415 of this subpart allows compliance with the pressure requirement in that section.

§ 108.469 Quantity of foam producing materials.

(a) Except as provided in paragraph (b) of this section, each foam extinguishing system with outlets—

(1) In a tank must have enough foam producing material to discharge foam for at least 5 minutes at each outlet; and

(2) in a space must have enough foam producing material to discharge foam for at least 3 minutes at each outlet.

(b) If a foam system has outlets in more than one tank or space, the system need have only enough foam producing material to cover the largest space that the system covers or, if the liquid surface of a tank covered by the system is larger, the tank with the largest liquid surface.

§ 108.471 Water pump.

Each water pump in a foam extinguishing system must be outside each machinery space in which the system has outlets and must not receive power from any of those spaces.

§ 108,473 Foam system components.

(a) Each foam agent, each tank for a foam agent, each discharge outlet, each control, and each valve for the operation of a foam extinguishing system must be approved by the Commandant.

(b) Each foam agent tank and each control and valve for the operation of a foam extinguishing system with outlets in a space must be outside the space and must not be in a space that may become inaccessible if a fire occurs in the space.

(c) Each control for a foam extinguishing system with outlets in a space must be near a main escape from the space.

§ 108.474 Aqueous film forming foam systems.

Aqueous film forming foam systems may be installed if approved by the Commandant.

§ 108.475 Piping.

(a) Each pipe, valve, and fitting in a foam extinguishing system must meet the applicable requirements in Subchapter F of this chapter.

(b) Each pipe, valve, and fitting made of ferrous material must be protected inside and outside from corrosion.

(c) Each pipe, valve, and fitting must have support and protection from damage.

(d) Each foam extinguishing system must have enough—

(1) Dirt traps to prevent the accumulation of dirt in its pipes; and

(2) Drains to remove liquid from the system.

(e) Piping in a foam extinguishing system must be used only for discharging foam.

§ 108.477 Fire hydrants.

(a) If a fixed foam extinguishing system has outlets in a main machinery space, at least 2 fire hydrants, in addition to the fire hydrants required by § 108.423 of this subpart, must be installed outside the entrances to the space with each at a separate entrance.

(b) Each hydrant must have enough hose to spray any part of the space.

(c) Each hydrant must have a combination nozzle and applicator.

FIRE PROTECTION FOR HELICOPTER FACILITIES

§ 108.486 Helicopter decks.

At least two of the accesses to the helicopter landing deck must each have a fire hydrant on the unit's fire main system located next to them.

§ 108.487 Helicopter deck fueling operations.

(a) Each helicopter landing deck on which fueling operations are conducted must have a fire protection system that discharges protein foam or aqueous film forming foam.

(b) a system that only discharges foam must—

(1) Have enough foam agent to discharge foam continuously for at least 5 minutes at maximum discharge rate;

(2) Have at least the amount of foam agent needed to cover an area equivalent to the swept rotor area of the

largest helicopter for which the deck is designed with foam at—

(i) If protein foam is used, 6.52 liters per minute for each square meter (.16 gallons per minute for each square foot) of area covered for five minutes;

(ii) If aqueous film forming foam is used, 4.07 liters per minute for each square meter (.1 gallons per minute for each square foot) of area covered for five minutes; and

(3) Be capable of discharging from each hose at 7 kilograms per square centimeter (100 pounds per square inch) pressure—

(i) A single foam stream at a rate of at least 340 liters (90 gallons) per minute; and

(ii) A foam spray at a rate of at least 190 liters (50 gallons) per minute.

(c) Each system must have operating controls at each of its hose locations, be protected from icing and freezing, and be capable of operation within 10 seconds after activation of its controls.

(d) Each system must have at least one hose at each of the two access routes required by § 108.235(f) of this Part. Each hose must be reel mounted and long enough to cover any point on the helicopter deck. Each hose that discharges foam must have a nozzle that has foam stream, foam spray, and off positions.

§ 108.489 Helicopter fueling facilities.

(a) Each helicopter fueling facility must have a fire protection system that discharges one of the following agents in the amounts prescribed for the agents over the area of the fuel containment systems around marine portable tanks, fuel transfer pumps and fuel hose reels:

(1) Protein foam at the rate of 6.52 liters per minute for each square meter (.16 gallons per minute for each square foot) of area covered for five minutes.

(2) Aqueous film forming foam at the rate of 4.07 liters per minute for each square meter (.1 gallon per minute for each square foot) of area covered for five minutes.

(3) 22.5 kilograms (50 pounds) of dry chemical (B-V semi-portable) for each fueling facility of up to 27.87 square meters (300 square feet).

(b) If the fire protection system required by § 108.487 of this subpart is arranged so that it covers both a helicopter fueling facility and a landing deck, the system must have the quantity of agents required by this section in addition to the quantity required by § 108.487.

HAND PORTABLE AND SEMIPORTABLE FIRE EXTINGUISHING SYSTEMS

§ 108.491 General.

Each hand portable and semiportable fire extinguisher on a unit must be approved under Subpart 162.028 or 162.039 of this chapter.

§ 108.493 Location.

(a) Each unit must have the hand portable and semiportable fire extinguishers prescribed in Table 108.495(a) of this subpart and installed in the locations prescribed in the table.

(b) Each portable and semi-portable fire extinguisher must be visible and readily accessible.

(c) The location, size, and number of each portable and semiportable fire extinguisher on a unit must be acceptable to the appropriate OCMI. The OCMI may require extinguishers in addition to those prescribed in Table 108.495(a) if he considers them necessary for fire protection on the unit.

(d) Each hand portable and semiportable fire extinguisher that has a nameplate which states that it is to be protected from freezing, must be located where freezing temperatures do not occur.

§ 108.495 Spare charges.

(a) Each unit must have enough spare charges for 50 percent of the hand portable fire extinguishers required under Table 108.495(a) of this subpart that are rechargeable by personnel on the unit.

(b) If a unit has extinguishers that cannot be recharged by personnel on unit, it must also have at least one spare extinguisher for each classification and variety of those extinguishers.

TABLE 108.495(a).—*Hand Portable Fire Extinguishers and Semiportable Fire-Extinguishing Systems*

Space	Classification (see table 108.495(b))	Quantity and location
SAFETY AREAS		
Wheelhouse and control room	C-I	2 in vicinity of exit.
Stairway and elevator enclosure		None required.
Corridors	A-II	1 in each corridor not more than 150 ft (45 m) apart. (May be located in stairways.)
Lifeboat embarkation and lowering stations		None required.
Radio room	C-I	2 in vicinity of exit.
ACCOMMODATIONS		
Staterooms, toilet spaces, public spaces, offices, lockers, small storerooms, and pantries, open decks, and similar spaces.		None required.
SERVICE SPACES		
Galleys	B-II or C-II	1 for each 2,500 ft² (232 m²) or fraction thereof suitable for hazards involved.
Paint and lamp rooms	B-II	1 outside each room in vicinity of exit.
Storerooms	A-II	1 for each 2,500 ft² (232 m²) or fraction thereof located in vicinity of exits, either inside or outside the spaces.
Work shop and similar spaces	C-II	1 outside each space in vicinity of an exit.
MACHINERY SPACES		
Oil-fired boilers: Spaces containing oil-fired boilers, either main or auxiliary, or their fuel oil units.	B-II	2 required in each space.
	B-V	1 required in each space.
Internal combustion or gas turbine propelling machinery spaces.	B-II	1 for each 1,000 brake horsepower but not less than 2 nor more than 6 in each space.
	B-III	1 required in each space. See note 1.
Motors or generators of electric propelling machinery that do not have an enclosed ventilating system.	C-II	1 for each motor or generator.
Motors and generators of electric propelling machinery that have enclosed ventilating systems.		None required.
AUXILIARY SPACES		
Internal combustion engines or gas turbine	B-II	outside the space containing engines or turbines in vicinity of exit.
Electric emergency motors or generators	C-II	1 outside the space containing motors or generators in vicinity of exit.
Steam driven auxiliary machinery		None required.
Trunks to machinery spaces		Do.
Fuel tanks		Do.
MISCELLANEOUS AREAS		
Helicopter landing decks	B-V	1 at each access route.
Helicopter fueling facilities	B-IV	1 at each fuel transfer facility. See note 2.
Drill floor	C-II	2 required.
Cranes with internal combustion engines	B-II	1 required.

NOTE.—1. Not required where a fixed gas extinguishing system is installed.
2. Not required where a fixed foam system is installed in accordance with sec. 108.489 of this subpart.

§ 108.514 Life preservers.

TABLE 108.495(b)

	Classification: Type and size	Water liters (gallons)	Foam liters (gallons)	Carbon dioxide kilograms (pounds)	Dry chemical kilograms (pounds)	Halon 1211 kilograms (pounds)
A	II	9.5 (2½)	9.5 (2½)		2.25 (5) [3]	
B	I		4.7 (1¼)	1.8 (4)	0.9 (2)	1.1 (2½)
B	II		9.5 (2½)	6.7 (15)	4.5 (10)	4.5 (10) [4]
B	III		45.5 (12)	15.8 (35)	9.0 (20)	
B	IV		7.6 (20)	22.5 (50)	13.5 (30)	
B	V		152 (40)	45 (100) [4]	22.5 (50) [4]	
C	I			1.8 (4)	0.9 (2)	
C	II			6.7 (15)	4.5 (10)	
C	III			15.8 (35)	9.0 (20)	
C	IV			22.5 (50)	13.5 (30)	

NOTE 1.—Fire extinguisher are designed by type as follows: (a) "A" for fires in combustible materials such as wood, (b) "B" for fires in flammable liquids and greases, (c) "C" for fires in electrical equipment.

2.—Fire extinguishers are designated by size where size "I" is the smallest and size "V" is the largest. Sizes "I" and "II" are hand-portable extinguishers and sizes "III", "IV", and "V" are semiportable extinguishers.

3.—Must be specifically approved as a type A, B, or C extinguisher.

4.—For outside use, double the quantity of agent that must be carried.

5.—For outside use only.

MISCELLANEOUS FIREFIGHTING EQUIPMENT

§ 108.497 Fireman's outfits.

Each unit must have at least 2 fireman's outfits. Each fireman's outfit on a unit must consist of—

(a) A self-contained breathing apparatus approved under § 160.011 of this chapter;

(b) A three-cell, explosion proof flashlight with the Underwriter's Laboratories, Inc., label and set of spare batteries for the flashlight;

(c) An oxygen and explosive meter with the Underwriter's Laboratories, Inc. label or the Factory Mutual label;

(d) A lifeline that—

(1) Is attached to the self-contained breathing apparatus;

(2) Is made of bronze wire rope, inherently corrosion resistant steel wire rope, or galvanized or tinned steel wire rope;

(3) Is made up of enough 15.2 meters (50 foot) or greater lengths of wire rope to permit use of the outfit in any location on the unit;

(4) Has each end fitted with a hook with a 16 millimeters (⅝ inch) throat opening for the keeper; and

(5) Has a minimum breaking strength of 680 kilograms (1,500 pounds).

(e) Boots and gloves that are made of rubber or other electrically nonconductive material;

(f) A helmet that meets the requirements in ANSI standard Z-89.1-1969; and

(g) Clothing that protects the skin from scalding steam and the heat of fire and that has a water resistant outer surface.

§ 108.499 Fire axes.

Each unit must have at least two fire axes.

Subpart E—Lifesaving Equipment

§ 108.501 Survival capsule.

For the purposes of this subchapter, the term lifeboat includes survival capsules.

§ 108.503 Lifeboats.

(a) Each unit with 30 persons or less allowed on board must have at least one lifeboat. Each unit with more than 30 persons allowed on board must have at least two lifeboats. The total number of lifeboats on a unit must accommodate all personnel on board.

(b) Each lifeboat on a unit must be approved under Subpart 160.035 of this chapter.

(c) Each lifeboat on a unit must be motor propelled and have a permanently installed rigid enclosure of international orange that provides protection from exposure and fire during operation of the lifeboat.

(d) Each lifeboat on a unit must have the equipment required by § 94.20-10 of this Chapter for a lifeboat on an ocean or coastwise vessel other than a seagoing barge, except that the following equipment is not required:

(1) Ditty bag.

(2) Lantern if the lifeboat has equivalent interior lighting.

(3) Illuminating oil, if the lifeboat does not carry a lantern.

(4) Protecting cover.

(e) In addition to the equipment listed in paragraph (d), the following equipment is not required for each lifeboat on a unit which is not in international service:

(1) Condensed milk.

(2) Oars.

(3) Storm oil.

(4) Provisions.

(5) Rowlocks.

(f) Each lifeboat must have a list of the equipment it is required to carry. Except for boat hooks, the equipment and list must be securely stowed in the lifeboat. The equipment required by paragraph (d) must meet the requirements of § 94.20-15 of this Chapter.

(g) Each unit must have a manual for each lifeboat containing the following detailed information:

(1) Instructions for launching the lifeboat.

(2) Instructions for operating the lifeboat, its accessories, and its equipment.

(3) Maintenance and repair instructions.

(4) Schedule of periodic maintenance.

(5) Diagram of lubrication points with recommended lubricants.

(6) List of replaceable parts.

(7) List of sources of repair parts.

(8) Log of records of inspections and maintenance.

§ 108.505 Liferafts.

(a) Each unit must have enough inflatable liferafts to accommodate at least 100% of the persons allowed on board.

(b) Each inflatable liferaft on a unit must—

(1) be approved under Subpart 160.051 of this chapter as an inflatable liferaft intended for an ocean service vessel; and

(2) have a carrying capacity of not less than 6 nor more than 25 persons.

(c) Lifeboats in addition to those required by § 108.503 may be substituted for inflatable liferafts.

§ 108.506 Lifeboat and liferaft launching capability.

(a) Each lifeboat and liferaft on a surface type unit must be capable of being launched to the water at the minimum operating draft when the unit has an adverse list up to 15° or trim up to 10°.

(b) Each lifeboat and liferaft on a non-surface type unit must be capable of being launched to the water at the maximum operating height above the water when the unit has an adverse list and trim, the amount of which is determined by the characteristics of the unit.

(c) Each liferaft on a unit which is launched from a position more than 3 meters (10 ft.) above the water must be davit launched.

§ 108.507 Launching equipment for lifeboats.

(a) Each unit must have the following launching equipment for each lifeboat:

(1) Mechanical disengaging apparatus that is approved under Subpart 160.033 of this chapter.

(2) Gravity davits that are approved under Subpart 160.032 of this chapter.

(3) A winch that is approved under Subpart 160.015 of this chapter.

(4) A means to hold the lifeboat steady in a location that allows the full complement to board the boat prior to launching.

(5) Wire falls that are—

(i) Equal or superior to 6 x 19 regular lay filler wire, pre-lubricated during construction;

(ii) Not more than 2 part falls; and

(iii) Designed to have a minimum breaking strength of at least six times the maximum working load.

(6) Blocks, if necessary to allow the falls to lead freely from the drum of the winch, that—

(i) Have sheaves each with a diameter measured from the base of the groove in the sheave that is at least 12 times as large as the diameter of the fall passing over the sheave;

(ii) Have a means to lubricate the moving parts of the blocks; and

(iii) Are designed to have a minimum breaking strength of at least six times the maximum working load.

(b) The lowering mechanism for the lifeboat must be operative from the lifeboat and from the unit.

(c) Each exposed wire fall on a unit must have a cover or means of protection from damage or fouling.

(d) The winch controls on the unit must be located where the operator can observe the lifeboat launching.

§ 108.508 Launching equipment for davit launched inflatable liferafts.

(a) Each unit must have the following launching equipment at each launching station:

(1) Winches that are approved by the Commandant (G-MMT).

(2) Mechanical disengaging apparatus that is approved by the Commandant (G-MMT).

(3) Davits that are approved by the Commandant (G-MMT).

(4) Load bearing components that meet §§ 108.507(a)(5), 108.507(c), and 108.509.

(5) A means to hold the liferaft in a location that allows a person to enter the liferaft.

(6) A means to rapidly retrieve the falls if the station has more than one liferaft.

(b) The launching equipment must be capable of being operated by a person in the liferaft and a person on the unit.

(c) The winch controls on the unit must be located where the operator can observe the liferaft launching.

(d) The launching equipment must be arranged so that a loaded liferaft does not have to be lifted before it is lowered.

(e) Not more than two liferafts may be launched from the same set of launching equipment.

§ 108.509 Wire fall fleet angle.

(a) "Fleet angle" is the angle made by two lines that intersect at the center of the sheave. One line is perpendicular to the axis of the drum and the other passes through either end of the drum at its axis.

(b) The portion of a wire fall between the drum of a winch on a unit and the first sheave over which the wire fall passes must have a fleet angle that is less than 8 degrees if the drum is a grooved drum and less than 4 degrees if the drum is a nongrooved drum.

§ 108.510 Hydrostatic releases.

Each inflatable liferaft that is not intended for davit launching must have—

(a) A hydrostatic release approved under Subpart 160.062 of this chapter; or

(b) A means to ensure that the liferaft will float free if the unit sinks.

§ 108.511 Lifeboat and liferaft arrangement.

The lifeboats and liferafts on a unit must be arranged—

(a) To provide ready access to them;

(b) So that a fire or other casualty does not immobilize all lifeboats and liferafts;

(c) So that they are accessible for inspection, maintenance, and testing;

(d) In locations clear of overboard discharge lines, propellers, and hull obstructions; and

(e) In locations to launch as designed.

§ 108.514 Life preservers.

(a) Each unit must have enough adult life preservers for 125% of the persons allowed on board.

(b) Each unit must have lockers, boxes, closets, shelves, or racks in readily accessible locations in berthing areas, watch stations, or other work areas for the stowage of life preservers. The stowage containers must not be capable of being locked.

(c) Each life preserver on a unit must be approved under Subpart 160.002, 160.005, or 160.055 of this chapter as a Type I—personal flotation device.

(d) Each life preserver on a unit must have a whistle that is—

(1) Of a ball-type;

(2) Corrosion resistant; and

(3) Attached to the life preserver by a 1 meter (3 foot) lanyard that—

(i) Does not have hooks, snaps, clips, or other metal connecting devices;

(ii) Allows the whistle to extend at least 38 centimeters (15 inches) from the top of the life preserver; and

(iii) Is coiled and bound with breakable thread.

§ 108.515 Ring life buoys.

(a) Each unit must have at least eight ring life buoys and mounting racks.

(b) Each ring life buoy on a unit must—

(1) Have a mounting rack that secures the buoy and allows it to be easily removed from the rack;

(2) Be approved under Subpart 160.009 or 160.050 of this chapter.

(c) At least four ring life buoys on a unit must each have a waterlight attached to the buoy by a 1 to 2 meters (3 to 6 foot) lanyard. Each waterlight must be approved under Subpart 161.012 of this chapter.

(d) At least two ring life buoys that have water light must each—

(1) Have a smoke signal approved under Subpart 160.057 of this chapter that self-activates when the ring life buoy is released from its mounting rack;

(2) Have a releasing mechanism that can be operated from the bridge, except that if the bridge is not continuously manned the mechanism must be capable of operation from a location authorized by the OCMI; and

(3) Be mounted in a location where the buoy, if released by the releasing mechanism, will drop into the water.

(e) At least one ring life buoy on each side of the unit, excluding those required by paragraph (d), must have a buoyant line attached to the buoy that is 1½ times the distance from the buoy to the design waterline of the unit or 15 fathoms in length, whichever is greater. The end of the line must not be secured to the unit.

(f) Each ring life buoy on a unit

centimeters (20 inches) on one side for

and designated by a testing laboratory

(3) Does not allow the plug to fall on to the deck.

be marked: "SELF CONTAINED BREATHING APPARATUS".

trol located above seat level must be on a background that contrasts with

V 4 3 / 2 3 3 D E 4 7 8 UMI

(f) Each ring life buoy on a unit must be readily accessible to persons on board.

§ 108.517 Line throwing appliance.

(a) Each unit on an international voyage must have at least one impulse projected rocket type line throwing appliance that is approved under Subpart 160.040 of this chapter.

(b) Each unit not on an international voyage must have—

(1) An impulse projected rocket type line throwing appliance that is approved under Subpart 160.040 of this chapter; or

(2) A shoulder type line throwing gun approved under Subpart 160.031 of this chapter.

§ 108.519 Portable radio apparatus.

Each unit on an international voyage must have a portable radio apparatus that meets the requirements of the Federal Communications Commission.

§ 108.521 Distress signals.

(a) Each unit must have at least 12 hand held, rocket-propelled, parachute, red flare, distress signals. Each distress signal on a unit must be approved under Subpart 160.036 of this chapter.

(b) Each distress signal must be stowed in a portable, watertight, and noncorrosive container on the bridge or, if the unit does not have a bridge, in the control room.

§ 108.523 EPIRB.

Each self-propelled unit must have an Class A emergency position indicating radio beacon (EPIRB). Each EPIRB on a unit must be approved under Subpart 161.011 of this chapter.

§ 108.525 Means of embarkation.

(a) Except as provided in paragraph (c), each unit must have a chain suspension ladder approved under subpart 160.017 of this chapter for each lifeboat and liferaft launching station.

(b) Each chain suspension ladder must extend to the unit's lightwaterline the unit at a 15 degree list away from the side where the ladder is installed.

(c) If a chain suspension ladder cannot be supported against a vertical flat surface, a fixed ladder must be installed; however no more than four fixed ladders are required.

(d) Each inclined fixed ladder must—

(1) be at least 71 centimeters (28 inches) wide; and

(2) have a pitch of 50° or less.

(e) Each vertical fixed ladder must meet the requirements of § 108.160 for Fixed Ladders, except that vertical bars in cages must be open at least 50 centimeters (20 inches) on one side for the length of the ladder.

§ 108.527 Additional means of abandonment.

Portable slides, safety booms, moveable ladders, elevators, and other means of abandonment may be installed if approved by the Commandant.

Subpart F—Cranes and Power Operated Industrial Trucks

CRANES

§ 108.601 Crane design.

(a) Each crane and crane foundation on a unit must be designed in accordance with the American Petroleum Institute Specification for Offshore Cranes, API Spec. 2C, Second Edition, February, 1972 (with supplement 2).

(b) In addition to the design requirements of paragraph (a), each crane must have the following:

(1) Each control marked to show its function.

(2) Instruments with built-in lighting.

(3) Fuel tank fills and overflows that do not run onto the engine exhaust.

(4) No gasoline engines.

(5) Spark arrestors fitted on engine exhaust pipes.

POWER OPERATED INDUSTRIAL TRUCKS

§ 108.611 Power operated industrial trucks: definition.

For the purposes of § 108.613 through § 108.615, "power industrial truck" means a tractor, lift truck, or specialized industrial truck used for material handling on a unit.

§ 108.613 Power operated industrial trucks.

(a) Each power operated industrial truck used on a unit must have a type designation as follows:

(1) "E"—electrically powered trucks that have safeguards against inherent sources of ignition.

(2) "EE"—electrically powered trucks that have the requirements for "E" trucks, and completely enclosed electric motors and equipment.

(3) "EX"—electrically powered trucks whose electrical fittings and equipment are designed, constructed, and assembled to permit the trucks to be used in atmospheres containing flammable vapors or dusts.

(4) "D"—diesel powered trucks that have safeguards against inherent sources of ignition.

(5) "DS"—diesel powered trucks that are provided with safeguards to the exhaust, fuel, and electrical systems not provided on a "D" truck.

(b) Each power operated industrial truck used on a unit must be approved and designated by a testing laboratory listed in paragraph (c) of this section.

(c) The following testing laboratories are accepted for the purposes of this section:

(1) Underwriters' Laboratories, Inc., P.O. Box 247, Northbrook, Illinois, 60092.

(2) Factory Mutual Laboratories Engineering Division, 1115 Boston Providence Turnpike, Norwood, Massachusetts 02062.

(d) Each power operated industrial truck used on a unit must have at least the following safety features:

(1) A warning device that can be heard above normal background noises.

(2) A driver's overhead guard if, during normal operations, the operator may be exposed to falling objects.

(3) If the truck has a fork lift—

(i) A vertical load back rest extension or rack to prevent the load from falling toward the driver when the mast is in a position of maximum backward tilt;

(ii) A means of securing the forks to the carriage to prevent unintentional lifting of the toe;

(iii) A means of securing fork extensions and other attachments to prevent lifting or displacement on the primary forks; and

(iv) A factor of safety for the forks of at least three to one, based on the elastic limit of the fork material.

(4) Guards on each exposed wheel to prevent the wheel from throwing particles at the operator.

(5) Steering controls that are—

(i) Within the clearances of the truck; or

(ii) Guarded so that movement of the controls will not result in injury to the operator when the truck is passing an obstruction.

(e) A steering knob may be mounted within the perimeter of the wheel, if used on a steering mechanism that allows the wheel to spin as a result of road action. The steering knob must be—

(1) A mushroom type that engages the palm of the operator's hand; or

(2) Arranged in some other manner to prevent injury to the operator.

§ 108.615 Charging facilities for battery powered industrial trucks.

Each supply or charging circuit for charging batteries of powered industrial trucks must be connected to the truck by a portable plug that is—

(a) Break away type; and

(b) Connected to the charging outlet so that any movement of the truck away from the charging station—

(1) Breaks the connection;

(2) Does not expose any live parts to contact with a conducting surface or object; and

(3) Does not allow the plug to fall on to the deck.

Subpart G—Equipment Markings and Instructions

§ 108.621 Equipment markings: general.

Unless otherwise provided, each marking required in this subpart must be—

(a) Printed in English;

(b) In red letters with a contrasting background;

(c) Permanent;

(d) Easy to be seen;

(e) At least 1.3 centimeters (½ inch) in height.

§ 108.623 General alarm bell switch.

Each general alarm bell switch must be marked "GENERAL ALARM" on a plate or other firm noncorrosive backing.

§ 108.625 General alarm bell.

Each general alarm bell must be identified by marking "GENERAL ALARM—WHEN BELL RINGS GO TO YOUR STATION" next to the bell.

§ 108.627 Carbon dioxide alarm.

Each carbon dioxide alarm must be identified by marking: "WHEN ALARM SOUNDS VACATE AT ONCE. CARBON DIOXIDE BEING RELEASED" next to the alarm.

§ 108.629 Fire extinguishing system branch line valve.

Each branch line valve of each fire extinguishing system must be marked with the name of the space or spaces it serves.

§ 108.631 Fixed fire extinguishing system controls.

(a) Each cabinet or space that contains a valve, control, or manifold of a fixed fire extinguishing system must be marked by one of the following: "CARBON DIOXIDE FIRE APPARATUS", "FOAM FIRE APPARATUS", or "WATER SPRAY FIRE APPARATUS" in letters at least 5 centimeters (2 inches) high.

(b) Instructions for the operation of a fixed fire extinguishing system must be posted next to a fire apparatus described in paragraph (a) of this section.

§ 108.633 Fire stations.

Each fire station must be identified by marking: "FIRE STATION NO. —" next to the station in letters and numbers at least 5 centimeters (2 inches) high.

§ 108.635 Self-contained breathing apparatus.

Each locker or space containing self-contained breathing apparatus must be marked: "SELF CONTAINED BREATHING APPARATUS".

§ 108.636 Work vests.

Each space containing a work vest must be marked: "WORK VEST".

§ 108.637 Hand portable fire extinguishers.

(a) Each hand portable fire extinguisher must be marked with a number that identifies it in relation to all other hand portable fire extinguishers.

(b) The location of each hand portable fire extinguisher must be marked with the same number that is marked on the extinguisher.

§ 108.639 Emergency lights.

Each emergency light must be marked: "E".

§ 108.641 Instructions for changing steering gear.

Instructions stating, in order, the different steps to be taken for changing to emergency and secondary steering gear must be posted in the steering gear room and at each secondary steering station in 1.3 centimeters (½ inch) letters and numerals of contrasting color to the background.

§ 108.643 Rudder orders.

At each steering station, the direction which the wheel or steering device must be moved for right rudder or left rudder must be marked in letters of contrasting color to the background on the wheel or steering device or in a place that is directly in the helmsman's line of vision to indicate "RIGHT RUDDER" and "LEFT RUDDER".

§ 108.645 Lifeboats.

(a) The bow of each lifeboat must be marked in letters and numbers of contrasting color to the background with—

(1) The name and port of registry of the unit in letters at least 7.5 centimeters (3 inches) high;

(2) The number of the boat in numbers at least 7.5 centimeters (3 inches) high; and

(3) The number of persons allowed in the boat in letters and numbers at least 4 centimeters (1½ inches) high.

(b) Each mechanical disengaging apparatus control lever must be colored red with the following marked on or next to the lever: "DANGER-LEVER DROPS BOAT" or "DANGER-LEVER RELEASES HOOKS".

(c) The location of each mechanical disengaging apparatus control lever located at or below seat level must be marked by a band of color contrasting to its surroundings approximately 30 centimeters (12 inches) wide from the keel to each side bench. Each mechanical disengaging apparatus control located above seat level must be on a background that contrasts with its red color.

§ 108.647 Inflatable liferafts.

Each inflatable liferaft must be identified by marking: "INFLATABLE LIFERAFT NO. — . . . . PERSONS CAPACITY" on a sign next to the liferaft or its container—

(a) in letters at least 4 centimeters (1½ inches) high; and

(b) in a contrasting color to the background.

§ 108.649 Life preservers and ring life buoys.

(a) Each life preserver must be marked in a color in contrast to the life preserver with the unit's name.

(b) Each locker box or closet used for stowing life preservers must be marked "LIFE PRESERVERS".

(c) Each ring life buoy must be marked in a color in contrast to the ring lifebuoy with the unit's name and port of registry.

§ 108.651 Portable magazine chests.

Each portable magazine chest must be marked: "PORTABLE MAGAZINE CHEST — FLAMMABLE — KEEP LIGHTS AND FIRE AWAY" in letters at least 7.5 centimeters (3 inches) high.

§ 108.653 Helicopter facilities.

(a) Each helicopter fueling facility must be marked adjacent to the fueling hose storage: "WARNING — HELICOPTER FUELING STATION — KEEP LIGHTS AND FIRE AWAY".

(b) Each storage tank for helicopter fuel must be marked: "DANGER — FLAMMABLE LIQUID".

(c) Each access to a helicopter landing area must be marked: "BEWARE OF TAIL ROTOR".

(d) Each marking required by this section must be in letters at least 7.5 centimeters (3 inches) high.

§ 108.655 Lifeboat and liferaft instructions.

Placards approved by the Commandant that contain instructions for launching lifeboats and liferafts and inflating inflatable liferafts must be conspicuously posted.

§ 108.657 Unit markings.

The hull of each unit must be marked in accordance with Parts 67 and 69 of this chapter.

§ 108.659 Breeches buoy and lifesaving signal instructions.

Instructions on Form CG-811 for the use of breeches buoys and lifesaving signals must be posted so that they can be easily seen in the pilothouse or control room, engine room, each messroom, and each recreation room.

corrections, and instructions for apply-

V 4 3 / 2 3 3

§ 108.661 Unit markings: draft marks.

(a) Each unit must have draft marks for each foot of immersion—

(1) If the unit is a surface unit, on both the port and starboard sides of the stem and the stern-post or rudder-post or at any other place at the stern of the unit as may be necessary for easy observance;

(2) If the unit is a self-elevating unit, near each corner of the hull but not more than 4 required; and

(3) If the unit is a column-stabilized unit, on each corner column, continuing to the footing or lower displacement hull.

(b) The bottom of each mark must be at the draft indicated by that mark.

(c) Each mark must be—

(1) In numerals 15 centimeters (6 inches) high; and

(2) In contrasting color to the background.

(d) For the purposes of this section, "draft" means the distance from the bottom of the keel or the lowest shell plate on the outer surface of the unit to the surface of the water, except that where a unit has a permanent appendage extending below the bottom of the keel, "draft" means the distance from the lowest part of the appendage to the surface of the water.

§ 108.663 Unit markings: load line.

Each unit that is assigned a load line must have the load line marked in accordance with Part 42 of this Chapter.

§ 108.665 Appliances for watertight integrity.

Each watertight door, scuttle, and hatch required for watertight integrity, which may be opened during normal operations must be marked in letters of contrasting color to the background "KEEP CLOSED".

Subpart H—Miscellaneous Equipment

§ 108.697 Buoyant work vest.

Each buoyant work vest on a unit must be approved under § 160.053 of this Chapter.

§ 108.699 Substitution of life preservers.

A work vest may not be substituted for a required life preserver—

(a) For the life saving equipment requirements of this part; or

(b) For use during drills and emergencies.

§ 108.701 Sounding equipment.

Each self-propelled unit must have a mechanical or electronic sounding apparatus.

§ 108.703 Self-contained breathing apparatus.

(a) Each unit must have a self-contained breathing apparatus to be used as protection from gas leaking from a refrigeration unit.

(b) The self-contained breathing apparatus required in § 108.497 may be used for this purpose.

§ 108.705 Anchors, chains, wire rope, and hauser.

(a) Each unit must be fitted with anchors, chains, wire rope, and hausers in agreement with the standards established by the American Bureau of Shipping.

(b) Units which are equipped with anchors used as operational equipment are not required to have additional anchors if the operational anchors meet the requirements of paragraph (a).

§ 108.707 First aid kit.

Each unit must have a first-aid kit approved by the Mine Safety and Health Administration (Formerly Mining Enforcement and Safety Administration) of a size suitable for the number of persons allowed on board the unit that is stowed in a location that is accessible to persons on board.

§ 108.709 Litter.

Each unit must have a litter that is—

(a) Stowed in a location that is accessible to the persons on board; and

(b) Capable of being used on the type of helicopters serving the unit.

§ 108.711 Pilot ladders.

(a) Except as provided in paragraph (c), each unit which normally uses a pilot must have a pilot ladder in addition to the ladders required in § 108.525.

(b) Each unit which has a pilot ladder must have the following:

(1) Spreaders.

(2) A man rope.

(3) A safety line.

(c) A pilot ladder is not required if there is no flat vertical surface to support a pilot ladder.

(d) Illumination over the side of the unit and on the deck where the pilot boards the unit must be provided.

§ 108.713 International Code of Signals.

Each vessel on an international voyage which is required to carry a radiotelegraph or radiotelephone installation in accordance with Chapter IV of the Safety of Life at Sea Convention, 1960, must carry the International Code of Signals.

§ 108.715 Magnetic compass and gyrocompass.

(a) Each self-propelled unit in ocean or coastwise service must have a magnetic compass.

(b) Each self-propelled unit of 1,600 gross tons and over in ocean or coastwise service must have a gyrocompass in addition to the magnetic compass required in paragraph (a).

(c) Each unit that is required to have a gyrocompass must have an illuminated repeater for the gyrocompass that is at the main steering stand unless the gyrocompass is illuminated and is at the main steering stand.

§ 108.717 Radar.

Each self-propelled unit of 1,600 gross tons and over in ocean or coastwise service must have—

(a) A marine radar system for surface navigation; and

(b) Facilities on the bridge for plotting radar readings.

PART 109—OPERATIONS

Subpart A—General

109.101 Applicability.
109.103 Requirements of the International Convention for Safety of Life at Sea, 1960.
109.107 Designation of master or person in charge.
109.109 Responsibilities of master or person in charge.
109.121 Operating manual.

Subpart B—Tests, Drills, and Inspections

109.201 Steering gear, whistles, general alarm, and a means of communication.
109.203 Sanitation.
109.205 Inspection of boilers and machinery
109.207 Line throwing equipment.
109.208 EPIRB.
109.209 Appliances for watertight integrity.
109.211 Testing of emergency lighting and power systems.
109.213 Fire drill.
109.215 Boat drill
109.217 Lifeboats and lifeboat launching equipment: inspection and testing.
109.219 Inflatable liferaft: servicing.
109.221 Electrical power operated winches.
109.223 Fire fighting equipment.

Subpart C—Operation and Stowage of Safety Equipment

109.301 Maintenance of equipment.
109.305 Obstruction on launching decks.
109.307 EPIRBS.
109.313 Stowage of life preservers.
109.317 Replacement of distress signal and self-activated smoke signals.
109.320 Line throwing equipment.
109.321 Portable radio.
109.323 Manning of lifeboats and inflatable liferafts.
109.325 Persons in command of lifeboats or liferafts.
109.329 Fire pumps.
109.331 Firehoses and hydrants.
109.333 Fire main cutoff valves.
109.334 Working over water.
109.335 Stowage of work vests.
109.337 Fireman's outfit.
109.339 Location of fire axes.
109.341 Chain suspension ladders.
109.343 Pilot ladders and equipment.
109.345 Pilot ladders use.

Subpart D—Reports, Notifications, and Records

REPORTS AND NOTIFICATIONS

109.411 Notice of casualty.
109.413 Written report of casualty.
109.415 Retention of records after casualty.
109.417 Report of damage to aid to navigation.
109.419 Report of unsafe machinery.
109.421 Report of repairs to boilers and pressure vessels.
109.423 Report of breaking safety valve seal.
109.425 Repairs and alterations; emergency equipment.

RECORDS

109.431 Logbook.
109.433 Logbook entries.
109.435 Record of fire fighting equipment inspection.
109.437 Crane record book.
109.439 Crane certificates.

Subpart E—Station Bill

109.501 Station bill: duties of personnel.
109.503 Station bill: emergency signals.
109.505 Station bill: general.

Subpart F—Cranes and Powered Industrial Trucks

109.521 Cranes: general.
109.525 Cranes: working loads.
109.527 Cranes: operator designation.
109.529 Powered industrial trucks: use.
109.531 Powered industrial trucks: ventilated spaces.
109.533 Powered industrial trucks: rated lifting capacity.
109.535 Designated refueling areas for diesel powered industrial trucks.
109.537 Refueling diesel powered industrial trucks: operations.
109.539 Recharging battery powered industrial trucks.

Subpart G—Miscellaneous

109.555 Propulsion boilers.
109.557 Flammable and combustible liquids: carriage.
109.558 Stores and supplies.
109.559 Explosives and radioactive materials.
109.563 Posting of documents.
109.564 Maneuvering characteristics.
109.565 Charts and nautical publications.
109.573 Riveting, welding, and burning operations.
109.575 Accumulation of liquids on helicopter decks.
109.577 Helicopter fueling.
109.581 Fixed ballast.
109.583 Prevention of oil pollution.
109.585 Use of auto pilot.

APPENDIX A—Navigation and Vessel Inspection Circular—Inspection and Certification of Existing Mobile Offshore Drilling Units.

AUTHORITY: Sec. 2, 87 Stat. 418 (46 U.S.C. 86); sec. 3, 82 Stat. 341, as amended (46 U.S.C. 367); R.S. 4405, as amended (46 U.S.C. 375); sec. 10, 35 Stat. 428 (46 U.S.C. 395); R.S. 4423, as amended (46 U.S.C. 400); R.S. 4429, as amended (46 U.S.C. 407); R.S. 4430, as amended (46 U.S.C. 408); 88 Stat. 423 (46 U.S.C. 411); R.S. 4434, as amended (46 U.S.C. 412); R.S. 4462, as amended (46 U.S.C. 416); sec. 1, 73 Stat. 475 (46 U.S.C. 481); sec. 4, 67 Stat. 462 (43 U.S.C. 1333(d)); sec. 6(b)(1), 80 Stat. 937 (49 U.S.C. 1655(b)(1)); 49 CFR 1.46(b) and (n)(6).

Subpart A—General

§ 109.101 Applicability.

No unit may be operated unless it complies with the regulations in this part.

§ 109.103 Requirements of the International Convention for Safety of Life at Sea, 1960.

No self-propelled unit of more than 500 gross tons may embark on an international voyage unless it is issued the appropriate Convention certificate as described in §§ 107.401 through 107.413 of this Subchapter.

§ 109.107 Designation of master or person in charge.

The owner of a unit or his agent shall designate an individual to be the master or person in charge of the unit.

§ 109.109 Responsibilities of master or person in charge.

(a) The master or person in charge shall—

(1) Ensure that the provisions of the Certificate of Inspection are adhered to; and

(2) Be fully cognizant of the provisions in the operating manual required by § 109.121.

(b) Nothing in this subpart shall be construed as limiting the master or person in charge, at his own responsibility, from diverting from the route prescribed in the Certificate of Inspection or taking such steps as he deems necessary and prudent to assist vessels in distress or for other emergency conditions.

§ 109.121 Operating manual.

(a) An operating manual must be prepared for each unit.

(b) Each operating manual must be approved by the Commandant (G-MMT).

(c) The operating manual must contain guidance for the safe operation of the unit under normal and emergency conditions.

(d) The operating manual must contain the following information:

(1) A general description of the unit, including lightship data.

(2) Data for each operating mode, including design loading, wave height, and draft.

(3) General arrangement showing watertight compartments, closures, vents, permanent ballast, and allowable deck loadings.

(4) Hydrostatic curves or equivalents.

(5) Capacity plan showing capacities of tanks, center of gravity, free surface corrections, and instructions for applying them.

(6) Instructions for the operation of the unit while—

(i) Preparing for the passage of a severe storm, including the specific actions and approximate length of time necessary to attain each level of preparedness; and

(ii) Change of operating condition, including preparations prior to making a move.

(7) Stability information setting forth maximum KG versus draft curve, or other parameters, based upon compliance with the intact and damaged stability criteria.

(8) Examples of loading conditions for each mode of operation, and a means for evaluation of other loading conditions.

(9) Inherent limitations of operation for each operating mode.

(10) General guidance and precautions regarding unintentional flooding.

(11) A table of contents and index for the manual.

Subpart B—Tests, Drills, and Inspections

§ 109.201 Steering gear, whistles, general alarm, and means of communication.

The master or person in charge shall ensure that—

(a) Steering gear, whistles, general alarm bells, and means of communication between the bridge or control room and the engine room on self propelled units are inspected and tested—

(1) Within 12 hours before getting under way; and

(2) At least once each week if under way or on station; and

(b) Whistles and general alarm bells on all other units are inspected examined and tested at least once each week.

§ 109.203 Sanitation.

(a) The master or person in charge shall insure that the accommodation spaces are in a clean and sanitary condition.

(b) The chief engineer, or engineer in charge if no chief engineer is required, shall insure that the engineering spaces are in a clean and sanitary condition.

§ 109.205 Inspection of boilers and machinery.

The chief engineer or engineer in charge, before he assumes charge of the boilers and machinery of a unit shall inspect the boilers and machinery, other than industrial machinery, and report to the master or person in charge and the Officer in Charge, Marine Inspection, any parts that are not in operating condition.

D E 4 7 8 UMI

(c) Each item of rescue and safety

§ 109.223 Firefighting equipment.

(c) The line-throwing equipment is

(d) Each firehose, except a firehose

§ 109.345 Pilot ladder use.

V 4 3 1 2 3 3

§ 109.207 Line-throwing equipment.

(a) The master or person in charge shall insure that personnel are instructed in the use of line-throwing equipment.

(b) The master or person in charge shall insure that each line throwing appliance is tested by firing it at least once every four months. The use of a service line is not required for test firing.

§ 109.208 EPIRB.

The master or person in charge shall insure that each EPIRB required in § 108.523 of this subchapter is tested monthly using the integrated test circuit and output indicator.

§ 109.269 Appliances for watertight integrity.

(a) Before getting underway, the master or person in charge shall insure that each appliance for watertight integrity is closed and watertight.

(b) If existing conditions warrant, the master or person in charge may permit appliances for watertight integrity to be open while afloat.

§ 109.211 Testing of emergency lighting and power systems.

(a) The master or person in charge shall insure that—

(1) each emergency lighting and each emergency power system is tested at least once each week;

(2) each emergency generator is tested at least once each month by operating it under load for at least 2 hours; and

(3) each storage battery for emergency lighting and power systems is tested every six months under actual connected load for a period of at least 2 hours.

(b) After the 2 hour test period required in paragraph (a)(3) of this section, the voltage values under load or specific gravity of electrolyte must be measured. Measured values must be extrapolated to approximate the values that would result following a 12 hour test period. The test must be extended if a trend cannot be determined to allow extrapolation. The capacity of the battery corresponding to the extrapolated values of voltage or specific gravity must be sufficient to supply the actual connected load.

§ 109.213 Fire drill.

The master or person in charge shall conduct a fire drill at least once each week and shall insure that—

(a) All personnel report to their stations, and demonstrate their ability to perform the duties assigned to them in the station bill;

(b) Each fire pump is started;

(c) Each item of rescue and safety equipment is brought from the emergency equipment lockers; and

(d) Each watertight door which is in use while the unit is underway is operated.

§ 109.215 Boat drill.

The master or person in charge shall conduct a boat drill at least once each week, and shall insure that—

(a) All personnel report to their stations, and demonstrate their ability to perform the duties assigned to them in the station bill;

(b) Each lifeboat is prepared for use;

(c) Weather permitting, at least one lifeboat is partially lowered, and its engine started and operated; and

(d) Each person not assigned duties in the station bill is instructed in the use of life preservers.

§ 109.217 Lifeboats and lifeboat launching equipment: Inspection and testing.

The master or person in charge shall insure that—

(a) Each lifeboat is lowered to the water launched and operated at least once each three months as part of a boat drill required by § 109.215;

(b) Each lifeboat is properly equipped;

(c) The motor of each motor propelled lifeboat is operated in the ahead and the astern position at least once each week;

(d) Each lifeboat is cleaned and inspected at least once each year;

(e) The fuel tank of each motor propelled lifeboat is emptied, and the fuel is changed at least once each year;

(f) Each rechargeable battery for each lifeboat radio is fully charged at least once each week; and

(g) Each lifeboat radio transmitter is tested at least once each week.

§ 109.219 Inflatable liferaft: Servicing.

The master or person in charge shall insure that each inflatable liferaft is serviced, every 12 months or not later than the next inspection for certification: *Provided,* The time since the date of the last servicing does not exceed 15 months. Except in emergency, no servicing may be done aboard the unit.

§ 109.221 Electric power operated winches.

(a) The master or person in charge shall insure that each lifeboat winch control apparatus, including motor controllers, emergency switches, master switches, and limit switches, is inspected at least once each 3 months.

(b) The inspection required in paragraph (a) of this section must include the removal of drain plugs from the electrical enclosures of each lifeboat winch control apparatus.

§ 109.223 Firefighting equipment.

The master or person in charge shall insure that each hand portable fire extinguisher, semi-portable fire extinguisher, and fixed fire-extinguishing system is tested and inspected at least once each twelve months.

Subpart C—Operation and Stowage of Safety Equipment

§ 109.301 Maintenance of equipment.

The master or person in charge shall insure that each item of lifesaving and firefighting equipment required by this subchapter is maintained in operative condition.

§ 109.305 Obstruction on launching decks.

The master or person in charge shall insure that each deck from which lifeboats are launched is kept clear of any obstruction that interferes with the immediate launching of lifeboats and liferafts.

§ 109.307 EPIRB.

The master or person in charge shall insure that—

(a) Each EPIRB required in § 108.523 is stowed in a manner so that it will float free if the unit sinks.

(b) Each battery of the EPIRB is replaced before the date marked on the EPIRB battery, or after the EPIRB is used.

§ 109.313 Stowage of life preservers.

The master or person in charge shall insure that each life preserver required in § 108.514 for each person assigned a berth, is stowed in his berthing area as provided in § 108.514(b), and that the remaining life preservers required in § 108.514(a) are stowed in each work area and watch station as provided in § 108.514(b).

§ 109.317 Replacement of distress signal and self-activated smoke signals.

The master or person in charge shall insure that each distress signal and self-activated smoke signal is replaced not later than 36 months after the date of manufacture or not later than the date of expiration, whichever date is marked on the signal.

§ 109.320 Line-throwing equipment.

The master or person in charge shall insure that—

(a) The line throwing equipment required by § 108.517 is stowed in a readily accessible location;

(b) The service life of rockets for impulse projected rocket type equipment is limited to a period of four years from the date of manufacture, and replacement of out-dated items made at the first arrival in the United States, except that replacement is made in all cases within twelve months after the date of expiration; and

(c) The line-throwing equipment is not operated in an explosive atmosphere.

§ 109.321 Portable radio.

The master or person in charge shall insure that the portable radio required in § 108.519 is—

(a) Stowed in the radioroom, bridge, or a protected location near a lifeboat; and

(b) Readily accessible for transfer to a lifeboat.

§ 109.323 Manning of lifeboats and inflatable liferafts.

The master or person in charge shall—

(a) Assign to each lifeboat and each inflatable liferaft to which seat assignments are made in the station bill—

(1) A licensed deck officer, able seaman, or certificated lifeboatman to command the lifeboat;

(2) A licensed deck officer, able seaman, or certificated lifeboatman as second in command, if the lifeboat has a capacity of more than 40 persons;

(3) A person who can operate the lifeboat's motor; and

(4) A person who can operate the portable radio, if the lifeboat has a portable radio; and

(b) Insure that the person assigned to command a lifeboat or inflatable liferaft has a list of the persons, by station bill number and job title, assigned to seats in the lifeboat or liferaft.

§ 109.325 Persons in command of lifeboats or liferafts.

A person assigned to command a lifeboat or liferaft shall insure that each person assigned to the lifeboat or liferaft can perform the duties assigned to that person.

§ 109.329 Fire pumps.

The master or person in charge shall insure that at least one of the fire pumps required in § 108.415 is ready for use on the fire main system at all times.

§ 109.331 Firehoses and hydrants.

The master or person in charge shall insure that—

(a) At least one length of firehose with a combination nozzle is connected to each fire hydrant required by this subchapter, at all times, except that during heavy weather a firehose in an exposed location may be temporarily removed from the fire hydrant and stowed in an accessible, nearby location;

(b) A fire hose required by this subchapter is not used for any purpose other than firefighting, fire drills, and testing;

(c) Access to each fire hydrant is not blocked;

(d) Each firehose, except a firehose temporarily removed from an exposed location, is stowed on a rack or reel required by this subchapter; and

(e) Each low velocity spray applicator for a fire hose nozzle is attached to the nozzle or stowed next to the fire hydrant to which the fire hose is attached.

§ 109.333 Fire main cutoff valves.

The master or person in charge shall insure that each fire main cutoff valve is open and sealed to prevent closing, except that a cutoff valve may be closed to protect the portion of the fire main system on an exposed deck from freezing.

§ 109.334 Working over water.

The master or person in charge shall insure that each person working over the water is wearing a life preserver or a buoyant work vest.

§ 109.335 Stowage of work vests.

The master or person in charge shall insure that no work vest is stowed where life preservers are stowed.

§ 109.337 Fireman's outfit.

The master or person in charge shall insure that—

(a) At least 2 persons who are trained in the use of the fireman's outfit are on board at all times; and

(b) Each fireman's outfit and its spare equipment is stowed in a separate and accessible location.

(c) A fireman's outfit is not used for any purpose other than fire fighting except as provided in § 108.703.

§ 109.339 Location of fire axes.

The master or person in charge shall insure that the fire axes required in § 108.499 of this subchapter are located in the enclosures for fire hoses marked in accordance with § 108.633 of this subchapter, if the fire axes are not located in plain view.

§ 109.341 Chain suspension ladders.

The master or person in charge shall insure that each chain suspension ladder required in § 108.525(a) of this subchapter is—

(a) Kept ready for immediate use; and

(b) Stowed near the lifeboat or inflatable liferaft davits.

§ 109.343 Pilot ladders and equipment.

The master or person in charge shall insure that—

(a) The equipment required in § 108.711(b) is kept available for use with the pilot ladder required in § 108.711(a); and

(b) One ring buoy with a waterlight is available for use when a pilot boards the unit.

§ 109.345 Pilot ladder use.

The master or person in charge shall insure that—

(a) A pilot ladder, when in use, is secured so that each step rests firmly against the side of the unit;

(b) A pilot boards a unit by means of an accommodation ladder or personnel transfer equipment if a pilot ladder is not used.

Subpart D—Reports, Notifications, and Records

Reports and Notifications

§ 109.411 Notice of casualty.

(a) The owner, agent, master, or person in charge of a unit that is involved in a marine casualty shall notify the Officer in Charge, Marine Inspection, as soon as possible after the casualty occurs, if the casualty involves any of the following:

(1) Actual physical damage to property in excess of $5,000.00.

(2) An occurrence affecting the seaworthiness or efficiency of the unit, such as fire, flooding, failure of a fixed fire protection system, or any failure of primary lifesaving equipment.

(3) Stranding or grounding of the unit, except when the unit is grounded to conduct normal operations.

(4) Loss of life.

(5) Injury causing any person to require hospitalization for more than 24 hours, or to be incapacitated for more than 72 hours.

(b) The notice required by this section must contain the following:

(1) Name and official number of the unit.

(2) Name of the owner or agent of the unit.

(3) Description of the casualty, including cause.

(4) Location of the unit at the time of the casualty.

(5) Nature and extent of injury to persons.

(6) Damage to property.

(c) The notice required by this section is not required to be submitted if the written report of casualty required by § 109.413 is submitted without delay.

§ 109.413 Written report of casualty.

The master or person in charge of a unit for which a report of casualty is made under § 109.411 shall submit a report to the Officer in Charge, Marine Inspection, as soon as possible after the casualty occurs, on—

(a) Form CG-924E if the casualty involves injury to persons or loss of life; and

(b) Form CG-2692 if the casualty involves damage to property or grounding or stranding of a vessel except when the unit is grounded to conduct normal operations.

§ 109.415 Retention of records after casualty.

(a) The owner, agent, master, or person in charge of a unit for which a report of casualty is made under § 109.411 shall insure that all records maintained on the unit are retained on board the unit for at least 3 months after the report of casualty is made or until advised by the Officer in Charge, Marine Inspection, that records need not be retained on board.

(b) The records which must be retained in accordance with paragraph (a) of this section include:

(1) Rough and smooth deck log.
(2) Rough and smooth engine room log.
(3) Tour reports.
(4) Bell books.
(5) Navigation charts in use at the time of casualty.
(6) Navigation work books.
(7) Compass deviation cards.
(8) Gyrocompass records.
(9) Storage plans.
(10) Record of drafts.
(11) Notices to mariners.
(12) Radiograms sent and received.
(13) The radio log.
(14) Personnel list.
(15) Crane record book.

(c) The owner, agent, master, or person in charge shall, upon request, make the records described in this section available for examination by any Coast Guard official authorized to investigate the casualty.

§ 109.417 Report of damage to aid to navigation.

If a unit collides with an aid to navigation maintained by the Coast Guard, the master or person in charge shall report the collision to the appropriate Officer in Charge, Marine Inspection.

§ 109.419 Report of unsafe machinery.

If a boiler, unfired pressure vessel, or other machinery on a unit is unsafe to operate, the master or person in charge shall report the existence of the unsafe condition to the Officer in Charge, Marine Inspection.

§ 109.421 Report of repairs to boilers and pressure vessels.

Before making repairs, except normal repairs and maintenance such as replacement of valves or pressure seals, to boilers or unfired pressure vessels in accordance with § 50.05-10 of this chapter, the master or person in charge shall report the nature of the repairs to the Officer in Charge, Marine Inspection.

§ 109.423 Report of breaking safety valve seal.

(a) If a required seal on a boiler safety valve is broken, the chief engineer or engineer in charge shall notify the Officer in Charge, Marine Inspection.

(b) The notice must—

(1) State the reason for breaking the seal; and

(2) Request that the valve be examined and adjusted.

§ 109.425 Repairs and alterations: Emergency equipment.

(a) Before making repairs or alterations, except emergency repairs or alterations, to lifesaving, fire detecting or extinguishing equipment, the master or person in charge shall report the nature of the repairs or alterations to the Officer in Charge, Marine Inspection.

(b) When emergency repairs or alterations to lifesaving, fire detecting or fire extinguishing equipment have been made, the master or person in charge shall report the nature of the repairs or alterations to the Officer in Charge, Marine Inspection.

RECORDS

§ 109.431 Logbook.

(a) The master or person in charge of a unit that is required by 46 U.S.C. 201 to have an official logbook shall maintain the logbook on Form CG-706. When the voyage is completed, the master or person in charge shall file the logbook with the Officer in Charge, Marine Inspection.

(b) The master or person in charge of a unit that is not required by 46 U.S.C. 201 to have an official logbook, shall maintain, on board, an unofficial logbook for making the entries required by this subpart. This logbook must be retained on board until the unit's next reinspection or inspection for certification.

§ 109.433 Logbook entries.[1]

The master or person in charge shall insure that the following applicable entries are made in the logbook required by this subpart:

(a) The date of each test of the steering gear, whistle, general alarm, and communications equipment and the condition of the equipment.

(b) The time and date of each opening and closing, while the unit is afloat, of each required appliance for watertight integrity not fitted with a remote operating control or alarm system and the reasons for the action.

(c) The date of each test of emergency lighting and power systems and the condition and performance of the equipment.

(d) the following information pertaining to each fire drill:

(1) Date and hour of each drill.
(2) Duration of each drill.
(3) The condition of all fire fighting equipment, watertight door mechanisms, and valves used during each drill.

(e) The following information pertaining to each boat drill:

(1) Date and hour of each drill.
(2) Duration of each drill.
(3) The number of each lifeboat swung out during each drill.
(4) The number of each lifeboat lowered during each drill.
(5) Length of time that each motor propelled lifeboat was operated during each drill.
(6) The condition of lifesaving equipment used during each drill.

(f) The date of the lifeboat equipment examination required in § 109.217 of this part.

(g) If a drill required in § 109.213 or § 109.215 is not held, the reasons for not holding the drill.

(h) If a drill required in § 109.213 or § 109.215 is not completed, the reasons for not completing the drill, and the date and a description of the incomplete drill.

(i) The date of each lifeboat winch inspection required in § 109.221 and the condition of the winch.

(j) Prior to getting underway, the fore and aft drafts, the position of the loadline marks in relation to the surface of the water, and the density of the water in which the vessel is floating, if in fresh or brackish water.

(k) The date of each inspection of each accommodation space.

(l) The date of each inspection required in § 109.573 if performed by the master or person in charge.

(m) The date of each test firing of the line throwing equipment required by § 109.207.

§ 109.435 Record of fire fighting equipment inspection.

(a) The master or person in charge shall ensure that a record of each test and inspection required in § 109.223 is maintained on board, until the unit is reinspected or inspected for certification.

(b) The record required in paragraph (a) of this section must show—

(1) The date of each test and inspection;

(2) The number or other identification of each item of equipment tested or inspected; and

(3) The name of the person, and the company he represents if any, who conducts the test or inspection.

§ 109.437 Crane record book.

The master or person in charge shall ensure that the following are maintained in a crane record book:

(a) Descriptive information which will identify each crane including—

[1] NOTE.—R. S. 4290 (46 U.S.C. 201) requires that certain entries be made in an official logbook, in addition to the entries required by this section; and R. S. 4291 (46 U.S.C. 202) prescribes the manner of making those entries.

(1) The API name plate data required by Section 11 of API Spec. 2C, Second Edition, February 1972; and

(2) The rates load chart for each line reeving and boom length which may be utilized.

(b) Information required by Section 3 of the American Petroleum Institute *Recommended Practice for Operation and Maintenance of Offshore Cranes*, API RP 2D, First Edition (October 1972) with supplement 1.

(c) Dates and results of frequent inspections and tests required in paragraph (b) of this section.

(d) Dates and results of periodic inspections and tests required in paragraph (b) of this section.

(e) Date and result of each rated load test.

(f) Date and description of each replacement or renewal of wire rope, hooks, and other load components.

(g) Date and description of each failure of the crane, or any component or safety feature.

(h) Date and description of each repair to the crane structure, boom, or equipment.

§ 109.439 Crane certificates.

The master or person in charge shall insure that the following certificates and records for each crane are maintained on the unit:

(a) Each certificate issued by a crane certifying authority.

(b) Each record and original certificate, or certified copy of a certificate, or manufacturers or testing laboratories, companies or organizations for—

(1) Loose gear;
(2) Wire rope; and
(3) The annealing of wrought iron gear.

Subpart E—Station Bill

§ 109.501 Station bill: Duties of personnel.

(a) The station bill must set forth the duties and station of each person during emergencies, including an assigned seat in a lifeboat or liferaft for each person on the unit.

(b) The duties must, as far as possible, be comparable with the regular work of the individual.

(c) These duties must include:

(1) Closing airports, watertight doors, scuppers, and sanitary and other discharges that lead through the unit's hull.
(2) Stopping fans and ventilating systems.
(3) Operating all safety equipment.
(4) Preparing lifeboats and life rafts for launching.
(5) Extinguishing fires.
(6) Warning personnel of the emergency.
(7) Instructing all personnel on use and wearing of their life preservers.
(8) Directing personnel to appointed stations.
(9) Carrying the portable radio apparatus, required in § 108.519, to a lifeboat.

§ 109.503 Station bill: Emergency signals.

(a) The station bill must set forth signals that—

(1) Call personnel to their stations; and

(2) Direct personnel at their stations.

(b) Emergency stations signals are established as follows:

(1) The signal to man emergency stations is a rapid succession of short soundings of both the general alarm bell and the whistle, if a whistle is installed, for a period of not less than 10 seconds.

(2) The signal to secure from emergency stations is the sounding of both the general alarm bell and the whistle, if a whistle is installed, three times.

(c) The abandon unit stations signals are established as follows:

(1) The signal to man abandon unit stations is a continuous sounding of both the general alarm and the whistle, if a whistle is installed.

(2) If whistle signals are used to direct the handling of lifeboats, they must be—

(i) One short blast to lower lifeboats; and

(ii) Two short blasts to stop lowering the lifeboats.

(3) The signal to secure from abandon unit stations is the sounding of both the general alarm bell and the whistle, if a whistle is installed, three times.

§ 109.505 Station bill: General.

The master or person in charge shall—

(a) Ensure that the station bill is prepared and maintained;

(b) Sign the station bill;

(c) Ensure that the station bill is posted in conspicuous locations on the unit;

(d) Ensure that temporary personnel and visitors are advised of their emergency stations and assigned a seat in a lifeboat or liferaft upon their arrival aboard the unit; and

(e) Ensure that all persons on the unit are familiar with the station bill.

Subpart F—Cranes and Powered Industrial Trucks

§ 109.521 Cranes: General.

The master or person in charge shall ensure that each crane is operated and maintained in accordance with the API *Recommended Practice for Operation and Maintenance of Offshore Cranes*, API RP 2D, First Edition (Oct. 1972) with supplement 1.

§ 109.525 Cranes: Working loads.

The master or person in charge shall ensure that tables indicating the maximum safe working loads for the various working angles of the boom, where the boom is rated at varying capacities depending on the radius, and the maximum and minimum radius at which the boom may be safely used, are conspicuously posted near the controls and are visible to the operator when working the crane.

§ 109.527 Cranes: Operator designation.

(a) The master or person in charge shall designate, in writing, each crane operator.

(b) The master or person in charge shall ensure that only designated operators operate cranes.

(c) The master or person in charge shall ensure that each designated operator is familiar with the provisions of the API *Recommended Practice for Operation and Maintenance of Offshore Cranes*, API RP 2D, First Edition (Oct. 1972) with supplement 1.

§ 109.529 Powered industrial trucks: Use.

The master or person in charge shall ensure that—

(a) Only "EX" designated trucks are used in Class I, Division 1 locations; and

(b) Only "EE", "EX", or "DS" designated trucks are used in—

(1) Class I, Division 2 spaces; and

(2) In spaces that are within the periphery of a Class I, Division 1 space.

§ 109.531 Powered industrial trucks: Ventilated spaces.

The master or person in charge shall ensure that diesel powered industrial trucks are operated only in ventilated spaces.

§ 109.533 powered industrial trucks: Rated lifting capacity.

The master or person in charge shall ensure that the rated lifting capacity of each powered industrial truck is posted on each truck.

§ 109.535 Designated refueling areas for diesel powered industrial trucks.

The master or person in charge shall designate refueling areas for diesel powered industrial trucks only on—

(a) The weather deck; or

(b) In spaces that are—

(1) Ventilated to prevent accumulation of vapors; and

(2) Located at least 3 meters (10 feet) from a source of ignition.

§ 109.537 Refueling diesel powered industrial trucks: Operations.

The master or person in charge shall ensure that—

§ 109.581 Fixed ballast.

contracted for on or after the effective date of the regulations.

personnel safety shall meet the applicable standards of Subchapter IA.

V 4 3 / 2 3 3 D E 4 7 8 UMI

(a) Each diesel powered industrial truck is refueled only in a refueling area designated under § 109.535;

(b) Before a diesel powered industrial truck is refueled, its engine is stopped;

(c) If refueling operations are conducted in an enclosed space, no truck engine is operated in the space during refueling operations;

(d) Diesel powered industrial trucks are refueled from—

(1) A portable container of five gallons or less that has a self-closing spout; or

(2) If the refueling operation is on the weather deck, a pump with a hose that has a pistol grip, deadman nozzle; and

(e) Each designated refueling area has at least one four pound, dry chemical, portable fire extinguisher available during refueling operations.

§ 109.539 Recharging battery powered industrial trucks.

The master or person in charge shall ensure that batteries of powered industrial trucks are charged only in a ventilated area and not in a Class I location.

Subpart G—Miscellaneous

§ 109.555 Propulsion boilers.

The master or person in charge and the engineer in charge shall ensure that—

(a) Steam pressure does not exceed that allowed by the certificate of inspection; and

(b) Except as provided in § 109.423, the safety valves, once set and sealed by the inspector, are not tampered with or made inoperative.

§ 109.557 Flammable and combustible liquids: Carriage.

The master or person in charge shall ensure that—

(a) Flammable and combustible liquids in bulk are not carried, except as allowed by endorsement to the Certificate of Inspection;

(b) Portable tanks are handled and stowed in accordance with Subparts 98.30 and 98.35 of this chapter, and the provisions of 49 CFR Parts 171, 172, 173, 176, and 178 which are applicable to portable tanks; and

(c) Grades B and lower liquids are—

(1) Authorized, by the Commandant, to be carried; and

(2) Carried only in fixed independent or integral tanks.

§ 109.558 Stores and supplies.

The master or person in charge shall ensure that dangerous articles, substances, and combustible liquids which are used on board a unit, except those used in industrial operations and as fuel for the unit's machinery, are accepted, handled, stowed, and used only in accordance with the provisions for cargo vessels in Part 147 of this Chapter.

§ 109.559 Explosives and radioactive materials.

Except as authorized by the master or person in charge, no person may use explosives or radioactive materials and equipment on a unit.

§ 109.563 Posting of documents.

The master or person in charge shall ensure that the following are posted under glass in the pilot house or control center:

(a) General arrangement plans for each deck showing—

(1) Each fire retardant bulkhead;

(2) Each fire detecting, manual alarm, and fire extinguishing system;

(3) Each fire door;

(4) Each means of ingress to compartments; and

(5) Each ventilating system, including the location of each damper, fan, and remote means of stopping the fans.

(b) The stability letter issued by the Coast Guard.

(c) Each SOLAS and Coast Guard certificate issued to the unit.

§ 109.564 Maneuvering characteristics.

(a) The master or person in charge of each self-propelled unit of 1,600 gross tons and over shall ensure that a maneuvering information fact sheet is prominently displayed in the pilothouse.

(b) For surface type units, the maneuvering information in Part 97.19 of this chapter must be displayed.

(c) The maneuvering information requirements for column stabilized, self-elevating, and other units of unusual design will be specified on a case by case basis.

§ 109.565 Charts and nautical publications.

The master or person in charge of a self-propelled unit shall ensure that the unit has the following adequate, up to date, and appropriate items for the intended voyage:

(a) Charts.

(b) Sailing directions.

(c) Coast pilots.

(d) Light lists.

(e) Notices to mariners.

(f) Tide Tables.

(g) Current Tables.

(h) All other nautical publications necessary.[1]

§ 109.573 Riveting, welding, and burning operations.

Except as allowed by this section—

(a) the master or person in charge shall ensure that there is no riveting, welding, or burning—

(1) In a fuel tank;

(2) On the boundary of a fuel tank;

(3) On pipelines, heating coils, pumps, fittings, or other appurtenances connected to fuel tanks; or

(4) On the boundary of spaces adjacent to tanks carrying Grades A, B, or C flammable liquids in bulk.

(b) The operations prohibited in paragraph (a) of this section may be allowed if—

(1) An inspection conducted in accordance with the "Standard for the Control of Gas Hazards on Vessels to be Repaired," N.F.P.A. No. 306-1974, is made—

(i) In ports or navigable waters of the United States, its territories and possessions, by—

(A) A marine chemist certified by the National Fire Protection Association; or

(B) If a certified marine chemist is not available, a person designated by the Officer in Charge, Marine Inspection; or

(ii) In all other locations by—

(A) A marine chemist certified by the National Fire Protection Association;

(B) If a certified marine chemist is not available, a person designated by the Officer in Charge, Marine Inspection; or

(C) If the persons required in paragraph (b)(ii) (A) and (B) of this section are not available, the master or person in charge; or a welding supervisor designated, in writing, by the master or person in charge; and

(2) A certificate is issued by the person conducting the inspection stating—

(i) That he conducted the inspection in accordance with the standard in paragraph (b)(1) of this section;

(ii) The operations that may be conducted; and

(iii) A list of precautions to be followed during the operations;

(c) The master or person in charge shall ensure that the precautions in paragraph (b)(2)(iii) of this section are followed.

§ 109.575 Accumulation of liquids on helicopter decks.

The master or person in charge shall ensure that no liquids are allowed to accumulate on the helicopter decks.

§ 109.577 Helicopter fueling.

(a) The master or person in charge shall designate persons to conduct helicopter fueling operations.

(b) No person may be designated to conduct such operations unless he is familiar with the fueling procedures and safety precautions.

[1] NOTE.—For U.S. units in or on the navigable waters of the United States. See 33 CFR 164.33.

§ 109.581 Fixed ballast.

(a) The master or person in charge shall ensure that fixed ballast is not removed from the unit or relocated unless the removal or relocation is approved by the Commandant.

(b) Fixed ballast may be moved for examination or repair of the unit if done in the presence of a marine inspector.

§ 109.583 Prevention of oil pollution.

The master or person in charge shall ensure that the unit is operated to meet the requirements in—

(a) Section 311 of the Federal Water Pollution Control Act, as amended (86 Stat. 816; 33 U.S.C. 1321);

(b) Section 12 of the Oil Pollution Act, 1961, as amended (75 Stat. 404; 33 U.S.C. 1011); and

(c) 33 CFR Parts 151, 155 and 156.

§ 109.585 Use of auto pilot.

Except as provided in 33 CFR 164.15, when the automatic pilot is used in areas of high traffic density, conditions of restricted visibility, and all other hazardous navigational situations, the master or person in charge shall ensure that—

(a) It is possible to immediately establish manual control of the unit's steering;

(b) A competent person is ready at all times to take over steering control; and

(c) The changeover from automatic to manual steering and vice versa is made by, or under the supervision of, the officer of the watch.

APPENDIX A—NAVIGATION AND VESSEL INSPECTION CIRCULAR NO. 3-78

SUBJ: INSPECTION AND CERTIFICATION OF EXISTING MOBILE OFFSHORE DRILLING UNITS

1. *Purpose.* To promulgate instructions for the inspection and certification of existing mobile offshore drilling units. This NVC is also being published as appendix A of 46 CFR Subchapter IA.

2. *Background.* Mobile Offshore Drilling Units are recognized internationally through the Intergovernmental Maritime Consultative Organization as being a "special purpose ship" designed and operated to carry out an industrial function at sea. Contemporary U.S. Vessel regulations in Title 46 CFR do not adequately cover the safety considerations which are unique to the hull and structural designs, industrial equipment and operating procedures incorporated in drilling vessels. To provide appropriate and adequate standards, the Coast Guard with the assistance of the National Offshore Operations Advisory Committee, and following the provisions of the Administrative Procedures Act, developed Subchapter IA, Regulations for Mobile Offshore Drilling Units, 46 CFR Parts 107-109 and amendments to 46 CFR Subchapters "F", Marine Engineering Regulations, and "J", Electrical Engineering Regulations. These regulations, published in FEDERAL REGISTER (43 FR 56788 December 4, 1978) will apply to all units contracted for on or after the effective date of the regulations.

3. *Discussion.* a. This NVC elaborates the "grandfather provisions" of 46 CFR 107.211 and 107.215 in applying Subchapter IA to the approximately 150 *existing* ocean-going U.S. flag mobile offshore drilling units. "Existing" Mobile Offshore Drilling Units are those vessels which have been contracted for before the effective date of the regulations including:

(1) Units in Service.

(2) Units under construction.

(3) Units contracted for which are to be constructed and delivered prior to January 1, 1981.

b. Existing *uncertificated* mobile drilling units of which there are approximately 92 of the bottom bearing configuration, i.e., jack-up and submersible types, have not previously been required to comply with vessel inspection regulations. Some units have met the load line requirements of Subchapter "E" for International Voyages. Many of the older units are not classed by a classification society. Bottom bearing units operating on the Outer Continental Shelf of United States have been required to meet the safety requirements of 33 CFR Subchapter "N" as artificial islands. On January 3, 1979, existing bottom bearing units are subject to the "grandfather provisions" in paragraph 107.211(c) of Subchapter IA.

c. Existing *certificated* mobile offshore drilling units, for the purposes of this NVC, are column-stabilized and ship-shape types of which approximately 58 are currently certificated, or have made application for an original Certificate of Inspection or intend to make application for an original inspection for certification under 46 CFR Subchapter "I" on the basis of the unit being contracted for prior to the effective date of the new regulations. These units may continue to meet the structural, equipment, material and arrangement standards which were applicable to the hull, engineering, electrical and industrial systems when the units were contracted for. In addition they must meet the provisions of d.(1), d.(4)(d), d.(7)(b), d.(8), d.(9), d.(10)(b), d.(11) and d.(12) of paragraph 3 of this NVC in accordance with paragraph 107.215(c)(2) of Subchapter IA.

d. *Inspection Provisions for Existing Uncertificated Units.* The intent of the "grandfather" provisions of this NVC for existing uncertificated units is to ascertain through inspection that the material condition of the unit and its equipment meet reasonable levels of safety. To this end, the following determinations will be made:

- The design, construction and arrangements of the hull, machinery electrical and industrial systems do not reveal manifestly unsafe aspects.
- There is no excessive deterioration of the hull structure or equipment foundations.
- There are no intrinsic fire or explosion hazards.
- There are no personnel hazards such as unguarded moving machinery, potential electrical shock conditions or lack of handrails.
- The unit is seaworthy and exhibits satisfactory stability.

d.(1) *General.* (a) Repairs and minor alterations to hull structure or equipment may be made to the same standards as the original installation. However, new installations or major alterations which affect vessel or personnel safety shall meet the applicable standards of Subchapter IA.

(b) Existing items of safety equipment not meeting the applicable specifications or requirements set forth in Subchapter IA may be continued in service as long as they are maintained in good working order to the satisfaction of the OCMI. Such safety equipment and installations requiring extensive repairs shall be replaced and shall meet the applicable specifications and requirements of Subchapter IA.

(c) The OCMI has discretion to accept alternatives or equivalents which meet the established standards, and to give special consideration to departures from the regulations when it can be shown that special circumstances warrant such departures.

d.(2) *Plan Submittal.* (a) For units not classed by the American Bureau of Shipping or other recognized classification society, (see 46 CFR 108.109) the OCMI must have sufficient plans and information submitted to him which will describe such things as the unit's size, construction, configuration, arrangement of tanks, decks and spaces; and the machinery and electrical installation. In addition, the OCMI may require submittal of any additional data he considers necessary in order to proceed with the original inspections.

(b) For units classed by the American Bureau of Shipping or other recognized classification society, the plans and information described in Subchapter IA paragraphs 107.305 (a), (b), (v), and (ii) and a general description of the machinery and electrical installation shall be submitted to the OCMI for information. The OCMI may accept continued classification as proof of structural, mechanical, and electrical sufficiency. However, the OCMI may require additional plans and information if necessary.

d.(3) *Hull Structure.* (a) No structural changes will be required unless manifestly unsafe conditions exist.

(b) Existing uncertificated units must be drydocked or have a special examination in lieu of drydocking as required by 46 CFR, Section 107-261.

(c) Achievement of one compartment subdivision is not required where extensive modification of the original design would be necessary; however, watertight integrity of the hull and structural boundaries must be maintained. Bulkheads and decks designed to be watertight must be maintained as such where they are penetrated by pipes, electrical cable, reach rods, ventilation systems, etc.

d.(4) *Stability.* (a) The stability of each existing unit will be reviewed by the Coast Guard. The plans indicated in 46 CFR Subchapter IA paragraphs 107.305(q) through (u-1) must be submitted to the cognizant OCMI or Merchant Marine Technical Office.

(b) Lightship data from a Coast Guard witnessed and approved stability test is required for each existing, uncertificated unit. Alternatively other evidence of lightship values will be considered on a case by case basis.

(c) In general, compliance with the intact stability standards of 46 CFR Subchapter IA, Sections 108.303 through 108.309 is required. Where existing units were designed to a lesser standard of stability than that specified in §§ 108.303 through 108.309, some relaxation based on proven past performance may be granted at the discretion of the OCMI and limiting conditions, if any, set

forth in the operating manual. In no case

where wood was utilized in the construction

cy lighting system and provide 12 hours of

detailed standards for all existing units. The

tion. Plans must include a symbol list

solid, gas-tight floor from the spaces

V 43/233 DEC 78 UMI

forth in the operating manual. In no case will the minimum wind speed for adequate stability be reduced below 50 knots.

(d) An operating manual shall be prepared for each unit. Each operating manual must contain the information indicated in 46 CFR Subchapter IA, § 109.121(d) and be submitted to the cognizant OCMI or Merchant Marine Technical Office for review.

d. (5) *Load Line.* (a) All units are required to obtain and maintain a valid Load Line Certificate. The structure and stability of the unit must be proven adequate for the voyages and areas of operation intended.

(b) The American Bureau of Shipping or other recognized classification society will issue Load Line Certificates and conduct initial and annual load line surveys. Coast Guard and the American Bureau of Shipping inspections may be conducted simultaneously, but it is the owner's responsibility to arrange coordinated inspection schedules.

(c) The structural review conducted by the American Bureau of Shipping or other recognized classification society for load line assignment may be accepted by the Coast Guard as proof of structural adequacy of the hull.

(d) The stability review must be completed prior to issuance of a Load Line Certificate. The Coast Guard will inform the American Bureau of Shipping or other recognized classification society of the results of the stability review, and will indicate any stability limitations to be placed on the Load Line Certificate.

(e) Freeboard calculations for self-elevating units with barge type hulls will be made in accordance with 46 CFR, Part 42. The bow height requirements of 46 CFR 42.20-70 may be relaxed to approximately 33% of the normal requirement for barge shapes moving at speeds less than 6 knots. No relaxation of the addition to freeboard for deficiency in sheer is allowed. The freeboard for units other than self-elevating units with barge type hulls will be based upon compliance with the intact and damage stability standards applicable at the time the unit was contracted for.

(f) All units *delivered after the date of this NVC* regardless of contract date, must obtain a Load Line Certificate as soon as operationally feasible.

d. (6) *Route and Operating Area Limitations.* (a) Units classed by the American Bureau of Shipping or other recognized classification society for ocean service generally will be certificated by the Coast Guard for ocean routes.

(b) Unclassed units which have proven structural and stability adequacy by continued safe operation in a specific geographic area, such as the Gulf of Mexico, will be limited by the Certificate of Inspection and Load Line Certificate to that area. To qualify for an unlimited oceans route, such a unit must be reviewed for adequacy of the structure and stability by the Coast Guard and meet the Load Line requirements of d. (5) above.

(c) Any unit which intends to move or operate outside the geographical area indicated on the Certificate of Inspection must receive prior approval from the OCMI.

d. (7) *Fire Protection.* (a) *Structural fire protection.* All units must meet the provisions of Section 108.123, Insulation of Combustible Materials and Section 108.127, Storage Lockers for Combustibles. All existing interior stairways which are open at each end must be enclosed at one level. On units where wood was utilized in the construction of accommodation spaces, each space must be equipped with a smoke or heat detector either battery powered or operating on the AC power supply. All detectors must have the Underwriters Laboratories, Inc., label (UL) or the Factory Mutual Laboratories (FM) label.

(b) *Fire Extinguishing Systems.* Systems and equipment must be provided which will meet or be equivalent to the applicable specifications and provisions required by Subchapter IA. Installed fire extinguishing systems, which provide equivalent or greater protection than systems required by Subpart E, Subchapter IA may be continued in use as long as they are in good material condition and will function as designed. Where practicable, existing washdown systems may be utilized as the firemain. Where wood was utilized in the construction of accommodation spaces, the applicable reqirements of 46 CFR Subchapter IA, Table 108.495(a) should be doubled.

d. (8) *Lifesaving Equipment.* (a) Each unit must have lifesaving equipment (lifeboats and davit launched liferafts) for 200 percent of the total persons allowed on board. Except for submersible type units, the installation of lifeboats for 100 percent of the persons (on board) is required in accordance with 46 CFR Section 108.503 of Subchapter IA. Consideration will be given to those units where existing arrangement and structure do not provide sufficient room for installation of the lifeboats or where the added weight of the lifeboats, davits and winches will materially reduce the variable load capacity of the unit. In such cases, davit launched inflatable liferafts with a combined personnel capacity of the required lifeboats, and a rescue boat approved by the OCMI may be acceptable equivalents. Submersible type units may substitute Coast Guard approved throw over type inflatable liferafts and an approved rescue boat for the required lifeboats.

(b) For the second part of the total 200 percent primary lifesaving requirement, lifeboats installed in accordance with 33 CFR, Subchapter "N" Part 144 or Coast Guard approved life floats may be retained as provided for in 3.d(1)(b) of this Circular. They will be considered collectively with the Coast Guard approved liferafts for calculating the amount of equipment to provide for 100 percent of personnel on board.

(c) Adequate access to all lifesaving equipment must be provided.

d. (9) *Cranes.* (a) Plan approval will not normally be required of any crane which conforms to the specifications of the manufacturer as orginally installed. A rated load test as described in Section 107.260 of Subchapter IA will be required unless the crane has been load tested while under certification by an approved certifying authority as provided for in 46 CFR 107.258. Prior to the rated load test, the crane should be identified by manufacturer and model number to determine that the correct load rating chart is being used. The owner must submit to the OCMI details and calculations of any alterations to a crane which were accomplished without manufacturer's documentation in order to verify the rated load of the crane.

d. (10) *Electrical.* (a) Multiple power sources do not require an emergency generator; however, storage batteries or approved relay-controlled battery operated lanterns are required to be installed for the emergency lighting system and provide 12 hours of lighting.

(b) Electrical equipment installed in Class I, division 1 and 2 locations, as defined in Subchapter IA, Section 108.170 must be of a suitable type and in good material condition.

d. (11) *Unfired Pressure Vessels.* (a) Unfired pressure vessels built and stamped in accordance with Section VIII of the ASME Code may be continued in service as long as they remain in satisfactory condition. At the original and subsequent inspections for certification, ASME Code pressure vessels must be tested and examined in accordance with the requirements in 46 CFR 61.10-5.

(b) Unfired pressure vessels which cannot be identified as being constructed to any recognized standard may be continued in service provided that no obvious defects are noted. These pressure vessels shall be hydrostatically tested to one and one half times the working pressure. For pressure vessels that can not be reasonably hydrostatically tested, nondestructive testing may be used to verify the pressure vessels condition for continued serviceability. These pressure vessels will then be stamped with a Coast Guard identification number and periodically tested and examined in accordance with the requirements in 46 CFR 61.10-5.

d. (12) *Marine Sanitation Devices.* (a) All units must meet the provisions of 33 CFR Part 159, Coast Guard Marine Sanitation Devices Regulations. The discharge requirements are compatible with the OCS Orders of the U.S. Geological Survey.

4. *Action.* a. The owner of each *existing certificated* unit must provide the cognizant OCMI a proposed plan to accomplish the requirements in paragraph 3. c. of this NVC within 60 days from the effective date of the regulations. Most items should be approved at the unit's next inspection for certification; however, where major equipment installations are concerned, the owner may be allowed up to two years to comply with the requirements from the time the OCMI completes his assessment of the proposals.

b. *Application for Original Inspection for Certification.* Not later than sixty days from January 3, 1979, application for original inspection for certification of all *existing uncertificated units*, shall be submitted to the appropriate OCMI. The plans or descriptive data specified in paragraph 3.d(2) of this NVC along with a proposed plan to bring the unit into compliance should, if possible, be submitted with the application for inspection. If not feasible to assemble all required information in this time frame, an estimated date of submittal shall be indicated on the application. Arrangements should be made to commence the original inspection for certification with due consideration for the unit's operating situation.

c. To the extent possible the same inspection team will conduct the inspection of all existing uncertificated units in a geographical area. It may be advantageous to conduct the original inspection in conjunction with an impending special or periodic survey, drydocking or availability period. Units under construction will receive primary consideration by the OCMI for the allocation of time and personnel so that any problems can be identified while the unit is in the most advantageous situation to apply corrections.

d. The variety of designs and arrangements presented by existing uninspected MODU's makes it impractical to prescribe

detailed standards for all existing units. The procedures followed to implement this NVC must provide the necessary flexibility. Items which must be taken into consideration in applying this NVC are listed below. Categorizing units into groups to which the same items apply will be of value during the inspection process. These items are:

- Type
- Builder
- Model
- Date build
- Classed by ABS or other classification society
- Load Line assignment
- Operating history (including geographical areas)
- Present location

e. *Issuance of the Original Certificate of Inspection.* The intent of the original inspection of *existing uncertificated units* is to identify and commence correction of any unsafe conditions and/or equipment deficiencies and to issue the unit an original Certificate of Inspection. A reasonable period of time will be permitted to correct minor deficiencies. Those items directly affecting personnel safety and health will require immediate attention to correct the unsafe condition. Extensive deficiencies, such as those involving structural aspects or equipment may require up to two years to remedy. Additional times may be allowed if repair facilities are not available to coastal areas adjacent to the unit's area of operation. Where manifestly unsafe conditions are found, the OCMI may require that the unit discontinue operations until such conditions are corrected. If the owner or operator feels aggrieved by the decision of the OCMI, the appeals procedures of 46 CFR 2.01-70 are applicable.

f. Questions concerning this NVC should be referred to the Commandant (G-MVI).

SUBCHAPTER J—ELECTRICAL ENGINEERING

PART 110—GENERAL PROVISIONS

24. By adding a new § 110.01-10(g) to read as follows:

§ 110.01-10 Authority for regulations.

* * * * * *

(g) *Mobile offshore drilling units.* The citation regarding authority to prescribe requirements for mobile offshore drilling units is in Subchapter I-A of this chapter.

PART 111—ELECTRIC SYSTEM: GENERAL REQUIREMENTS

25. By adding a new § 111.05-(d)(22) to read as follows:

§ 111.05-5 Plan approval.

* * * * * *

(d) * * *

(22) For tank vessels, mobile offshore drilling units, and other vessels carrying hazardous materials as indicated in § 111.80-5, plans showing the location of each item of electrical equipment that is in a hazardous location. Plans must include a symbol list and manufacturer's name and identification.

* * * * * *

26. By adding a new Subpart 111.92 to read as follows:

Subpart 111.92—Mobile Offshore Drilling Units

Sec.

111.92-1 Definition.
111.92-3 Intrinsically safe electrical equipment.
111.92-5 Class I, Division 1 locations.
111.92-7 Class I, Division 2 locations.
111.92-9 Contiguous locations.
111.92-11 Electrical equipment in classified locations.

AUTHORITY: Sec. 2, 87 Stat. 418 (46 U.S.C. 86); sec. 3, 82 Stat. 341, as amended (46 U.S.C. 367); R.S. 4405, as amended (46 U.S.C. 375); sec. 10, 35 Stat. 428 (46 U.S.C. 395); R.S. 4423, as amended (46 U.S.C. 400); R.S. 4429, as amended (46 U.S.C. 407); R.S. 4430, as amended (46 U.S.C. 408); 88 Stat. 423 (46 U.S.C. 411); R.S. 4434, as amended (46 U.S.C. 412); R.S. 4462, as amended (46 U.S.C. 416); sec. 1, 73 Stat. 475 (46 U.S.C. 481); sec. 4, 67 Stat. 462 (43 U.S.C. 1333(d)); sec. 6(b)(1), 80 Stat. 937 (49 U.S.C. 1655(b)(1)); 49 CFR 1.46(b) and (n)(6).

Subpart 111.92—Mobile Offshore Drilling Units

§ 111.92-1 Definition.

As used in this subpart, "semi-enclosed location" means a location where natural conditions of ventilation are notably different from those on open decks due to the presence of structures such as roofs, windbreaks or bulkheads.

§ 111.92-3 Intrinsically safe electrical equipment.

(a) This section applies to each mobile offshore drilling unit.

(b) Only intrinsically safe electrical equipment approved for a Class I, Division 1 Location may be installed in the following locations:

(1) The internal space of each pressure vessel, tank, pipe, or gas vent of the mud circulating system between the well and the final degassing discharge.

(2) Any space in which an oil-gas-air mixture is continuously present under normal operational conditions.

§ 111.92-5 Class I, Division 1 locations.

The following are Class I, Division locations:

(a) An enclosed space that contains any part of the mud circulating system that has an opening into the space and is between the well and final degassing discharge.

(b) An enclosed or semi-enclosed location that is below the drill floor, and contains a possible source of gas release.

(c) An enclosed space that is on the drill floor, and is not separated by a solid, gas-tight floor from the spaces specified in paragraph (b) of this section.

(d) A space that would normally be considered a Division 2 location under § 111.92-7 but where combustible or flammable gases might accumulate.

(e) A location in the weather, or a semi-enclosed location, except as provided in paragraph (b) of this section that is within 1.5 m (5 ft.) of the boundary of any—

(1) Equipment or opening specified in paragraph (a) of this section;

(2) Ventilation outlet, access, or other opening to a Class I, Division 1 space; or

(3) Gas vent outlet.

(f) Except as provided in § 111.92-9, an enclosed space that has an opening into a Class I, Division 1 location.

§ 111.92-7 Class I, Division 2 locations.

The following are Class I, Division 2 locations:

(a) An enclosed space that has any open portion of the mud circulating system from the final degassing discharge to the mud suction connection at the mud pit.

(b) A location in the weather that is—

(1) Within the boundaries of the drilling derrick up to a height of 3 m (10 ft.) above the drill floor;

(2) Below the drill floor and within a radius of 3 m (10 ft.) of a possible source of gas release; or

(3) Within 1.5 m (5 ft.) of the boundaries of any ventilation outlet, access, or other opening to a Class I, Division 2 space.

(c) A location that is—

(1) Within 1.5 m (5 ft.) of a semi-enclosed Class I, Division 1 location indicated in § 111.92-5(b); or

(2) Within 1.5 m (5 ft.) of a Class I, Division 1 space indicated in § 111.92-5(e).

(d) A semi-enclosed area that is below and contiguous with the drill floor to the boundaries of the derrick or to the extent of any enclosure which is liable to trap gasses.

(e) A semi-enclosed derrick to the extent of its enclosure above the drill floor or to a height of 3 m (10 ft.) above the drill floor, whichever is greater.

(f) Except as provided in § 111.92-9 an enclosed space that has an opening into a Class I, Division 2 location.

§ 111.92-9 Contiguous locations.

An enclosed space that has direct access to a Division 1 or Division 2 location is the same division as that location, except—

(a) An enclosed space that has direct access to a Division 1 location is not a hazardous location if—

(1) The access has self-closing gastight doors that form an air lock;

(2) The ventilation causes greater

(b) NEMA standards in § 110.10-1(c)

Part 34 of Subchapter D (Tank Ves-

7 8

UMI

(2) The ventilation causes greater pressure in the space than in the Division 1 location; and

(3) Loss of ventilation overpressure activates an alarm at a manned station.

(b) An enclosed space that has direct access to a Division 1 location can be considered as a Division 2 location if—

(1) The access has a self-closing, gastight door that opens into the space and that has no hold-back device;

(2) Ventilation causes the air to flow with the door open from the space into the Division 1 location; and

(3) Loss of ventilation activates an alarm at a manned control station; and

(c) An enclosed space that has direct access to a Division 2 location is not a hazardous location if—

(1) The access has a self-closing, gastight door that opens into the space and that has no hold-back device;

(2) Ventilation causes the air to flow with the door open from the space into the Division 2 location; and

(3) Loss of ventilation activates an alarm at a manned control station.

§ 111.92-11 Electrical equipment in classified locations.

Electrical equipment and devices installed in spaces made non-hazardous by the methods indicated in § 111.92-9 must only be essential equipment.

26. By adding a new Subpart 111.94 to read as follows:

Subpart 111.94—Mobile Offshore Drilling Unit Industrial Systems

§ 111.94-1 Industrial systems.

A system on a mobile offshore drilling unit that is used only for the industrial function of the unit and meets the National Electrical Code need not meet this subchapter except—

(a) The Underwriters' Laboratories, Inc. standards in § 110.10-1(e) of this subchapter;

(b) NEMA standards in § 110.10-1(c) (1) and (2) of this subchapter;

(c) Section 111.05-5—Plan approval;

(d) Section 111.05-15—General considerations;

(e) Section 111.60-25(f)—Ship structure as a conductor;

(f) Section 111.60-30—Engine starting;

(g) Subpart 111.92—Mobile offshore drilling units; and

(h) Cables that penetrate a deck or bulkhead must—

(1) Be installed in accordance with § 111.60-1(k); and

(2) Meet the flammability test requirements of Section 18.13.5 of IEEE Std. No. 45.

PART 112—EMERGENCY LIGHTING AND POWER SYSTEM

28. By adding a new § 112.05-10 (e) and (f) to read as follows:

§ 112.05-10 Emergency lights.

* * * * *

(e) On a mobile offshore drilling unit, the distribution panels required in paragraph (b) of this section may be in the control room.

(f) On a mobile offshore drilling unit, the switches required in paragraph (c) of this section may be in the control room.

29. By adding a new § 112.15-5(c) and revising § 112.15-5(f) to read as follows:

§ 112.15-5 Final emergency source leads.

* * * * *

(c) Each electric blow-out preventer control system on a mobile offshore drilling unit.

* * * * *

(f) One of the fire pumps, if dependent upon the emergency generator for its source of power to comply with Part 34 of Subchapter D (Tank Vessels), Part 76 of Subchapter H (Passenger Vessels), Part 95 of Subchapter I (Cargo and Miscellaneous Vessels), or Part 108 of Subchapter IA (Mobile Offshore Drilling Units) of this chapter.

* * * * *

PART 113—COMMUNICATION AND ALARM SYSTEMS AND EQUIPMENT

30. By adding a new § 113.25-5(e) to read as follows:

§ 113.25-5 Operation.

* * * * *

(e) Each mobile offshore drilling unit must have a manually operated contact maker for the general alarm system—

(1) In the main control room;

(2) At the drilling console;

(3) In the space that has the feeder distribution panel;

(4) In the wheelhouse if a wheelhouse is installed; and

(5) In a location that is as far as practicable from each other contact maker.

(Sec. 2, 87 Stat. 418 (46 U.S.C. 86); sec. 3, 82 Stat. 341, as amended (46 U.S.C. 367); R.S. 4405, as amended (46 U.S.C. 375); sec. 10, 35 Stat. 428 (46 U.S.C. 395); R.S. 4423, as amended (46 U.S.C. 400); R.S. 4429, as amended (46 U.S.C. 407); R.S. 4430, as amended (46 U.S.C. 408); 88 Stat. 423 (46 U.S.C. 411); R.S. 4434, as amended (46 U.S.C. 412); R.S. 4462, as amended (46 U.S.C. 416); sec. 1, 73 Stat. 475 (46 U.S.C. 481); sec. 4, 67 Stat. 462 (43 U.S.C. 1333(d)); sec. 6(b)(1), 80 Stat. 937 (49 U.S.C. 1655(b)(1)); 49 CFR 1.46 (b) and (n)(6).)

Dated: November 21,1978.

J. B. HAYES,
Admiral, U.S. Coast Guard
Commandant.

OFFSHORE OIL POLLUTION LIABILITY AND COMPENSATION

Proposed Rules

AGENCY: Coast Guard, DOT.

ACTION: Notice of Proposed Rulemaking.

SUMMARY: The Coast Guard proposes to issue regulations to implement parts of Title III of the Outer Continental Shelf Lands Act Amendments of 1978. Title III creates a scheme of strict liability and compensation for the economic consequences of oil spilled as a result of activities on the Outer Continental Shelf and establishes a Federally administered fund to provide compensation for losses which are not otherwise compensated. The intended effect of this rulemaking is to propose requirements for establishment of financial responsibility, settlement and adjudication of claims, notification of incidents, designation of sources of oil pollution, and advertisement of claims procedures.

DATES: 1. Comments must be received on or before January 18, 1979. 2. Public Hearings: The Coast Guard will hold public hearings on the proposals in this notice on January 4, 1979 beginning at 9:30 a.m. in the Prince of Wales Room, 2d Floor, Hilton Hotel, Poydres at the Mississippi River at New Orleans, La. and on January 8, 1979 beginning at 9 a.m. in Room 2230, Department of Transportation, Nassif Building, 400 Seventh Street SW., Washington. D.C.

ADDRESS: Comments should be submitted in writing to Commandant (G-CMC/81). U.S. Coast Guard, 400 Seventh Street SW., Washington, D.C. 20590.

FOR FURTHER INFORMATION CONTACT:

Frank A. Martin, Jr. (202) 426-2606 (7:30 a.m. to 4 p.m.).

SUPPLEMENTARY INFORMATION: The Coast Guard invites the public to participate in this rulemaking by submitting written data, views, or arguments. Each person submitting comments should include his or her name and address, identify this notice (CGD 77-055), the specific item or items being commented upon, and give detailed reasons for any suggestions, arguments, objections or recommendations submitted. All comments received will be considered as fully as possible before final action is taken on the proposals in this notice; however, the statutory authority under which these rules are being issued requires final action by March 17, 1979. To facilitate the comment evaluation stage of this rulemaking and assure a full and careful consideration of all comments received, commenters are asked to key each comment to the particular section of the proposed rule to which it applies.

Availability of Materials in Rulemaking Docket

Comments received will be available for examination during normal business hours, 7:30 a.m. to 4 p.m., in Room 8117 at the above address. Also available at that address, for public inspection, are copies of the Regulatory Analysis from which the economic summary in this document is taken and the Environmental Assessment prepared for this rulemaking action. Copies of materials in the docket, including the public hearing transcripts when they become available, will be furnished to interested persons upon request to the Executive Secretary (G-CMC/81) at the above address and payment of the fees prescribed in 49 CFR 7.95.

Public Hearing Information

Interested persons are invited to attend the scheduled public hearings and present oral or written statements on the proposals in this document. The hearings will be informal and presided over by a Coast Guard official. Persons planning to make hearing presentations are encouraged to submit their views in writing in advance, and should notify Mr. Martin at least 10 days before the scheduled hearing dates, specifying the approximate length of time needed for their presentation. Time limitations may be imposed by the presiding officer, within the officer's sole discretion. Organizations or groups of individuals are requested to limit their presentations to a single speaker on behalf of the organization or group. Procedural details regarding the conduct of each hearing will be announced at the beginning of the hearing.

Public Comment Period

For reasons discussed elsewhere in this preamble, the Coast Guard has determined that this proposed rulemaking constitutes a significant regulation". Under current departmental regulatory policy, the general public should be allowed at least 60 days to comment upon proposed significant regulations. In the few instances where the initiating office determines this is not possible, the proposal is to be accompanied by a brief statement of the reasons for a shorter time period for public comment.

Because the statutory authority under which the rules in this document are being promulgated requires that they be developed, finalized, and effective on the 180th day after the date of enactment of the authorizing statute, i.e., by March 17, 1979, the Coast Guard determined that it can allow the public only 45 days in which to prepare and submit its comments on the proposals in this document. The Coast Guard believes this to be a reasonable time period under the circumstances, because, in addition to this publication in the Federal Register, it has made a direct mailing of this notice to those parties most affected by the proposed rules and issued appropriate news releases to assure timely dissemination. The Coast Guard has also involved a wide range of potentially affected interest in the early development of this rulemaking.

Drafting Information

The principal persons involved in this rulemaking action are: Mr. Frank A. Martin, Jr., Project Manager, Office of Marine Environment and Systems and Mr. Stephen H. Barber, Project Counsel, Office of Chief Counsel.

Background

On September 18, 1978, the President signed into law the Outer Continental Shelf Lands Act Amendments of 1978 (Pub. L. 95-372) (the Act). Title III of that Act imposes liability for the consequences of oil pollution from offshore activities on the owners, operators, and guarantors of the sources of such pollution and specifies requirements for evidence of the ability to meet that liability. The Act also establishes an Offshore Oil Pollution Compensation Fund (the Fund) which is to be administered jointly by the Secretary of Transportation and the Secretary of the Treasury. The principal purpose of the Fund is to ensure that money is available to pay for the prompt removal of any oil spilled or discharged as a result of activities on the Outer Continental Shelf (OCS) and to compensate for any damages to public or private interests caused by such spills or discharges, when, for whatever reason, payment is not made by the source of such oil pollution.

While the offshore Fund under Title III of the Act focuses on providing a uniform liability and compensation scheme for pollution incidents arising in connection with OCS activities, it is expected that legislative initiatives will mature that will, in effect, expand the scope of the Fund to include coverage of virtually all marine oil pollution, including that discharged from onshore facilities and Deepwater Ports. With this in mind, the Coast Guard's regulatory approach reflected

in this proposed rulemaking notice for implementing Title III considers the eventuality of a "Comprehensive Oil Pollution Liability and Compensation" scheme or "Superfund".

The increased scope of claims authorized by Title III, as opposed to claims heretofore primarily limited to cleanup costs under the Federal Water Pollution Control Act, as amended (33 U.S.C. 1321), represents a significant shift in Federal Government policy regarding damages caused by and claims originating from oil pollution. Under Title III there will be a greater degree of Federal Government involvement in compensation for damages from OCS oil pollution, including control of liability and financial responsibility requirements of parties connected with U.S. OCS petroleum production.

The Congress assigned the Secretary of Transportation major regulatory and administrative responsibilities regarding implementation of Title II. With the exception of the authority to appoint special three-member panels to hear and decide disputes under section 307(h) of the Act, and the authority to refer a disputed claim to such panel under section 307(i)(1) of the Act, it is expected the Secretary will delegate his responsibilities under Title III to the Commandant, U.S. Coast Guard.

A brief summary of the major provisions of Title III follows.

Fund Administration

The Secretary of Transportation and the Secretary of the Treasury share administrative responsibility for the Fund, which is authorized to be maintained at a level of not less than $100 million nor more than $200 million. The Fund is to be supported by a fee, not to exceed $.03 per barrel (bbl.), on all oil produced from the OCS. The Fund will also be supplemented by fines and penalties collected and interest earned. In addition to payment for oil spill removal and damage claims arising in connection with OCS activities not otherwise compensated, the Fund is also available for administrative costs of operating the Fund.

It does not appear likely that Fund revenues will approach the $200 million level in the near future. Based upon current OCS production the Coast Guard estimates that Fund revenue for the first year will be approximately $10 million, generated by levying the maximum $.03 bbl. fee authorized.

Under the statute, the Secretary of Transportation levies the per barrel fee which is imposed on the owner of the oil at the point where it is actually produced. The Secretary of the Treasury is given the statutory authority to collect the fees on behalf of the Fund. In this regard, the Secretary of the Treasury may, after consulting with the the Secretary of Transportation, promulgate regulations regarding actual fee collection and payment procedures. The per barrel fee may, by regulation, be modified from time to time by the Secretary of Transportation, to assure that the Fund does not exceed its statutory ceiling, but is still able to meet potential obigations.

The Act also give the Secretary of the Treasury authority to identify records and documents required to be maintained, and accessible for audit and examination by those subject to payment of the barrel fee.

The Secretary of Transportation may determine the Fund balance required to meet potential obligations, and borrow from the treasury, as necessary, to maintain such balance. The Secretary of Transportation may also promulgate regulations designating those persons who may obligate Fund monies.

Losses Covered

The Act imposes liability for economic loss resulting from or arising out of oil pollution from OCS activities as follows:

(1) Removal and cleanup cost;

(2) Injury to, or destruction of, property;

(3) Loss of property;

(4) Injury to, or destruction of natural resources;

(5) Loss of use of natural resources;

(6) Loss of profits or impairment of earning capacity due to injury to, or destruction of, real or personal property or natural resources; and

(7) Loss of tax revenue for a period of one year due to injury to real or personal property.

Liability

The Act imposes, with certain exceptions, strict liability for all loss on the owner and operator of the source of offshore oil pollution, up to certain limits. Except in certain cases, total liability of a vessel is $250,000 or $300 per gross ton, whichever is greater, plus all removal costs incurred by the Federal government of any State or local government; total liability for an offshore facility is all removal costs, plus up to $35,000,000 for all damages. In cases of gross negligence or willful misconduct of the owner or operator of vessels or facilities, liability is unlimited. The Fund is liable, without limitation, for all damages and removal costs to the extent that the loss is not compensated from other sources. If gross negligence or willful misconduct on the part of the claimant contributed to the damages, there in no liability to that claimant.

Liability is unlimited in the case where the owner or operator of a vessel fails or refuses to provide all reasonable cooperation and assistance requested by the responsible Federal official in furtherance of cleanup activities following a pollution incident. This provision requires that a determination be made as to whether reasonable cooperation and assistance has been provided. Most of the vessels affected by the Act are barges which transport oil from platforms to shore. There are twelve barging systems in operation in the Gulf of Mexico handling an average of 20,000 barrels a day of OCS oil from approximately 70 leases. There is one known self-propelled vessel which performs similar operations with OCS oil off the California coast. Vessel transport accounts for movement of 3% of all oil produced on the OCS. The remainder is moved by pipeline.

The facilities covered by the Act include platforms, mobile offshore drilling units, pipelines, storage facilities and any other structure which is used to drill for, transfer, store, produce, handle, process, or transport oil produced from the OCS. There are now about 2,300 platforms on the OCS with all but a few in the Gulf of Mexico. There are approximately, 120 mobile offshore drilling units in operation in several OCS locations including the Gulf of Mexico, the Santa Barbara channel and the Baltimore Canyon. There are over 57 million feet of pipelines operated by 66 companies in the Gulf of Mexico alone. Plugged and abandoned wells number over 6,600.

This notice does not contain any proposed regulations regarding the liability provisions of Title III of the Act. Rather, the Coast Guard chooses to defer to the statute in this area and reevaluate the need for any liability regulations after experience is gained with the operation of the Fund.

Financial Responsibility

In general, the Act requires the owner or operator of an offshore facility to establish and maintain evidence of financial responsibility in the amount of $35,000,000. The Act also requires vessel owners or operators to establish and maintain evidence of financial responsibility in varying amounts. The authority of the President to promulgate regulations concerning financial responsibility is expected to be delegated, in the case of offshore facilities, to the Secretary of Transportation, who, in turn, will delegate that authority to the Commandant, and in the case of vessels, to the Federal Maritime Commission (FMC), which currently issues Certificates of Financial Responsibility to vessels under the Federal Water Pollution Control Act (33 U.S.C. 1321).

V 4 3 / 2 3 3 D E 4 7 8 UMI

NOTIFICATION, DESIGNATION, AND ADVERTISEMENT

Any person involved in a discharge of oil subject to Title III is required to immediately notify the Secretary of Transportation when such an incident occurs or is imminent. Upon the Secretary's designation of the source of a discharge, the person or organization so designated shall advertise the designation and procedures by which damage claims are to be presented. The Act provides general guidelines on, and time limits for, these procedures. The implementing regulations proposed in this document incorporate and amplify these statutory guidelines for notification, designation and advertisement.

The Act also prescribes when advertisement will be performed by the Fund; i.e., for cases where the vessel or facility owner or operator involved denies a source designation, fails to advertise in a timely fashion, or where the source of the pollution is unknown or is a public vessel.

CLAIMS SETTLEMENT

The basic premise of the claims settlement provisions of the Act is that claims are to be presented first to the owner, operator, or guarantor of the source. A claim is presented directly to the Fund only when the owner, operator, and guarantor fail to settle the claim within 60 days or deny the designation or when the source is unknown or is a public vessel. The Secretary of Transportation's authority to promulgate regulations for the appraisal and settlement of claims against the Fund will be delegated to the Commandant.

SUBROGATION

The Act provides that any person or government entity, including the Fund, who makes payment on a claim under the Act, acquires by subrogation the rights of that claimant to recover the cost or damage covered by the payment. Thus, if the Fund pays claims, it will seek reimbursement from the source of the pollution.

Potential defendants in actions by the Fund to recover costs or damages are separated into two classes for the purpose of differentiating their respective rights to dispute claims settlements. If the Fund proceeds against an owner, operator, or guarantor who either denies a designation or who denies liability, the owner, operator, or guarantor cannot protest the amount involved except to the extent that the amount exceeds their liability. If, however, the owner, operator or guarantor accepts a designation and attempts to negotiate with a claimant, the owner, operator, or guarantor has a right to contest any amount paid by the Fund in excess of the largest amount offered by the owner, operator or guarantor in settlement to the claimant.

RELATIONSHIP TO OTHER LAW

The Act does not preempt existing State liability requirements or preclude a State from imposing, within State jurisdiction, new or additional requirements for liability for either damages or removal costs, or both.

Claimants who are eligible under both the Act and a State law may seek reimbursement for damages and removal costs under either law. However, any person who receives compensation under a State law is precluded from compensation for those damages and removal costs under the Act.

PENALTIES

The Act subjects persons who violate the financial responsibility requirements of the Act and of regulations thereunder to a civil penalty not to exceed $10,000. The Act also imposes the same penalty on those who violate an order denying a vessel entry into navigable waters of the United States or detaining it at a U.S. port because of failure to show a certification of financial responsibility.

The assessment of penalties relating to financial responsibility for offshore facilities, denial and detention orders for vessels, and the Coast Guard's right of access to vessels and offshore facilities in order to verify certification of financial responsibility will be performed by the Coast Guard under 33 CFR 1.07.

GENERAL DISCUSSION OF PROPOSED REGULATIONS

The primary objective of this rulemaking action is to develop and prescribe the Federal policies, procedures and administrative requirements necessary to the operation of the Fund. In pursuit of this objective the Coast Guard believes regulations are necessary in the following areas:

a. Methods and procedures for the adjudication and settlement of claims.

b. Requirements for establishing and maintaining evidence of financial responsibility for offshore facilities.

c. Designation, notification and advertisement requirements, to be followed when an oil pollution incident occurs.

d. The levy of the per barrel fee owners of OCS oil are to pay to Fund.

e. Denial and detention orders for vessels.

The proposed regulations are the minimum necessary to implement the Secretary of Transportation's authority under Title III of the Act and communicate the system of Fund operation. The following segments of the general public are directly affected by the proposed regulations.

a. Owners and operators of offshore facilities and their guarantors, who must meet liability and financial responsibility requirements, and damage claim obligations.

b. Persons who suffer oil pollution damage or removal costs and are eligible claimants within the context of Title III of the Act.

c. Certain vessel owners and operators required to comply with FMC's regulations under Title III, and meet damage claim obligations.

REGULATORY ANALYSIS

The Coast Guard considers this regulatory action to be a "significant" rulemaking action under current Departmental guidelines for "Improving Government Regulations", published in the FEDERAL REGISTER (43 FR 23925-33) on June 1, 1978. The proposed regulations deal with oil spill liability and compensation for damages arising from oil pollution, a matter of substantial public interest and controversy. The increased financial certification and claims adjudication requirements imposed upon firms connected with the U.S. OCS petroleum industry represent a significantly greater degree of Federal Government involvement in that industry than has previously existed. Finally, it is expected that these regulations will impact upon, and must be consistent with the regulatory and administrative approach taken by the other Federal agencies assigned responsibilities under Title III, principally the Treasury Department. For these reasons a Regulatory Analysis has been prepared.

The Regulatory Analysis discusses the major alternatives considered by the Coast Guard during development of the proposals in this document. That analysis, presently in draft form, contains a detailed description of the major regulatory alternatives considered, the economic and other relevant consequences of each alternative, and the reasons for selecting the proposals in this document. Based on that Analysis, the Coast Guard has concluded that the proposed regulations are basically procedural in nature and, consequently are not likely to have a major general economic impact in terms of costs, consumer prices, or production; nor upon individual industries, levels of government, or geographic regions. The draft Regulatory Analysis will be revised, as appropriate, in light of comment received from this notice, and finalized concurrently with the promulgation of the final regulations.

The cost to industry of meeting the financial responsibility requirements of the proposed regulations is of critical importance. Due to the nature of the liability imposed by the Act, there is some question as to whether the

surety, guarantee, or insurance options will be available to those who may desire to establish evidence of financial responsibility by one of those methods. The consequence of such options not being available would be the necessity for relatively small firms, those unable to self-insure, to cease petroleum production operations on the OCS. In such a case there might be a reduction in competition in the industry, a reduction in production volume, and ultimately, an increase in the cost of OCS petroleum to the consumer.

Preliminary inquiry conducted by the Coast Guard indicates that the surety, guarantee, and insurance options probably will be available given the requirements for evidence of financial responsibility established by the regulations as presently proposed. However, the Coast Guard has been unsuccessful in its efforts to determine the cost associated with establishing evidence of financial responsibility by any of those methods. A study is to be conducted pursuant to section 305(d) of the Act to determine whether adequate insurance will be available. Public comment regarding the expected impact of this aspect of the proposed regulations is greatly desired by the Coast Guard.

ENVIRONMENTAL ASSESSMENT

The Coast Guard has considered the environmental impact of the proposed regulations and concluded that preparation of an environmental impact statement is not necessary. A Negative Declaration has been prepared and is on file in the rulemaking docket.

EFFECTIVE DATE

Section 315(b) of the Act requires that the regulations authorized in Title III be effective on the 180th day after enactment. Section 313(c) requires appropriation act enactment before collecting or spending is authorized. The effective date of these proposals, as may be modified by changes resulting from this notice, will be no earlier than March 17, 1979, or after the appropriation act enactment, whichever occurs later.

SPECIFIC DISCUSSION OF PROPOSED REGULATIONS

All the regulations for implementing the responsibilities assigned to the Secretary of Transportation under Title III of the Act are contained in proposed new Parts 130 and 131. The proposed rules prescribe only the minimum necessary to explain to those persons affected by the Act the details worked out for the actual operation of the Fund. In some instances the rules in Parts 130 and 131 do not place a specific requirement or burden on any particular individual, but describe internal agency procedures and practices regarding administration of the Fund.

Proposed § 130.3 identifies those segments of the public that are affected by the proposed regulations. Paragraph (a)(1) thru (4) of the section identify the specific segments of the general public upon which the Act and these regulations place major responsibilities regarding liability and financial responsibility for oil pollution incidents arising in connection with OCS activities. Paragraph (a)(5) of this section is merely a statement intended to indicate that there are persons other than those listed in paragraph (a)(1) thru (4) that are affected less directly by the Act and these implementing regulations.

Section 302 (d)(1) of the Act requires the Secretary to levy a barrel fee not to exceed $.03 per barrel on the owners of oil produced on the OCS. Proposed § 130.103 in Subpart B is the actual levy of the barrel fee on the owner of OCS oil. The levy of the maximum fee allowed under the Act is predicated upon Coast Guard analysis that the maximum barrel fee is necessary to build the Fund up to an operating level adequate to meet anticipated obligations. Based on current statistics on oil produced on the OCS it appears the fee will remain at the full $.03 per barrel permitted by the Act for the foreseeable future.

Proposed § 130.103(b) contains the criteria for determining when oil is "produced" and thus subject to the $.03/bbl. fee levied by paragraph (a) of the section.

Proposed § 130.105 states how the Commandant will modify the barrel fee imposed on OCS oil produced, as necessary to keep the Fund balance within the levels authorized by the Act.

Proposed Subpart C, §§ 130.201-.223 contain the requirements believed necessary for establishing and maintaining evidence of financial responsibility for facilities.

Evidence of financial responsibility could be established by allowing private insurance companies, bonding agencies, or guarantors to issue certification verifying that the owner or operator of an offshore facility has the financial capability to meet specified limits of liability. Such evidence could also be established by requiring that the Fund issue that certification. The selection of one of those alternatives involves the decision to impose the administrative cost of certification of financial responsibility on either private industry or the Fund.

It may be argued that because offshore facilities are always subject to United States jurisdiction and are not in most cases readily movable, private insurance companies, bonding agencies, or guarantors should be allowed to issue certification of financial responsibility to an owner or operator of an offshore facility. However, because it is expected that a significant percentage of owners and operators will be self-insured, which will require that the Fund issue a large percentage of certificates, because the Fund might not have legal authority to revoke certification issued by a private company, because certification must be completed in a timely fashion, and because the Coast Guard desires that certification be of uniform quality and appearance, it has been decided that evidence of financial responsibility will be established by having the Fund issue certification verifying that the owner or operator of an offshore facility has the financial capability to meet specified limits of liability. Proposed Subpart C reflects this decision throughout the subpart.

For the purpose of the rules in proposed Subpart C, a mobile offshore drilling unit is considered to be an offshore facility rather than a vessel when it becomes attached to the seabed for exploration, development, or production of oil.

The definition of "vessel" in section 301(5) of the Act precludes by the language "* * * and which is transporting oil directly from an offshore facility * * *", the placement of mobile offshore drilling units in the caregory of a "vessel" under Title III because such units are not normally used for transporting oil. The owners and operators of mobile offshore drilling units must establish and maintain evidence of financial responsibility as required for an "offshore facility" under section 305(b) of the Act, when engaged in drilling for, producing, or processing oil on the OCS. The applicability of the offshore facility financial responsibility requirements proposed in Subpart C includes a specific reference to mobile offshore drilling units in proposed § 130.201(b).

An application needs to be made for each facility but an owner or operator need only provide evidence in the amounts proposed in § 130.203. This provision would not lessen the multiple liability of the owner or operator and is not to be construed to include insuring only the largest facility.

An owner or operator of an offshore facility is required to have evidence of financial responsibility in the amount of $35,000,000. Because the likelihood that an owner or operator, or guarantor of an owner or operator, will be involved in more than one incident increases with an increase in the number of offshore facilities operated at any given time, the Coast Guard has required in proposed § 130.203 that, where evidence of financial responsibility is by guarantee, surety bond, or

self-insurance, covering more than one

sary to issue and maintain the certifi-

[4910-14-C]

OUTER CONTINENTAL SHELF LANDS ACT

V 43/233 DE 4 78 UMI

self-insurance, covering more than one offshore facility, there must be additional assets available to pay any damages arising out of multiple incidents.

However, because the dollar amount of the probable damages to which an owner or operator, or guarantor of an owner or operator, may be exposed by reason of the operation of more than one offshore facility at any given time is not directly proportional to the number of offshore facilities operated, the increase in assets required to cover more than one offshore facility progressively decreases for each additional offshore facility. Thus, the self-insured owner or operator of more than one offshore facility is required to have only $8 million in additional assets for the second offshore facility, $4 million for the third offshore facility, $2 million for the fourth offshore facility, and $1 million for the fifth offshore facility. No additional assets will be required for the sixth and subsequent offshore facilities.

The procedures for applying for certificates of financial responsibility are proposed in § 130.215. This section proposes a single application form that is sufficiently flexible to accommodate the range of alternatives, or combination thereof, of methods available to a facility owner for establishing financial responsibility. The Coast Guard is developing the single form application concept to minimize paperwork and reporting requirements for the facility owners and operators and their guarantors.

The single application form will contain only the basic information necessary to issue and maintain the certificate of financial responsibility. The endorsement side of the form (reverse side), to be completed by the guarantor, surety, or insurer will establish their liability and provide a mechanism for the Fund Administrator to check compliance with the applicable provisions of proposed Subpart C.

The purpose of requiring that an application form be submitted for each facility (proposed § 130.215(b)) is to enable quick processing of changes, additions, and deletions of facilities of record without changing the previously furnished evidence when that is unnecessary. The reference on the face of the form to primary and secondary certificate numbers is to facilitate the administrative process of reviewing financial evidence and keeping issued certificates current. The primary number will locate for the Fund Administrator the initial evidence furnished as regards the particular insurer, guarantor, or surety for a facility. The secondary number will identify the specific owner and facility.

It is intended that the single application form and endorsement thereon, together with any attached supporting financial data required as evidence, complement the proposed Subpart C regulations and achieve a rather simple administrative process for assuring that the financial responsibility requirements of the Act are met. Public comment on the draft application form proposed herein is specifically desired to assist in finalizing the form in a manner that will achieve the above intent.

As a practical matter it is not possible to process requests from the owners, operators, or guarantors of offshore facilities for the issuance of certificates of financial responsibility so as to have the certificates on the facilities within the time frame intended by Congress, i.e., the 180th day after enactment of the Act. Therefore, the rule proposed in § 130.215(a)(1) will most probably be waived to allow applicants for certificates of financial responsibility sufficient time to make the required application. Public comment is also specifically invited as to what the "sufficient time" should be, taking into consideration the time an applicant would require to arrange for insurance, bonding, or guarantee, or to gather appropriate supporting financial data to comply with the financial responsibility provisions of proposed Subpart C.

The proposed regulations for Subpart C contain no adminstrative sanctions against facilities, similar to those prescribed for vessels in proposed Subpart E because none are authorized by the Act. However, in addition to the administrative sanctions in proposed § 130.401 against vessels, failure of an owner or operator of either a vessel or a facility to meet the requirements of financial responsibility subjects that person to the civil penalty provided in section 312(a)(1) of the Act.

Subpart D, §§ 130.301-130.319 are proposed regulations governing notification, designation and advertisement requirements associated with a pollution incident. These procedures deal with contacts and communications between claimants and the owners, operators, and guarantors of facilities and vessels which have been designated as the source or sources of oil pollution. Since the nature of the functions covered in proposed Subpart D are more operationally oriented rather than administrative, the term "Commandant" is used throughout this subpart in lieu of the term "Fund Administrator" used in the other proposed subparts.

In view of the similarity of the notification requirements in section 306 of the Act to the notification requirements under the Federal Water Pollution Control Act (FWPCA), as amended, and to avoid duplication of effort, the notification procedures in proposed § 130.305 are essentially the same as those which already exist in 33 CFR 153.203. The one important distinction is that the Act requires notification of "imminent threats," which is not required under the FWPCA. In an effort to clarify what constitutes an imminent threat, proposed § 130.303(a)(3) defines "occurrences which impose an imminent threat of oil pollution." Notifications under proposed § 130.305 would also satisfy the provisions of 33 CFR 153.203.

It is anticipated that most of the functions assigned to the Commandant in proposed Subpart D will, in practice, be carried out by Federal On Scene Coordinators. The Notice of Designation proposed in § 130.309 for designating the source of an oil spill incident contains much of the information which is currently provided by the notice of Federal interest which is issued under FWPCA auspices. Failure to deny designation is not an acceptance of liability. If, subsequently, it is determined that a designated source was not responsible for the discharge, or has a defense to liability, that source would have recourse to the Fund or to other parties for reimbursement.

Section 130.313 proposes that the commandant determine advertising requirements, if any, that will be applied to each oil pollution incident and the criteria upon which that determination is made. This proposal reflects an interpretation of section 306(b)(2) of the Act that advertising may not be required or necessary in all cases, but rather, should depend upon the circumstances of each incident.

Proposed § 130.315 lists acceptable types of advertisement. The type or types of advertisement required for each specific oil pollution incident, if any, will be determined by the Commandant, along with the required frequency and geographical scope (proposed § 130.317). The contents of each advertisement are proposed in § 130.319.

Although the statutory authority regarding the establishment and maintenance of vessel financial responsibility was given to the President who will probably delegate that responsibility to the FMC, the Act specifically directs the Secretary of Transportation to issue regulations concerning sanctions against vessels which do not adhere to FMC financial responsibility requirements. Accordingly, these regulations appear in proposed Subpart E and include the conditions under which the vessel sanctions will be imposed and removed. By expected delegation from the Secretary, the Commandant will administer sanctions against vessels.

The regulations proposed in Part 131 prescribe the procedures and requirements for the presentation, consideration and settlement of claims against the Fund.

The Act requires, to the extent possible, the use of the facilities and services of private insurance and claims adjusting organizations, or State agencies, to process claims against the Fund. It should be noted that State agencies cannot, under the Act, settle claims of that State. For this reason it is thought that to utilize a State claims organization would be unnecessarily duplicative of existing private adjuster organizations, particularly in light of the limited number of claims expected. Therefore, for the time being, it is not contemplated that State agencies will be used to process claims against the Fund.

Consequently, the Coast Guard intends to contract with one or more private claims processing organizations to provide nationwide claims processing capability to receive, evaluate, adjust, and settle claims against the Fund, with minimum Federal involvement. It is believed that this approach, which may be modified after the Fund gains experience, will provide the most effective, uniform, and efficient claims processing system.

The regulations proposed in Part 131 are intended to be sufficiently detailed to implement statutory requirements for making and settling claims against the Fund, yet be sufficiently flexible to apply to the myriad of situations which will undoubtedly arise.

In consideration of the foregoing, the Coast Guard proposes to establish new Parts 130 and 131 in a new Subchapter M in Title 33, Code of Federal Regulations, as follows:

SUBCHAPTER M—MARINE OIL POLLUTION LIABILITY AND COMPENSATION

PART 130—OFFSHORE OIL POLLUTION COMPENSATION FUND

Subpart A—General

Sec.
130.1 Purpose.
130.3 Applicability.

AUTHORITY: Pub. L. 95-372; 49 CFR 1.46.

Subpart A-General

§ 130.1 Purpose.

(a) This part prescribes the policies, procedures, and administrative practices regarding offshore oil pollution liability and compensation, including the administration and general operation of the fund established under Title III of the Outer Continental Shelf Lands Act Amendments of 1978 (Pub. L. 95-372).

§ 130.3 Applicability.

(a) This part applies to each person who—

(1) Owns oil obtained from the Outer Continental Shelf when the oil is produced;

(2) Owns, operates, or is the guarantor of the owner or operator of any vessel as defined in § 130.5;

(3) Owns, operates, or is the guarantor of the owner of operator of any offshore facility;

(4) Sustains an economic loss as a consequence of oil pollution arising from Outer Continental Shelf activities; or

(5) Otherwise has responsibilities under Title III of the Act and the regulations in this part.

§ 130.5 Definitions.

(a) As used in this part, the following terms shall have the same meaning as defined in Section 301 of Title III of the Outer Continental Shelf Lands Act Amendments of 1978 (Pub. L. 95-372): "Barrel"; "claim"; "discharge"; "facility"; "Fund"; "guarantor"; "incident"; "offshore facility"; "oil"; "oil pollution"; "operator"; "owner"; "person"; "person in charge"; "public vessel"; and "vessel".

(b) As used in this part—

(1) "Act" means Title III of the Outer Continental Shelf Lands Act Amendments of 1978 (Pub. L. 95-372), entitled "Offshore Oil Spill Pollution Fund".

(2) "Captain of the Port" means a Coast Guard officer commanding a Captain of the Port area described in Part 3 of this chapter, or that person's authorized representative or, where there is no Captain of the Port area, a District Commander of a Coast Guard District described in Part 3 of this chapter, or that person's authorized representative.

(3) "Commandant" means the Commandant of the Coast Guard or that person's authorized representative.

(4) "Fund Administrator" means the person to whom the authority and functions of the Commandant as administrator of the Fund are delegated.

(5) "Outer Continental Shelf" or "OCS" means "Outer Continental Shelf" as defined in Section 2(a) of the Outer Continental Shelf Lands Act (43 U.S.C. 1331(a)).

§ 130.7 Delegation—Fund Administrator.

(a) The Fund Administrator is delegated authority to perform those functions assigned or delegated to the Secretary of Transportation under the Act not reserved by the Secretary of Transportation or the Commandant.

(b) The Fund Administrator may redelegate and authorize successive redelegations of the authority granted in paragraph (a) of this section within the command under which that person has jurisdiction or to members of the Fund staff.

§ 130.9 Fund address.

(a) The address to which correspondence relating to the Coast Guard's administration of the Fund is to be directed and the location of the Fund Administrator is Offshore Oil Pollution Compensation Fund, U.S. Coast Guard Headquarters (G-W/73), 400 Seventh Street, SW., Washington, D.C. 20590.

Subpart B—Levy of Fees

§ 130.101 Purpose.

(a) The purpose of this subpart is to state the general requirements concerning the levy of fees.

§ 130.103 Levy and payment of barrel fee on OCS oil.

(a) The owner of oil obtained from the OCS shall pay to the Treasury of the United States a fee of $0.3 per barrel on all oil produced on the OCS.

(b) The owner of oil obtained from the OCS shall, for the purpose of computing the barrel fee levied in paragraph (a) of this section, measure OCS oil production by employing the criteria of the U.S. Geological Survey contained in 30 CFR 250.60 and OCS Order 13.

NOTE.—Payment of the fee levied in paragraph (a) of this section is made in accordance with the fee collection regulations issued by the Secretary of the Treasury.

§ 130.105 Adjustment of levy.

(a) The Commandant modifies or suspends by regulation the barrel fee levied in § 130.103(a) to maintain the statutory Fund level.

(b) The Commandant gives at least 90 days notice before any barrel fee modification or suspension becomes effective.

Subpart C—Financial Responsibility for Offshore Facilities

§ 130.201 Applicability.

(a) This subpart applies to the owner or operator of each offshore facility required by the Act to establish and maintain evidence of financial responsibility.

(b) For the purpose of this subpart:

(1) A mobile offshore drilling unit is considered an offshore facility from the moment a drill shaft connected to the unit first touches the seabed for the purposes of exploration, development, or production of oil until drilling is complete and the unit is no longer attached to the seabed by any device which transfers oil to the unit.

(2) Two or more platforms or structures, when physically connected above the waterline, are considered to be a single offshore facility.

(3) All wells, including satellite wells, and the flow lines from all wells are considered to be part of the platform or structure to which they are connected.

(4) A pipeline used to transport oil between two offshore facilities, between an offshore facility and a pipeline, between an offshore facility and the shore, or between any point on the OCS and the shore, including any pumping or booster stations whether above or below water, is considered to be an offshore facility.

NOTE.—Regulations governing financial responsibility and certification for vessels are promulgated by the Federal Maritime Commission.

§ 130.203 Amount required.

(a) The owner or operator of an offshore facility that is used in drilling for, producing, or processing oil, or has the capacity to transport, store, transfer, or otherwise handle more than 1,000 barrels of oil at any one time, must establish and maintain evidence of financial responsibility in the amount of $35,000,000.

(b) In any case where an owner or operator owns or operates more than one offshore facility and chooses to provide evidence of financial responsibility by guarantee, surety bond, or self-insurance, the amount must be established according to the following scale:

(1) For one facility, $35,000,000;
(2) For two facilities, $43,000,000;
(3) For three facilities, $47,000,000;
(4) For four facilities, $49,000,000;
(5) For five or more facilities, $50,000,000.

(c) In the case where an owner or operator owns or operates more than one offshore facility, the amount of insurance coverage for each facility must be $35,000,000.

(d) The owner or operator who owns or operates more than one offshore facility shall obtain a Certificate of Financial Responsibility for each facility.

(e) If separate parts of an offshore facility are owned by separate owners or operators, only one owner or operator need establish financial responsibility if that owner or operator is acting as guarantor for all of the owners and operators of that facility.

(f) If an entire offshore facility is jointly owned or operated only one owner or operator need establish financial responsibility if that owner or operator will assure financial responsibility for all of the other owners or operators of that facility.

§ 130.205 Methods of establishing evidence.

(a) Evidence of financial responsibility may be established by any one, or any combination acceptable to the Fund Administrator, of the following methods:

(1) Insurance;
(2) Guarantee;
(3) Surety bond; or
(4) Qualification as self-insurer.

(b) The Fund Administrator accepts alternative evidence of financial responsibility if it establishes an equivalent degree of financial responsibility for the purposes of this subpart.

§ 130.207 Insurance as evidence.

(a) Insurance filed with the Fund Administrator as evidence of financial responsibility shall be issued by an insurer that is acceptable to the Fund Administrator

(b) An insurer must—

(1) Agree to be sued directly by any person for claims under the Act against the owner or operator; and

(2) Designate an agent in the United States for service of process.

(c) Insurance coverage as evidence of financial responsibility must be effective on the date of endorsement on the application for Certificate of Financial Responsibility and must remain in force until 30 days after date of receipt by the Fund Administrator of written notification that the insurer has elected to terminate the insurance coverage.

(d) Termination of insurance coverage shall not affect the liability of the insurer for an incident occurring before the effective date of termination.

(e) Joint insurers shall be jointly and severably liable.

§ 130.209 Guarantee as evidence.

(a) A guarantor must—

(1) Agree to be sued directly by any person for claims under the Act against the owner or operator; and

(2) Designate an agent in the United States for service of process.

(b) Guarantees filed as evidence of financial responsibility must be supported by a copy of the guarantor's most recent balance sheet, income statement, and statement of changes in financial position, that are either consolidated or non-consolidated, certified by an independent Certified Public Accountant, and, when consolidated, endorsed by an independent Certified Public Accountant confirming that the guarantor's—

(1) Current assets held in the United States, not including pledged assets or stock not publicly traded, exceed current liabilities in an amount greater than the amount being guaranteed; and

(2) Equity exceeds the amount guaranteed.

(c) If the guarantor files a Securities and Exchange Commission Form 10-K report, a copy of the guarantor's most recent 10-K report must be filed with the Fund Administrator.

(d) Each guarantor must file annually with the Fund Administrator copies of the documents required under paragraph (b) of this section, within 90 days after the close of the guarantor's fiscal accounting period, and, under paragraph (c) of this section, within 30 days after the date of filing the 10-K reports with the Securities and Exchange Commission.

(e) A guarantee as evidence of financial responsibility must be effective on the date of endorsement on the application for Certificate of Financial Responsibility and must remain in effect until 30 days after date of receipt by the Fund Administrator or written notification that the guarantor has elected to terminate the guarantee.

(f) Termination of the guarantee shall not affect the liability of the guarantor for an incident occurring before the effective date of termination.

(g) Joint guarantors shall be jointly and severably liable.

§ 130.211 Surety bond as evidence.

(a) Each surety bond filed with the Fund Administrator as evidence of financial responsibility shall be issued by a bonding company that—

(1) Is authorized to do business in the United States;

(2) Is licensed to do business in the state or territory in which the bond is executed;

(3) Is certified by the Department of the Treasury with respect the issuance of Federal bonds in the penal sum of the bond; and

(4) Designates an agent in the United States for service of process.

(b) The surety must agree to be sued directly by any person for claims under the Act against the owner or operator.

(c) A surety bond as evidence of financial responsibility must be effective on the date of the endorsement on the application for Certificate of Financial Responsibility and must remain in effect until 30 days after date of receipt by the Fund Administrator of written notification that the surety has elected to terminate the surety bond.

(d) Termination of the surety bond shall not affect the liability of the surety for an incident occurring before the effective date of termination.

§ 130.213 Qualification as self-insurer.

(a) Evidence of self-insurance filed with the Fund Administrator as proof of financial responsibility must be supported by either—

(1) A non-consolidated copy of the self-insurer's most recent balance sheet, income statement, and statement of changes in financial position, that are certified by an independent Certified Public Accountant and endorsed confirming that the self-insurer's current U.S. assets, not including pledged assets or stock not publicly traded, exceed current liabilities for the amount of the self-insurance, and that the self-insurer's equity exceeds the amount of the self-insurance; or

(2) A copy of the self-insurer's most recent balance sheet, income statement, and statement of changes in financial position which are certified by an independent Certified Public Accountant, and a statement prepared by that accountant which shows that, based on an analysis of the self-insurer's financial position, sufficient liquid assets cash flow, or a combination thereof have historically been available over the past five years to sufficiently retire a claim for the amount of self-insurance requested without placing the self-insurer in an insolvent position.

(b) If the self-insurer files a Securities and Exchange Commission Form 10-K report, a copy of the self-insurer's most recent 10-K report must be filed with the Fund Administrator.

(c) Each self-insurer must file annually with the Fund Administrator copies of the documents required under paragraph (a) of this section, within 90 days after the close of the self-insurer's fiscal accounting period,

UMI

and, under paragraph (b) of this section, within 30 days after the date of filing the 10-K reports with the Securities and Exchange Commission.

§ 130.215 Certification.

(a) The owner or operator or owner and operator of an offshore facility shall—

(1) Apply for a Certificate of Financial Responsibility before March 17, 1979; or

(2) If the offshore facility is not in existence on March 17, 1979, apply for a Certificate of Financial Responsibility at least 45 days before placing the offshore facility into operation.

(b) Each application for a Certificate of Financial Responsibility must be made on Coast Guard Form CG- , Application for Certificate of Financial Responsibility, available from the Fund Administrator or any Coast Guard District Office. This form must be submitted for each facility.

(c) Each Application form submitted under this section must be signed by the applicant owner or operator of the offshore facility or an authorized representative. A written statement proving authority to sign must also be submitted where the signer is not disclosed as an individual (sole proprietor) applicant, a partner in a partnership applicant, or a director of other officer of a corporate applicant.

(d) Financial data or other information contained in an application form submitted under this section that is proprietary in nature, or constitutes a trade secret, must be clearly designated as such to insure confidential treatment by the Fund Administrator.

(e) If any of the information submitted for certification is determined by the Fund Administrator to be insufficient the Fund Adminstrator may require additional information before final consideration of the application.

§ 130.217 Display of certificate.

(a) Each owner or operator who has obtained a Certificate of Financial Responsibility for a manned offshore facility must post the Certificate of Financial Responsibility at the control station of the facility.

(b) Each owner or operator who has obtained a certificate of Financial Responsibility for an unmanned offshore facility must—

(1) Keep the certificate readily available for examination at the nearest office of the owner or operator; and

(2) Post a copy of the certificate at the facility where possible (unless submerged) in a weatherproof enclosure.

(c) Certificates, as issued, are to be considered property of the U.S. Government, are not to be altered in any manner, and must be surrended on demand.

§ 130.219 Notification of changes affecting certification.

(a) Each owner, operator, or guarantor of an offshore facility shall within five days notify the Fund Administrator in writing when any changes occur which significantly affect the financial capability of the owner, operator, or guarantor, to meet the obligations for which a Certificate of Financial Responsibility has been issued.

(b) Based on notice of a change in financial capability under paragraph (a) of this section, the Fund Administrator may revoke a Certificate of Financial Responsibility.

§ 130.221 Reapplication for certification.

(a) Each owner or operator whose Certificate of Financial Responsibility becomes invalid for any reason, must immediately reapply to the Fund Administrator for a certificate.

§ 130.223 Revocation of certificates.

(a) The Fund Administrator may revoke any certificate for—

(1) A false statement made in an application or reapplication for a certificate or to the Fund Administrator in connection with an existing certificate;

(2) Failure of the certificant to establish and maintain evidence of financial responsibility in accordance with the requirements of this subpart;

(3) Failure of the guarantor or certificant to comply with or respond to inquiries or orders of the Fund Administrator concerning financial responsibility; and

(4) Cancellation, termination, or modification of any insurance policy, surety bond, or guarantee, which reduces the financial capacity of the owner, operator, or guarantor to meet the requirements of this subpart.

(b) Before revoking a certificate the Fund Administrator advises the certificant, in writing, of the intention to revoke the certificate and the reason for this action.

(c) The revocation action will be effective within ten days of receipt of the notice of intent to revoke unless action under paragraph (d) of this section is initiated.

(d) A certificant informed under paragraph (b) of this section of a pending revocation action by the Fund Administrator may submit to the Fund Administrator, in writing within 10 days of receipt of the notice, reasons why the revocation should not be effected.

Subpart D—Notification, Designation and Advertisement

§ 130.301 Purpose.

(a) This subpart prescribes the requirements concerning notification of pollution incidents, source designation, and advertisement of designations.

§ 130.303 Definitions.

(a) As used in this subpart—

(1) "Advertisement" means the dissemination of information, including methods other than paid ads, that advises the public how to contact the designated source of pollution or the Fund to initiate a claim for economic loss.

(2) "Designated source" means a vessel or offshore facility which has been designated by the Commandant as the source of oil pollution.

(3) "Occurrences which pose an imminent threat of oil pollution" means those incidents that are likely to result in a discharge and include, but are not limited to: Vessel collisions, grounding or strandings; structural failures or weaknesses in tanks, pipelines or other oil handling systems; fires, explosions or other events which may cause structural damage to a vessel or offshore facility.

NOTIFICATION

§ 130.305 Notification procedures.

(a) The person in charge of a vessel or offshore facility that is involved in an incident shall, as soon as that person has knowledge of the incident, immediately notify by telephone, radio telecommunication or a similar rapid means of communication, in the following order of preference—

(1) The Duty Officer, National Response Center, U.S. Coast Guard, 400 Seventh St., S.W., Washington, D.C. 20590, toll free telephone number 800-424-8802; or

(2) The commanding officer or supervisor of any Coast Guard Marine Safety Office, Captain of the Port Office, Marine Safety Detachment or Port Safety Detachment in the vicinity of the incident; or

(3) The commanding officer or officer in charge of any other Coast Guard unit in the vicinity of the incident; or

(4) The Commander of any Coast Guard District.

§ 130.307 Notification contents.

(a) In each notification provided under § 130.305, the person in charge of the vessel or offshore facility involved in the incident shall provide his or her name and telephone number, or radio callsign, and, to the extent known, the—

(1) Location, date and time of the incident;

(2) Quantity of oil involved;

(3) Cause of the incident;

(4) Name or other identification of the vessel or offshore facility involved;

(5) Size and color of any slick or sheen and the direction of movement;

(6) Observed on scene weather conditions, including wind speed and direction, height and direction or seas, and any tidal or current influence present;

(7) Actions taken or contemplated to secure the source or contain and remove or otherwise control the discharged oil;

(8) Extent of any injuries or other damages incurred as a result of the incident;

(9) Observed damage to living natural resources; and

(10) Any other information deemed relevant by the reporting party or requested by the person receiving the notification.

(b) The person giving notification of an incident must not delay notification to gather the required information and must provide information not immediately available when that information becomes known.

DESIGNATION

§ 130.309 Notice of Designation.

(a) Upon learning of an incident which involves oil pollution, the Commandant designates, where possible, the source of the oil pollution and notifies the owner, operator and any guarantor as listed on the Certificate of Financial Responsibility applicable to the source of that designation.

(b) Designation is made by a written Notice of Designation containing, to the extent known:

(1) The name of the vessel or offshore facility being designated as the source of oil pollution;

(2) The location, date, and time of the incident;

(3) The quantity of oil involved;

(4) The procedures for accepting or denying the designation;

(5) The initial requirements for advertising, if any, and

(6) The name, address and telephone number of the responsible Federal official to whom further communication regarding the incident, advertisement of the incident, or denial of designation should be directed.

§ 130.311 Denial of designation.

(a) The owner or operator of a designated source may deny a designation within five days after receipt of a written Notice of Designation.

(b) A denial of designation must be in writing and—

(1) Identify the Notice of Designation; and

(2) Be submitted to the official named in the notice of Designation.

ADVERTISEMENT

§ 130.313 Advertisement determinations.

(a) The Commandant determines the type, scope, and frequency of advertisements, if any, to be used for each oil pollution incident.

(b) In making the determination specified in paragraph (a) of this section, the Commandant considers—

(1) The nature and extent of economic losses that have occured or are likely to occur;

(2) The persons who are likely to incur economic losses;

(3) The geographical area that is or is likely to be affected; and

(4) The most effective method of reasonably notifying potential claimants of the designation and procedures for submitting claims.

(c) The Commandant provides, in writing, the specific requirements for advertising for each pollution incident to the designated representatives of the owner, operator or guarantor.

§ 130.315 Types of advertisement.

(a) Advertisement required by this subpart shall be made by one or more of the following means:

(1) Paid advertisement in a newspaper, or newspapers, having general circulation in the area designated by the Commandant;

(2) A public service announcement on commerical radio and television stations serving the area designated by the commandant, when such services are avaliable;

(3) Notice posted in marinas, marine supply stores, bait and tackle shops and other appropriate business establishments or public facilities in the area designated by the Commandant;

(4) News release to all newspapers, radio and television stations serving the area designated by the Commandant; and

(5) Publication in the Notice to Mariners.

§ 130.317 Frequency and geographical scope of advertisement.

(a) The frequency and geographical coverage of advertisement depends upon the circumstances of each incident and will be designated by the Commandant.

(b) The substance of the required advertisement will be published in at least four successive editions of the Local Notice to Mariners.

§ 130.319 Content of advertisement.

(a) Each advertisement required by this subpart must specify the—

(1) Location, date and time of the incident;

(2) Geographical area affected, as determined by the Commandant;

(3) Quantity of oil involved;

(4) Name or other description of the source designated by the Commandant;

(5) Identity of the owner, operator or guarantor of the source; and

(6) Name, address, telephone number, office hours and work days of the person or persons to whom claims are to be presented and from whom claim information can be obtained.

Subpart E—Access, Denial, and Detention

§ 130.401 Access to facility and vessel Certificates of Financial Responsibility.

(a) The owner, operator, master or agent of any facility or vessel subject to the Act must, upon request by any Coast Guard officer or petty officer, provide access to the facility or vessel and produce for examination the Certificate of Financial Responsibility.

§ 130.403 Sanctions for failure to produce vessel Certificates of Financial Responsibility.

(a) The Captain of the Port issues denial or detention orders to the owner, operator, agent, or master of any vessel that cannot show upon request a valid Certificate of Financial Responsibility issued under the Act.

(b) A denial order forbids entry of any vessel subject to the Act to any port or place in the United States or to the navigable waters of the United States.

(c) A detention order detains any vessel subject to the Act at the port or place in the United States from which it is about to depart or any other port or place in the United States.

(d) The Captain of the Port terminates a denial or detention order when the owner, operator, agent, or master or a vessel furnishes adequate evidence that the certification of financial responsibility requirements under the Act have been met.

§ 130.405 Appeal provisions.

(a) The owner, operator, agent or master of a vessel issued a denial or detention order under this subpart may petition the nearest District Commander in any manner to review that order.

(b) Upon completion or review, the District Commander affirms, sets aside, or modifies the order.

(c) Unless otherwise determined by the District Commander a denial or detention order remains in affect pending the outcome of any petition or appeal of that order.

(d) The District Commander acts on all petitions or appeals within 10 days of receipt.

(e) The decision of the District Commander is final agency action.

AUTHORITY: Pub. L. 95-372; 49 CFR 1.46.

Subpart A—Introduction

§ 131.1 Purpose.

(a) This part prescribes uniform procedures and standards for the settlement of claims against the Offshore Oil Pollution Compensation Fund (Fund) as authorized by Title III of the Outer Continental Shelf Lands Act Amendment of 1978 (Pub. L. 95-372; 43 U.S.C. 1811-1824) (the Act) for economic loss resulting from, or arising out of, oil pollution from Outer Continental Shelf activities, including removal costs.

§ 131.3 Information.

(a) Any person who desires to file a claim against the Fund may obtain information from the Administrator, Offshore Oil Pollution Compensation Fund, U.S. Coast Guard Headquarters (G-W/78), 400 Seventh Street SW., Washington, D.C. 20590.

§ 131.5 Definitions.

(a) As used in this part, the following terms shall have the same meaning as defined in section 301 of Title III of the Outer Continental Shelf Lands Act Amendments of 1978 (Pub. L. 95-372): "claims"; "foreign claimant"; "Fund"; "guarantor"; "incident"; "oil"; "oil pollution"; "operator"; "owner"; "person"; "property"; "removal costs"; "State"; "United States"; and "United States claimant".

(b) As used in this part—

(1) "Act means Title III of the Outer Continental Shelf Lands Act Amendments of 1978 (Pub. L. 95-372, 43 U.S.C. 1811-1824), entitled "Offshore Oil Spill Pollution Fund".

(2) "Administrative Law Judge" means any person designated by the Commandant pursuant to the Administrative Procedure Act (5 U.S.C. 551-559) to hear and resolve disputed claims in accordance with section 307 [i] of the Act.

(3) "Commandant" means the Commandant of the Coast Guard or that person's authorized representative.

(4) "Fund Administrator" means the person to whom the authority and functions of the Commandant as administrator of the Fund are delegated.

(5) "Fund Claims Adjuster" means a person authorized to receive, review, adjust, and pay claims on behalf of the Fund.

(6) "Natural resources" means land, fish, wildlife, biota, air, water, and other such resources belonging to, managed by held in trust by, appertaining to or otherwise controlled by the United States (including the resources of the fishery conservation zone established by the Fishery Conservation and Management Act of 1976), any state or local government, or any foreign government.

(7) "Outer Continental Shelf" means "Outer Continental Shelf" as defined in section 2(a) of the Outer Continental Shelf Lands Act (43 U.S.C. 1331(a)).

(8) "Panel" means a three member panel appointed by the Secretary of Transportation in accordance with section 307 (h) of the Act.

§ 131.7 Foreign claims.

(a) Claims may be presented by foreign claimants for economic loss, except for loss of tax revenues, to the same extent that compensation for economic loss may be claimed by any United States claimant when the conditions of section 303(b)(6) of the Act are met.

(b) Foreign claims must be submitted in accordance with the regulations of this part and any additional instructions of the Fund Administrator.

(c) Before any foreign claim may be paid, the Fund Administrator certifies that the foreign claim is appropriate for consideration by the Fund.

Subpart B—General

TIMELINESS

§ 131.101 Time limitation on claims.

(a) A claim may not be considered by the Fund unless presented, in writing, to the Fund within three years of discovery of the economic loss for which compensation is sought or within six years of the date of the incident which resulted in the loss, whichever is earlier.

(b) For purposes of this section, a claim may be presented to the Fund even though the claim has been presented to and is under consideration by the owner, operator, or guarantor of a disignated source, or other person.

(c) A claim is presented on the date the claim is actually received by the Fund Claims Adjuster or Fund Administrator.

PRESENTMENT

§ 131.103 Federally authorized removal costs.

(a) Claims for federally authorized removal costs that are recoverable under the Act must be presented to the fund established by section 311(k) of the Federal Water Pollution Control Act (33 U.S.C. 1251) in accordance with the regulations of Subpart D of 33 CFR Part 153.

§ 131.105 Other claims.

(a) If the source of pollution is known, claims must be presented to the owner, operator, or guarantor of the source, except where the Fund Administrator has advertised or otherwise notified claimants and potential claimants that the claims may be presented to the Fund.

(b) A claim presented to the owner, operator, or guarantor of the source of pollution which is denied for any reason or not settled within sixty days may be presented to the Fund.

(c) A claim may be presented to the Fund when the source of pollution is not known.

§ 131.107 Presenting claims to the Fund.

(a) A claimant must present a claim to the Fund by making the claim personally at, or by delivering or mailing the claim directly to, an office of the Fund Claims Adjuster.

§ 131.109 Referral of unsettled claims.

(a) A claimant may present any claim not satisfied under § 131.105(b) by requesting the owner, operator, or guarantor to whom the claim has been presented to refer the claim to the Fund.

(b) The owner, operator, or guarantor shall, within five days of receiving a request under paragraph (a) of this section, forward the entire claim file, except for material pertaining to settlement offers, directly to an office of the Fund Claims Adjuster.

§ 131.111 Form

(a) A claim must be in writing and include the specific amount claimed.

(b) Whenever practicable, a claimant should submit a claim in the format specified and on the forms provided by the Fund Claims Adjuster.

(c) Each claim must be signed in ink by the Claimant or an authorized agent or legal representative of the claimant.

(d) A claim presented by an agent or legal representative must be presented in the name of the claimant, showing the title or legal capacity of the agent or representative.

CONTENT

§ 131.115 Proof.

(a) A claimant must establish—

(1) The nature and extent of economic loss incurred; and

(2) That the cause of the loss was "oil pollution" under the Act.

§ 131.117 Evidence.

(a) A claimant must submit evidence in support of each claim.

(b) A sworn statement of the claimant may be accepted when other evidence is not available.

§ 131.119 Multiple items of damage.

(a) A claimant must include all known losses arising out of a single incident or from the some oil pollution when submitting a clain.

(b) Each separate type of loss (as described in Subpart C of this part) must be separatly listed.

(c) In the discretion of the Fund Administrator each separate type of loss may be treated separately for settlement purposes.

§ 131.121 Insurance.

(a) A claimant must provide the following information concerning any insurance which may cover the loss for which compensation is claimed.

(1) The names and addresses of insurers;

(2) The kind and amount of coverage;

(3) The policy number;

(4) Whether a claim has been or will be presented to an insurer, and if so, the amount of the claim and the name of the insurer; and

(5) Whether any insurer has paid the claim in full or in part, or has indicated whether or not payment will be made.

§ 131.123 Other compensation.

(a) A claimant must include with each claim an accounting, including source and value, of all other compensation received as a consequence of the incident out of which the claim arises including, but not limited to, monetary payments, goods or services, or other benefits.

§ 131.125 Subrogation.

(a) The claims of a subrogor (insured) and subrogee (insurer) for damages arising out of the same incident constitute a single claim.

(b) A subrogor and subrogee may file a claim jointly or individually. If a joint claim is made, it must be signed by all parties in interest.

(c) A fully subrogated claim is payable only to the subrogee.

(d) A subrogee must support a claim in the same manner as any other claimant.

§ 131.127 Costs incident to claim preparation.

(a) Costs incurred in the preparation of a claim may be included in the claim.

(b) Compensation may be allowed for reasonable costs of claim preparation.

SETTLEMENT AND NOTICE TO CLAIMANT

§ 131.129 Payment.

(a) Payment is made as soon as possible when a claim is approved in full or an offer of settlement is accepted. Amounts in settlement greater than $100,000 require Fund Administrator approval before payment.

(b) Whenever a claim is not approved in full, the claimant is notified in writing of the settlement offer. Acceptance of the settlement offer must be in writing.

(c) The acceptance of an offer in settlement is final and conclusive for all purposes and, upon payment, constitutes a release of the Fund for the claim.

(d) Failure to accept an offer of settlement within thirty days constitutes rejection of the offer.

§ 131.131 Denial of claim.

(a) A claimant will be notified in writing whenever a claim against the Fund is denied, including when denial results from rejection, by the claimant, of an offer of settlement.

(b) The notification of paragraph (a) of this section includes a statement of the claimants right to further review of the claim.

(c) A claimant may consider a claim not settled within sixty days as being denied for purposes of administrative review.

Subpart C—Procedures for Particular Losses

INJURY TO, DESTRUCTION OF OR LOSS OF USE OF PROPERTY

§ 131.201 Authorized claimants.

(a) A claim for injury to or destruction of real or personal property, which may include loss of use of the property, or a claim for loss of use of real or personal property which is not damaged, may be presented by any person either owning or leasing the property.

§ 131.203 Proof.

(a) A claimant must establish an ownership or leasehold interest in the property.

(b) For each claim for injury to, or destruction of, property the claimant must establish—

(1) That the property was injured or destroyed;

(2) The cost of repair or replacement; and

(3) The value of the property both before and after injury occurred, if the cost of repairs exceeds replacement cost.

(c) For each claim for loss of use of property, the claimant must establish—

(1) That the property was not available for use;

(2) Whether or not substitute property was available and utilized, and the costs thereof; and

(3) The economic loss incurred as a result of the loss of use of the property.

§ 131.205 Compensation allowed.

(a) The measure of damages for injured property is the actual or estimated net cost of repairs necessary to restore the property to substantially the condition which existed immediately before injury.

(b) If the actual or estimated net cost of repairs exceeds the value of the property immediately before injury less the value immediately after injury, the measure of damages is the value of the property immediately

before injury less the value immedi-

UMI

before injury less the value immediately after injury.

(c) Compensation for loss of use of property may be allowed for reasonable costs, actually incurred, for use of substitute property or, if substitute property was not reasonably available, for the amount of the net economic loss which resulted from not having use of the property. When substitute property was reasonably available, but not used, compensation for loss of use is not payable.

LOSS OF INCOME DUE TO INJURY TO, OR DESTRUCTION OF, PROPERTY OR NATURAL RESOURCES

§ 131.207 Authorized claimants.

(a) A claim for loss of profits or impairment of earning capacity due to injury to, or destruction of, real or personal property or natural resources may be presented by any person deriving at least 25 percent of his or her annual income from activities which utilize the property or natural resource.

(b) A person who either owns or leases property which is injured or destroyed is not a proper claimant under paragraph (a) of this section. That person should claim under § 131.201.

(c) A person who uses natural resources directly is not a proper claimant under paragraph (a) of this section. That person should claim under § 131.219.

§ 131.209 Proof.

(a) The claimant must establish—

(1) that 25 per cent of the claimant's income, on an annual basis, is derived from activities which utilize the injured or destroyed property or natural resources;

(2) that the claimant's income from these activities was reduced as a consequence of injury or destruction of the property or natural resources; and

(3) Whether or not substitute employment, or business, was available and undertaken and, if so, the amount of income received.

§ 131.211 Compensation allowed.

(a) Compensation is limited to the earnings or profits lost but is not allowed when appropriate substitute employment or business was available but not undertaken.

(b) If substitute employment or business was undertaken, any resulting reduction in earnings or profits may be allowed.

(c) Compensation is ordinarily limited to loss of earnings or profits resulting from the interruption or discontinuance of employment or business rather than to prospective earnings or profits.

INJURY TO, OR DESTRUCTION OF, NATURAL RESOURCES

§ 131.213 Authorized claimants.

(a) A claim for injury to, or destruction of, natural resources may be presented by—

(1) A Federal agency designated by the President, as trustee, for those natural resources over which the United States has sovereign rights or exercises exclusive management authority; or

(2) Any State, for natural resources within the boundary of the State belonging to, managed by, controlled by, or appertaining to the State.

§ 131.215 Proof.

(a) A claimant must establish—

(1) The identification and quantity of the natural resource for which compensation is claimed;

(2) The nature and extent of the injury to the natural resource;

(3) The cost to restore or replace the natural resource; and

(4) Any economic loss relating to the natural resource which would not be recovered by replacement or restoration.

§ 131.217 Compensation allowed.

(a) The amount of compensation is based on—

(1) The cost to restore, rehabilitate, or acquire the equivalent of the natural resource; or

(2) A unit value when replacement or restoration is either impossible or impracticable.

LOSS OF USE OF NATURAL RESOURCES

§ 131.219 Authorized claimants.

(a) A claim for loss of use of natural resources may be presented by any person who incurs economic loss as a result of not being able to directly use any natural resource.

§ 131.221 Proof.

(a) A claimant must establish—

(1) The identification of the natural resource for which compensation for loss of use is claimed;

(2) The activity which the loss of use of the natural resource prevented or affected;

(3) An explanation of how the use of the natural resource was affected;

(4) Alternatives to the activity and whether or not utilized, and if so, how, and with what result; and

(5) The economic loss suffered.

§ 131.223 Compensation allowed.

(a) The amount of compensation allowed is the net economic loss incurred.

CLEANUP COSTS

§ 131.225 Authorized claimants.

(a) A claim for cleanup costs may be presented by any person.

§ 131.227 Proof.

(a) A claimant must establish—

(1) The actions taken to prevent, minimize, or mitigate oil pollution;

(2) The costs incurred and other economic loss incurred as a result of these actions; and

(3) Why the actions were taken.

§ 131.229 Compensation allowed.

(a) The amount of compensation allowed is the total of reasonable economic loss incurred.

(b) Except for action taken with respect to property owned, leased, or otherwise subject to the supervision, management, or use of the claimant, voluntary actions will not ordinarily be compensated.

LOSS OF TAX REVENUE DUE TO INJURY TO PROPERTY

§ 131.231 Authorized claimants.

(a) A claim for loss of tax revenue may be presented on behalf of the United States, or any State or political subdivision thereof with authority to assess and collect taxes, by the official charged with the responsbility and authority for collecting these taxes.

§ 131.331 Proof.

(a) A claimant must establish—

(1) The identification and description of the tax for which compensation is claimed, including authority and regulations, property affected, method of assessment, rate, and method and dates of collection;

(2) That a consequence of the oil pollution was a reduction in tax revenue;

(3) The total tax assessment or tax revenue collected for the tax period before injury occurred; and

(4) The net loss of revenue.

§ 131.235 Compensation allowed.

(a) The amount of compensation allowed is the total tax revenue actually lost during the one year period following the oil pollution incident.

Subpart D—Administrative Review of Claims

§ 131.301 General.

(a) Administrative review of the denial of a claim is either by panel or administrative law judge in accordance with the Administrative Procedure Act (5 U.S.C. 554), section 307 of the Act, and these regulations.

§ 131.303 Initiation of administrative review.

(a) A claimant must initiate review of a claim by written notice, within 30 days fo the denial of a claim, to the Fund Administrator, for forwarding to the Commandant.

(b) Upon receipt of a request for review of a claim the Commandant refers the claim to an administrative law judge or recommends to the Secretary of Transportation that the claim be referred to a panel. If the Secretary does not refer the claim to a panel, the claim is returned to the Commandant for referral to an administrative law judge. The Commandant notifies the claimant of the action taken.

(c) The Fund Administrator may reconsider any claim at any time before administrative review begins.

§ 131.305 Procedure.

(a) The administrative law judge, or presiding officer of a panel, is responsible for all proceedings for review of a claim and, may—

(1) Administer oaths and affirmations;

(2) Issue subpenas;

(3) Adopt procedures for the submission of evidence;

(4) Rule on offers of proof and receive evidence;

(5) Dispose of procedural requests and similar matters;

(6) Convene, recess, reconvene, adjourn, and otherwise regulate the hearing;

(b) An informal, preliminary conference is held, in advance of the hearing, presided over by the administrative law judge, or presiding officer, to narrow the issues and otherwise discuss the specific matters in dispute.

(c) A verbatim record is made of the proceedings. A transcript is not prepared unless either an appeal is taken or the administrative law judge, or presiding officer, specifically so orders.

(d) The administrative law judge, or panel, promptly renders a decision at the close of the proceedings.

(e) The decision of the administrative law judge, or panel, constitutes final agency action, unless, within 30 days, review under § 131.309 has been directed.

§ 131.307 Subpenas.

(a) The administrative law judge, or presiding officer, may issue subpenas for the attendance and the giving of testimony by witnesses or for the production of any relevant evidence either upon motion by the administrative law judge, or presiding officer, or upon request of either the claimant or Fund.

(b) Each subpena bears the name "Offshore Oil Pollution Compensation Fund" and the name and address of the issuing administrative law judge or presiding officer and commands the person to whom it is directed to testify at a specified time and place or to produce at a specified time and place books, papers, documents, or any other evidence described in the subpena with the particularity necessary to identify what is disired.

(c) Service of a subpena shall be by personal service, or by certified mail with return receipt to be signed by the addressee only. Proof of service, or an explanation of the lack of service, shall consist of appropriate endorsement upon a copy of the subpena, and shall be delivered to the administrative law judge, or presiding officer.

(d) The person to whom a subpena is directed may apply to the administrative law judge, or presiding officer, in writing, to request that the subpena be quashed or modified. The administrative law judge, or presiding officer, promptly considers and rules on the request. The request must be made at least five days before appearance is required or documents must be produced.

(e) Subpenaed witnesses are entitled to the same fees and mileage allowance as witnesses subpenaed by District Courts of the United States. These witness expenses are reimbursable by the Fund, to be paid by the Fund Administrator, if and when certified by the administrative law judge, or presiding officer, as costs necessary to settle claims against the Fund.

(f) If the administrative law judge, or presiding officer, rules that good cause has been shown for seeking judicial enforcement of a subpena, the ruling is referred to the Commandant for action.

§ 131.309 Review of administrative determination.

(a) Either the claimant or the Fund may petition the Secretary of Transportation, in the case of administrative review by panel, or the Commandant, in the case of administrative review by administrative law judge, for further review. Review is granted at the discretion of the Secretary or Commandant, as appropriate.

(b) A petition under paragraph (a) of this section must—

(1) Be in writing;

(2) Be made within 15 days of the decision of the administrative body; and

(3) Specify the issues in dispute and the basis for the appeal.

(c) Either the Secretary of Transportation, for a claim reviewed by a panel, or the Commandant, for a claim reviewed by an administrative law judge, may, on their own initiative, review the decision of the administrative body.

§ 131.311 Judicial review.

(a) The claimant may seek review of final agency action in accordance with 5 U.S.C. 702.

(Pub. L. 95-372; 49 CFR 1.46.)

Dated: November 29, 1978.

J. B. HAYES,
Admiral, U.S. Coast Guard
Commandant.

Title 33—Navigation and Navigable Waters

CHAPTER I—COAST GUARD, DEPARTMENT OF TRANSPORTATION

[CGD 77-145]

PART 183—BOATS AND ASSOCIATED EQUIPMENT

Flotation Materials

AGENCY: Coast Guard, DOT.

ACTION: Final Rule.

SUMMARY: This amendment to the Coast Guard flotation standard for monohull boats under 20 feet in length establishes performance specifications for flotation materials. Present standards do not specify how performance characteristics can be determined. This amendment will enable a manufacturer of a boat to determine if the flotation material used in the boat is able to meet minimum safety standards.

EFFECTIVE DATE: This regulation is effective on August 1, 1979, however, manufacturers may voluntarily comply with the regulations at the time of this publication.

FOR FURTHER INFORMATION CONTACT:

Mr. Lars E. Granholm, Office of Boating Safety (G-BBT), U.S. Coast Guard, Room 4314, Department of Transportation, Trans Point Building, Washington, D.C. 20590, 202-426-4027.

SUPPLEMENTARY INFORMATION: The Notice of Proposed Rulemaking was published in the FEDERAL REGISTER by the Coast Guard on March 6, 1978. Interested persons were invited to participate in the proposed rulemaking by submitting relevant comments.

DRAFTING INFORMATION: The principal persons involved in drafting this amendment are: Mr. Lars E. Granholm, Project Manager, Office of Boating Safety and LT Robert R. Meeks, Project Attorney, Office of Boating Safety.

DISCUSSION OF COMMENTS: Two comments were received in response to the invitation. Both commenters offered arguments which were carefully considered. The amendment is modified in view of these comments.

One commenter suggested that the word "volume" in paragraph 183.114 should be replaced by the words "buoyant force", because the performance requirement is related more to loss of buoyancy, i.e., the property of being able to support a swamped boat, than the volume of the flotation material. The commenter further suggested that a test method be specified whereby the buoyancy can be measured. These comments are accepted. The Coast Guard agrees that the words "buoyant force" describe the intended purpose of the test better than the word "volume". A test for determining the buoyancy is added in paragraph 118.114(h). Although different methods for testing buoyant forces can be used, the Coast Guard believes that a standard method should be included in the rule.

The same commenter also pointed out that in paragraph 183.110, the definition of "connected" should include the same test specification as used in the definition of "sealed compartment". That specification establishes what the pressure head of water should be for determining a leakage rate. This comment is accepted and the specification is added to the definition of "connected" to make it consistent with the definition of "sealed compartment".

The commenter further pointed out that the temperature specifications should include either the word "maximum" or "minimum". This comment is accepted. Flotation foams deteriorate more with higher temperature, therefore, the temperature specified is a minimum temperature; the word "minimum" is for this reason added to paragraph 183.114(a).

The other commenter pointed out that the temperature specification in paragraphs 118.114(b) through 118.114(g) is somewhat higher than ambient temperatures in testing laboratorics and would require specially heated areas for conducting tests. He pointed out that by lowering the specified temperature by 6° C, testing laboratories could perform the tests without specially heated areas. The temperature, suggested by the commenter, is the standard laboratory temperature listed in ASTM D-471 as 23 plus or minus 2° C. The comment pointed out that the solubility of any material is relative to temperature, and this proposed lowering of the test temperature will enhance the chemical resistance of the plastic foam. However, the commenter does not believe that lowering the temperature to the suggested level will endanger the primary objective of differentiating between oil resistant and standard grades of foams. The Coast Guard accepts this argument and a temperature of 23 plus or minus 2° C is specified for the tests.

Paragraphs 183.222(a) and 183.322(a) are revised. The words "engine room bilge" and "engine room" are removed. The reason is that these paragraphs address only outboard boat requirements, and outboard boats have no engine rooms.

This amendment has been reviewed under DOT Notice 78-1, Improving Government Regulations (43 FR 9582). A final evaluation has been prepared and is available for inspection at the Marine Safety Council.

In consideration of the foregoing, Part 183 of Title 33 of the Code of Federal Regulations is amended as follows:

1. By revising § 183.110 to read as follows:

§ 183.110 Definitions.

For the purpose of this subpart—

"ASTM" means American Society for Testing and Materials. The Coast Guard incorporates by reference ASTM Standard D-471, dated March 28, 1975, in § 183.114 of this subpart. This incorporation by reference was approved by the Director of the Office of the Federal Register on December 6, 1977. The Coast Guard also incorporates by reference ASTM Standard D-2842, dated November 14, 1969 (reapproved 1975), in § 183.114 of this subpart. This incorporation by reference was approved by the Director of the Office of the Federal Register on September 11, 1978. The incorporated standards are available for inspection at Coast Guard Headquarters, Room 4313, Trans Point Building, 2100 2nd St., SW., Washington, D.C. 20590 and at the Office of the Federal Register library, Room 8401, 1100 L St., NW., Washington, D.C. 20408. The incorporated standards may be obtained from the American Society for Testing and Materials, 1916 Race Street, Philadelphia, Pa. 19103.

"Bilge" means the area in the boat, below a height of 4 inches measured from the lowest point in the boat where liquid can collect when the boat is in its static floating position, except engine rooms.

"Connected" means allowing a flow of water in excess of one-quarter ounce per hour from the engine room bilge into any other compartment with a 12 inch head of water on the engine room side of the bulkhead.

"Engine room bilge" means the area in the engine room or a connected compartment below a height of 12 inches measured from the lowest point where liquid can collect in these compartments when the boat is in its static floating position.

"Engine room" means the compartment where a permanently installed gasoline or diesel engine is installed, including connected compartments.

"Open to atmosphere" means a compartment that has at least 15 square inches of open area directly exposed to the atmosphere for each cubic foot of net compartment volume.

"Sealed compartment" means an enclosure that can resist an exterior water level of 12 inches without separation of more than one-quarter fluid ounce per hour.

2. By adding a new § 183.112 to read as follows:

§ 183.112 Flotation material and air chambers.

(a) Flotation materials must meet the requirements in § 183.114 as listed in table 5 when used in the: (1) Engine room bilge, (2) engine room, or (3) bilge, unless located in a sealed compartment.

(b) Air chambers used to meet the flotation requirements of this subpart must not be integral with the hull.

3. By adding a new § 183.114 to read as follows:

§ 183.114 Test of flotation materials.

(a) *Vapor test.* The flotation material must not reduce in buoyant force more than 5 percent after being immersed in a fully saturated gasoline vapor atmosphere for 30 days at a minimum temperature of 38° C.

(b) *24-hour gasoline test.* The flotation material must not reduce in buoyant force more than 5 percent after being immersed for 24 hours at 23 plus or minus 2° C in reference fuel B, of ASTM D-471, dated March 28, 1975.

(c) *30-day gasoline test.* The flotation material must not reduce in buoyant force more than 5 percent after being immersed for 30 days at 23 plus or minus 2° C in reference fuel B, of ASTM D-471, dated March 28, 1975.

(d) *24-hour oil test.* The flotation material must not reduce in buoyant force more than 5 percent after being immersed for 24 hours at 23 plus or minus 2° C in reference oil No. 2, of ASTM D-471, dated March 28, 1975.

(e) *30-day oil test.* The flotation material must not reduce in buoyant force more than 5 percent after being immersed for 30 days at 23 plus or minus 2° C in reference oil No. 2, of ASTM D-471, dated March 28, 1975.

(f) *24-hour bilge cleaner test.* The flotation material must not reduce in buoyant force more than 5 percent after being immersed for 24 hours at 23 plus or minus 2° C in a 5-percent solution of trisodium phosphate in water.

(g) *30-day bilge cleaner test.* The flotation material must not reduce in buoyant force more than 5 percent after being immersed for 30 days at 23 plus or minus 2° C in a 5-percent solution of trisodium phosphate in water.

(h) The buoyant force reduction in (a)-(g) is measured in accordance with ASTM D-2842, dated November 14, 1969 (reapproved 1975).

4. By revising § 183.222 to read as follows:

§ 183.222 Flotation material and air chambers.

(a) Flotation materials must meet the requirements in § 183.114 as listed in table 5 when used in the bilge, unless located in a sealed compartment.

(b) Air chambers used to meet the flotation requirements of this subpart must not be integral with the hull.

5. By revising § 183.322 to read as follows:

§ 183.322 Flotation materials.

(a) Flotation materials must meet the requirements in § 183.114 as listed in table 5 when used in the bilge, unless located in a sealed compartment.

6. By adding a new table 5 to follow § 183.335 to read as follows:

TABLE 5 - FLOTATION PERFORMANCE TESTS

Test 183.114 \ Area 183.110		(b) Engineroom Bilge	(c) Engineroom Unless Open to Atmosphere	(d) Bilge
(a)	Vapor Test		X	
(b)	24 Hour Gasoline Test			X
(c)	30 Day Gasoline Test	X		
(d)	24 Hour Oil Test			X
(e)	30 Day Oil Test	X		
(f)	24 Hour Bilge Cleaner Test			X
(g)	30 Day Bilge Cleaner Test	X		

NOTE.—The Coast Guard has determined that this document does not contain a major proposal requiring preparation of an economic impact statement under Executive Order 11821, as amended, and OMB Circular A-107.

(Sec. 5, Pub. L. 92-75, 85 Stat. 215 (46 U.S.C. 1454); 49 CFR 1.46(n)(1).)

Dated: November 27, 1978.

R. H. SCARBOROUGH,
Vice Admiral, U.S. Coast Guard,
Acting Commandant.

Title 16—Commercial Practices

CHAPTER I—FEDERAL TRADE COMMISSION

SUBCHAPTER A—ORGANIZATION, PROCEDURES AND RULES OF PRACTICE

PART 3—RULES OF PRACTICE FOR ADJUDICATIVE PROCEEDINGS

Discovery Rules; Revision

AGENCY: Federal Trade Commission.

ACTION: Final rules.

SUMMARY: These rules are a revision of the Commission's discovery rules. They are intended to make the procedures for discovery clearer, to provide the parties with more discovery devices, and to strengthen the authority of the Administrative Law Judge to supervise the proceedings effectively. They are more flexible than the previous rules, and are better suited to the needs of complex cases.

EFFECTIVE DATE: January 18, 1979. These amendments to the rules shall govern all discovery in Commission adjudicative proceedings that are initiated after they take effect and also all further discovery in proceedings that are then pending except to the extent that in the opinion of the Administrative Law Judge or the Commission their application in a particular proceeding pending when the amendments take effect would not be feasible or would work injustice, in which event the former rule or rules apply.

FOR FURTHER INFORMATION CONTACT:

Jack Schwartz, Assistant to the General Counsel, Federal Trade Commission, Washington, D.C., 20580 (202-523-3615).

SUPPLEMENTARY INFORMATION: The Federal Trade Commission previously published for comment a proposed general revision of its discovery rules based on the Federal Rules of Civil Procedure (40 FR 15239, April 4, 1975) and, subsequently, a less extensive proposed amendment of those rules (41 FR 21793, May 28, 1976). The latter proposal was intended to balance a somewhat broadened range of discovery with firm control by Administrative Law Judges of the pace and scope of adjudicative proceedings. After careful consideration of all comments submitted, the Commission has determined to promulgate the rules set forth below, pursuant to the authority of the Federal Trade Commission Act, 15 U.S.C. 41 et seq.

The Commission's general purpose in adopting these rules is to provide clearer standards, greater specificity, a wider range of discovery devices, and more explicit authority for the Administrative Law Judges to control adjudicative proceedings. The procedures are intended to shorten adjudicative proceedings by enabling the parties to more precisely define the actual issues. The Commission anticipates—and commends to parties and Administrative Law Judges—more frequent use of expedited decisional methods, such as stipulated records and summary judgments, as a consequence of discovery. In order to assure firm control of the proceeding by the Administrative Law Judge, no discovery may be had without advance authorization by the Administrative Law Judge. In no instance is an Administrative Law Judge *required* to authorize discovery. When discovery is authorized, the Commission expects prompt compliance. The Commission intends its Administrative Law Judges vigorously to enforce the provisions of § 3.38.

Like the Commission's present discovery rules, the revised rules are intended, *inter alia*, both to provide several means by which parties to a Commission proceeding may require other parties or nonparties to supply information, and to permit the Commission and its Administrative Law Judges to control the burdens imposed by such compulsory procedures. The discovery rules do not provide the exclusive means by which parties may obtain information, and are not intended to limit such ability as a party otherwise may have to obtain information through voluntary means or that may otherwise be available to them (*e.g.*, access requests under the Freedom of Information Act; information otherwise properly obtained by the Commission).[1] Where parties or nonparties are willing to do so voluntarily, they may of course provide or obtain information without resort to the formalities and procedural requirements applicable to nonvoluntary discovery. In this regard, in recognition of the fact that voluntary production commonly occurs and is often in the interests of all concerned, § 3.31(d) of the revised rules explicitly provides for stipulations as to discovery and procedure, upon approval of the Administrative Law Judge. Parties are especially encouraged to stipulate to cost-saving techniques like telephone depositions.

The Commission wishes to reiterate that these rules are intended to reaffirm and strengthen the authority of the Administrative Law Judge to supervise discovery. The Commission expects that, in carrying out the duty to prescribe a discovery plan and schedule, in deciding whether or not to authorize a particular request for discovery, and in determining whether to "deny or limit discovery" pursuant to the protection order authority under § 3.31(c)(1), the Administrative Law Judge will take into account the contribution that such discovery may make to the resolution of the issues, the needs of the parties, and the public interest in disposition of the proceeding without undue delay. The Administrative Law Judge should give particular attention to these factors in considering requests for authorization of depositions or interrogatories.

Administrative Law Judges and the parties are encouraged to conduct discovery simultaneously and without undue formality. Whenever possible, arrangements to facilitate discovery should be arrived at informally. For example, the "order" reciting the results of a prehearing conference, required under § 3.21(e)(1), need be no more than a one-sentence order, such as an order entering into the record a letter between the parties that memorializes the conference.

Apart from numerous drafting changes, the principal changes from the May 1976 proposal are as follows:

1. Section 3.21 is amended to provide that one or more prehearing conferences must be held in every case. Such conferences will enable the Administrative Law Judge to ascertain what discovery is necessary in light of the issues in the proceeding. The Administrative Law Judge shall by order set a plan and schedule of discovery, including whatever limitations on discovery may be necessary in aid of expedition. This section is further amended to provide a mechanism whereby the issues in complex cases will, within set deadlines, be more precisely delineated. This new provision is § 3.21(b); the subsections of the former rule are renumbered accordingly.

2. The scope of discovery, as set forth in § 3.31(b), conforms to that proposed on March 31, 1978, for the Federal Rules of Civil Procedure by the Advisory Committee on Civil Rules: discovery may be authorized "upon a satisfactory showing that the requested discovery may reasonably be expected to yield any information relevant to the allegations of the complaint, to the proposed relief, or to the defenses of any respondent." The same standard applies to discovery of parties and non-parties alike.

The Commission intends this precisely tailored standard to be applied so that unnecessary discovery will not be permitted. The party seeking discovery must state specifically how the requested discovery bears upon the issues as they have been framed by

[1] In a statement dated June 2, 1978, concerning a subpoena issued to Atlantic Richfield Co., the Commission indicated that its existing discovery rules do not limit complaint counsel's access to information properly obtained by the Commission for other purposes. Nothing in the present revisions alters that interpretation.

the pleadings. In considering whether such a showing is "satisfactory," the Administrative Law Judge has broad discretion to weigh the probable relevancy of the information in light of his own assessment of the issues in the proceeding. The need for line-drawing of this kind is especially important in complex cases. See *Dolgow* v. *Anderson*, 53 F.R.D. 661, 664 (E.D.N.Y. 1971).

3. The Commission has reinserted a section (3.31) containing provisions applicable to discovery generally. It is substantially similar to Federal Rule 26 and to 1975 proposed § 3.31–2, with the following significant differences:

(a) It contains a provision on privilege adapted from Rule 501 of the Federal Rules of Evidence.

(b) It omits a provision comparable to paragraph 2 of Federal Rule 26(b)(3), because the mechanism provided there is unnecessary in Commission proceedings.

(c) It sets a ceiling on the amount that a party seeking discovery of another party's experts may be required to pay namely "the maximum specified in 5 U.S.C. 3109," unless the parties agree to, and the Administrative Law Judge orders, payment of a higher amount.

(d) It reserves, for the time being, the portion of the subsection on protective orders pertaining to the treatment of assertedly confidential business information. Such a provision has been published for comment at 43 FR 3571 (Jan. 26, 1978) as part of a separate rulemaking. After consideration of those comments, the Commission will decide in what form to promulgate § 3.31(c)(2). In the interim, Administrative Law Judges may continue to issue such protective orders in aid of their duty to conduct fair and impartial hearings and to avoid delay. See 16 CFR 3.42(c).

(e) It includes provisions on stipulations and on applications for compulsory process that were elsewhere in the rules.

4. A rule on interrogatories is added, modeled after Federal Rule 33. However, insofar as information is in the possession of the Commissioners, the General Counsel, the Administrative Law Judges, the Secretary in his capacity as custodian or recorder of any such information, and their respective staffs, that information is excluded from the rule. This exclusion is a necessary corollary of the separation of functions within the Commission. Access to such information continues to be governed by § 3.36. Also, a provision has been added (§3.37) for access orders to parties, paralleling in part the analogous provision in Federal Rule 34. The Commission has incorporated in both of these provisions requirements that records be made available in an orderly fashion, as suggested in the report of the Advisory Committee on Civil Rules.

5. The provisions for class deposition and subpoenas are deleted, because they pose an unacceptable risk to effective Administrative Law Judge supervision of discovery.

6. The previous provision for an order compelling appearance is deleted as unnecessary and dilatory. However, a new subsection (a) has been added to § 3.38, to provide for motions to compel answers to requests for admissions or to interrogatories.

7. Former § 3.31 is renumbered to § 3.32. This rule provides for party-generated requests for admissions. It is augmented by an additional provision (§ 3.42(c)(4)) that empowers the Administrative Law Judge *sua sponte* to compel admissions.

8. Former §§ 3.36 and 3.37 are combined in § 3.36.

The Commission rejects the suggestions of commenters that it return to the Federal Rules of Civil Procedure in their totality as a model, or conversely, make no change in its present rules. The Commission believes that, in general, parties should be permitted sufficient discovery to prepare their presentations effectively. In the long run, time will be saved if issues are explored in discovery, rather than at hearing. However, the complexity of many Commission proceedings and the potential for delay inherent in discovery require careful supervision, by the Administrative Law Judge, at every stage of the proceedings. Thus, though it has adopted the full panoply of Federal Rules devices (except Federal Rule 35 physical or mental examinations, which are unlikely to be required in Commission proceedings), the Commission has retained provisions for advance authorization of discovery and confirms the Administrative Law Judge's full authority to limit discovery in order to ensure fair, orderly, and expeditious proceedings. Where the Commission has adopted provisions substantially similar to provisions in the Federal Rules, judicial constructions of such analogous provisions may serve as interpretive aids, but they are not to be regarded as binding, because application of the Commission's rules must be tailored to the circumstances of Commission proceedings.

The Commission also rejects the contention of some commenters that the special provisions in § 3.36 regarding discovery of Commission and other government employees are improper. These provisions are "designed to accommodate the necessity of balancing the private litigant's right to prepare a proper defense against the government's vital interest in maintaining the integrity and efficiency of the administrative process." *Coca Cola Co.*, 85 F.T.C. 398, 399 (1975). The discovery rules provide full and fair access to necessary information; due process requires no more.

The provisions concerning motions to quash have been revised to reflect formally the Commission's view that all objections must be presented in such motions and to make clear that, as is commonly done, such motions can and should be accompanied by all appropriate supporting materials.

The Commission will review the operation of these rules after one year, so as to ascertain whether they have in fact worked as the Commission intends.

Accordingly, § 3.21 of Subpart C, §§ 3.31, 3.32, 3.33, 3.34, 3.35, 3.36, 3.37, and 3.38 of Subpart D, and § 3.42(c) of Subpart E, Part 3, Subchapter A, Chapter I of Title 16 of CFR are amended as set forth below:

Subpart C—Prehearing Procedures; Motions; Interlocutory Appeals; Summary Decisions

1. Section 3.21 is revised to read as follows:

§ 3.21 Prehearing conferences.

(a) *Purpose.* The Administrative Law Judge in every case shall direct counsel for all parties to meet with him for one or more conferences to consider any or all of the following:

(1) Simplification and clarification of the issues;

(2) Necessity or desirability of amendments to pleadings, subject, however, to the provisions of § 3.15;

(3) A plan and schedule of discovery, and such limitations on discovery as may promote expedition;

(4) Stipulations, admissions of fact and of the contents and authenticity of documents;

(5) Expedition in the presentation of evidence including, but not limited to, restriction of the number of expert, economic, or technical witnesses;

(6) Matters of which official notice will be taken and matters which may be resolved by reliance upon trade regulation and other rules pursuant to §§ 1.8 and 1.22(c) of this chapter; and

(7) Such other matters as may aid in the orderly and expeditious disposition of the proceeding, including disclosure of the names of witnesses and of documents or other physical exhibits which will be introduced in evidence in the course of the proceeding.

(b) *Complex cases.* In any case in which in his judgment the likely complexity of the case or other circumstances so warrant, the Administrative Law Judge shall institute the following procedures:

(1) The Administrative Law Judge shall set a date for a prehearing con-

ference, to be held not later than 45

§ 3.31 General provisions.

(4) *Hearing Preparation: Experts.* (i) Discovery of facts known and opinions

§ 3.36), and applications for authoriza-

sents a genuine issue for trial may not,

(c) *Notice to corporation or other or-*

V 4 3 / 2 3 3

ference, to be held not later than 45 days after the filing of the answer to the complaint.

(2) The Administrative Law Judge shall order (i) that complaint counsel, not later than 30 days prior to such conference, file a nonbinding statement setting out the theory of the case, the issues to be tried, and what complaint counsel expect their evidence to prove; and (ii) that respondent, not later than 15 days prior to such conference, file a nonbinding statement setting out the theory of the defense, the issues to be tried, and what respondent expects its evidence to prove. Such statements may be changed upon completion of discovery or at such other times as the Administrative Law Judge may direct.

(3) The Administrative Law Judge shall, not later than 30 days after such conference, formulate a statement of the issues of the case, based upon the pleadings of the parties and their statements filed pursuant to this rule.

(4) The Administrative Law Judge may, at appropriate intervals, reformulate the statement of the issues of the case.

(c) *Subpoenas.* Prehearing conferences may be convened for the purpose of accepting returns on subpoenas duces tecum issued pursuant to the provisions of § 3.34(b).

(d) *Public Access and Reporting.* Prehearing conferences shall be public unless the Administrative Law Judge determines in his discretion that the conference (or any part thereof) shall be closed to the public. The Administrative Law Judge shall have discretion to determine whether a prehearing conference shall be stenographically reported.

(e) *Orders.* (1) The Administrative Law Judge shall enter in the record an order which recites the results of a prehearing conference. Such order shall include the Administrative Law Judge's rulings upon other matters considered at the conference, together with appropriate directions to the parties. The Administrative Law Judge's order shall control the subsequent course of the proceeding, unless modified to prevent manifest injustice. (2) In each proceeding the Administrative Law Judge shall enter an order establishing a plan and schedule of discovery, including limitations on discovery and such other provisions as are necessary for the proper management of discovery in the proceeding. Such order may at any time be modified by the Administrative Law Judge for good cause shown.

Subpart D—Discovery; Compulsory Process

2. Section 3.31 is revised to read as follows:

§ 3.31 General provisions.

(a) *Discovery Methods.* Parties may obtain discovery by one or more of the following methods: Depositions upon oral examination or written questions; written interrogatories; production of documents or things for inspection and other purposes; and requests for admission. Unless the Administrative Law Judge orders otherwise, the frequency or sequence of these methods is not limited.

(b) *Scope of Discovery.* Unless otherwise limited by order of the Administrative Law Judge or the Commission in accordance with these rules, the scope of discovery is as follows:

(1) *In General.* The Administrative Law Judge may authorize discovery upon a satisfactory showing that the requested discovery may reasonably be expected to yield information relevant to the allegations of the complaint, to the proposed relief, or to the defenses of any respondent. Such information may include the existence, description, nature, custody, condition and location of any books, documents, or other tangible things and the identity and location of persons having any knowledge of any discoverable matter. It shall not be an adequate ground for denying such authorization that the information sought will be inadmissible at the hearing if the information sought appears reasonably calculated to lead to the discovery of admissible evidence.

(2) *Privilege.* Authorization for discovery may be denied or limited, or a protective order may be entered, to preserve the privilege of a witness, person, or governmental agency as governed by the Constitution, any applicable Act of Congress, or the principles of the common law as they may be interpreted by the Commission in the light of reason and experience.

(3) *Hearing Preparation: Materials.* Subject to the provisions of paragraph (b)(4) of this Section, a party may obtain discovery of documents and tangible things otherwise discoverable under paragraph (b)(1) of this section and prepared in anticipation of litigation or for hearing by or for another party or by or for that other party's representative (including his attorney, consultant, or agent) only upon a showing that the party seeking discovery has substantial need of the materials in the preparation of his case and that he is unable without undue hardship to obtain the substantial equivalent of the materials by other means. In ordering discovery of such materials when the required showing has been made, the Administrative Law Judge shall protect against disclosure of the mental impressions, conclusions, opinions, or legal theories of an attorney or other representative of a party.

(4) *Hearing Preparation: Experts.* (i) Discovery of facts known and opinions held by experts, otherwise discoverable under the provisions of paragraph (b)(1) of this section and acquired or developed in anticipation of litigation or for hearing, may be obtained only as follows:

(A) A party may through interrogatories require any other party to identify each person whom the other party expects to call as an expert witness at hearing, to state the subject matter on which the expert is expected to testify, and to state the substance of the facts and opinions to which the expert is expected to testify and a summary of the grounds for each opinion. (B) Upon motion, the Administrative Law Judge may order further discovery by other means, subject to such restrictions as to scope as the Administrative Law Judge may deem appropriate.

(ii) A party may discover facts known or opinions held by an expert who has been retained or specially employed by another party in anticipation of litigation or preparation for hearing and who is not expected to be called as a witness at hearing, only upon a showing of exceptional circumstances under which it is impracticable for the party seeking discovery to obtain facts or opinions on the same subject by other means.

(iii) The Administrative Law Judge may require as a condition of discovery that the party seeking discovery pay the expert a reasonable fee, but not more than the maximum specified in 5 U.S.C. 3109 unless the parties have stipulated to a higher amount, for time spent in responding to discovery under paragraphs (b)(4)(i)(B) and (b)(4)(ii) of this section.

(c) *Protective Orders.* (1) The Administrative Law Judge may deny discovery or make any order which justice requires to protect a party or other person from annoyance, embarrassment, oppression, or undue burden or expense, or to prevent undue delay in the proceeding.

(2) [Reserved]

(d) *Stipulations.* When approved by the Administrative Law Judge, the parties may by written stipulation (1) provide that depositions may be taken before any person, at any time or place, upon any notice, and in any manner and when so taken may be used like other depositions, and (2) modify the procedures provided by these rules for other methods of discovery.

(e) *Rulings on Applications For Compulsory Process.* Applications for authorization to take depositions pursuant to the provisions of § 3.33, applications for the issuance of subpoenas pursuant to the provisions of § 3.34 or of offers pursuant to the provisions of § 3.37 (other than as provided in

D E 4 7 8 UMI

§ 3.36), and applications for authorization to serve interrogatories pursuant to the provisions of § 3.35 may be made *ex parte*, and, if so made, such applications and rulings thereon shall remain *ex parte* unless otherwise ordered by the Administrative Law Judge or the Commission. Such applications, and motions for protective orders shall be ruled upon by the Administrative Law Judge or, in the event the Administrative Law Judge is not available, by the Chief Administrative Law Judge or such other Administrative Law Judge as the Chief Administrative Law Judge may designate.

§ 3.32 Admissions.

(a) At any time after thirty (30) days after issuance of compliant, or after publication of notice of an adjudicative hearing in a rulemaking proceeding under § 3.13, any party may serve on any other party a written request for admission of the truth of any matters relevant to the pending proceeding set forth in the request that relate to statements or opinions of fact or of the application of law to fact, including the genuineness of any documents described in the request. Copies of documents shall be served with the request unless they have been or are otherwise furnished or are known to be, and in the request are stated as being, in the possession of the other party. Each matter of which an admission is requested shall be separately set forth. A copy of the request shall be filed with the Secretary.

(b) The matter is admitted unless, within ten (10) days after service of the request, or within such shorter or longer time as the Administrative Law Judge may allow, the party to whom the request is directed serves upon the party requesting the admission, with a copy filed with the Secretary, a sworn written answer or objection addressed to the matter. If objection is made, the reasons therefor shall be stated. The answer shall specifically deny the matter or set forth in detail the reasons why the answering party cannot truthfully admit or deny the matter. A denial shall fairly meet the substance of the requested admission, and when good faith requires that a party qualify his answer or deny only a part of the matter of which an admission is requested, he shall specify so much of it as is true and qualify or deny the remainder. An answering party may not give lack of information or knowledge as a reason for failure to admit or deny unless he states that he has made reasonable inquiry and that the information known to, or readily obtainable by, him is insufficient to enable him to admit or deny. A party who considers that a matter of which an admission has been requested presents a genuine issue for trial may not, on that ground alone, object to the request; he may deny the matter or set forth reasons why he cannot admit or deny it.

(c) Any matter admitted under this rule is conclusively established unless the Administrative Law Judge on motion permits withdrawal or amendment of the admission. The Administrative Law Judge may permit withdrawal or amendment when the presentation of the merits of the proceeding will be subserved thereby and the party who obtained the admission fails to satisfy the Administrative Law Judge that withdrawal or amendment will prejudice him in maintaining his action or defense on the merits. Any admission made by a party under this rule is for the purpose of the pending proceeding only and is not an admission by him for any other purpose nor may it be used against him in any other proceeding.

§ 3.33 Depositions.

(a) *In general.* Any party may request the Administrative Law Judge to order the taking of a deposition or depositions of a named person or of a person or persons described with reasonable particularity. Such an order may be issued upon a satisfactory showing that the deposition or depositions may reasonably be expected to yield any information within the scope of discovery under § 3.31(b)(1). Such an order may also be issued to preserve relevant evidence upon a showing that there is substantial reason to believe that such evidence would not otherwise be available for presentation at the hearing. Depositions may be taken before any person having power to administer oaths, either under the law of the United States or of the state or other place in which the deposition is taken, who may be designated by the party seeking the deposition, provided that such person shall have no interest in the outcome of the proceeding. If such an order is issued, the party seeking the deposition shall serve upon each person whose deposition is sought and upon each party to the proceeding reasonable notice in writing of the time and place at which it will be taken, and the name and address of each person or persons to be examined, if known, and if the name is not known, a description sufficient to identify them.

(b) *Form of application.* Any party desiring to take a deposition or depositions shall make application in writing to the Administrative Law Judge making the showing required by paragraph (a) of this section and including, as appropriate, any applications or motions for subpoenas or other orders under §§ 3.34 or 3.36.

(c) *Notice to corporation or other organization.* A party may in a request for authorization of a deposition and in a subpoena *ad testificandum* name as the deponent a public or private corporation, partnership, association, governmental agency other than the Federal Trade Commission, or any bureau or regional office of the Federal Trade Commission, and describe with reasonable particularity the matters on which examination is requested. If such deposition is ordered and subpoena issued, the organization so named shall designate one or more officers, directors, or managing agents, or other persons who consent to testify on its behalf, and may set forth, for each person designated, the matters on which he will testify. A subpoena shall advise a non-party organization of its duty to make such a designation. The persons so designated shall testify as to matters known or reasonably available to the organization. This subsection does not preclude taking a deposition by any other procedure authorized in these rules.

(d) *Taking of deposition.* Each deponent shall be duly sworn, and any party shall have the right to question him. Objections to questions or to evidence presented shall be in short form, stating the grounds of objections relied upon. The questions propounded and the answers thereto, together with all objections made, shall be recorded and certified by the officer. Thereafter, upon payment of the charges therefor, the officer shall furnish a copy of the deposition to the deponent and to any party.

(e) *Depositions upon written questions.* A party desiring to take a deposition upon written questions shall, upon order of the Administrative Law Judge, serve them upon every other party with a notice stating (1) the name and address of the person who is to answer them, and (2) the name or descriptive title and address of the officer before whom the deposition is to be taken. A deposition upon written questions may be taken of a public or private corporation, partnership, association, governmental agency other than the Federal Trade Commission, or any bureau or regional office of the Federal Trade Commission in accordance with the provisions of Rule 3.33(c). Within 30 days after the notice and written questions are served, any other party may serve cross questions upon all other parties. Within 10 days after being served with cross questions, the party taking the deposition may serve redirect questions upon all other parties. Within 10 days after being served with redirect questions, any other party may serve recross questions upon all other parties. The content of any question shall not be disclosed to the deponent prior to the

V 4 3 / 2 3 3

taking of the deposition. A copy of the notice and copies of all questions served shall be delivered by the party taking the deposition to the officer designated in the notice, who shall proceed promptly to take the testimony of the deponent in response to the questions and to prepare, certify, and file or mail the deposition, attaching thereto the copy of the notice and the questions received by him. When the deposition is filed the party taking it shall promptly give notice thereof to all other parties.

(f) *Correction of deposition.* A deposition may be corrected, as to form or substance, in the manner provided by § 3.44(b). Any such deposition shall, in addition to the other required procedures, be read to or by the deponent and signed by him, unless the parties by stipulation waive the signing or the deponent is unavailable or cannot be found or refuses to sign. If the deposition is not signed by the deponent within 30 days of its submission or attempted submission, the officer shall sign it and certify that the signing has been waived or that the deponent is unavailable or that the deponent has refused to sign, as the case may be, together with the reason for the refusal to sign, if any has been given. The deposition may then be used as though signed unless, on a motion to suppress under Rule 3.33(g)(3)(iv), the Administrative Law Judge determines that the reasons given for the refusal to sign require rejection of the deposition in whole or in part. In addition to and not in lieu of the procedure for formal correction of the deposition, the deponent may enter in the record at the time of signing a list of objections to the transcription of his remarks, stating with specificity the alleged errors in the transcript.

(g)(1) *Use of Depositions in Hearings.* At the hearing on the complaint or upon a motion, any part or all of a deposition, so far as admissible under the rules of evidence applied as though the witness were then present and testifying, may be used against any party who was present or represented at the taking of the deposition or who had reasonable notice thereof, in accordance with any of the following provisions:

(i) Any deposition may be used for the purpose of contradicting or impeaching the testimony of deponent as a witness.

(ii) The deposition of a party or of anyone who at the time of taking the deposition was an officer, director, or managing agent, or a person designated to testify on behalf of a public or private corporation, partnership or association which is a party, or of an official or employee (other than a special employee) of the Commission, may be used by an adverse party for any purpose.

(iii) A deposition may be used by any party for any purpose if the Administrative Law Judge finds: (A) That the deponent is dead; or (B) that the deponent is out of the United States or is located at such a distance that his attendance would be impractical, unless it appears that the absence of the deponent was procured by the party offering the deposition; or (C) that the deponent is unable to attend or testify because of age, sickness, infirmity, or imprisonment; or (D) that the party offering the deposition has been unable to procure the attendance of the deponent by subpoena; or (E) that such exceptional circumstances exist as to make it desirable, in the interest of justice and with due regard to the importance of presenting the testimony of witnesses orally in open hearing, to allow the deposition to be used.

(iv) If only part of a deposition is offered in evidence by a party, any other party may introduce any other part which ought in fairness to be considered with the part introduced.

(2) *Objections to Admissibility.* Subject to the provisions of paragraph (g)(3) of this section, objection may be made at the hearing to receiving in evidence any deposition or part thereof for any reason which would require the exclusion of the evidence if the witness were then present and testifying.

(3) *Effect of Errors and Irregularities in Depositions*—(i) *As to notice.* All errors and irregularities in the notice for taking a deposition are waived unless written objection is promptly served upon the party giving the notice.

(ii) *As to disqualification of officer.* Objection to taking a deposition because of disqualification of the officer before whom it is to be taken is waived unless made before the taking of the deposition begins or as soon thereafter as the disqualification becomes known or could be discovered with reasonable diligence.

(iii) *As to taking of deposition.* (A) Objections to the competency of a witness or to the competency, relevancy, or materiality of testimony are not waived by failure to make them before or during the taking of the deposition, unless the ground of the objection is one which might have been obviated or removed if presented at that time.

(B) Errors and irregularities occurring at the oral examination in the manner of taking the deposition, in the form of the questions or answers, in the oath or affirmation, or in the conduct of parties, and errors of any kind which might be obviated, removed, or cured if promptly presented, are waived unless seasonable objection thereto is made at the taking of the deposition.

(C) Objections to the form of written questions are waived unless served in writing upon all parties within the time allowed for serving the succeeding cross or other questions and within 5 days after service of the last questions authorized.

(iv) *As to completion and return of deposition.* Errors and irregularities in the manner in which the testimony is transcribed or the deposition is prepared, signed, certified, endorsed, or otherwise dealt with by the officer are waived unless a motion to suppress the deposition or some part thereof is made with reasonable promptness after such defect is or with due diligence might have been ascertained.

§ 3.34 Subpoenas.

(a) *Subpoenas ad testificandum.* Application for issuance of a subpoena requiring a person to appear and depose or testify at the taking of a deposition or at an adjudicative hearing shall be made in writing to the Administrative Law Judge. If for the purpose of discovery, such subpoena may be issued upon a satisfactory showing that the testimony may reasonably be expected to yield any information within the scope of discovery under § 3.31(b)(1). If to preserve relevant evidence, such subpoena may be issued upon a showing that there is substantial reason to believe that such evidence would not otherwise be available for presentation at the hearing. If for testimony at an adjudicative hearing, such subpoena may be issued upon a showing of the reasonable relevancy of the expected testimony.

(b) *Subpoenas duces tecum.* Application for issuance of a subpoena requiring a person to appear and depose or testify and to produce specified documents (including writings, drawings, graphs, charts, photographs, phono records and other recordings, and other data compilations from which information can be obtained (translated, if necessary, by the person into reasonably usable form)) at the taking of a deposition, or at a prehearing conference, or at an adjudicative hearing shall be made in writing to the Administrative Law Judge, shall specify with reasonable particularity the material to be produced, showing that the material sought is reasonable in scope and, if for the purpose of discovery, falls within the limits of permissible discovery under § 3.31(b)(1), or, if for an adjudicative hearing, is reasonably relevant. Subpoenas *duces tecum* may be used by any party for purposes of discovery or for obtaining documents for use in evidence, or for both purposes.

(c) *Motions to Quash.* Any motion by the subject of a subpoena to limit or quash the subpoena shall be filed within the earlier of ten (10) days after service thereof or the time for compliance therewith. Such motion shall set forth all assertions of privilege or other factual and legal objections to the subpoena, including all appropriate argument, affidavits and other supporting documentation.

§ 3.35 Interrogatories to parties.

(a) *Availability; Procedures for Use.* (1) Upon authorization by the Administrative Law Judge, any party may serve upon any other party written interrogatories to be answered by the party served or, if the party served is a public or private corporation, partnership, association or governmental agency, by any officer or agent, who shall furnish such information as is available to the party. For this purpose, information shall not be deemed to be available insofar as it is in the possession of the Commissioners, the General Counsel, the office of Administrative Law Judges, or the Secretary in his capacity as custodian or recorder of any such information, or their respective staffs.

(2) Each interrogatory shall be answered separately and fully in writing under oath, unless it is objected to on grounds not raised and ruled on in connection with the authorization, in which event the reasons for objection shall be stated in lieu of an answer. The answers are to be signed by the person making them, and the objections signed by the attorney making them. The party upon whom the interrogatories have been served shall serve a copy of the answers, and objections if any, within 30 days after the service of the interrogatories, except that a respondent may serve answers or objections within 45 days after service of the complaint upon that respondent. The Administrative Law Judge may allow a shorter or longer time.

(b) *Scope; Use at Hearing.* (1) Interrogatories may relate to any matters which can be inquired into under § 3.31(b)(1), and the answers may be used to the extent permitted by the rules of evidence.

(2) An interrogatory otherwise proper is not necessarily objectionable merely because an answer to the interrogatory involves an opinion or contention that relates to fact or the application of law to fact, but the Administrative Law Judge may order that such an interrogatory need not be answered until after designated discovery has been completed or until a pretrial conference or other later time.

(c) *Option to Produce Records.* Where the answer to an interrogatory may be derived or ascertained from the records of the party upon whom the interrogatory has been served or from an examination, audit or inspection of such records, or from a compilation, abstract or summary based thereon, and the burden of deriving or ascertaining the answer is substantially the same for the party serving the interrogatory as for the party served, it is a sufficient answer to such interrogatory to specify the records from which the answer may be derived or ascertained and to afford to the party serving the interrogatory reasonable opportunity to examine, audit or inspect such records and to make copies, compilations, abstracts or summaries. The specification shall include sufficient detail to permit the interrogating party to identify readily the individual documents from which the answer may be ascertained.

§ 3.36 Applications for subpoenas for records of the commission or other governmental agency and for appearance of commission or other government officials and employees.

(a) *Form.* An application for issuance of a subpoena for documents (as defined in § 3.34(b)), or for the issuance of an order requiring access to documents pursuant to § 3.37, in the possession, custody, or control of the Federal Trade Commission or its employees, or of another governmental agency or its employees; or for the issuance of a subpoena requiring the appearance of an official or employee of the Commission, including complaint counsel, or the appearance of an official or employee of another governmental agency, shall be made in the form of a written motion filed in accordance with the provisions of § 3.22(a). No application for records pursuant to § 4.11 of this chapter or the Freedom of Information Act may be filed with the Administrative Law Judge.

(b) *Content.* The motion shall make the same showing required to obtain a subpoena under § 3.34 or an order under § 3.37, together with a specific showing that the information or material sought cannot reasonably be obtained by other means.

§ 3.37 Access for inspection and other purposes.

(a) *Availability; Procedures for Use.* Upon application in writing by any party, the Administrative Law Judge may issue an order requiring a party (1) to permit the party making the request, or someone acting on his behalf, to inspect and copy any designated documents, as defined in § 3.34(b), or to inspect and copy, test, or sample any tangible things which are in the possession, custody or control of the party upon whom the order would be served; or (2) to permit entry upon designated land or other property in the possession or control of the party upon whom the order would be served for the purpose of inspection and measuring, surveying, photographing, testing, or sampling the property or any designated object or operation thereon. Each such application shall specify with reasonable particularity the documents or things to be inspected, or the property to be entered, showing that the material sought is reasonable in scope and falls within the limits of permissible discovery under § 3.31(b)(1). Each such application shall also specify a reasonable time, place, and manner of making the inspection and performing the related acts. A party shall make documents available as they are kept in the usual course of business or shall organize and label them to correspond with the categories in the order that requires their production.

(b) *Motions to Quash.* Any motion by the subject of an order to limit or quash the order shall be filed within the earlier of ten (10) days after service thereof or the time for compliance therewith. Such motion shall set forth all assertions of privilege or other factual and legal objections to the order, including all appropriate argument, affidavits and other supporting documentation.

§ 3.38 Motion for order compelling answer; sanctions.

(a) A party who has requested admissions or who has served interrogatories may move to determine the sufficiency of the answers or objections thereto. Unless the objecting party sustains his burden of showing that the objection is justified, the Administrative Law Judge shall order that an answer be served. If the Administrative Law Judge determines that an answer does not comply with the requirements of these rules, he may order either that the matter is admitted or that an amended answer be served. The Administrative Law Judge may, in lieu of these orders, determine that final disposition may be made at a prehearing conference or at a designated time prior to trial.

(b) If a party or an officer or agent of a party fails to comply with a subpoena or with an order including, but not limited to, an order for the taking of a deposition, the production of documents, or the answering of interrogatories, or requests for admissions; or an order of the Administrative Law Judge or the Commission issued as, or in accordance with, a ruling upon a motion concerning such an order or subpoena or upon an appeal from such a ruling, the Administrative Law Judge or the Commission, or both, for the purpose of permitting resolution of relevant issues and disposition of the proceeding without unnecessary delay despite such failure, may take such action in regard thereto as is

D E 4 7 8 UMI

just, including but not limited to the

(5) To rule upon offers of proof and

(d) • • •

just, including but not limited to the following:

(1) Infer that the admission, testimony, documents or other evidence would have been adverse to the party;

(2) Rule that for the purposes of the proceeding the matter or matters concerning which the order or subpoena was issued be taken as established adversely to the party;

(3) Rule that the party may not introduce into evidence or otherwise rely, in support of any claim or defense, upon testimony by such party, officer, or agent, or the documents or other evidence;

(4) Rule that the party may not be heard to object to introduction and use of secondary evidence to show what the withheld admission, testimony, documents, or other evidence would have shown;

(5) Rule that a pleading, or part of a pleading, or a motion or other submission by the party, concerning which the order or subpoena was issued, be stricken, or that a decision of the proceeding be rendered against the party, or both.

(c) Any such action may be taken by written or oral order issued in the course of the proceeding or by inclusion in an initial decision of the Administrative Law Judge or an order or opinion of the Commission. It shall be the duty of parties to seek and Administrative Law Judges to grant such of the foregoing means of relief or other appropriate relief as may be sufficient to compensate for withheld testimony, documents, or other evidence. If in the Administrative Law Judge's opinion such relief would not be sufficient, or in instances where a nonparty fails to comply with a subpena or order, he shall certify to the Commission a request that court enforcement of the subpena or order be sought.

§ 3.42 Presiding Officials.

* * * * *

(c) *Powers and duties.* Administrative Law Judges shall have the duty to conduct fair and impartial hearings, to take all necessary action to avoid delay in the disposition of proceedings, and to maintain order. They shall have all powers necessary to that end, including the following:

(1) To administer oaths and affirmations;

(2) To issue subpenas and orders requiring answers to questions;

(3) To take depositions or to cause depositions to be taken;

(4) To compel admissions, upon request of a party or on their own initiative;

(5) To rule upon offers of proof and receive evidence;

(6) To regulate the course of the hearings and the conduct of the parties and their counsel therein;

(7) To hold conferences for settlement, simplification of the issues, or any other proper purpose;

(8) To consider and rule upon, as justice may require, all procedural and other motions appropriate in an adjudicative proceeding, including motions to open defaults;

(9) To make and file initial decisions;

(10) To certify questions to the Commission for its determination; and

(11) To take any action authorized by the rules in this part or in conformance with the provisions of the Administrative Procedure Act as restated and incorporated in Title 5, U.S.C.

By direction of the Commission dated November 9, 1978.

CAROL M. THOMAS,
Secretary.

MOTIONS TO QUASH COMPULSORY PROCESS

AGENCY: Federal Trade Commission.

ACTION: Final rule.

SUMMARY: Section 1.13(d)(6), 2.7(b), 2.11(b), and 2.12(d) are amended to provide that objections to Commission demands for information should set forth all claims of privilege or other objections including all supporting documentation. A parallel technical amendment is made to § 4.9(b)(22). These amendments codify requirements under existing Commission practices.

EFFECTIVE DATE: December 4, 1978.

FOR FURTHER INFORMATION CONTACT:

Jerold D. Cummins, Deputy Assistant General Counsel, Office of General Counsel, Federal Trade Commission, 6th Street and Pennsylvania Avenue NW., Washington, D.C. 20580, (202) 523-1928.

In consideration of the foregoing, 16 CFR Chapter I is amended as follows:

PART 1—GENERAL PROCEDURES

§ 1.13 [Amended]

(1) Add to § 1.13(d)(6) just before the next to the last full sentence.

* * * * *

(d) * * *

(6) * * * Such motion shall set forth all assertions of privilege or other factual and legal objection to the ruling, including all appropriate argument, affidavits and other supporting documentation. * * *

PART 2—NONADJUDICATIVE PROCEDURES

§ 2.7 [Amended]

(2) Add to § 2.7(b) after the first sentence:

* * * * *

(b) * * * Such motion shall set forth all assertions of privilege or other factual and legal objections to the subpena, including all appropriate argument, affidavits and other supporting documentation. * * *

§ 2.11 [Amended]

(3) Add to § 2.11(b) after the first sentence:

* * * * *

(b) * * * Such motion shall set forth all assertions of privilege or other factual and legal objections to the order requiring access, including all appropriate argument, affidavits and other supporting documentation. * * *

§ 2.12 [Amended]

(4) Add to § 2.12(d) after the first sentence:

* * * * *

(d) * * * Such motion shall set forth all assertions of privilege or other factual and legal objection to the order requiring a report or answer to specific questions, including all appropriate argument, affidavits and other supporting documentation. * * *

PART 4—MISCELLANEOUS RULES

§ 4.9 [Amended]

(5) Revise § 4.9(b)(22) to read in its entirety:

* * * * *

(b) * * * (22) Motions to limit or quash compulsory process, and the rulings thereon, except for information exempt from disclosure under § 4.10(a)(2) or § 4.10(a)(7) of this chapter.

By direction of the Commission dated November 9, 1978.

CAROL M. THOMAS,
Secretary.

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The following agencies have agreed to publish all documents on two assigned days of the week (Monday/Thursday or Tuesday/Friday). This is a voluntary program. (See OFR notice 41 FR 32914, August 6, 1976.)

Monday	Tuesday	Wednesday	Thursday	Friday
DOT/COAST GUARD	USDA/ASCS		DOT/COAST GUARD	USDA/ASCS
DOT/NHTSA	USDA/APHIS		DOT/NHTSA	USDA/APHIS
DOT/FAA	USDA/FNS		DOT/FAA	USDA/FNS
DOT/OHMO	USDA/FSQS		DOT/OHMO	USDA/FSQS
DOT/OPSO	USDA/REA		DOT/OPSO	USDA/REA
CSA	CSC		CSA	CSC
	LABOR			LABOR
	HEW/FDA			HEW/FDA

Documents normally scheduled for publication on a day that will be a Federal holiday will be published the next work day following the holiday.

Comments on this program are still invited. Comments should be submitted to the Day-of-the-Week Program Coordinator, Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408.

NOTE: As of August 14, 1978, Community Services Administration (CSA) documents are being assigned to the Monday/Thursday schedule.

federal register

Area Code 202 Phone 523-5240

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $5.00 per month or $50 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

Title 3—The President

Proclamation 4610 • **November 30, 1978**

Modification of Quotas on Certain Sugars, Sirups, and Molasses

By the President of the United States of America

A Proclamation

1. By Proclamation 4334 of November 16, 1974, the President modified Subpart A, Part 10, Schedule 1 of the Tariff Schedules of the United States (19 U.S.C. 1202, hereinafter referred to as the "TSUS") to establish, effective January 1, 1975, following expiration of the Sugar Act of 1948, rates of duty and a quota applicable to sugars, sirups and molasses described in items 155.20 and 155.30 of the TSUS. The President subsequently modified the rates of duty by Proclamation 4463 of September 21, 1976, Proclamation 4466 of October 4, 1976, and Proclamation 4539 of November 11, 1977.

2. The President took these actions pursuant to authority vested in him by the Constitution and statutes of the United States, including section 201(a)(2) of the Trade Expansion Act of 1962 (19 U.S.C. 1821(a)(2)), and in conformity with Headnote 2 of Subpart A of Part 10 of Schedule 1 of the TSUS, hereinafter referred to as the "Headnote." The Headnote was part of a trade agreement which embodied the results of the "Kennedy Round" of international trade negotiations. That agreement is known formally as the 1967 Geneva Protocol to the General Agreement on Tariffs and Trade, and the agreement includes, as an Annex, "Schedule XX," a schedule of United States trade concessions made during those negotiations. This agreement was concluded pursuant to section 201(a) of the Trade Expansion Act of 1962 (19 U.S.C. 1821(a)), and was implemented by Proclamation No. 3822, of December 16, 1967, (82 Stat. 1455) which, *inter alia*, added the Headnote to the TSUS.

3. The Headnote provides, in relevant part, as follows:

"(i) . . . if the President finds that a particular rate not lower than such January 1, 1968, rate, limited by a particular quota, may be established for any articles provided for in item 155.20 or 155.30, which will give due consideration to the interests in the United States sugar market of domestic producers and materially affected contracting parties to the General Agreement on Tariffs and Trade, he shall proclaim such particular rate and such quota limitation, . . .

"(ii) . . . any rate and quota limitation so established shall be modified if the President finds and proclaims that such modification is required or appropriate to give effect to the above considerations; . . ."

4. Section 201(a)(2) of the Trade Expansion Act authorizes the President to proclaim the modification or continuance of any existing duty or other import restrictions, or such additional import restrictions as he determines to be required or appropriate to carry out any trade agreement entered into under the authority of that Act, except that pursuant to section 201(b)(2) of

V 43/234 DEC 5 78 UMI

the Act, the President may not by proclamation increase a rate of duty to a rate more than 50 percent above the rate existing on July 1, 1934.

5. I find that the modifications hereinafter proclaimed of the quota applicable to items 155.20 and 155.30 of the TSUS are appropriate to carry out the International Sugar Agreement, 1977, and that portion of the Kennedy Round Trade agreement set forth in the Headnote, and as provided for in the Headnote, give due consideration to the interests in the United States sugar market of domestic producers and materially affected contracting parties to the General Agreement on Tariffs and Trade.

NOW, THEREFORE, I, JIMMY CARTER, President of the United States of America, acting under the authority vested in me by the Constitution and statutes, including section 201 of the Trade Expansion Act of 1962, and in conformity with Headnote 2, Subpart A of Part 10 of Schedule 1, of the TSUS, do hereby proclaim until otherwise superseded by law:

A. Headnote 3 of Subpart A, Part 10, Schedule 1 of the TSUS is modified to provide as follows:

(3) The total amount of sugars, sirups, and molasses described in items 155.20 and 155.30, the products of all foreign countries, entered, or withdrawn from warehouse, for consumption in any calendar year shall not exceed, in the aggregate, 6,900,000 short tons, raw value. Of this quantity, not more than 210,987 short tons, raw value, the product of the Republic of China, and not more than 150,544 short tons, raw value, in the aggregate, the products of all foreign countries other than Argentina, Australia, Bangladesh, Barbados, Belize, Bolivia, Brazil, Bulgaria, Canada, Costa Rica, Cuba, Republic of China, Dominican Republic, Ecuador, Egypt, El Salvador, Fiji, Finland, German Democratic Republic, Guatemala, Guyana, Honduras, Hungary, India, Indonesia, Iraq, Jamaica, Japan, Kenya, Republic of Korea, Madagascar, Malawi, Mauritius, Mexico, Mozambique, New Zealand, Nicaragua, Norway, Pakistan, Panama, Paraguay, Peru, Philippines, Portugal, Singapore, South Africa, St. Christopher-Nevis-Anguilla, Swaziland, Sweden, Thailand, Trinidad and Tobago, Uganda, Union of Soviet Socialist Republics, Venezuela, and Yugoslavia, may be entered, or withdrawn from warehouse for consumption in the period between January 1, 1978 and December 31, 1979, inclusive. For the purposes of this headnote, the term "raw value" means the equivalent of such articles in terms of ordinary commercial raw sugar testing 96 degrees by the polariscope as determined in accordance with regulations issued by the Secretary of the Treasury. The principal grades and types of sugar shall be translated into terms of raw value in the following manner:

(i) For articles described in item 155.20, by multiplying the number of pounds thereof by the greater of 0.93, or 1.07 less 0.0175 for each degree of polarization under 100 degrees (and fractions of a degree in proportion).

(ii) For articles described in item 155.30, by mutiplying the number of pounds of the total sugars thereof (the sum of the sucrose and reducing or invert sugars) by 1.07.

(iii) The Secretary of the Treasury shall establish methods for translating sugar into terms of raw value for any special grade or type of sugar for which he determines that the raw value cannot be measured adequately under the above provisions.

B. The provisions of this proclamation shall become effective with respect to articles entered, or withdrawn from warehouse, for consumption on and after the date of publication of this Proclamation in the FEDERAL REGISTER, except that articles which were released under the provisions of section 448(b) of Tariff Act of 1930 (19 U.S.C. 1448(b)) prior to such date shall be not be denied entry.

IN WITNESS WHEREOF, I have hereunto set my hand this thirtieth day of November, in the year of our Lord nineteen hundred seventy-eight, and of the Independence of the United States of America the two hundred and third.

Jimmy Carter

Title 5—Administrative Personnel

CHAPTER I—CIVIL SERVICE COMMISSION

PART 213—EXCEPTED SERVICE

Department of Commerce

AGENCY: Civil Service Commission.

ACTION: Final Rule.

SUMMARY: Schedule A authority for appointment of not to exceed 4,000 part-time, temporary and intermittent supervisors, assistant supervisors, supervisors' clerks and enumerators in the field service of the Census Bureau is amended to remove the prohibition against employment under the authority after December 31, 1978. Continuing exception of these positions under Schedule A is appropriate because the limited amount of employment involved and need to staff on short notice make examining for the positions impracticable.

EFFECTIVE DATE: November 15, 1978.

FOR FURTHER INFORMATION CONTACT:

James R. Edman, 202-632-4533.

Accordingly, 5 CFR 213.3114(d)(1) is amended as set out below:

§ 213.3114 Department of Commerce.

* * * * *

(d) *Bureau of Census.* (1) Not to exceed 4,000 positions of supervisors, assistant supervisors, supervisors' clerks and enumerators in the field service, other than Current Program Interviewers, for temporary, part-time or intermittent employment: *Provided,* That temporary part-time employment will be for periods not-to-exceed 1 year; and that such appointments may be extended for additional periods of not-to-exceed 1 year each: But that prior Commission approval is required for extension for longer than 1 year.

[6325-01-M]

PART 213—EXCEPTED SERVICE

Environmental Protection Agency

AGENCY: Civil Service Commission.

ACTION: Final rule.

SUMMARY: This amendment changes the title of positions at the Environmental Protection Agency from one Secretary to the Deputy Administrator to one Confidential Assistant to the Deputy Administrator and from Special Assistant to the Administrator to Confidential Assistant to the Administrator. These changes more appropriately reflect the duties of the positions. Also changed is Special Assistant (Political Coordination) to the Administrator to Special Assistant to the Deputy Administrator to reflect an organizational redesignation.

EFFECTIVE DATE: October 16, 1978.

FOR FURTHER INFORMATION CONTACT:

William Bohling, 202-632-4533.

Accordingly, 5 CFR 213.3318(a) (1), (5), (6) are amended as set out below:

§ 213.3318 Environmental Protection Agency.

(a) *Office of the Administrator.* (1) Eight Special Assistants and one Confidential Assistant to the Administrator. * * *

(5) One Confidential Assistant to the Deputy Administrator.

(6) Two Special Assistants to the Deputy Administrator.

PART 213—EXCEPTED SERVICE

Department of Defense, Department of Health, Education, and Welfare

AGENCY: Civil Service Commission.

ACTION: Final Rule.

SUMMARY: This amendment (1) excepts under Schedule C a position at the Department of Defense because it is confidential in nature and (2) changes the title of positions at the Department of Health, Education, and Welfare from one Assistant to the Secretary for Special Programs to one Special Assistant to the Executive Secretary and from one Confidential Assistant to the Under Secretary to one Special Assistant to the Executive Secretary. These changes more appropriately reflect the duties of the positions and also reflect an organizational redesignation. Appointments to these positions may be made without examination by the Civil Service Commission.

EFFECTIVE DATES: Department of Defense—October 30, 1978; Department of Health, Education, and Welfare—October 31, 1978.

FOR FURTHER INFORMATION CONTACT:

William Bohling, 202-632-4533.

Accordingly, 5 CFR 213.3306(a)(30) is added and 213.3316(a) (6), (9), and (11) are amended as set out below:

§ 213.3306 Department of Defense.

(a) *Office of the Secretary.* * * *

(30) One Private Secretary to the Principal Deputy Assistant Secretary of Defense/Deputy Under Secretary of Defense for Research and Engineering (Communications, Command and Control, and Intelligence).

Title 7—Agriculture

CHAPTER VII—AGRICULTURAL STABILIZATION AND CONSERVATION SERVICE (AGRICULTURAL ADJUSTMENT), DEPARTMENT OF AGRICULTURE

SUBCHAPTER B—FARM MARKETING QUOTAS AND ACREAGE ALLOTMENTS

PART 725—FLUE-CURED TOBACCO

Subpart—Proclamations, Determinations, and Announcements of National Marketing Quotas and Referendum Results

1979 NATIONAL MARKETING QUOTA FOR FLUE-CURED TOBACCO

AGENCY: Agricultural Stabilization and Conservation Service, USDA.

ACTION: Final Rule.

SUMMARY: The Secretary of Agriculture has determined that the flue-cured tobacco quota shall be 1,095 million pounds, about two percent below last year. The law requires this announcement by December 1, 1978. This and related determinations are being made to effect an orderly marketing of the supplies of flue-cured tobacco which will be available for the 1979-80 marketing year.

EFFECTIVE DATE: November 30, 1978.

FOR FURTHER INFORMATION CONTACT:

Robert L. Tarczy, (202) 447-7601, Price Support and Loan Division, ASCS, U.S. Department of Agriculture, P.O. Box 2415, Washington, D.C. 20013.

SUPLEMENTARY INFORMATION: 7 CFR 725.2 is issued pursuant to and in accordance with the Agricultural Adjustment Act of 1938, as amended (hereinafter referred to as the "Act"), to determine and announce for flue-cured tobacco for the marketing year beginning July 1, 1979:

1. The amount of the reserve supply level.
2. The amount of the total supply.
3. The amount of the national marketing quota.
4. The national average yield goal.
5. The national acreage allotment.
6. The national acreage reserve.

A. For establishing acreage allotments for new farms.

B. For making corrections and adjusting inequities in old farms.

7. The national acreage factor.
8. The national yield factor.

Marketing quotas on an acreage-poundage basis were proclaimed for flue-cured tobacco for the 1977-78; 1978-79; and 1979-80 marketing years (41 FR 52430). Flue-cured tobacco farmers approved marketing quotas on an acreage-poundage basis for the 1977-78, 1978-79, and 1979-80 marketing years (42 FR 10996).

The determinations by the Secretary contained in § 725.2 have been made on the basis of the latest available statistics of the Federal Government, and after due consideration of data, views, and recommendations received from flue-cured tobacco producers and others pursuant to a notice (43 FR 44862) given in accordance with the provisions of 5 U.S.C. 553.

DISCUSSION OF COMMENTS

During the flue-cured comment period, 32 written responses were received. Included were comments from farmers, members of the trade including trade associations, and farm groups. Twelve favored no change in quota, and 5 recommended increases ranging from 5 to 8 percent. The major thrust of these responses centered around a need for adequate supplies to maintain markets. Two responses recommended no increase in quota and two others recommended a 10 percent reduction in quota, noting that supplies of flue-cured tobacco are excessive. Twelve other respondents gave no specific quota recommendations.

Three meetings were held in the producing area to give farmers and others the opportunity to express their views verbally. At one meeting, most of the attendants generally favored a small increase in the quota so that supplies would be adequate to maintain markets. At the other two meetings, most of the attendants generally favored a quota decrease of not more than 10 percent, noting that supplies are excessive.

In keeping with the Secretary's obligations to effect an orderly reduction of total supply to the reserve supply level, a marketing quota of 1,095 million pounds is hereby determined and announced for the 1979-80 marketing year.

Section 317(a) (1) of the Act provides, in part, that for flue-cured tobacco, the national marketing quota for a marketing year is the amount of flue-cured tobacco produced in the United States which the Secretary estimates will be utilized during the marketing year in the United States and will be exported during the marketing year, adjusted upward or downward in such amount as the Secretary, in his discretion, determines is desirable for the purpose of maintaining an adequate supply or for effecting an orderly reduction of supplies to the reserve supply level. The Act further provides that any such downward adjustment shall not exceed 15 per centum of such estimated utilization and exports.

The reserve supply level is defined in the Act as 105 percent of the normal supply. The normal supply is defined in the Act as a normal year's domestic consumption and exports, plus 175 percent of a normal year's domestic consumption and 65 percent of a normal year's exports. A normal year's domestic consumption is defined in the Act as the yearly average quantity produced in the United States and consumed in the United States during the 10 marketing years immediately preceding the marketing year in which such consumption is determined, adjusted for current trends in such consumption. A normal year's exports is defined in the Act as the yearly average quantity produced in the United States which was exported from the United States during the 10 marketing years immediately preceding the marketing year in which such exports are determined, adjusted for current trends in such exports.

The yearly average domestic consumption during the 10 marketing years preceding the 1978-79 marketing year was 655 million pounds, and the yearly average exports during such period amounted to 531 million pounds. Both domestic disappearance and exports have fluctuated in relatively narrow bands with no predominate trends. Accordingly, a normal year's domestic consumption and a normal year's exports equal the respective 10 year averages. These normals result in a reserve supply level of 2,811 million pounds.

Total supply is defined as the carryover at the beginning of the marketing year (July 1) plus the estimated production in the United States during the calendar year in which the marketing year begins. The carryover of flue-cured tobacco in the inventories of manufacturers and dealers (including CCC loan stocks) on July 1, 1978, amounted to 2,046 million pounds, farm sales weight. The 1978 crop marketings plus 1977 crop tobacco marketed during the 1978-79 marketing year is currently estimated at 1,200 million pounds. The sum of these, 3,246 million pounds, represents the total supply of flue-cured tobacco for the 1978-79 marketing year, an amount which exceeds the proposed reserve supply level by 435 million pounds.

It is estimated that 605 million pounds of flue-cured tobacco will be utilized in the United States during the 1979-80 marketing year and 535 million pounds will be exported. Because it is deemed desirable to effect an orderly reduction of supplies to the reserve supply level, the sum of these amounts, 1,140 million pounds, is adjusted downward by 45 million pounds in establishing the quota. This reduction is less than the maximum reduction of 15 percent permitted by the Act, and is the reduction which is deemed desirable under the present supply-demand situation. Accordingly, the national marketing quota for flue-cured tobacco for the marketing year beginning July 1, 1979, is determined to be 1,095 million pounds.

The "national average yield goal" has been determined to be 1,854 pounds per acre. It has been determined that this yield will improve or insure the usability of flue-cured tobacco and increase the net return per pound to the growers. In making this determination, consideration was given to research data of the Agricultural Reserach Service of the Department and one of the land-grant colleges in the flue-cured tobacco area.

The community average yields have been determined for flue-cured tobacco and published in the FEDERAL REGISTER (30 FR 6207, 9875, 14487).

The national acreage allotment is 590,614.89 acres, determined in accordance with provisions of the Act by dividing the national marketing quota by the national yield goal.

In accordance with the Act, a national reserve, from the national acreage allotment, is established in the amount of 500 acres for making corrections in farm acreage allotments, adjusting inequities and establishing allotments for new farms. It is determined that the reserve acreage will be adequate.

It has been determined that types 11, 12, 13, and 14 constitute one kind of tobacco for the 1977-78, 1978-79, and 1979-80 marketing years. It has been determined also that no substantial difference exists in the usage or market outlets for any one or more of the types of flue-cured tobacco (30 FR 6144). Therefore, no action is being taken under section 313(i) of the Act for the 1979-80 marketing year.

Since farmers are now making their plans for 1979 production of flue-cured tobacco and need to know the acreage allotments and marketing quota for their farms for the 1979-80 marketing year, it is hereby found that compliance with the provisions of Executive Order 12044 and the notice of proposed rule making, public participation procedure and 30-day effective date requirements in 5 U.S.C. 553 is impossible and contrary to the public interest. Therefore, this revision is issued without following such procedure.

FINAL RULE

Part 725 of Title 7 is amended by revising § 725.2 and the centerhead which precedes it to read as set forth below, effective for the 1979 crop of flue-cured tobacco. The material previously appearing in this section under centerhead DETERMINATIONS AND ANNOUNCEMENTS—1978-79 MARKETING YEAR remains in full force and effect as to the crop to which it was applicable.

DETERMINATIONS AND ANNOUNCEMENTS—1979-80 MARKETING YEAR

§ 725.2 Flue-cured tobacco.

For flue-cured tobacco for the marketing year beginning July 1, 1979:

(a) *Reserve supply level.* The reserve supply level is determined and announced to be 2,811 million pounds, calculated, as provided in the Act, from a normal year's domestic consumption of 655 million pounds and a normal year's exports of 531 million pounds.

(b) *National marketing quota.* A national marketing quota on an acreage-poundage basis for the marketing year is hereby determined and announced to be 1,095 million pounds. This quota is based on estimated utilization in the United States in such marketing year of 605 million pounds and estimated exports in such marketing year of 535 million pounds, with a downward adjustment of 45 million pounds which is determined to be desirable for the purpose of effecting an orderly reduction of supplies to the reserve supply level.

(c) *National average yield goal.* The national average yield goal is determined and announced to be 1,854 pounds. This goal is based on the yield per acre which, on a national average basis, is determined will improve or insure the usability of flue-cured tobacco and increase the net return per pound to growers.

(d) *National acreage allotment.* The national acreage allotment on an acreage-poundage basis is determined and announced to be 590,614.89 acres. This allotment was determined by dividing the national marketing quota of 1,095 million pounds by the national average yield goal of 1,854 pounds.

(e) *National reserve.* The national reserve for making corrections and adjusting inequities in old farm acreage allotments and for establishing allotments for new farms in determined and announced to be 500 acres.

(f) *National acreage factor.* The national acreage factor is determined and announced to be .98.

(g) *National yield factor.* The national yield factor is determined and announced to be .9307.

(Sec. 301, 313, 317, 375, 52 Stat. 38, 47, 66, as amended, 79 Stat. 66 (7 U.S.C. 1301, 1313, 1314c, 1375))

NOTE.—An approved Impact Analysis Statement is available from Thomas A. VonGarlem, Acting Director, Price Support and

Title 9—Animals and Animal Products

CHAPTER I—ANIMAL AND PLANT HEALTH INSPECTION SERVICE, DEPARTMENT OF AGRICULTURE

SUBCHAPTER C—INTERSTATE TRANSPORTATION OF ANIMALS (INCLUDING POULTRY) AND ANIMAL PRODUCTS

PART 73—SCABIES IN CATTLE

Areas Quarantined

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Final rule.

SUMMARY: The purpose of this amendment is to quarantine portions of San Luis Obispo County in California because of the existence of cattle scabies. Psoroptic cattle scabies was confirmed by Veterinary Services Laboratories in California. Therefore, in order to prevent the dissemination of cattle scabies it is necessary to quarantine the infested areas.

EFFECTIVE DATE: November 30, 1978.

FOR FURTHER INFORMATION CONTACT:

Dr. Glen O. Schubert, Chief Staff Veterinarian, Sheep, Goat, Equine, and Ectoparasites Staff, USDA, APHIS, VS, Federal Building, Room 737, 6505 Belcrest Road, Hyattsville, Md. 20782, 301-436-8322.

SUPPLEMENTARY INFORMATION: This amendment quarantines portions of San Luis Obispo County in California because of the existence of cattle scabies. The restrictions pertaining to the interstate movement of cattle from quarantined areas as contained in 9 CFR Part 73, as amended, will apply to the areas quarantined.

Accordingly, Part 73, Title 9, Code of Federal Regulations, as amended, restricting the interstate movement of cattle because of scabies, is hereby amended as follows:

In § 73.1a, a new paragraph (c) relating to the State of California is added to read:

§ 73.1a Notice of quarantine.

* * * * *

(c) Notice is hereby given that cattle in certain portions of the State of California are affected with scabies, a contagious, infectious, and communicable disease; and, therefore, the following areas in such State are hereby quarantined because of said disease:

(1) The premises of the Stinton Feedlot, San Luis Obispo County, Shandon, R. 15 E., T. 27 S., secs. 10 and 15.

(2) The premises of the Phelan Feedlot, San Luis Obispo County, Arroyo Grande, R. 13 E., T. 12 N., N. ½ sec. 35.

(3) The premises of the Camatti Ranch, San Luis Obispo County, Santa Margarita, R. 15 E., T. 27 S., secs. 1, 2, 11, 12, 13, 14, 22, 24, 25, 26, 35; R. 16 E., T. 27 S., secs. 18, 19, 20, 28, 29, 30, 31, 32, 33, 34; R. 16 E., T. 28 S., secs. 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 14, 15, 16, 17, 18, 19, 20, 21, 22, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35; R. 16 E., T. 29 S., secs. 2, 3, 4, 5, 6, 8, 9, 10.

(Secs. 4-7, 23 Stat. 32, as amended; secs. 1 and 2, 32 Stat. 791-792, as amended; secs. 1-4, 33 Stat. 1264, 1265, as amended; secs. 3 and 11, 76 Stat. 130, 132; (21 U.S.C. 111-113, 115, 117, 120, 121, 123-126, 134b, 134f); 37 FR 28464, 28477; 38 FR 19141.)

The amendment imposes certain further restrictions necessary to prevent the interstate spread of cattle scabies and must be made effective immediately to accomplish its purpose in the public interest. It does not appear that public participation in this rulemaking proceeding would make additional relevant information available to the Department.

Accordingly, under the administrative procedure provisions in 5 U.S.C. 553, it is found upon good cause that notice and other public procedure with respect to the amendment are impracticable and contrary to the public interest, and good cause is found for making the amendment effective less than 30 days after publication in the FEDERAL REGISTER.

NOTE.—This regulation has been reviewed under the USDA criteria established to implement Executive Order 12044, "Improving Government Regulations" and has not been designated to be "significant" under these criteria.

Done at Washington, D.C., this 30th day of November 1978.

PIERRE A. CHALOUX,
Deputy Administrator, Veterinary Services.

[3410-34-M]

SUBCHAPTER D—EXPORTATION AND IMPORTATION OF ANIMALS (INCLUDING POULTRY) AND ANIMAL PRODUCTS

PART 92—IMPORTATION OF CERTAIN ANIMALS AND POULTRY AND CERTAIN ANIMAL AND POULTRY PRODUCTS; INSPECTION AND OTHER REQUIREMENTS FOR CERTAIN MEANS OF CONVEYANCE AND SHIPPING CONTAINERS THEREON

Restrictions on Importation of Horses From Belgium and the Federal Republic of Germany

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Final rule.

SUMMARY: This document extends to Belgium and the Federal Republic of Germany the prohibitions previously placed on the importation into the United States of certain horses from or that have been in countries affected with contagious equine metritis (CEM). This action is necessary to protect the livestock of the United States from such disease.

EFFECTIVE DATE: The foregoing amendment shall become effective November 30, 1978, except for horses then in transit to the United States from Belgium and the Federal Republic of Germany (i.e., loaded aboard a commercial carrier and en route to the United States).

FOR FURTHER INFORMATION CONTACT:

Dr. D. E. Herrick, USDA, APHIS, VS, Federal Building, Room 815, Hyattsville, Md. 20782, 301-436-8170.

SUPPLEMENTARY INFORMATION: On September 9, 1977 (42 FR 45895) a prohibition was placed on the importation into the United States of certain horses from England, Ireland, and France and the importation into the United States of certain horses that have been in such countries within the 60 days immediately preceding their export to the United States because of the existence of CEM in such countries. On September 16, 1977 (42 FR 48327-48328), the prohibition was extended to include Australia and all of the United Kingdom (England, Scotland, Northern Ireland, Wales, and Isle of Man). On December 8, 1977 (42 FR 63384-63385) an amendment extended the specified period as a condition for entry of such horses which have been in countries infected with CEM listed under § 92.2(i) from 60 days to 12 months. This action was taken to protect the livestock of the United States against the introduction and dissemination of CEM, a communicable disease of horses, into the United States. CEM is now known to exist in Belgium and the Federal Republic of Germany and prohibitions on the importation of certain horses from or that have been in that country within 12 months immediately preceding their export to the United States are hereby placed in effect. The same restrictions that now apply to horses from Australia, Ireland, France and the United Kingdom are hereby placed on the importation of certain horses from or that have been in Belgium and the Federal Republic of Germany. Dr. E. C. Sharman, Senior Staff Veterinarian, Import/Export Staff, has determined this amendment to be of an emergency nature and should be placed in effect immediately.

Accordingly, part 92, Code of Federal Regulations, is amended in the following respects:

In § 92.2, paragraph (i)(1) is amended to read:

§ 92.2 General prohibitions; exceptions.

* * * * *

(i)(1) Except as provided in subparagraph (2) of this paragraph, notwithstanding the other provisions of this part concerning the importation of horses into the United States, the importation of all horses from the following listed countries and the importation of all horses which have been in any such country within the 12 months immediately preceding their export to the United States is prohibited because of the existence of CEM in such countries: Australia, Belgium, Ireland, Federal Republic of Germany, France, and the United Kingdom (England, Scotland, Northern Ireland, Wales, and the Isle of Man).

(Sec. 2, 32 Stat. 792, as amended; secs. 4 and 11, 76 Stat. 130, 132 (21 U.S.C. 111, 134c, 134f); 37 FR 28464, 28477; 38 FR 19141.)

This amendment imposes additional restrictions on the importation of certain horses from Belgium and the Federal Republic of Germany into the United States. The amendment is of an emergency nature and should be placed in effect immediately in order to protect the livestock of the United States from the introduction and dissemination of disease.

Therefore, for such good cause the Department finds that notice and other public procedure regarding this amendment are impracticable, unnecessary and contrary to the public interest and good cause is found for making the amendment effective less than 30 days after publication in the FEDERAL REGISTER.

NOTE.—This final rulemaking is being published under emergency procedures as authorized by E.O. 12044. We have determined that the possibility of the introduction of CEM from Belgium and the Federal Republic of Germany is severe enough to warrant the publication of this quarantine without waiting for public comment. An impact analysis statement is being prepared and will be available from Program Services Staff, Room 870, Federal Building, 6505 Belcrest Road, Hyattsville, Maryland 20782, 301-436-8695. In addition, the regulations covering CEM will be scheduled for review under provisions of E.O. 12044.

Done at Washington, D.C., this 30th day of November 1978.

PIERRE A. CHALOUX,
Deputy Administrator, Veterinary Services.

Title 12—Banks and Banking

CHAPTER II—FEDERAL RESERVE SYSTEM

SUBCHAPTER A—BOARD OF GOVERNORS OF THE FEDERAL RESERVE SYSTEM

[Reg Z; FC-0159]

PART 226—TRUTH IN LENDING

Official Staff Interpretations

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Official Staff Interpretation(s).

SUMMARY: The Board is publishing the following official staff interpretation of Regulation Z, regarding § 226.9(g)(6) exception to general rescission requirements. The agency is taking this action in response to a request for interpretation of this regulation.

EFFECTIVE DATE: On or after January 4, 1979.

FOR FURTHER INFORMATION CONTACT:

Glenn E. Loney, Section Chief, Division of Consumer Affairs, Board of Governors of the Federal Reserve System, Washington, D.C. 20551 (202-452-3867).

SUPPLEMENTARY INFORMATION: (1) Identifying details have been deleted to the extent required to prevent a clearly unwarranted invasion of personal privacy. The Board maintains and makes available for public inspection and copying a current index providing identifying information for the public subject to certain limitations stated in 12 CFR Part 261.6.

(2) An opportunity for public comment on an official staff interpretation may be provided upon request of interested parties and in accordance with 12 CFR Part 226.1(d)(2)(ii). As provided by 12 CFR Part 226.1(d)(3) every request for public comment must be in writing, should clearly identify the number of the official staff interpretation in question, should be addressed to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551 and must be post marked or received by the Secretary's office before the effective date of the interpretation. The request must also state the reasons why an opportunity for public comment would be appropriate.

(3) The publication of this official staff interpretation was inadvertently delayed.

(4) Authority: 15 U.S.C. 1640(f).

§ 226.9(g) Creditor that extends nonsale credit directly to customer under open end credit plan may qualify for § 226.9(g)(8) exception to general rescission requirements.

OCTOBER 13, 1978.

This is in response to your letter of * * *, in which you request an official staff interpretation of the Board's recent amendment to the rescission provisions of Regulation Z. That amendment, § 226.9(g)(6) of the regulation, provides an exception to the regulation's general requirements regarding the right of rescission for individual transactions under an open end credit account, provided the specific requirements of the amendment are satisfied.

Specifically, you ask for clarification of § 226.9(g)(6)(i). Under that provision, the exception from the right of rescission for individual transactions under an open end credit account applies (assuming the amendment's other requirements are met) provided "[t]hat the creditor and the seller are not the same or related persons." You are concerned that this provision may be interpreted to mean that, for the exception to apply, an open end credit transaction must involve a *seller* that is not the same person as the creditor or related to the creditor. Under such an interpretation, the exception could not apply to a nonsale open end credit transaction (e.g., a cash advance loan made pursuant to an open end line of credit).

The staff is of the opinion that, in adopting this amendment to Regulation Z, the Board intended to allow creditors to qualify for an exception to the regulation's general rescission requirements for any open end credit transaction, whether involving sale or nonsale credit, except for the limited class of transactions in which the creditor of an open plan is the same person as or is related to the seller of property or services purchased by means of the plan. Thus, for example, a creditor of an open end plan could extend nonsale credit under the plan directly to a customer (in which case the creditor and the *lender* would be the same person and there would be no *seller* involved in the transaction at all) and could still qualify for the amendment's exception.

In accordance with your request, this is an official staff interpretation of Regulation Z, issued pursuant to § 226.1(d)(2) of the regulation and limited to the facts and issues discussed above. It will become effective 30 days after publication in the FEDERAL REGISTER unless a request for public comment, made in accordance with the Board's proce-

for and against the program were es- was to have eligibility and authoriza- nary cases, if at all. OR-135, also

V 4 3 / 2 3 4 D E 5 7 8 UMI

dures, is received and granted. We will notify you if the effective date of the interpretation is suspended because such a request is received.

Sincerely,

NATHANIEL E. BUTLER,
Associate Director.

Board of Governors of the Federal Reserve System, November 27, 1978.

THEODORE E. ALLISON,
Secretary of the Board.

[6320-01-M]

Title 14—Aeronautics and Space

CHAPTER II—CIVIL AERONAUTICS BOARD

[Reg. PR-182; Amdt. No. 44 of Part 302; Docket 29880]

PART 302—RULES OF PRACTICE IN ECONOMIC PROCEEDINGS

Intervention

AGENCY: Civil Aeronautics Board.

ACTION: Final rule.

SUMMARY: In PR-181, also issued today, the Board set up a program of payments to eligible participants in its proceedings. For the reasons set forth in PR-181, the Rules of Practice are amended to state that an Administrative Law Judge's grant of a petition to intervene in a hearing case will not affect the intervenor's eligibility for payments under the new program.

DATES: Adopted: October 26, 1978. Effective: November 28, 1978.

FOR FURTHER INFORMATION CONTACT:

Mark Schwimmer, Office of the General Counsel, Civil Aeronautics Board, 1825 Connecticut Avenue, N.W., Washington, D.C. 20428, 202-673-5442.

SUPPLEMENTARY INFORMATION: Since this amendment is administrative in nature, affecting a rule of agency practice and procedure, the Board finds that notice and public procedure are unnecessary and the amendment may be effective immediately.

Accordingly, the Civil Aeronautics Board amends Rule 15 of its Rules of Practice (14 CFR 302.15) as follows:

A sentence is added at the end of paragraph (b), so that it reads:

§ 302.15 Formal intervention in hearing cases.

* * * * *

(b) *Considerations relevant to determination of petition to intervene.* In passing upon a petition to intervene, the following factors, among other things, will be considered: (1) The nature of the petitioner's right under the statute to be made a party to the proceeding; (2) the nature and extent of the property, financial or other interest of the petitioner; (3) the effect of the order which may be entered in the proceeding on petitioner's interest; (4) the availability of other means whereby the petitioner's interest may be protected; (5) the extent to which petitioner's interest will be represented by existing parties; (6) the extent to which petitioner's participation may reasonably be expected to assist in the development of a sound record; and (7) the extent to which participation of the petitioner will broaden the issue or delay the proceeding. These criteria will be liberally interpreted to facilitate the effective participation by members of the public Board proceedings. The grant of a petition under this section will not affect the intervenor's eligibility under Part 304 of this chapter.

* * * * *

(Secs. 203 and 204 of the Federal Aviation Act of 1958, as amended, 72 Stat. 742 and 743; 49 U.S.C. 1323 and 1324.)

By the Civil Aeronautics Board.

PHYLLIS T. KAYLOR,
Secretary.

[FR Doc. 78-33925 Filed 12-4-78; 8:45 am]

[6320-01-M]

[Reg. PR-181; Docket 29880]

PART 304—COMPENSATION OF PARTICIPANTS IN BOARD PROCEEDINGS

Adoption of New Part

AGENCY: Civil Aeronautics Board.

ACTION: Final rule.

SUMMARY: The CAB establishes a program of payments to participants in its proceedings. Compensation will be paid to applicants who otherwise would be unable to participate, and who are expected to contribute substantially to a fair decision. Applicants' interest in the outcome must be small compared to the burden of participation.

DATES: Adopted: October 26, 1978. Effective: November 28, 1978.

FOR FURTHER INFORMATION CONTACT:

Mark Schwimmer, Office of the General Counsel, Civil Aeronautics Board, 1825 Connecticut Avenue, N.W., Washington D.C. 20428, Phone: 202-673-5442.

SUPPLEMENTARY INFORMATION: This rulemaking began in October 1976, when the Aviation Consumer Action Project (ACAP) and the Institute for Public Interest Representation petitioned the Board to set up a program to promote public participation in Board proceedings. They recommended compensation for attorneys' fees, expert witness fees, and other costs of participation incurred by qualifying participants. To qualify, a participant would need to represent "an interest which will substantially contribute to a full and fair determination of the issues involved in the proceeding" and meet a criterion of financial need.

Responding to the petition, we published PDR-45, an advance notice of proposed rulemaking.[1] We agreed in principle with the petition's aims and, in general terms, asked for comment on various questions of detail that it raised. The comments primarily addressed the threshold question of whether we ought to set up a compensation program at all. Supporters argued that participation by "public interest groups" and others can improve the balance of views presented to us and thus enhance the decision-making process, but that the cost of effective participation has often been a practical barrier. Opponents argued that a compensation program is unnecessary, impracticable to administer, and an improper and illegal use of public money.

In PDR-50, a notice of proposed rulemaking,[2] we discussed these arguments at length, resolved the general question in favor of having such a program, and asked for comments on a specific new Part 304 of our Procedural Regulations to govern it.

Twenty-five agencies, "public interest" groups, other organizations, and individuals filed comments on this proposal.[3] Since the general arguments

[1] February 8, 1977 (42 FR 8663, February 11, 1977).

[2] March 16, 1978 (43 FR 14045, April 4, 1978).

[3] Supporting comments were filed by the Board's Office of the Consumer Advocate, U.S. Department of Transportation, Federal Trade Commission, Airline Passengers Associations, Americans for Democratic Action, Common Cause, Public Citizen, Public Interest Economics Foundation, Washington Legal Foundation, Nebraska Department of Aeronautics, Senators Warren G. Magnuson and Edward M. Kennedy (jointly), and Mr. Donald Pevsner. A joint supporting comment was filed by ACAP, the Institute for Public Interest Representation, Consumer Federation of America, Council for Public Interest Law, and the Center for Law and Social Policy ("the ACAP commenters"). Opposing comments were filed by the Air Transport Association of America, National Association of Manufacturers, National Legal Center for the Public Interest, Missouri Department of Transportation, Chamber of Commerce of the United States, and

Footnotes continued on next page

for and against the program were essentially repetitions of those made in the comments on PDR-45, they will not be addressed again here. We are now adopting a new Part 304. A thorough discussion of the basis and purpose of the compensation program can be found in PDR-50. The discussion below deals with our legal authority to conduct the program and the details addressed by the commenters.

LEGAL AUTHORITY FOR THE PROGRAM

PDR-50 stated our tentative conclusion that authority to conduct a compensation program was implicit in the Federal Aviation Act and our then-current appropriation act. In a series of opinions, the Comptroller General had interpreted similar governing statutes of other agencies as authorizing compensation when (1) the participation "can reasonably be expected to contribute substantially to a full and fair determination" of the issues in a proceeding, and (2) the participant is "indigent or otherwise unable to finance its participation." Agreeing with those interpretations, we tentatively applied them to our own governing statutes. PDR-50 distinguished *Greene County Planning Board* v. *FPC*, 559 F. 2d 1237 (2d Cir. 1977), a case in which the U.S. Court of Appeals for the Second Circuit had agreed with the FPC that the Federal Power Act did not allow that agency to compensate participants without a more explicit statutory authorization.

Several commenters, relying primarily on the *Greene County* decision, argued that authority was lacking. We have examined those comments in detail and they have not persuaded us that the tentative conclusion announced in PDR-50 was incorrect. Therefore, we are hereby adopting our tentative finding that the Federal Aviation Act confers implied authority to establish a compensation program.[4] In addition, as a separate and totally independent legal basis, we conclude that Congress has since conferred authority by enacting the Department of Transportation and Related Agencies Appropriations Act, 1979.[5] The Conference Committee's report stated that:

> The conferees approve the expenditure of not to exceed $150,000 of the funds provided to the Board for the expenses of a one year demonstration project involving the participation of public interest groups and individuals in the Board's proceedings.[6]

ADMINISTRATION OF THE PROGRAM

PDR-50 invited comments on a variety of forms of administration. One was to have eligibility and authorization decisions made by an Evaluation Committee made up of the Managing Director, the General Counsel, and Director of the Office of Economic Analysis. Others included having a Board member on the committee, giving this function to the Administrative Law Judges or the Managing Director's office, and setting up a separate office to administer the program. ACAP, Common Cause, and Americans for Democratic Action favored the committee, with the composition described above. They stated that such a committee should be independent enough to avoid conflict with interested staff members. Consumer Federation of America and Public Citizen suggested a separate office. Although this approach could conceivably provide even greater independence, the $150,000 budget for the program's first year does not appear to justify it. The Office of the Consumer Advocate suggested that the program be administered by the Chief Administrative Law Judge, with the help of the other ALJ's. Involvement of the ALJ's would be particularly useful only in hearing cases, however. Rather than have a dual system of administration that depends on the type of case in which money is sought, we have selected the committee approach as the most workable one.

PDR-50 stated that, after selecting the persons who would administer the program, we would amend Part 385 of the Organization Regulations (14 CFR Part 385) to delegate the necessary authority. The ATA, nothing that the proposal did not discuss appeals to the Board from persons whose applications are disapproved, stated that we should specify whether §§ 380.50 through 385.54 of that part would govern such appeals. The review procedure set out in those sections, since it is designed primarily for staff actions that can meaningfully be said to have an "effective date", is not well suited to review of compensation decisions. We have therefore decided to place the delegation of authority to the Evaluation Committee directly in the new Part 304, along with a special review procedure.

A person whose application for compensation has been disapproved by the Committee will have 10 days to petition for discretionary review by the Board. Any person may submit an answer to a petition for review; we will consider answers to the extent practicable. To prevent delay, the rule specifies that submission of a petition for review will not stay the proceeding in which the petitioner has applied for compensation. We could nevertheless issue a stay if persuaded by the equities of a particular situation. However, we expect to do this only in extraordinary cases, if at all. OR-135, also issued today, amends Part 385 to exclude the delegation to the Evaluation Committee from the coverage of that part.

As proposed in PDR-50, applications for compensation and written decisions of the Evaluation Committee will be placed in the relevant docket and in a new "Compensation of Participants" file to be maintained in the Public Reference Room. The Committee will similarly file copies of any written communications with applicants, along with summaries of oral communications.

PDR-50 proposed no procedure for disclosing the recommendations that Board staff members make to the Committee. The ATA stated that all such recommendations should be in writing and docketed immediately. We agree that they should be made available to the public without delay. To require all communications between the staff and the Committee to be in writing is too restrictive, however, since it would prohibit meetings and telephone conversations about applications. These can be especially helpful when time is short. Therefore, we are permitting such oral communications with staff members. As with oral communications between the Committee and applicants, however, summaries will be placed in the docket and the "Compensation of Participants" file promptly. Also, to limit the chance of undue influence by interested staff members, communications between the Committee and those staff members who are participating in a proceeding will be limited to whatever is necessary for the Committee to ascertain whether the applicant's presentation is likely to duplicate that of the staff.

We are adding a provision to allow the Evaluation Committee to communicate with the staff of other Federal agencies in whose proceedings an applicant has participated. These communications will be limited to discussion of the effectiveness of the applicant's contribution to a full and fair determination of the other agency's proceeding. Such discussions can be helpful to the Committee in deciding whether compensation of the applicant is likely to be worthwhile. These communications will be summarized (if oral) and docketed, as described above for those with applicants and Board staff.

We are also adding procedures to allow public answers to applications for funding. Answers may provide the Evaluation Committee with information that is useful in its funding decisions. There is therefore no reason to preclude them, as long as the procedure does not hinder the administration of the program. In proceedings

---

V 43/234

where the Board invites applications for compensation, if there appears to be enough time to specify a period for filing answers, the invitation will announce a closing date for applications and a second date for answers. Any answers filed after that second date will be considered by the Committee only to the extent practicable. Similarly, when the invitation announces only a closing date for applications, and in cases where there is no invitation at all (and so no deadline even for applications), any answers filed will be considered only to the extent practicable.

APPLICATIONS FOR COMPENSATION

PDR-50 proposed to require that applicants list the proceedings of other Federal agencies in which they participated in the preceding year and the amount of any compensation that they received from the Federal government in connection with those proceedings. Americans for Democratic Action agreed that the list of proceedings would be helpful to the Board's staff in evaluating the quality of an applicant's past performance. ADA objected to any listing of previous compensation, however, arguing that this information would lead to discrimination against applicants who had already received money from other agencies. We do not agree. There would be no reason for such discrimination. The fact that an applicant has received money from another agency in the past, taken alone, is of no relevance to that applicant's eligibility for compensation from the Board. The amount becomes particularly relevant, however, in evaluating whether the other agency received good value for what it paid. That information, in turn, will be very useful to the Evaluation Committee.

Therefore, we are adopting the requirements for applications as proposed. Section 304.3 specifies the information that must be included, but does not prescribe a form. Our staff is preparing a pamphlet describing the compensation program to prospective applicants, for wide distribution to consumer groups and other interested persons around the country. The pamphlet will include an application form, whose use will be optional.

INTEREST ELIGIBILITY

The interest eligibility standard enunciated by the Comptroller General is that the applicant's participation "can be reasonably expected to contribute substantially to a full and fair determination" of the issues in a proceeding. In PDR-50, we proposed to implement this standard as follows:

(1) The applicant must represent an interest whose representation can reasonably be expected to contribute substantially to a full and fair determination of the proceeding, in light of the number and complexity of the issues presented, the importance of public participation, and the need for representation of a fair balance of interests;

(2) Participation by the applicant must be reasonably necessary to represent that interest adequately; and

(3) It must be reasonably probable that the applicant can represent the interest competently within the time available for the proceeding.

These three requirements, taken together, embody the Comptroller General's standard. Public Citizen and the ACAP commenters argue that the second one should be deleted because it is not only repetitive of the first, but susceptible to an interpretation that is too restrictive. In particular, they suggest that any given applicant is arguably unnecessary, since another participant could conceivably come forward to represent the same interest.

The second test described above is not redundant, however. The first addresses only the interest, and not the applicant itself. No matter how important the interest, one cannot say that the applicant's participation will contribute substantially to the proceeding if the same interest is already adquately represented by another party. Hence the need for the second test—that the applicant's participation must be reasonably necessary to represent the interest adequately. Since this requirement is intended only to preclude funding of participation that is likely to duplicate that which is already expected, the commenters need not fear the restrictive interpretation that they have suggested. Therefore, we are adopting the first three eligibility requirements as proposed.

The Public Interest Economics Foundation and the Air Transport Association stated that the "substantial contribution" standard should be elaborated on. ATA particularly argued that this standard is too vague. We disagree. In fact, the rule adopted today is already more specific on this subject than the language of S. 270, the bill in Congress that would give explicit statutory authority to most Federal agencies to conduct similar compensation programs.

The Airline Passengers Association and the Air Transport Association argued that applicants should have to demonstrate that they actually represent the groups they purport to represent. The APA surveys its members to ensure its representativeness. The ATA states that an organization applying for funds should specify which of its members affirmatively support the organization's position. If the program were based on the idea that applicants have a right to compensation, there would be merit in this argument. These commenters have misunderstood the point of the program, however. Compensation is based on the usefulness of applicants' expected presentations to the Board in making its decisions. Although membership support may give some weight to an organization's position, an applicant need not even have an identifiable constituency as long as the views that it will present are likely to be useful.

PDR-50 invited comments on the extent to which the Evaluation Committee should favor applicants who propose to develop new evidence and accompanying arguments over applicants who offer novel arguments based on existing evidence. OCA suggested that new evidence can be better developed by the Board's staff because the time available in the public phase of a proceeding is relatively short. The Federal Trade Commission, however, observed that the new information supplied by funded participants in its rulemaking proceedings has been particularly useful. We agree with the Public Interest Economics Foundation, which suggested that this question cannot really be answered in advance. Only with actual experience in a variety of proceedings can we decide which type of offering should be preferred. Perhaps there can be no general rule.

We wish to clarify the relation, in hearing cases, between formal intervention under Rule 15 and awards of compensation under the new Part 304, since a person may be seeking both. Under Rule 15 of the Rules of Practice (14 CFR § 302.15), an administrative law judge may grant a petition to intervene after considering several factors, one of which is "the extent to which petitioner's participation may reasonably be expected to assist in the development of a sound record." This factor is similar to, but much more lenient than, the "substantial contribution" criterion for compensation eligibility. If an ALJ's grant of a petition to intervene carried any weight in the Evaluation Committee's decision on the same applicant's request for money, the judges would be inhibited in their decisions on intervention. This would run counter to our policy of liberal interpretation of Rule 15. Therefore, PR-182, also adopted today, amends Rule 15 to state that a grant of intervention will not affect the Evaluation Committee's decision. Conversely, § 304.1 establishes that the Committee cannot give intervention rights to an applicant who does not already have them, whether by statute or by discretionary grant under Rule 15.

FINANCIAL ELIGIBILITY

The financial eligibility test enunciated by the Comptroller General is that the applicant be "indigent or otherwise unable to finance its participation." In PDR-50, this was embodied in proposed § 304.7(a)(4) as follows:

> The applicant does not have available, and cannot reasonably obtain in other ways, enough money to participate effectively in the proceeding without compensation under this part.

Public Citizen and the ACAP commenters stated that the words "and cannot reasonably obtain in other ways" should be deleted, because this provision could otherwise be read as requiring a group to try first to obtain a bank loan or a grant elsewhere, which would be burdensome. The key word here is "reasonably". Deletion is unnecessary, however, since we intend to interpret this eligibility requirement liberally. In the ordinary case, it would not be reasonable to expect a consumer group to obtain a bank loan, or to demonstrate that it had unsuccessfully appealed to a number of foundations for grants. On the other hand, it might be reasonable to expect an applicant with a direct commercial interest in the outcome of a proceeding to seek a loan, or to divert funds from other projects before obtaining money from this program. Therefore, we are adopting this test as proposed.

PDR-50 also proposed to specify an income level below which individual applicants would be presumed financially unable to participate without compensation. It suggested $30,000, but also invited comment on other possible levels. One commenter suggested that this figure is too low, while several stated that it is too high. Since participation costs can vary widely, depending on the type and complexity of a proceeding, it appears unwise to set any specific income threshold for presuming financial eligibility of individual applicants. An individual's ability to participate without compensation will depend not only on his or her own income, but also on the cost of participating in the particular case. Therefore, no threshold appears in the final rule adopted today.

The fifth proposed prerequisite to eligibility was the "small economic interest" requirement. Under this criterion, the applicant's economic interest in the outcome of the proceeding must be small in comparison with the cost of effective participation. Groups and organizations would satisfy this criterion as long as a substantial majority of their members did. The National Legal Center for the Public Interest objected to this provision, arguing that it had been rejected in a decision of the Comptroller General. The NLCPI has misunderstood that decision. The Comptroller General only rejected the "small economic interest" criterion for use as an alternative to the "inability to participate without compensation" criterion in determining which applicants would qualify for funds. PDR-50 proposed to use the two tests in conjunction: the latter to stay within the bounds of our legal authority, and the former to limit eligibility further by excluding those whose economic stake is large enough to warrant either the use of personal funds or the borrowing of money to pay for participation. There is no legal bar to such a conjunction of eligibility tests.

The Public Interest Economics Foundation suggested that the small economic interest test be restated so that consumer groups with a large aggregate interest would not be excluded. Such a restatment is unnecessary, however, since for groups this test is already stated in terms of the interest of a substantial majority of the group's individual members.

Accordingly, we are adopting the small economic interest test as proposed, except for a change prompted by the comment of the Seattle parties. A civic party, as a representative of a large number of people, may have an economic interest that is large in comparison with the cost of participation, but still be unable to meet that cost because of competing demands on local municipal budgets. We did not intend to exclude civic parties from eligibility for compensation under this program. Therefore, the small economic interest test adopted today balances the applicant's interest against the "burden" of participation, instead of the "cost" of participation. The change will permit a more flexible interpretation of the test, which will not automatically exclude civic parties.

COMPENSATION

PDR-50 proposed that compensation be limited to the reasonable costs of participation, with prevailing market rates ordinarily being considered reasonable. To prevent windfalls, however, it proposed as a ceiling the amount normally paid by the Board for comparable goods or the salaries normally paid by the Board for comparable services. The ACAP commenters objected to this ceiling, stressing that government salaries do not reflect the true cost of private services. Factors like overhead and fringe benefits make a direct comparison of salaries and costs unrealistic. In proposing the ceiling, however, we did not intend to exclude such indirect costs to the Board of employing staff. Including them in the computation of the ceiling will make the comparison legitimate. Several commenters suggested that we establish a schedule of fees. We plan to follow the practice of the Federal Trade Commission, which has published maximum billable rates for attorneys and guidelines for the computation of overhead and fringe benefit costs. These will be included in the pamphlet, discussed above, that our staff is now preparing for prospective applicants.

The proposed rule stated that the Board would not compensate applicants for work already performed or costs already incurred. The ACAP commenters and Senators Magnuson and Kennedy objected to this provision. In particular, ACAP recommended that the costs of preparing successful rulemaking petitions and applications for funding be compensable. The two Senators focused on the cost of preparing petitions. These are as legitimately considered "costs of participation" as those of preparing written comments or presenting expert testimony. We believe, however, that the limited budget for this program can be more effectively applied to promoting participation in proceedings that have already begun. We also do not wish to encourage applicants to incur expenses in reliance on the possibility that they might be reimbursed. Therefore, the final rule limits compensation to prospective awards, as proposed.

PDR-50 also proposed that actual payments be made within 90 days after an approved applicant submits a completed, documented claim for its expenses. The ACAP commenters, stressing the cash flow problems that applicants are likely to have, asked that this period be reduced to 30 days. In case of disputed expenses, however, the staff may need more time to process claims. Therefore, the final rule sets a 45-day period, which should be long enough to cover all cases. We do expect, however, that most claims will be paid within 30 days, as these commenters have suggested.

This program is a one-year demonstration project. Our staff will prepare a detailed report on the results of the project toward the end of the year, in time for us to assess the value of the program and whether to continue it.

Since the procedures for filing answers to applications, docketing the communications of the Evaluation Committee, and our reviewing actions taken by the Committee under delegated authority are incidental to the administration of the program and create no additional burden, we find that notice of proposed rulemaking on them is unnecessary and not in the public interest. Since this program makes money available to eligible applicants and imposes requirements only as conditions on that availability, we also find that an immediate effective date is in the public interest.

This program requires individuals and organizations to prepare and submit certain information to the Evaluation Committee in order to apply. By publishing this final rule, we

DEC 5 1978 UMI

V 4 3 / 2 3 4 D E 5 7 8 UMI

have determined that this information is necessary in conducting the program and must be prepared and submitted. Accordingly, this application requirement, found in § 304.5, is adopted subject only to review by the General Accounting Office, pursuant to 44 U.S.C. 3512. This specific requirement will be effective immediately along with the rest of Part 304. Interested persons are not precluded from applying for these funds immediately. However, GAO will conduct its clearance review to ensure that a minimum burden is imposed upon applicants and that the information required is otherwise consistent with the Federal Reports Act. We will publish a notice of GAO's decision.

O'MELIA, MEMBER, CONCURRING AND DISSENTING

When the Board issued its Notice of Proposed Rulemaking in March, 1978 on a program to fund public participation in CAB proceedings, I issued an attached separate statement expressing legal and policy reservations to the proposed program. My legal concern was that the Board, having neither explicit nor implied statutory authority to dispense funds for compensating participants, should await explicit authorization and a clear Congressional endorsement of such a program for this agency before adopting cumbersome procedural regulations to implement it. I remain convinced, after considering the comments filed in this rulemaking, that the legal constraints I outlined in my separate statement are valid and should be observed by Federal agencies. Although, as reported in the Supplementary Information section of this Final Rule, the comments received presented arguments for and against a public funding program, the comments that addressed the legal aspect overwhelmingly took the position that statutory authorization for the Board to sponsor such a program was lacking.

Despite this, I noted in my statement that if Congress were to approve funds to the Board for this purpose in the context of an appropriation bill, that would largely moot, if not remedy, the legal deficiency. Since the Conference Committee has, in the interim, appropriated funds to the Board for a one-year demonstration project for this purpose, I will not restate here my legal considerations. I would only observe, that in the long-debated and recently-enacted *Airline Deregulation Act of 1978*, Congress did not see fit to reassure the Board that it was being granted this authority. The appropriation of funds may indeed have been an aberration.

Aberration or not, since Congress has in fact allocated $150,000 for this project, I concur in the adoption of this new part 304 so that the administrative feasibility of this notion can be tested. I dissent because I question the desirability of a high-level in-house Evaluation Committee to select the public participants for this experiment. I am not convinced that a program of disbursing public money in the circumstances of this agency and of the air transport industry is useful or desirable. We compound the detriment of this program by adopting this method of selecting the participants to be funded.

Nonetheless, since this is supposedly a one-year project, with presumably a chance to review the results toward the end of this period, we will have an opportunity to evaluate the results of public funding and also the effectiveness and aptness of the mechanism for doling out the money. In keeping with my policy reservations, I would urge that during this one-year experiment we keep in mind three very relevant questions to enable us to properly evaluate the success of the program: Is the public participation we are getting through this funding program supplying the Board with a point of view, an insight, the representation of a legitimate interest that would not have been presented in the absence of this program? Has this distinctive point of view contributed substantially to a full and fair determination of the proceeding? Has the selection of the impecunious participants been conducted fairly and without bias by the Evaluation Committee. Since this Committee is to be composed of the Managing Director, the Director of the Office of Economic Analysis, and the General Counsel, it is important for the Board to avoid the inference that might be drawn that this well-entrenched trio is merely seeking advertently or subconsciously to shore up the Board's predetermined policy with compatible testimony.

I realize that it may seem harsh to ask this funding program to live up to the promise that participation by public interest groups and others, in the past allegedly impeded by financial insufficiency, will improve substantially the balance of views presented and enhance the decision-making process. But if we mean to be good stewards of public funds, these are the questions that we must ask ourselves. These questions should form the basis for our review at the end of the one-year experiment.

RICHARD J. O'MELIA

THE RULE

In light of the above, the Civil Aeronautics Board adds a new Part 304 to its Procedural Regulations (14 CFR Part 304), to read as follows:

Sec.
304.1 Scope.
304.2 Purpose.
304.3 Application.
304.4 Definitions.
304.5 Applications for compensation.
304.6 Answers to applications.
304.7 Processing of applications.
304.8 Eligibility and allocation criteria.
304.9 Delegation of authority.
304.10 Petitions for Board review.
304.11 Compensable costs and services.
304.12 Payments to participants.
304.13 Audits.

AUTHORITY: Secs. 203 and 204 of the Federal Aviation Act of 1958, as amended, 72 Stat. 742 and 743, 49 U.S.C. 1323 and 1324; Reorganization Plan No. 3 of 1961, 75 Stat. 837, 26 FR 5989, 49 U.S.C. 1324 (note).

§ 304.1 Scope.

This part establishes criteria and procedures for compensation to eligible participants in Civil Aeronautics Board proceedings. It does not, however, create any new right to intervene or otherwise participate in any proceeding.

§ 304.2 Purpose.

The purpose of this part is to assist the Board in making full and fair resolutions of the issues presented in its public proceedings by funding the representation of eligible interests that would otherwise be unrepresented.

§ 304.3 Application.

This part applies to all proceedings before the Board.

§ 304.4 Definitions.

(a) "Applicant" means any person who submits an application in accordance with § 304.5 for compensation under this part.

(b) "Evaluation Committee" or "Committee" means the committee established by § 304.7(a).

(c) "Person" means any person as defined in section 101(29) of the Federal Aviation Act of 1958 (49 U.S.C. 1301(29)) and includes a group of individuals with similar interests.

(d) "Proceeding" means any Board process (including adjudication, licensing, rulemaking, ratemaking, or any other Board process) in which there may be public participation pursuant to statute, rule, order, or Board practice.

§ 304.5 Applications for compensation.

(a) Any person may submit an application for compensation for participation in any Board proceeding. The application should be submitted as early as practicable.

(b) If the Board anticipates that compensated participation would be especially useful to it in a particular proceeding, it may invite applications for compensation. The invitation will include a closing date for the submission of applications and may include a closing date for answers. It will be published in the FEDERAL REGISTER and may also be publicized in any other media that appear appropriate. Applications submitted after the closing date will be considered only to the extent practicable.

(c) Applications for compensation will not be considered for work already performed or for costs already incurred.

(d) Applications shall be submitted to the Office of the Secretary, Civil Aeronautics Board, Washington, D.C. 20428, marked for the attention of the "Public Participation Evaluation Committee". Three copies are requested but not required.

(e) Applications shall contain the following information, in the order specified:

(1) The applicant's name and address, and in the case of an organization, the names, addresses, and titles of the members of its governing body and a description of the organization's general purposes, structure, and tax status;

(2) An identification of the proceeding for which funds are requested;

(3) A description of the applicant's economic, social, and other interests in the outcome of the proceeding;

(4) A discussion of the reasons why the applicant is an appropriate representative of those interests, including the expertise and experience of the applicant;

(5) A specific explanation of how the applicant's participation would enhance the quality of the decision making process and serve the public interest;

(6) A statement of the total amount of funds requested;

(7) With respect to the proceeding for which funds are requested, an itemized statement of the services and expenses to be covered by the requested funds;

(8) A description of the evidence, activities, studies, or other submissions that the applicant expects to generate;

(9) An explanation of why the applicant cannot use funds that it already has, or expects to receive, for the purpose for which funds are requested, including: (i) A listing of the applicant's anticipated income and expenditures (rounded to the nearest $100) during its current fiscal year, and

(ii) A listing of the total assets and liabilities of the applicant; and

(10) A list of all proceedings of the Federal govenment in which the applicant has participated during the past year (including the interest represented and the naure and extent of the contribution made) and any amount of financial assistance received from the Federal government in connection with those proceedings.

§ 304.6 Answers to applications.

(a) Any person may submit an answer to an application for compensation. Answers shall be submitted in the manner set forth in § 304.5(d) for applications.

(b) If the Board has announced a closing date for the submission of answers, any answers submitted after that date will be considered only to the extent practicable. Otherwise, all answers will be considered only to the extent practicable.

§ 304.7 Processing of applications.

(a) Applications will be processed by an Evaluation Committee composed of the Managing Director, the Director of the Office of Economic Analysis, and the General Counsel, or their respective delegates. Whenever a member of the Evaluation Committee is participating in the proceeding, he or she will not participate in the evaluation of applications for compensation for participation in that proceeding. The member will instead delegate the position on the Committee to a person who is not and will not become substantively involved.

(b) If the Board has invited applications for compensation in a particular proceeding and announced a closing date for answers, the Evaluation Committee will act on the applications as soon as practicable after that date. If the invitation does not include a closing date for answers, the Committee will act on the aplications as soon as practicable after the closing date for applications. If there has been no invitation, the Committee will act on an application as soon as practicable after it is received. In accordance with the criteria set out in § 304.8, the Committee will approve or disapprove the application, in whole or in part.

(c) The Evaluation Committee may communicate with Board staff members whose views appear relevant to the proceeding. Communication with staff members who are participants in a proceeding will be limited to that which is necessary for the Committee to ascertain whether the presentation of an applicant is likely to duplicate the presentation of the staff.

(d) The Evaluation Committee may communicate with staff members of other Federal agencies in whose proceedings an applicant has participated. These communications will be limited to discussion of the effectiveness of the applicant's contribution to a full and fair determination of the other agency's proceeding.

(e) The Evaluation Committee may communicate with applicants.

(f) The Evaluation Committee's determination whether to select any applicant who satisfies the criteria of § 304.8(a) is discretionary. In addition to those criteria, the Committee may consider—

(1) The importance of the applicant's proposed participation in light of the funding available for compensation under this part; and

(2) Whether the application is premature, in light of the stage that the proceeding has reached.

(g) A written decision of the Evaluation Committee will be mailed to each applicant for compensation in the proceeding. The decision will explain the reasons for the Committee's disposition of the application and the amount and computation of any compensation authorized.

(h) Copies of each application, answer, decision, and written communication in accordance with paragraph (c), (d), or (e) of this section will, upon receipt, be filed in the docket for the proceeding and in a "Compensation of Participants" file in the Public Reference Room. The Committee will similarly file a summary of any oral communication in accordance with those paragraphs, and mail a copy to the other party to the communication.

(i) The Committee may, for a good reason given by an applicant, reconsider the disapproval of all or part of an application.

(j) After the beginning of its participation, an applicant may request a supplemental authorization to enable it to complete its work. The committee may approve the request if the applicant shows that, because of an unforeseeable change in circumstances, it or the Committee seriously underestimated the probable costs of participation. Such requests will not be approved for work already performed or for costs already incurred.

(k) The Evaluation Committee may ask the Board or the relevant Board employee, as appropriate, to extend any filing period for all parties or postpone any hearing, in order to afford applicants adequate time to prepare their presentations. The committee, in deciding whether to make such a request, and the Board or Board employee, in considering whether to agree to it, shall balance the Board's need to give time to applicants against the need for a speedy resolution of the proceeding.

§ 304.8 Eligibility and allocation criteria.

(a) The Evaluation Committee may approve an application, in whole or in part, only if it finds that:

(1) The applicant represents an interest whose representation can reasonably be expected to contribute substantially to a full and fair determination of the proceeding, in light of the number and complexity of the issues presented, the importance of public participation, and the need for representation of a fair balance of interests;

V 4 3 / 2 3 4 D E 5 7 8 UMI

(2) Participation by the applicant is reasonably necessary to represent that interest adequately;

(3) It is reasonably probable that the applicant can competently represent the interests it espouses within the time available for the proceeding;

(4) The applicant does not have available, and cannot reasonably obtain in other ways, enough money to participate effectively in the proceeding without compensation under this part; and

(5) The applicant's ecomonic interest in the outcome of the proceeding is small in comparison with the burden of effective participation, except that if the applicant is a group or organization, the committee need only find that the economic interest of a substantial majority of its individual members is small in comparison with the burden of effective participation.

(b) In determining whether an applicant would be unable to participate effectively without compensation, the committee will require the applicant to demonstrate that its current assests (cash, accounts receivable, and marketable securities that are not in reserves, budgeted for other use, or otherwise restricted for withdrawal) less current liabilities, adjusted by any anticipated operating loss or profit over the relevant year, are less than the amount needed for participation. Salaries paid to employees of an applicant in excess of salaries paid to Board employees for comparable services will be disallowed in this computation.

(c) The committee may waive the "small economic interest" requirement of paragraph (a)(5) of this section if it finds that the applicant's participation in the proceeding would be exceptionally important.

(d) If multiple applications that satisfy the criteria of paragraph (a) of this section seek to represent the same or similar interest, but contain significant differences in viewpoint, approach, or proposals, the Evaluation Committee may partially or completely approve one or more of these applications.

(e) In selecting among applications representing the same or similar interests, the Evaluation Committee will consider and compare the applicants' skills and experience and the contents of their proposals. In particular, the committee will consider and compare:

(1) The applicants' experience and expertise in Civil Aeronautics Board matters generally and in the substance of the proceeding particularly;

(2) The applicants' prior general performance and competence;

(3) Evidence of the applicants' relations to the interest they seek to represent;

(4) The specificity, novelty, relevance, and significance of the matters the applicants propose to develop and present; and

(5) The public interest in promoting new sources of public participation.

§ 304.9 Delegation of authority.

The Board delegates to the Evaluation Committee the authority to process, approve, and disapprove applications for compensation as set forth in this part.

§ 304.10 Petitions for Board review.

(a) A person whose application for compensation has been disapproved by the Evaluation Committee, in whole or in part, may petition the Board for review of the committee's decision within 10 days after that decision.

(b) Petitions for review shall be submitted to the Office of the Secretary, Civil Aeronautics Board, Washington, D.C. 20428. They shall be prominently labeled "Petition for Review of a Compensation Denial". Three copies are requested but not required.

(c) Petitions for review shall present the petitioner's arguments as to why the committee's decision is wrong. If a petition includes any new facts, arguments, or other matter, it shall explain why the new matter was not submitted to the committee.

(d) Any person may submit an answer to a petition for review. Answers shall be prominently marked "Answer to Petition for Review of a Compensation Denial" and submitted in the manner set for in paragraph (b) of this section for petitions for review. The Board will consider answers only to the extent practicable.

(e) Petitions for review and answers will be placed in the relevant docket and in the "Compensation of Participants" file in the Public Reference Room.

(f) The Board, in its descretion, may affirm, modify, or reverse the Committee's decision, or decline to review that decision.

(g) The submission of a petition for review under this section will not stay the proceeding in which the petitioner has applied for compensation.

§ 304.11 Compensable costs and services.

(a) The following costs and services are compensable under this part:

(1) Salaries or other remuneration for services performed by participants or their employees;

(2) Fees for consultants, experts, contractual services, and attorneys;

(3) Transportation costs;

(4) Travel-related costs such as lodging, meals, and telephone calls; and

(5) All other costs reasonably incurred.

(b) Compensation is limited to reasonable services and costs of participation that have been authorized and actually incurred. In no case, however, will compensation be greater than salaries paid by the Board for comparable services or the amounts normally paid by the Board for comparable goods.

§ 304.12 Payments to participants.

Payment of compensable expenses for approved applications will be made by the Board within 45 days after the applicant has submitted a completed claim, including bills, receipts, or other proof of costs incurred or services performed. For good cause shown, partial payments may be made as an applicant's work progresses.

§ 304.13 Audits.

The Board and the General Accounting Office shall have access for the purposes of audit to any pertinent records of a participant receiving compensation under this part. The Board may by order establish additional guidelines for accounting, recordkeeping, and other procedures to be followed by participants.

By the Civil Aeronautics Board:

PHYLLIS T. KAYLOR,
Secretary.

[Reg. OR-135; Amdt. No. 73 of Part 385; Docket 29880]

PART 385—DELEGATIONS AND REVIEW OF ACTION UNDER DELEGATION; NONHEARING MATTERS

Applicability of Part

AGENCY: Civil Aeronautics Board.

ACTION: Final rule.

SUMMARY: In PR-181, also issued today, the Board set up a program of payments to eligible participants in its proceedings. The delegation of authority to the Evaluation Committee that will administer the program appears in Part 304, the regulation that governs the new program. The Board is therefore amending Part 385 to exclude this particular delegation from its coverage.

DATES: Adopted: October 26, 1978. Effective: November 28, 1978.

FOR FURTHER INFORMATION CONTACT:

Mark Schwimmer, Office of the General Counsel, Civil Aeronautics Board, 1825 Connecticut Avenue NW., Washington, D.C. 20428, 202-673-5442.

SUPPLEMENTARY INFORMATION: Since this amendment is administrative in nature, affecting a rule of agency practice and procedure, the Board finds that notice and public procedure are unnecessary and the amendment may be effective immediately.

Accordingly, the Civil Aeronautics Board amends Part 385 of its Organization Regulations, *Delegations and Review of Action under Delegation; Nonhearing Matters* (*14 CFR Part 385*) *as follows:*

A sentence is added at the end of § 385.2, so that it reads:

§ 385.2 Applicability.

This part describes the organization of the Board insofar as, pursuant to authority conferred on it by sections 202(a) and 204(a) of the Federal Aviation Act and Reorganization Plan No. 3 of 1961, 26 FR 5989, the Board has adopted rules which grant continuing delegations of authority with respect to any of its functions of making orders or other determinations which are not required to be made on an evidentiary record upon notice and hearing or which are not the subject of contest, and the Chairman has assigned Board personnel to perform such functions. This part also sets forth the procedures governing discretionary review by the Board of action taken under such delegation. Nothing in this part shall be construed as precluding the Board from issuing, by appropriate order, temporary delegations of authority with respect to any of its functions described in this part or with respect to any other of its functions which can be lawfully delegated. However, this part does not apply to the delegation of authority, set forth in § 304.9 of this title, to the Evaluation Committee established in § 304.7(a) of this title.

(Secs. 203 and 204 of the Federal Aviation Act of 1958, 72 Stat. 742, 743, 49 U.S.C. 1323; Reorganization Plan No. 3 of 1961, 75 Stat. 837, 26 FR 5989, 49 U.S.C. 1324 (note).)

By the Civil Aeronautics Board:

PHYLLIS T. KAYLOR,
Secretary.

Title 17—Commodity and Securities Exchanges

CHAPTER I—COMMODITY FUTURES TRADING COMMISSION

PART 31—LEVERAGE TRANSACTIONS

Temporary Moratorium Regarding Gold and Silver Leverage Transactions

AGENCY: Commodity Futures Trading Commission.

ACTION: Final rule.

SUMMARY: The Commodity Futures Trading Commission has adopted a rule imposing a temporary moratorium on persons entering the business of offering and selling to the public standardized contracts for the delivery of silver bullion, gold bullion, bulk silver coins or bulk gold coins which are commonly known to the trade as margin accounts, margin contracts, leverage accounts or leverage contracts, or any contracts, accounts, agreements, schemes or devices that serve the same function or functions as such standardized contracts or that are marketed or managed in substantially the same manner as such standardized contracts. (These contracts are hereinafter collectively referred to as "leverage transactions"). The moratorium will remain in effect only until such time as the Commission determines whether leverage transactions, or any class thereof, are contracts for future delivery within the meaning of the Commodity Exchange Act and should be regulated accordingly, or are not contracts for future delivery and the Commission adopts appropriate registration, financial, recordkeeping, disclosure or other regulations as necessary in order to provide adequate customer protection.

The moratorium rule does not affect firms engaged in a leverage transaction business on June 1, 1978. In addition, the rule provides that the Commission may, in its discretion, grant applications for exemption from the moratorium to any person who is able to demonstrate (1) that he had invested substantial resources in the development of a leverage transaction business prior to June 1, 1978, (2) that his business will be conducted in a manner that may reasonably be expected to insure the financial solvency of the transactions to be offered and to prevent manipulation or fraud and (3) that the manner in which the business will be conducted will present no substantial risk to the public and will otherwise be consistent with the public interest.

EFFECTIVE DATE OF RULE: January 4, 1979.

FOR FURTHER INFORMATION CONTACT:

David R. Merrill, Office of the General Counsel, 2033 K Strect N.W., Washington, D.C. 20581. Telephone: 202-254-9880.

SUPPLEMENTARY INFORMATION: On June 1, 1978, the Commission published a proposed rule imposing a temporary moratorium on the entry into the business of publicly offering and selling leverage transactions. 43 FR 23729. As proposed, the moratorium would be in effect only until such time as the Commission determines whether leverage transactions, or any class thereof, should be regulated as contracts for future delivery within the meaning of the Commodity Exchange Act, or, if not, what regulatory approach is required to insure the financial solvency of these transactions and to prevent fraud and manipulation in these transactions. Interested persons were afforded a thirty-day opportunity in which to submit written comments on the rule.

In the notice of proposed rulemaking, the Commission noted its jurisdiction and regulatory authority over leverage transactions under Section 2(a)(1) of the Commodity Exchange Act, as amended, and Section 217 of the Commodity Futures Trading Commission Act of 1974, 7 U.S.C. 2 and 15a (1976). The Commission's authority to regulate leverage transactions described in Section 217 of the 1974 Act has now been expanded and incorporated into the Commodity Exchange Act by the enactment, on September 30, 1978, of the Futures Trading Act of 1978, Pub. L. No. 95-405, 92 Stat. 865. Section 23 of the 1978 Act [1] added a new Section 19 to the Commodity Exchange Act which, among other things, broadened the description of a leverage transaction to include not only a standardized contract commonly known to the trade as a margin account, margin contract, leverage account or leverage contract, but also "any contract, account, arrangement, scheme, or device that the Commission determines serves the same function or functions as such a standardized contract, or is marketed or managed in substantially the same manner as such a standardized contract." [2]

[1] Pub. L. No. 95-405, 92 Stat. 870-871.

[2] Section 19 provides in pertinent part:

"No person shall offer to enter into, enter into, or confirm the execution of any transaction for the delivery of silver bullion, gold bullion, or bulk silver coins or bulk gold coins, under a standardized contract described (previously) in • • • this section, contrary to any rule, regulation, or order of the Commission designed to ensure the financial solvency of the transaction or prevent manipulation or fraud • • •."

The Commission's authority under Section 19 encompasses:

"a standardized contract commonly known to the trade as a margin account, margin contract, leverage account, or leverage contract, or • • • any contract, account, arrangement, scheme, or device that the Commission determines serves the same function or functions as such a standardized contract, or is marketed or managed in substantially the same manner as such a standardized contract."

Additionally, Section 19(d) continues the Commission's authority, previously set forth in Section 217 of the 1974 Act, to determine to regulate leverage transactions as contracts for future delivery:

"If the Commission determines that any (leverage) transaction • • • is a contract for

Footnotes continued on next page

V 4 3 / 2 3 4 D E 5 7 8 UMI

The notice proposing the moratorium rule also summarized the Commission's regulatory and investigatory experience concerning the offer and sale of leverage transactions in the United States. That summary focused on the Commission's April 1978, in-depth survey of firms then known to be marketing leverage transactions.[3] The survey, a summary of which was set forth in the Commission's notice of proposed rulemaking at 43 FR 23730,[4] revealed, among other things, that (1) outstanding leverage transactions at that time accounted for at least $100 million in open customer interest; (2) while the principal characteristics of a leverage transaction appear to be similar, if not identical, to those of contracts for future delivery, many of the advantages of trading futures on exchanges are not present in leverage transaction trading; (3) leverage customers appear to be inadequately protected, and are totally dependent upon the financial integrity of the leverage transaction dealer for fulfillment of the leverage transaction and for making any buy-sell market for offsetting transactions;[5] (4) leverage market prices and trade information are not widely disseminated; and (5) at least eleven leverage transaction firms experienced financial failure since 1973.

Three written comments on the proposed rule were received, one of which expressed opposition to the moratorium, but provided no meaningful criticism with regard to the Commission's proposal. The other two comments, submitted on behalf of firms engaged in the leverage transaction business, opposed the moratorium concept and suggested that the Commission immediately promulgate a comprehensive regulatory structure to govern the offer and sale of leverage transactions which would include, among other things, registration, net working capital, segregation of customers' funds, disclosure and recordkeeping requirements. While the Commission may ultimately determine that this would be an appropriate regulatory approach, it would be premised on the Commission first concluding that leverage transactions are not contracts for future delivery within the meaning of the Commodity Exchange Act, a conclusion that the Commission has not yet made.

In any event, regardless of the form of regulation the Commission may ultimately decide to adopt concerning leverage transactions, some time will be needed to reach and implement that decision.[6] In the interim, on the basis of the information it now possesses concerning leverage transactions and consistent with the basic policies underlying the Commodity Exchange Act, the Commission believes that the imposition of a moratorium pending the adoption and implementation of a permanent regulatory scheme is necessary to protect the public.

Both of the comments submitted on behalf of leverage transaction firms expressed the view that the proposed rule would be anticompetitive since it would limit the offer and sale of leverage transactions to those firms engaged in a leverage transaction business on the operative date of the moratorium. For this reason, they claimed that its adoption would be inconsistent with Section 15 of the Commodity Exchange Act, 7 U.S.C. 19 (1976). In proposing and in adopting the moratorium, the Commission has taken into account its responsibility under Section 15 of the Act.[7] Section 15 does not require the Commission to subordinate the policies and purposes of the Commodity Exchange Act to those of the antitrust laws. Thus, consistent with Section 15, the Commission may adopt regulations that may have anticompetitive implications, and is not required to take the least anticompetitive course of action where the objectives, policies or purposes of the Commodity Exchange Act would be better served in some other way.

The Commission recognizes that the moratorium may inhibit competition by permitting some firms to continue to market leverage transactions while preventing others from doing so for the present time. However, the moratorium is an interim measure designed to halt the recent growth of firms entering the leverage transaction field only until an appropriate regulatory scheme to assure adequate customer safeguards is implemented.

Since publication of the proposed moratorium rule, the Commission has continued to monitor closely the offer and sale of leverage transactions in the United States. Once again, as was the case with the offer and sale of commodity options in this country in the recent past, the Commission is witnessing an explosive growth in the marketing of a commodity instrument in an area which has yet to be brought under a system of comprehensive regulatory control.[8] Leverage transactions, like commodity options, are esoteric instruments the intricacies of which are difficult to comprehend by most members of the public. As with options, leverage transactions require a substantial initial investment by the customer, a large percentage of which often goes immediately to the leverage dealer in the form of commissions, mark-ups or other costs or fees. The lack of general understanding of leverage transactions coupled with the lure of large potential profits to be made, make these transactions highly susceptible to overreaching. For these reasons there exists a significant possibility that increased marketing of leverage transactions poses increasing and substantial risks of financial injury to members of the public. Under these circumstances, the Commission will not stand idly by and permit this potential for public injury to realized by the unfettered entry of firms into the leverage field in the absence of appropriate regulatory controls.

Wholly apart from the foregoing considerations, the Commission's experience with leverage transactions has revealed that a number of the principals of the firms and other individuals recently commencing the offer and sale of leverage transactions, as well as the salespersons they employ, were previously engaged in the sale of commodity options, an activity which the Commission found to be pervaded by fraudulent sales techniques, and that the entry of many of these persons into the leverage transaction field coincided with the June 1, 1978, effective date of the Commission's suspension of the offer and sale of commodity options in the United States (Rule 32.11; 43 FR 16161 (April 17, 1978)).[9]

Accordingly, the Commission has concluded that, at this time, adequate public protection can only be guaranteed by a moratorium on the entry into the gold and silver leverage transaction field. In this way, the Commission will be able to limit temporarily what would otherwise be an uncontrolled growth in the number of firms involved in the offer and sale of leverage-type transactions, thereby affording itself an opportunity to evaluate this area of activity, and to adopt and implement an appropriate regulatory program.

The Commission fully appreciates that there may be some individuals or firms who may have been planning to establish a leverage transaction business after June 1, 1978, and who may now be temporarily prohibited from doing so. The Commission is also aware that some persons may have established leverage contract businesses subsequent to June 1, 1978, who now will be required temporarily to curtail further leverage contract sales activities.[10] However, these individuals or firms have proceeded at their own risk in the face of the Commission's publication of the proposed moratorium rule on June 1, 1978. And, to minimize any adverse effects of the moratorium on persons who had made a substantial investment to develop a leverage transaction business, but had not commenced that business by June 1, 1978, the moratorium rule establishes a procedure whereby such persons may make a written request for an exemption from the moratorium. In any event, in balancing the adverse consequences that may be involved, the Commission has determined that the private interests of all these persons must yield to the public interest and the protection of the public.

Accordingly, the Commission has adopted the moratorium rule in a form substantially similar to that proposed. In addition to making several clarifying changes in language, the Commission has determined to modify the proposed rule in three respects. First, the date on which a firm must be engaged in a leverage transaction business in order to be unaffected by the moratorium has been changed from May 23, 1978, to June 1, 1978, the date of publication in the FEDERAL REGISTER of the proposed moratorium rule.

Second, the rule has been amended to make clear that only those firms that were engaged in the offer and sale of leverage transactions *in the United States* on June 1, 1978, will be exempt from the moratorium. Thus, for example, a leverage transaction firm which was organized and was operating in the United States on June 1, but which had only marketed leverage transactions outside the United States prior to that date, will be precluded during the moratorium from marketing leverage transactions in the United States.

Third, the rule has been modified to conform to the provisions of Section 19 of the Futures Trading Act of 1978.[11] The rule thus makes clear that the moratorium will apply not only to transactions commonly known to the trade as leverage-type transactions but also to transactions that serve the same function or functions as these leverage-type transactions or which are marketed or managed in substantially the same manner.

On the subject of requests for exemption from the moratorium which may be submitted to the Commission pursuant to paragraph (b) of the rule, such requests must be in writing and should set forth complete and specific details concerning the basis upon which the exemption is requested. The Commission wishes to make clear that it has no intention of expending its limited resources on a myriad of exemptive requests which are not meritorious and, therefore, that it will not entertain frivolous or undocumented requests for exemption. Exemptions will be granted only if the Commission finds, in its discretion, that the criteria set forth in paragraph (b) of the rule have been satisfied.

In consideration of the foregoing, Chapter I of Title 17 of the Code of Federal Regulations is hereby amended by adding a new Part 31 as follows:

PART 31—LEVERAGE TRANSACTIONS

§ 31.1 Temporary moratorium on the offer and sale of certain transactions for the delivery of gold or silver bullion or bulk coins.

(a) Until the Commission by rule, regulation or order determines otherwise, it shall be unlawful for any person, by use of the mails or any means or instrumentality of interstate commerce, to engage in the business of offering to enter into, entering into or confirming the execution of, any transaction for the delivery of silver bullion, gold bullion, bulk silver coins or bulk gold coins in the United States under a standardized contract commonly known to the trade as a margin account, margin contract, leverage account or leverage contract, or under any contract, account, agreement, scheme, or device that serves the same function or functions as such a standardized contract, or that is marketed or managed in substantially the same manner as such a standardized contract, who was not engaged in that business on June 1, 1978.

(b) The Commission may, in its discretion, grant an exemption from the provisions of paragraph (a) of this section to any person who can demonstrate to the Commission's satisfaction that (1) prior to June 1, 1978, the person had invested substantial resources to develop a business referred to in paragraph (a) of this section, (2) the business will be conducted in a manner that may reasonably be expected to insure the financial solvency of the contracts to be offered and sold and to prevent manipulation and fraud, and (3) the manner in which the business will be conducted will present no substantial risk to the public and will otherwise be consistent with the public interest.

(7 U.S.C. 2. 12a(5) (1976); as amended, Pub. L. No. 95-405, secs. 2 and 23, 92 Stat. 865, 876.)

Issued in Washington, D.C., on November 30, 1978.

GARY L. SEEVERS,
Vice Chairman, Commodity Futures Trading Commission.

Title 20—Employees' Benefits

CHAPTER II—RAILROAD RETIREMENT BOARD

RAILROAD RETIREMENT ACT AND RAILROAD UNEMPLOYMENT INSURANCE ACT

Miscellaneous Amendments; Final Rule

AGENCY: Railroad Retirement Board.

ACTION: Final rule.

SUMMARY: The Railroad Retirement Board amends Part 250, "Reports and

---

Footnotes continued from last page

future delivery within the meaning of this Act, such transaction shall be regulated in accordance with the applicable provisions of this Act."

[3] In April 1978 when the survey was conducted, the Commission was aware of only seven firms that were then actively engaged in selling leverage transactions in the United States. When the proposed moratorium rule was published on June 1, 1978, the number of firms that appeared to be selling leverage transactions had risen to approximately twenty. At the present time, the Commission has identified nearly eighty firms that may currently be engaged in marketing leverage transactions domestically.

[4] A summary of this survey was also made public by the Commission in an Advisory to the Media released on April 27, 1978. Because the survey itself contains information dealing with specific business transactions, it has not been made public. See Section 8 of the Commodity Exchange Act, 7 U.S.C. 12 (1976), as amended by Section 16 of the Futures Trading Act of 1978, Pub. L. No. 95-405, 92 Stat. 873-874.

[5] During recent Congressional debate on the bill which became the Futures Trading Act of 1978, several Members of Congress likewise recognized the vulnerable position occupied by the typical leverage transaction customer. *E.g.*, 124 *Cong. Rec.* S10536-S10537 (daily ed. July 12, 1978) (remarks of Senator Huddleston); 124 *Cong. Rec.* S10564 (daily ed. July 12, 1978) (remarks of Senator Eagleton).

[6] Should the Commission determine that any leverage transactions are, in fact, contracts for future delivery, it may be necessary for Congressional hearings to be held before the Commission may implement such a determination. *See* S. Rept. No. 1239, 95th Cong., 2d Sess. 28 (1978).

[7] Under Section 15, the Commission is required, in adopting any rule or regulation, to—

"take into consideration the public interest to be protected by the antitrust laws and endeavor to take the least anticompetitive means of achieving the objectives of • • • [the] Act, as well as the policies and purposes of • • • [the] Act • • •."

[8] See note 3, *supra*.

[9] In a number of instances, these former option dealers are operating leverage businesses in the same business offices from which options were previously sold and appear to be employing the same or similar "boiler room" techniques used to sell options including high pressure, cold canvass telephone solicitations, failure adequately to disclose risks, misrepresentations, etc.

[10] Of course, the temporary moratorium does not in any way relieve individuals or firms who have established leverage businesses after June 1 of the obligations owing to customers arising out of leverage contracts sold since that date but prior to the effective date of the moratorium. In this regard, the Commission will consider a failure by such individuals or firms to discharge these obligations as constituting, among other things, a violation of the Commission's leverage contract antifraud rule, 17 CFR 30.03 (1977), statutory citations amended, 43 FR 47722 (October 17, 1978).

[11] See note 2, *supra*.

ing mail to each party at the address (e) The decision of the Board shall (c) The General Counsel shall, upon

V 4 3 / 2 3 4

Information To Be Filed by Employers" by deleting provisions relating to conduct of hearings and readopting them elsewhere in the regulations. It was determined this would result in the regulations being more easily understood.

Part 259 has been added to formalize the existing procedure followed in making determinations with respect to employer and employee status under the Railroad Retirement Act and the Railroad Unemployment Insurance Act. The procedures established provide for authority to make initial decisions and for the review and appeal of those decisions.

Part 260 has been amended to provide a procedure to be followed with respect to determinations concerning erroneous payments and the recovery or waiver of recovery of such payments. Part 260 has also been amended to make certain changes in the procedures followed by the Board's appeals referees in the handling of appeals from initial decisions.

EFFECTIVE DATE: November 14, 1978.

FOR FURTHER INFORMATION CONTACT:

R. F. Butler, Secretary, Railroad Retirement Board, 844 Rush Street, Chicago, Illinois 60611, 312-751-4920.

In accordance with the Board's procedure as established to implement Executive Order 12044, Improving Government Regulations, the Chief Executive Officer of the Railroad Retirement Board has determined that the regulations contained in Parts 258, 259 and 260, as adopted by the Board, do not constitute "significant" regulations within the criteria established by the Board.

The title of Part 250 has been changed; §§ 250.7 through 250.16 of Part 250 have been deleted; new Parts 258 and 259 have been added, and Part 260 has been revised in its entirety as follows:

PART 250—REPORTS AND INFORMATION TO BE FILED BY EMPLOYERS

. . . . . .

§§ 250.7 through 250.16 [Deleted]

PART 258—HEARINGS BEFORE THE BOARD OR DESIGNATED EXAMINERS

Sec.
258.1 Hearings.
258.2 Witnesses.
258.3 Application for witnesses.
258.4 Service of subpoenas.
258.5 Exhibits.
258.6 Procedure when examiner appointed.
258.7 Board decisions and opinions and dissenting opinions.

AUTHORITY: Sec. 10, 50 Stat. 314, as amended; 45 U.S.C. 228j, unless otherwise noted.

§ 258.1 Hearings.

(a) To such extent as may be necessary to determine (1) the employee status of any individual or group of individuals, (2) the employer status of any person, and (3) any other matter arising out of or necessary for the administration of the Railroad Unemployment Insurance Act and the Railroad Retirement Acts of 1935, 1937, and 1974, other than those matters specifically provided for in Parts 260 and 320 of this chapter, the Board may itself or through one of its members or a designated examiner, conduct hearings, require and compel the attendance of witnesses and the production of records and documents, administer oaths, take testimony, make all pertinent investigations and findings of fact, and render decisions upon such findings.

(b) Where the Board determines that an oral hearing is necessary to the determination of a matter before it, the Board shall notify all parties to the proceeding that a hearing will be conducted, and, if the hearing is to be before a single Board member or a designated examiner, the notice shall identify the member or examiner authorized to conduct the hearing. The Board or the person authorized to conduct the hearing shall fix a time and place for the holding of the hearing and shall notify all parties thereof.

§ 258.2 Witnesses.

(a) In any hearing held pursuant to the provisions of this part, witnesses may be compelled to appear, give testimony, and produce records and documents.

(b) Designation by the Board of any person as an examiner to preside at and conduct such hearings shall constitute a delegation of authority to such examiner to require and compel the attendance of witnesses and the production of records and documents, to administer oaths, and to take testimony.

§ 258.3 Application for witnesses.

(a) Any person or persons conducting a hearing pursuant to the provisions of this Part or Part 260 of this chapter may, upon such person's or persons' own motion or upon application of any party to such hearing, issue a subpoena for a witness or witnesses. An application for a subpoena shall be by affidavit filed with the person or persons conducting the hearing within such period of time as will permit service and return of a subpoena prior to the date set for the hearing at which the witness is to appear, but in no case shall such application be filed later than 10 days prior to the date of hearing. The application shall set forth:

(1) The name and address of the witness;

(2) The title of the matter to be heard, i.e., names of parties;

(3) The issue to which the testimony of the witness will be directed;

(4) The substance of the testimony which such witness is expected to give or the facts to which such witness will testify; and

(5) The specific books, papers or documents which are requested, if a subpoena duces tecum is applied for.

(b) In addition to the above, the party filing such application shall, at the time of filing, deposit therewith a sum of money sufficient to cover the fees and transportation allowance of the witness, or, in lieu thereof, shall state in the application that satisfactory arrangements have been made with the witness for the direct payment of his or her fees and transportation allowance and any other allowable expense.

§ 258.4 Service of subpoenas.

Service of subpoenas issued under § 258.3 may be made by any individual designated by the Board. Such individual shall deliver a copy of the subpoena to the person or persons named therein, and shall at that time tender to that person or persons the fees for one day's attendance and the transportation allowance authorized by law; *Provided, however,* That if the witness or witnesses be summoned to appear upon motion of the person or persons designated to conduct the hearing, no fees or transportation allowance need be tendered. Fees and transportation allowances shall be in the same amount as is allowed to witnesses in the courts of the United States. The person serving the subpoena shall make certification of the manner and time of service on the original subpoena and shall file such original subpoena with the person or persons by whom it was issued.

§ 258.5 Exhibits.

Copies of all exhibits admitted in evidence at any hearing held pursuant to the provisions of this Part shall be furnished by the party offering the same to all other parties participating in the proceedings.

§ 258.6 Procedure when examiner appointed.

(a) Where an examiner has been designated by the Board under this Part to conduct a hearing with respect to a matter before it, the examiner shall preside at the hearing and shall cause all testimony to be recorded. The examiner shall, as soon as practicable following the conclusion of the hearing, mail to each party at the address stated in his or her appearance a free transcript of the record of the proceedings had before the examiner. Thereafter, the examiner shall give all parties participating in the hearing the opportunity to present argument upon both law and facts. Upon conclusion of the proceedings before him or her, the examiner shall prepare a report which, together with the record of the proceedings before him or her, shall be submitted to the Board. The report shall set forth the examiner's findings of fact, conclusions of law, and recommendations as to decision. The report may also contain such discussion of the question raised, both legal and factual, as the examiner may desire to present to the Board. A copy of the examiner's report shall be served by the examiner upon each party participating in the hearing by mailing such copy to each such party at the address stated in his or her appearance. Each party shall, within 30 days after the date of mailing to him or her of the examiner's report, file with the Board and serve upon other parties by mailing to their addresses as stated in their appearances such exceptions in writing as he or she desires to make to the examiner's findings of fact and conclusions of law. Each exception shall specifically designate the particular findings of fact or conclusions of law to which objection is taken, and shall set forth in detail the grounds for the objection. General exceptions and exceptions not specifically directed to particular findings of fact or conclusions of law will not be considered by the Board. Exceptions to findings of fact shall make specific reference by page numbers to those portions of the record upon which reliance is placed.

(b) Each party shall have 10 days after receipt of exceptions taken by other parties in which to file with the Board replies to those exceptions. Replies to exceptions to findings of fact shall make specific reference by page number to those portions of the record upon which reliance is placed.

(c) The Board may, upon the application of a party and for cause shown, extend the time for filing and serving of exceptions or filing of replies thereto. The Board will render its decision upon the record, the examiner's report, and such exceptions and replies thereto as are made.

(d) The examiner's report shall be advisory only and the Board may, in any case, exercise its right to reject or adopt the examiner's report in whole or in part or adopt such report with modifications. Findings of fact to which no exceptions are taken will, subject only to the power of the Board upon its own consideration to reject or modify, be presumed to be correct.

(e) The decision of the Board shall be communicated to the parties participating in the hearing within 30 days of the date upon which the decision of the Board is entered upon its records.

§ 258.7 Board decisions and opinions and dissenting opinions.

The following shall apply to all decisions of the Board except decisions relating to matters of internal administration:

A decision made by at least two members of the Board shall constitute the decision of the Board. The decision of the Board shall be stated in a written opinion filed in the record of the proceedings. A dissenting opinion may be stated by a member of the Board who disagrees with the decision of the Board and any such dissenting opinion shall also be filed in the record of the proceedings.

PART 259—INITIAL DETERMINATIONS AND APPEALS FROM INITIAL DETERMINATIONS WITH RESPECT TO EMPLOYER STATUS AND EMPLOYEE STATUS

Sec.
259.1 Initial determinations with respect to employer and employee status.
259.2 Parties to determinations with respect to employer and employee status.
259.3 Reconsideration of initial determinations with respect to employee or employer status.
259.4 Authority of General Counsel to conduct investigations.
259.5 Appeals to the Board from determinations made by the General Counsel on reconsideration.
259.6 Appeals from decisions of the Board.
259.7 Finality of determinations issued under this part.

AUTHORITY: Sec. 10, 50 Stat. 314, as amended; 45 U.S.C. 228j, unless otherwise noted.

§ 259.1 Initial determinations with respect to employer and employee status.

(a) The General Counsel of the Railroad Retirement Board shall make initial determinations with respect to: (1) The status of any person as an employer under the Railroad Retirement Act and the Railroad Unemployment Insurance Act and the rules and regulations issued thereunder; and (2) the status of any individual or group of individuals as an employee or employees of an employer covered under the Railroad Retirement Act and the Railroad Unemployment Insurance Act.

(b) The authority conferred by paragraph (a)(2) of this section shall not apply with respect to determinations of employee status where such issue arises in connection with an application for benefits filed by the employee.

(c) The General Counsel shall, upon the rendition of a determination under this section, promptly notify the party or parties thereto of the determination.

§ 259.2 Parties to determinations with respect to employer and employee status.

(a) With respect to any determination under this Part concerning the status of a person as an employer under the Railroad Retirement Act and the Railroad Unemployment Insurance Act, that person shall be a party to such determination and may submit written briefs or argument, as well as any documentary evidence pertinent to the matter at issue, to the decision maker to be considered in the rendition of a determination. The employees of such person may submit written briefs or argument with respect to such determination, but shall not be parties thereto.

(b) With respect to any determination under this part concerning the status of an individual or group of individuals as an employee or employees of an employer covered by the Railroad Retirement Act and the Railroad Unemployment Insurance Act, the employer alleged to be the employer of the individual or group of individuals and the individual or group of individuals shall each be considered a party to such determination and may submit written briefs or argument, and documentary evidence pertinent to the matter at issue, to the decision maker to be considered in the rendition of a determination.

§ 259.3 Reconsideration of initial determinations with respect to employee or employer status.

A party to an initial decision issued under § 259.1 shall have the right to request that the General Counsel reconsider the initial determination. A request for reconsideration shall be in writing and must be filed with the General Counsel within one year following the date on which the General Counsel issued the initial determination. Where a request for reconsideration has been timely filed with the General Counsel, the General Counsel shall notify all other parties to the initial determination of such request. The party who requested reconsideration and any other party shall have the right to submit briefs or written argument, as well as any documentary evidence pertinent to the issue under consideration. The General Counsel shall promptly notify all parties of the determination issued upon reconsideration.

§ 259.4 Authority of General Counsel to conduct investigations.

In rendering a determination under § 259.1 or § 259.3, the General Counsel

D E 5 7 8 UMI

V 4 3 / 2 3 4

shall have the authority and the power to conduct any investigations he deems necessary. In addition, the General Counsel shall have the power to compel, by subpoena, any person, company, corporation, or other entity to produce any records or other documents pertinent to the matter under consideration.

§ 259.5 Appeals to the Board from determinations made by the General Counsel on reconsideration.

(a) A party to a decision under § 259.3 shall have the right to appeal that determination to the Board. An appeal to the Board shall be in writing and must be filed with the Secretary of the Board within one year following the date of the General Counsel's decision on reconsideration.

(b) On appeal from a determination of the General Counsel with respect to employer or employee status, the Board shall have the authority to conduct any investigations it deems necessary, including the authority to conduct a hearing with respect to the matter before it, either itself or through a member or duly designated examiner, in accordance with the procedure set out in Part 258 of this chapter.

(c) Within 30 days following the date on which it issues a decision on appeal under this part, the Board shall notify the party or parties to the proceeding of its decision.

§ 259.6 Appeals from decisions of the Board.

A party who claims to be aggrieved by a decision of the Board under this Part may obtain review of such decision by filing a petition for review in the United States court of appeals for the circuit in which the party resides or has its principal place of business or principal executive office, in the United States Court of Appeals for the Seventh Circuit, or in the United States Court of Appeals for the District of Columbia. The petition for review must be filed within 90 days following the date on which the notice of the Board's decision was mailed to that party.

§ 259.7 Finality of determinations issued under this part.

Any determination rendered by the General Counsel at the initial and reconsideration stages, and any determination rendered by the Board at the appeal stage shall be considered a final determination and shall be binding with respect to all parties thereto unless a timely request has been made for reconsideration by the General Counsel, an appeal has been filed with the Board, or an appeal has been filed with the appropriate United States court of appeals, respectively. A final determination may be challenged at the request of a party who was or could have been a party to the final determination where the party alleges that the law or the facts upon which the final determination was based have changed sufficiently to warrant a contrary determination. Such a request shall be submitted to the Board's General Counsel, who shall consider such request as a request for an initial determination under § 259.1.

PART 260—APPEALS WITHIN THE BOARD FROM DECISIONS ISSUED BY THE BUREAU OF RETIREMENT CLAIMS AND THE BUREAU OF DATA PROCESSING AND ACCOUNTS

Sec.

260.1 Initial decisions by the Bureau of Retirement Claims.
260.2 Request for waiver of recovery of an erroneous paymnent and/or for reconsideration of the erroneous payment decision.
260.3 Initial decisions by the Bureau of Data Processing and Accounts.
260.4 Appeal from an initial decision of the Bureau of Retirement Claims or the Bureau of Data Processing and Accounts.
260.5 Pre-hearing case review.
260.6 Final appeal from a decision of the referee.
260.7 Determination of date of filing of appeal.

AUTHORITY: Sec. 10, 50 Stat. 314, as amended; 45 U.S.C. 228j, unless otherwise noted.

§ 260.1 Initial decisions by the Bureau of Retirement Claims.

(a) Claims shall be adjudicated and initial decisions made by the Bureau of Retirement Claims concerning:

(1) Applications for benefits under the Railroad Retirement Act;

(2) The withdrawal of an application;

(3) A change in an annuity beginning date;

(4) The termination of an annuity;

(5) The modification of the amount of an annuity or lump-sum benefit;

(6) The reinstatement of an annuity which had been terminated or modified;

(7) The existence of an erroneous payment;

(8) The recovery of the amount of an erroneous payment;

(9) The eligibility of an individual for a supplemental annuity or the amount of such supplemental annuity;

(10) Whether representative payment shall serve the best interests of an annuitant as a result of that individual's incapacity to manage his annuity payments; and

(11) Who shall be designated or continued as representative payee on behalf of an annuitant. Adjudication of a claim and the issuance of an initial decision shall be in accordance with instructions issued by the Director of the Bureau and shall be made upon the basis of evidence submitted by the claimant and evidence otherwise available.

(b) (1) A decision to recover the amount of an erroneous payment as authorized under paragraph (a)(8) of this section shall not be made, except with respect to the cases specified in paragraph (b)(2) of this section, prior to a date 30 calendar days after the date on which notice of the erroneous payment decision was sent to the beneficiary.

(2) The Director of Retirement Claims is authorized to commence recovery of the amount of an erroneous payment without regard to the restriction imposed under paragraph (b)(1) of this subsection in the following cases:

(i) Where recovery of the erroneous payment can be made by reducing the amount of an accrued retroactive benefit payable by the Board to the beneficiary; and

(ii) Where the erroneous payment can be recovered from one month's benefit, the amount of the erroneous payment is no greater than 20 percent of the beneficiary's known monthly income, and the beneficiary's combined monthly income from all known sources would, after the reduction in the railroad retirement benefit, be at least $300.00.

(c) Notice of an initial decision shall be communicated by the Bureau of Retirement Claims to the claimant in writing within 30 days after such decision is made. Such notice shall inform the claimant with respect to the reasons for the decision and of his or her right to appeal such initial determination.

(d) (1) Where an initial decision that an erroneous payment has been made to a beneficiary under paragraph (a)(7) of this section, the notice of decision shall, except with respect to those decisions enumerated in paragraph (d)(2) of this section, include in addition to the information required under paragraph (c) of this section, a statement notifying the beneficiary of the possibility of waiver of recovery of the erroneous payment and of the conditions which must be met before waiver of recovery could be granted. The notice shall state that the beneficiary may, within 30 calendar days from the date of the issuance of the notice, file with the Board a request for waiver of recovery of the erroneous payment and/or for reconsideration of the erroneous payment decision. The notice shall state that the beneficiary may, if he or she elects, be afforded the opportunity for an informal oral hearing on the issues of waiver of recovery and/or reconsideration of the erroneous payment decision. Except in those cases enumerated in paragraph (b)(2) of this section, the beneficiary shall be further informed that if no request for waiver or reconsideration is received within 30 days, an initial decision to recover the amount of the erroneous payment will be made under paragraph (a)(8) of this section.

(2) The additional information required under paragraph (d)(1) of this section to be included in the notice of a decision need not be included where a decision has been made that an erroneous payment has been made to a beneficiary under the Railroad Retirement Act as a result of the individual's simultaneous entitlement to benefits under the Social Security Act and recovery of the amount of the erroneous payment may be made by reducing the amount of any accrued retroactive payment to be made by the Railroad Retirement Board.

§ 260.2 Request for waiver of recovery of an erroneous payment and/or for reconsideration of the erroneous payment decision.

(a) A beneficiary who has been determined to have received an erroneous payment under paragraph (a)(7) of § 260.1 shall have the right, upon the filing of a timely request in accordance with the requirements of this section and § 260.1, to request waiver of recovery of the erroneous payment and/or reconsideration of the erroneous payment decision. The beneficiary shall, except in those cases enumerated in subdivisions (i) and (ii) of § 260.1(b)(2), have the right to an informal oral hearing prior to commencement of recovery on the issues of waiver of recovery and/or reconsideration of the erroneous payment decision before an employee designated to conduct the hearing.

(b) A request for waiver of recovery and/or reconsideration of an erroneous payment decision and for an oral hearing under this section shall be in writing, and addressed to the district office of the Board set forth in the initial decision letter or to the Director of Retirement Claims. The beneficiary shall state in the request whether he or she elects to have an oral hearing. If the beneficiary does not elect to have an oral hearing with respect to his or her request for waiver of recovery or for reconsideration of the erroneous payment decision, he or she may, along with the request, submit any evidence and argument which he or she would like to present in support of his or her case.

(c) Except with respect to the cases enumerated in subdivisions (i) and (ii) of § 260.1(b)(2), the Director of Retirement Claims shall, upon receipt of a timely request for waiver or reconsideration under this section, postpone the commencement of recovery of the amount of the erroneous payment until a decision on waiver of recovery is rendered and notice of such decision is mailed to the claimant.

(d) Upon receipt of a timely request for an oral hearing under this section, the Director of Retirement Claims or his or her delegee shall promptly arrange for the selection of a Board employee to conduct a hearing in the case. The employee designated to conduct a hearing under this section shall not have had any prior involvement with the initial erroneous payment decision and shall conduct the hearing in a fair and impartial manner. The employee designated to conduct a hearing under this section shall promptly schedule a time and place for the hearing and promptly notify the beneficiary of such.

(e) The beneficiary shall upon request have the opportunity to review, prior to the hearing, his or her claim folder and all documents pertinent to the issues raised. A hearing conducted under this section shall be informal. At the hearing the beneficiary shall be afforded the following rights:

(1) To present his or case orally and to submit evidence, whether through witnesses or documents;

(2) To cross-examine adverse witnesses who appear at the hearing; and

(3) To be represented by counsel or other person.

(f) Upon completion of the hearing, the employee who conducted the hearing shall prepare a summary of the case including a statement of the facts, the employee's findings of fact and law, and a recommended decision. The summary of the case shall then be submitted to the Director of Retirement Claims.

(g) The Director of Retirement Claims shall render a decision with respect to the beneficiary's request for reconsideration of the initial erroneous payment determination and/or waiver of recovery, and shall promptly notify the claimant of that decision. If the Director of Retirement Claims renders a decision adverse to the beneficiary, he or she shall further notify the beneficiary of the basis for such determination and that the beneficiary may appeal the decision to the Bureau of Hearings and Appeals, as provided in § 260.4.

(h) The fact that a beneficiary may have notified the Board with respect to the method by which he or she would choose to have the recovery made, or the fact that such beneficiary may have actually tendered to the Board a portion or all of the amount of the erroneous payment, shall in no way operate to prejudice his or her right to request reconsideration of the initial erroneous payment determination or to request waiver of recovery.

§ 260.3 Initial decisions by the Bureau of Data Processing and Accounts.

In response to a timely request by an employee for an amendment with respect to the amount of compensation credited to the employee by the Board under the Railroad Retirement Act and the Railroad Unemployment Insurance Act, the Director of Data Processing and Accounts shall promptly make a determination with respect to such matter. Notice of such decision shall be communicated by the Director of Data Processing and Accounts to the employee in writing within 30 days after such decision is made. For purposes of this section, a timely request to amend an employee's record of compensation maintained under the Railroad Retirement Act shall be filed within four years after the date on which the return of compensation was required to be made to the Board by the employee's employer. For purposes of this section, a timely request to amend an employee's record of compensation maintained under the Railroad Unemployment. Insurance Act shall be filed within 18 months after the date on which the last return of compensation was required to be made covering any portion of the calendar year which includes the period during which the challenged payment was made.

§ 260.4 Appeal from an initial decision of the Bureau of Retirement Claims or the Bureau of Data Processing and Accounts.

(a) Every claimant shall have a right to appeal to the Bureau of Hearings and Appeals from any initial decision of the Bureau of Retirement Claims or the Bureau of Data Processing and Accounts by which he or she claims to be aggrieved: *Provided, however,* That (1) an individual under age 18 shall not have the right to appeal a finding of incapacity to manage his or her annuity payments, but shall have the right to contest the finding that he or she is, in fact, under age 18; (2) an individual who has been adjudged legally incompetent shall not have the right to appeal a finding of incapacity to manage his or her annuity payments, but shall have the right to contest the fact of his or her having been adjudged legally incompetent; and (3) an individual shall not have the right to appeal a denial of his or her application to serve as representative payee on behalf of an annuitant.

(b) Appeal from an initial decision of the Bureau of Retirement Claims or the Bureau of Data Processing and Accounts shall be made by filing the form prescribed by the Board for such

D E 5 7 8 UMI

[4510-26-M]

V 4 3 / 2 3 4

purpose. Such appeals must be filed with the Bureau of Hearings and Appeals within one year from the date upon which notice of the initial decision is mailed to the claimant.

(c) The right to further review of an initial decision of the Bureau of Retirement Claims or the Bureau of Data Processing and Accounts shall be forfeited unless formal appeals is filed in the manner and within the time prescribed in this Part.

(d) Within a reasonable time after the claimant has filed a proper appeal, the Director of Hearings and Appeals shall appoint a referee to act on the appeal. The Director of Hearings and Appeals may, if the Bureau of Hearings and Appeals' caseload dictates, appoint a qualified Board employee, other than a referee assigned to the Bureau of Hearings and Appeals, to act as referee with respect to a case. Such referee shall not have any interest in the parties or in the outcome of the proceedings, shall not have directly participated in the initial decision from which the appeal is made, and shall not have any other interest in the manner which might prevent a fair and impartial decision.

(e) In the development of appeals, the referee shall have the power to hold hearings, require and compel the attendance of witnesses by subpoena or otherwise in accordance with the procedures set forth in Part 258 of this chapter, administer oaths, rule on motions, take testimony, and make all necessary investigations.

(f) The appellant, or his or her representative, shall be afforded full opportunity to present evidence upon any controversial question of fact, orally or in writing or by means of exhibits; to examine and cross-examine witnesses; and to present argument in support of the appeal. If, in the judgment of the referee, evidence not offered by the appellant is available and is relevant and material to the merits of the claim, the referee may obtain such evidence upon his or her own initiative. If new evidence is obtained by the referee subsequent to an oral hearing, the referee shall notify the appellant or his or her representative that such evidence was obtained and shall describe the nature of the evidence in question. In such event, the appellant shall have the right to submit rebuttal evidence or argument or to an oral hearing to confront and challenge such new evidence. The referee shall protect the record against scandal, impertinence and irrelevancies, but the technical rules of evidence shall not apply.

(g) Where the referee finds that no factual issues are presented by an appeal, and the only issues raised by the appellant are issues concerning the application or interpretation of law, the appellant or his or her representative shall be afforded full opportunity to submit written argument in support of the claim but no oral hearing shall be held.

(h)(1) In any case in which an oral hearing is to be held pursuant to the provisions of this section, the referee shall schedule a time and a place for the conduct of the hearing and shall promptly notify the party or parties to the proceeding by mail as to said time and place for the hearing. The notice shall also include a statement of the specific issues involved in the case.

(2) A party to the proceeding may object to the time and place of the hearing or as to the stated issues to be resolved by filing a written notice of objection with the referee. The notice of objection shall clearly set forth the matter objected to and the reasons for such objection, and, if the matter objected to is the time and place of the hearing, said notice shall further state that party's choice as to the time and place for the hearing. Said notice of objection shall be filed at the earliest practicable time, but in no event shall said notice be filed later than five business days prior to the date of the hearing.

(3) The referee shall rule on any objection timely filed by a party under this subsection and shall notify the party of his or her ruling thereon. The referee may for good cause shown, or upon his or her own motion, reschedule the time and/or place of the hearing. The referee also may limit or expand the issues to be resolved at the hearing.

(4) If neither a party nor his or her representative appears at the time and place scheduled for the hearing, that party shall be deemed to have waived his or her right to an oral hearing, unless said party either filed with the referee a notice of objection showing good cause why the hearing should have been rescheduled, which notice was timely filed but not ruled upon, or, within 10 days following the date on which the hearing was scheduled, said party filed with the referee a motion to reschedule the hearing showing good cause why neither the party nor his or her representative appeared at the hearing and further showing good cause as to why said party failed to file at the prescribed time any notice of objection to the time and place of the hearing.

(5) If the referee finds either that a notice of objection was timely filed showing good cause to reschedule the hearing, or that the party has within 10 days following the date of the hearing filed a motion showing good cause for failure to appear and to file a notice of objection, the referee shall reschedule the hearing. If the referee finds that the hearing shall not be rescheduled, he or she shall so notify the party in writing.

(i) All evidence presented by the appellant and all evidence developed by the referee shall be preserved. Such evidence, together with a record of the arguments, oral or written, and the file previously created in the adjudication of the claim, shall constitute the record on appeal. After an appeal is filed, the compilation of the record shall be initiated by the inclusion therein of the file created in the adjudication of the claim; the compilation of the record shall be kept up to date by the prompt addition thereto of all parts of the record subsequently developed. The entire record shall be available for examination by the appellant or his or her representative at any time during the pendency of the appeal.

(j) Except where the referee has determined that additional evidence not offered by the appellant at or prior to the hearing is available, the record shall be closed as of the conclusion of the hearing. The appellant may move for an extension of time to submit evidence and the referee may grant the motion upon a showing of good cause for failure to have submitted the evidence earlier. The extension shall be for a period not exceeding 30 days.

(k) Upon completion of the record, the referee shall render a decision thereon as soon as practicable. Such decision shall be communicated to the appellant in writing within 30 days after the making thereof.

§ 260.5 Pre-hearing case review.

(a) The referee assigned to a case may, prior to an oral hearing, upon his or her own motion, refer the case back to the bureau of the Board which issued the initial decision for the purpose of reconsideration of that decision, where the referee finds that (1) additional evidence pertinent to the resolution of the issues on appeal was submitted by the appellant at the time the appeal was filed, or subsequent thereto; or (2) additional evidence pertinent to the resolution of the issues on appeal is available and should be procured; or (3) there is some other indication in the record that the initial decision may be revised in a manner favorable to the appellant.

(b) Where the referee finds that referral of a case back to the bureau which issued the initial decision for the purpose of reconsideration of that decision would be warranted, the referee shall give that bureau the reason for such referral, together with specific directions as to the handling of the case on reconsideration.

(c) The bureau to which a case is referred shall promptly undertake any additional development required, and shall make a determination as to whether the initial determination may be revised in whole or in part in a manner favorable to the appellant. Upon issuance of its determination, the bureau in question shall return the case along with a copy of its decision to the referee.

(d) Where the bureau to which a case is referred determines to revise its initial decision in whole or in part, that bureau shall notify the appellant of such determination. If the revised determination is wholly favorable to the appellant, he or she shall be notified that the appeal to the Bureau of Hearings and Appeals will be dismissed by the referee assigned to the case. If the revised decision is partially favorable to the appellant, the notice shall inform the appellant that the referee will proceed with the portion of the appellant's case not revised in his or her favor, unless the appellant should request dismissal of the appeal.

(e) The fact that a case on appeal has been referred back to the bureau which issued the initial decision in the case shall not delay the conduct of a hearing scheduled with respect to the appeal, unless the appellant agrees to a delay. If it appears that the bureau to which a case has been referred will not have completed its reconsideration of the case prior to the date of a scheduled hearing on an appeal and the appellant has not agreed to a delay in the conduct of the hearing, the referee shall proceed with the hearing and the handling of the case as though the case had not been referred back to the bureau.

§ 260.6 Final appeal from a decision of the referee.

(a) Every appellant shall have a right to a final appeal to the Railroad Retirement Board from any decision of a referee by which he or she claims to be aggrieved.

(b) Final appeal from a decision of a referee shall be made by the execution and filing of the final appeal form prescribed by the Board. Such appeal must be filed with the Board within four months from the date upon which notice of the decision is mailed to the appellant at the address furnished by him or her.

(c) The right to further review of a decision of a referee shall be forfeited unless formal final appeal is filed in the manner and within the time prescribed in this Part.

(d) Upon final appeal to the Board, the appellant shall not have the right to submit additional evidence: *Provided, however,* That, if upon final appeal to the Board, the Board finds that new or better evidence is available, the Board may obtain such evidence, in which event the appellant shall be advised with respect to such evidence and given an opportunity to submit rebuttal evidence and argument: *Provided further,* That in the event that pursuant to the preceding proviso, material evidence is developed which tends to show facts contrary to those found by the referee, or in the event that the appellant shows that he is ready to present further material evidence, which for good reason he was not able to present to the referee, the claim may be referred back to the referee. Thereupon, the referee shall develop new or better evidence if available, receive such new evidence as may be offered, include a transcript of all such evidence in the record, and transmit the entire record to the Board together with his or her recommendation to the Board for final decision.

(e) The decision of the Board shall be made upon the record of evidence and argument which has been made in the handling of the case before final appeal to the Board, with such additions as may be made pursuant to this section. Further argument will not be permitted except upon a showing by the appellant that he or she has arguments to present which for valid reasons he or she was unable to present at an earlier stage or in cases in which the Board requests further elaboration of the appellant's arguments. In such cases, the further argument shall be submitted orally or in writing, as the Board may indicate in each case, and shall be subject to such restrictions as to form, subject matter, length and time as the Board may indicate to the appellant.

(f) The Board may, on its own motion, review or cause to be reviewed any decision issued by a subordinate official or employee under this Part.

§ 260.7 Determination of date of filing of appeal.

In determining whether an appeal has been made in accordance with the regulations in this part, the date of filing a duly executed appeal form prescribed by the Board shall be the date of its receipt at an office of the Board or the date of delivery for the purpose of transmission to the Board's main office in Chicago, Illinois, to any field agent specifically authorized by a regional director to receive custody thereof in the district where delivery is made, whichever date is earlier.

Dated: November 28, 1978.

By authority of the Board.

R. F. BUTLER,
Secretary of the Board.

Title 29—Labor

CHAPTER XVII—OCCUPATIONAL SAFETY AND HEALTH ADMINISTRATION, DEPARTMENT OF LABOR

PART 1910—OCCUPATIONAL SAFETY AND HEALTH STANDARDS

Occupational Exposure to Cotton Dust; Corrections

AGENCY: The Occupational Safety and Health Administration, Department of Labor.

ACTION: Final Rule; corrections.

SUMMARY: This notice announces a further correction to the cotton dust standard which appeared in the FEDERAL REGISTER on June 23, 1978 (43 FR 27350).

EFFECTIVE DATE: November 29, 1978.

FOR FURTHER INFORMATION CONTACT:

Mr. Gail Brinkerhoff, Office of Compliance Programs, OSHA Third Street and Constitution Avenue, NW., Room N-3112, Washington, D.C. 20210, telephone: (202) 523-8034.

SUPPLEMENTARY INFORMATION: On June 23, 1978, an occupational safety and health standard for exposure to cotton dust, with an accompanying explanation, was published in the FEDERAL REGISTER (43 FR 27350, FR Doc. 78-17232) as 29 CFR 1910.1043. There were a number of minor typographical errors and inadvertent omissions in the June 23, 1978 document. On June 30, 1978, a document was published (43 FR 28473), correcting some of the errors and omissions which were in the Cotton dust Standard and Appendices portion of the June 23, 1978 document. On August 8, 1978, another document correcting errors and omissions in the preamble to the Cotton Dust Standard, and a few errors remaining in the standard and appendices of the June 23, 1978 document appeared in the FEDERAL REGISTER at 43 FR 35032. This present document corrects the Cotton Dust Standard by adding a provision which appeared originally in Appendix C of the proposed standard but was inadvertently omitted from the final standard. Accordingly, FR Doc 78-17232 appearing at 43 FR 27350, is corrected as follows: Page 27397, column 1, section(h)(2), (iii) line 8 insert, "The predicted FEV$_1$ and FVC for blacks shall be multiplied by 0.85 to adjust for ethnic differences."

PART 1910—OCCUPATIONAL SAFETY AND HEALTH STANDARDS

PART 1928—OCCUPATIONAL SAFETY AND HEALTH STANDARDS FOR AGRICULTURE

Occupational Exposure to Cotton Dust in Cotton Gins; Corrections

AGENCY: The Occupational Safety and Health Administration, Department of Labor.

ACTION: Final Rule; corrections.

SUMMARY: This notice announces a further correction to the cotton dust in cotton gins standard which appeared in the FEDERAL REGISTER on June 23, 1978 (43 FR 27418).

EFFECTIVE DATE: November 29, 1978.

FOR FURTHER INFORMATION CONTACT:

Mr. Gail Brinkerhoff, Office of Compliance Programs, OSHA Third Street and Constitution Avenue, N.W., Room N-3112, Washington, D.C. 20210, telephone: (202) 523-8034.

SUPPLEMENTARY INFORMATION: On June 23, 1978, an occupational safety and health standard for exposure to cotton dust in cotton gins, with an accompanying explanation, was published in the FEDERAL REGISTER (43 FR 27350, FR Doc. 78-17233) as 29 CFR 1910.1046. There were a number of minor typographical errors and inadvertent omissions in the document. On June 30, 1978, a document was published (43 FR 28474) which corrected a number of errors and omissions in the standard and appendices. On August 8, 1978, another document correcting errors and omissions in the preamble to the Cotton Dust in Cotton Gins standard, and remaining errors in the standard and appendices of the June 23, 1978 document appeared in the FEDERAL REGISTER at 43 FR 35035. This present document corrects the Cotton Dust in cotton gins standard (43 FR 35032) by adding a provision which appeared originally in Appendix C of the proposed cotton dust standard but was inadvertently omitted from the final standard. Accordingly, FR Doc. 78-17233 appearing at 43 FR 27418, is corrected as follows:

Page 27435, column 2, section (h)(2), (iii) line 8 insert, "The predicted FEV, and FVC for blacks shall be multiplied by 0.85 to adjust for ethnic differences."

CHAPTER I—OFFICE OF THE SECRETARY OF DEFENSE

SUBCHAPTER R—CHARTERS

[DoD Directive 5105.40]

PART 360—DEFENSE MAPPING AGENCY

AGENCY: Office of the Secretary of Defense.

ACTION: Final rule—DoD Charter Directive 5105.40.[1]

SUMMARY: The Secretary of Defense has assigned functions and responsibilities to the Director, Defense Mapping Agency (DMA), and has delegated specific authorities. This Directive serves as the instrument that authorizes the Director, DMA, to carry out the charter.

EFFECTIVE DATE: August 10, 1978.

FOR FURTHER INFORMATION CONTACT:

Mr. Arthur H. Ehlers, Director for Organizational & Management Planning, Office of the Deputy Assistant Secretary of Defense (Administration), telephone 202-695-4278.

SUPPLEMENTARY INFORMATION: This information is submitted in compliance with the requirements of section 552(a)(1) of Title 5, United States Code, and Recommendation 76-2 of the Administration Conference of the United States.

[1] Copies may be obtained, if needed, from the U.S. Naval Publications and Forms Center, 5801 Tabor Avenue, Philadelphia, Pa. 19120; attention Code 301.

MAURICE W. ROCHE,
Director, Correspondence and Directives, Washington Headquarters Services, Department of Defense.

NOVEMBER 29, 1978.

Accordingly, 32 CFR, Chapter I, is amended by adding a new Part 360, reading as follows:

Sec.
360.1 Purpose.
360.2 Mission.
360.3 Organization and management.
360.4 Responsibilities and functions.
360.5 Authority.
360.6 Relationships.
360.7 Administration.
360.8 Delegation of authority.

AUTHORITY: The provisions of this Part 360 are issued under 10 U.S.C. Chapter 4.

§ 360.1 Purpose.

Pursuant to the authority vested in the Secretary of Defense under the provisions of title 10, United States Code, this Part establishes the Defense Mapping Agency (hereinafter referred to as "DMA") with responsibilities, functions, authorities, and relationships as outlined below.

§ 360.2 Mission.

DMA shall provide support to the Secretary of Defense, the Military Departments, the Joint Chiefs of Staff, and other DoD components, as appropriate, on matters concerning mapping, charting and geodesy (hereinafter referred to as "MC&G").

§ 360.3 Organization and management.

DMA is established as a separate agency of the Department of Defense under the direction, authority, and control of the Under Secretary of Defense for Research and Engineering (hereinafter referred to as "U/S Def R&E"). DMA shall consist of a Director and such subordinate organizational elements as are established by the Director within resources authorized by the Secretary of Defense.

§ 360.4 Responsibilities and functions.

(a) The *Director, DMA,* shall:

(1) Organize, direct, and manage the DMA and all resources assigned to DMA.

(2) Serve as Program Manager and coordinator of all DOD MC&G resources and activities. This includes review of the execution of all DOD plans, programs, and policies for MC&G activities not assigned to DMA.

(3) Provide staff advice and assistance on MC&G matters to the Office of the Secretary of Defense, the Military Departments, the Joint Chiefs of Staff, other DOD components, and other Government agencies, as appropriate.

(4) Develop MC&G guidance for the Department of Defense. Review Military Department program and fiscal documents as related to MC&G matters and recommend appropriate actions to the Secretary of Defense.

(5) In support of the Joint Chiefs of Staff, review MC&G requirements and priorities; develop a consolidated statement of MC&G requirements and priorities.

(6) Insure responsive support to the MC&G requirements of the Military Departments and the Unified and Specified Commands.

(7) Establish policies and provide DOD participation in national and international MC&G activities in coordination with the Assistant Secretary of Defense (International Security Affairs); execute DOD responsibilities under interagency and international MC&G agreements.

(8) Establish and/or consolidate DOD MC&G data collection requirements and provide them to the U/S Def R&E and the Deputy Under Secretary of Defense (Policy). The latter official shall verify and set priorities for such requirements. Collect or task other DOD components to collect and provide necessary data.

(9) Establish DOD MC&G RDT&E requirements in coordination with the U/S Def R&E and the Deputy Under Secretary of Defense (Policy). Task other DOD components or private contractors to accomplish such requirements.

(10) Carry out the statutory responsibilities assigned under U.S.C. Title 10, Chapter 639, Sections 7391, 7392, 7393, 7394 for providing nautical charts and marine navigation data for the use of all vessels of the United States and of navigators generally, and the responsibilities assigned under U.S.C. Title 44, Chapter 13, Section 1336 for the printing of notices to mariners and other publications.

(b) The *Deputy Under Secretary of Defense (Policy)* shall provide guidance on matters of MC&G policy, requirements, and priorities.

(c) The *Secretaries of the Military Departments* and the *Commanders of Unified and Specified Commands* shall:

(1) Develop and submit to DMA their MC&G requirements and priorities.

(2) Provide support, within their respective fields of responsibilities, to the Director, DMA, as required to carry out the assigned mission of the Agency.

(3) Assess the responsiveness of the DMA to their operational needs.

(d) The *Joint Chiefs of Staff* shall:

(1) Advise the Secretary of Defense on MC&G requirements and priorities.

(2) Provide guidance to the DMA and the Unified and Specified Commands which will serve as the basis for interrelationships between these organizations.

(3) Obtain the advice and recommendations from the Director, DMA, on matters within his areas of responsibility.

§ 360.5 Authority.

The Director, DMA, is specifically delegated authority to:

(a) Command the Defense Mapping Agency.

(b) Task DOD components directly to accomplish MC&G RDT&E and data collection requirements as established by DMA and verified by the Deputy Under Secretary of Defense (Policy).

(c) Have free and direct access to, and direct communications with, all elements of the DOD and other executive departments and agencies, as necessary.

(d) Obtain such reports, information, advice and assistance from other DOD components of DOD Directive 5000.19,[1] as may be necessary for the performance of assigned functions and responsibilities.

(e) Establish DMA facilities, using appropriate established facilities and services in the DOD or other Government agencies whenever practicable to achieve maximum efficiency and economy.

(f) Exercise the administrative authorities contained in enclosure 1 of this Directive.

§ 360.6 Relationships.

(a) In the performance of his functions, the Director, DMA, shall:

(1) Be responsible to the Joint Chiefs of Staff for operational matters within their cognizance, as well as requirements associated with the Joint Planning process. For these purposes the Chairman of the Joint Chiefs of Staff is authorized to task and communicate with the DMA directly.

(2) Maintain appropriate liaison with other DOD components and other agencies of the Executive Branch for the exchange of information on programs in the field of assigned responsibilities.

(3) Make use of established facilities and services in the DOD or other Governmental agencies whenever practicable to achieve maximum efficiency and economy.

(4) Insure that the Joint Chiefs of Staff, the Military Departments, and appropriate OSD staff elements are kept fully informed concerning DMA activities of substantive concern to them.

needless delay merely because parties

V 4 3 / 2 3 4 DES 78 UMI

(b) The Military Departments and other DOD components shall:

(1) Provide assistance within their respective fields of responsibility to the Director, DMA, in carrying out his assigned responsibilities and functions.

(2) Coordinate with DMA all programs and activities which include or are related to MC&G.

§ 360.7 Administration.

(a) The Director, DMA, shall be appointed by the Secretary of Defense.

(b) The Deputy Director will be selected by the U/S Def R&E when a military officer on recommendation by the Joint Chiefs of Staff.

(c) DMA will be authorized such personnel, facilities, funds and other administrative support as the Secretary of Defense deems necessary.

(d) The Military Departments will assign military personnel to DMA in accordance with approved authorizations and procedures for assignment to joint duty. The Joint Chiefs of Staff will review and provide recommendations on the DMA joint manpower program to the U/S Def R&E, as appropriate, for those functions where DMA is responsive to the Joint Chiefs of Staff.

§ 360.8 Delegations of authority.

Pursuant to the authority vested in the Secretary of Defense, and subject to his direction, authority, and control, and in accordance with DoD policies, directives, and instructions, the Director, DMA, or in the absence of the Director the person acting for him, is hereby delegated authority as required in the administration and operation of DMA to:

(a) Exercise the powers vested in the Secretary of Defense by 5 USC 301, 302(b) and 3101 pertaining to the employment, direction and general administration of DMA civilian personnel.

(b) Fix rates of pay for wage board employees exempted from Civil Service classification by 5 USC 5102(c)(7) on the basis of prevailing rates for comparable jobs in the locality where each installation is located.

(c) Establish advisory committees and employ part-time advisers, as approved by the Secretary of Defense for the performance of DMA functions pursuant to the provisions of 10 USC 173, 5 USC 3109(b), the Federal Advisory Committee Act, and the Agreement between the Department of Defense (DoD) and the Civil Service Commission on employment of experts and consultants, dated March 14, 1975.

(d) Administer oaths of office incident to entrance into the Executive Branch of the Federal Government or any other oath required by law in connection with employment therein, in accordance with the provisions of 5 USC 2903, and designate in writing, as may be necessary, officers and employees of DMA to perform this function.

(e) Establish a DMA Incentive Awards Board and pay cash awards to, and incur necessary expenses for the honorary recognition of civilian employees of the Government whose suggestions, inventions, superior accomplishments or other personal efforts, including special acts or services, benefit or affect DMA or its subordinate activities in accordance with the provisions of 5 USC 4503 and Civil Service Regulations.

(f) In accordance with the provisions of 5 USC 7532; Executive Order 10450, dated April 27, 1953, as amended; and 32 CFR § 156.

(1) Designate any position in DMA as a "sensitive" position;

(2) Authorize, in case of an emergency, the appointment of a person to a sensitive position in the Agency for a limited period of time for whom a full field investigation or other appropriate investigation, including the National Agency Check, has not been completed; and

(3) Authorize the suspension, but not terminate the services of an employee in the interest of national security in positions within DMA.

(g) Clear DMA personnel and such other individuals as may be appropriate for access to classified Defense material and information in accordance with the provisions of DoD Directive 5210.8,[1] "Policy on Investigation and Clearance of DoD Personnel for Access to Classified Defense Information," February 15, 1962 and of Executive Order 11652, dated March 8, 1972, as amended.

(h) Act as agent for the collection and payment of employment taxes imposed by Chapter 21 of the Internal Revenue Code of 1954 and, as such agent, make all determinations and certifications required or provided for under Section 3122 of the Internal Revenue Code of 1954 and Section 205(p)(1) and (2) of the Social Security Act, as amended (42 USC 405(p) (1) and (2)) with respect to DMA employees.

(i) Authorize and approve overtime work for DMA civilian officers and employees in accordance with the provisions of the Federal Personnel Manual Supplement 990-1, section 550.111.

(j) Authorize and approve:

(1) Travel for DMA civilian officers and employees in accordance with Joint Travel Regulations, Volume 2, DoD Civilian Personnel;

(2) Temporary duty travel only for military personnel assigned or detailed to DMA in accordance with Joint Travel Regulations, Volume 1, Members of Uniformed Services; and

(3) Invitational travel to persons serving without compensation whose consultive, advisory or other highly specialized technical services are required in a capacity that is directly related to, or in connection with DMA activities, pursuant to the provisions of 5 USC 5703.

(k) Approve the expenditure of funds available for travel by military personnel assigned or detailed to DMA for expenses incident to attendance at meetings of technical, scientific, professional or other similar organizations in such instances where the approval of the Secretary of Defense or his designee is required by law (37 USC 412). This authority cannot be redelegated.

(l) Develop, establish and maintain an active and continuing Records Management Program, pursuant to the provisions of Section 506(b) of the Federal Records Act of 1950 (44 USC 3102), the Freedom of Information Act Program (5 USC 552) and the Privacy Act Program (5 USC 522a).

(m) Establish and use Imprest Funds for making small purchases of material and services other than personal for DMA when it is determined more advantageous and consistent with the best interests of the Government, in accordance with the provisions of DoD Instruction 5100.71,[1] "Delegation of Authority and Regulations Relating to Cash Held at Personal Risk Including Imprest Funds," March 4, 1973 and the Joint Regulation of the General Services Administration/Treasury Department/General Accounting Office, entitled "For Small Purchases Utilizing Imprest Funds."

(n) Authorize the publication of advertisements, notices or proposals in newspapers, magazines or other public periodicals as required for the effective administration and operation of DMA (44 USC 3702).

(o) Establish and maintain appropriate Property Accounts for DMA and appoint Boards of Survey, approve reports of survey, relieve personal liability, and drop accountability for DMA property contained in the authorized Property Accounts that has been lost, damaged, stolen, destroyed or otherwise rendered unserviceable, in accordance with applicable laws and regulations.

(p) Promulgate the necessary security regulations for the protection of property and places under the jurisdiction of the Director, DMA, pursuant to subsections III.A. and V.B. of DoD Directive 5200.8,[1] "Authority of Military Commanders under the Internal Security Act of 1950 to Issue Security Orders and Regulations for the Protection of Property or Places under Their Command," August 20, 1954.

(q) Establish and maintain, for the functions assigned, an appropriate

publications system for the promulgation of common supply and service regulations, instructions, and reference documents, and changes thereto, pursuant to the policies and procedures prescribed in DoD Directive 5025.1,[1] "Department of Defense Directive System," November 18, 1977.

(r) Enter into interservice support agreements in accordance with DoD Directive 4000.19,[1] "Basic Policies and Principles for Interservice, Interdepartmental and Interagency Support," March 27, 1972.

(s) Enter into logistic supply and service agreements with Federal departments and agencies other than the DoD.

(t) Exercise the authority delegated to the Secretary of Defense by the Administrator of the General Services Administration with respect to the disposal of surplus personal property.

(u) Enter into and administer contracts, directly or through a Military Department, a DoD contract administration service component, or other Government department or agency, as appropriate, for supplies, equipment and services required to accomplish the mission of DMA. To the extent that any law or Executive order specifically limits the exercise of such authority to persons at the Secretarial level of a Military Department, such authority will be exercised by the appropriate Under Secretary or Assistant Secretary of Defense.

(v) Sell maps, charts, and related products to the public as governed by the provisions of OMB Circular A-25 and U.S.C. Title 10, Chapter 639, Section 7394.

(w) Authorize the release of classified DoD MC&G products to foreign nationals within DoD disclosure policies.

Title 46—Shipping

CHAPTER IV—FEDERAL MARITIME COMMISSION

SUBCHAPTER A—GENERAL PROVISIONS

[General Order 16, Amdt. 27]

PART 502—RULES OF PRACTICE AND PROCEDURE

Miscellaneous Amendments

AGENCY: Federal Maritime Commission.

ACTION: Final rules.

SUMMARY: The rules of practice and procedure are amended to require a showing of exceptional circumstances in support of requests for enlargement of time to file pleadings and other documents in Commission proceedings. The rules are also amended to permit postponement of hearing dates only if necessary to prevent substantial delay, expense, detriment to the public interest or undue prejudice to a party. These changes are needed to eliminate routine requests for extensions of time and postponements of hearings which have caused unnecessary delay in Commission proceedings. The effect will be to save time in the conduct of agency proceedings and to encourage greater diligence on the part of litigating parties.

EFFECTIVE DATE: December 5, 1978.

FOR FURTHER INFORMATION CONTACT:

Francis C. Hurney, Secretary, Federal Maritime Commission, 1100 L Street, NW., Washington, D.C. 20573, 202-523-5740.

SUPPLEMENTARY INFORMATION: During the past several years the Commission has been revising its rules of practice and procedure for the purpose of reducing the time of litigation and bringing its proceedings to conclusion as promptly as possible consistent with the requirements of due process of law. Most recently the Commission has established stricter standards with regard to extensions of time for the filing of exceptions and replies to exceptions to initial decisions issued by Administrative Law Judges by amending Rule 228, 46 CFR 502.228, to specify that requests for such extensions of time "will be granted only exceptional circumstances duly demonstrated in the request." See General Order 16, Amendment 24, 43 FR 33721, August 1, 1978.

The Commission believes that Rule 102, 46 CFR 502.102, which governs enlargements of time for the filing of all other pleadings and documents does not adequately serve to prevent the occurrence of undue delay during other phases of its proceedings. Rule 102 presently permits the granting of motions for enlargements of time "upon a showing of diligence and good cause on the part of the moving party, except where the time for compliance has been fixed by statute." It has been the Commission's experience that the standard quoted in this rule has not promoted diligence, but has, in fact, often had the opposite result, by permitting a variety of routine excuses such as travel, press of other business, vacations, and like events to support requests for additional time. The Commission believes that excuses such as the foregoing are commonplace and predictable. Diligent parties should anticipate them and prepare for them so that proceedings in which these parties are involved do not suffer needless delay merely because parties do not bother to plan ahead.

For the foregoing reasons, the Commission has determined to amend Rule 102 by adopting the standard recently enunciated in Rule 228, as amended, namely, "exceptional circumstances duly demonstrated in the request." This amendment will not only make the two rules consistent, but should encourage parties to exercise greater care in meeting procedural deadlines by placing them on notice that routine, often recurring events, will no longer suffice to justify the delay which would result if extensions of time were permitted.

Another rule which requires amendment is Rule 104, 46 CFR 502.104, governing the postponement of hearings. Although the Commission, elsewhere in its rules, prohibits postponements of hearing dates unless necessary to "prevent substantial delay, expense, detriment to the public interest or undue prejudice to a party" (Rule 61, 46 CFR 502.61), Rule 104 permits postponements of hearings merely "upon a showing of diligence and good cause on the part of the moving party." This, of course, is the same standard as that which the Commission is deleting from Rule 102, as discussed above, and is inconsistent with the standard enunciated in Rule 61. Therefore, the Commission is amending Rule 104 to conform in this respect.

Therefore, pursuant to section 43 of the Shipping Act, 1916 (46 U.S.C. 841a) and 5 U.S.C. 553, Part 502 of Title 46 CFR is amended as follows:

§ 502.102 [Amended]

1. Section 502.102 is amended by deleting the second sentence and substituting therefor the following sentence:

• • • Such motions will be granted only under exceptional circumstances duly demonstrated in the request. • • •

§ 502.104 [Amended]

2. Section 502.104 is amended by deleting the second sentence and substituting therefor the following sentence:

• • • Such motions will be granted only if found necessary to prevent substantial delay, expense, detriment to the public interest or undue prejudice to a party. • • •

Effective date. Notice, opportunity to comment on these amendments and delayed effective date are not necessary because the amendments involve agency procedures. The amendments shall be effective December 5, 1978.

By the Commission.

FRANCIS C. HURNEY,
Secretary.

[FR Doc. 78-33884 Filed 12-4-78; 8:45 am]

CHAPTER I—FEDERAL COMMUNICATIONS COMMISSION

[SS Docket No. 78-9; FCC 78-814]

PART 87—AVIATION SERVICES

Permitting the Authorization of an Additional Aeronautical Advisory Station at a Landing Area To Separate Helicopter and Fixed-wing Aircraft Communications

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This action terminates the proceeding and amends the rules to permit the authorization of an additional Aeronautical Advisory station at an airport. This additional station is needed because of the increase in aviation activity at some airports, and the resultant increase in radio traffic. Presently, both frequencies must be handled through use of only one station. The second station may only be used for the separation of fixed-wing and helicopter activities. Applicants must justify the need and also provide certification that safety will not be affected.

EFFECTIVE DATE: January 8, 1979.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

John E. Jacobs, Safety and Special Radio Services Bureau, (202) 632-7197.

SUPPLEMENTARY INFORMATION:

REPORT AND ORDER—PROCEEDING TERMINATED

Adopted: November 21, 1978.

Released: November 29, 1978.

In the matter of amendment of Part 87 of the FCC rules and regulations to permit the authorization of an additional Aeronautical Advisory Station at a landing area to separate helicopter and fixed-wing aircraft communications, SS Docket No. 78-9.

1. On its own motion, the Commission released a Notice of Proposed Rule Making (NPRM) in the subject matter on January 23, 1978. The Notice was published in the FEDERAL REGISTER on January 25, 1978 (43 FR 3408). The time for comments and reply comments has passed.

2. In our NPRM, we proposed to amend the Rules to permit the authorization of a second aeronautical advisory (Unicom) station at a landing area to separate helicopter and fixed-wing aircraft operations. A Unicom station is one authorized to provide information "limited to the necessities of safe and expeditious operation of private aircraft • • •." This normally consists of airport information (services available, etc.) and, where permitted, wind, weather and runway conditions. They do not provide air traffic control at the airport.

3. In the interests of safety our rules now only permit one Unicom station to be established at any one landing area. Different frequencies are available for airports primarily serving fixed-wing aircraft and for heliports. Where conditions warrant, we permit an established station to add a second frequency for separation of these two operations. However, the use of two frequencies has been limited to one station. This has created some problems in today's environment. Many airports have grown considerably in physical size to accommodate the increase in aviation activity. In addition, the use of helicopters has grown at a rate greater than that of fixed-wing aircraft. At a number of airports, the corresponding increase in radio traffic and the requirement that both frequencies must be operated from the same station has worked a hardship on Unicom licensees. This is particularly true when the two types of operations are widely separated at the larger landing areas.

4. To relieve this situation, we proposed to amend the rules to permit the installation of a second Unicom station at a landing area to separate these two functions. Rather than require that the separate helicopter and fixed-wing frequencies be operated by one licensee from one station, we proposed to allow a second physical installation where the circumstances would warrant and where safety would permit.

5. Comments favoring the proposal were received from Chief, Program Management Staff, Federal Aviation Administration (FAA), Air Transport Association of America (ATA), the Aircraft Owners and Pilots Association (AOPA), the Central Committee on Telecommunications of the American Petroleum Institute (Central Committee), Jess C. Lester, M.D. and the Chesapeake and Potomac Airways, Inc. There were no comments opposing the proposal. No reply comments were received.

6. The Central Committee fully supports the Commission's proposal, citing their own members' extensive use of helicopters in oil and gas exploration. They specifically pointed out the fact that although two frequencies are now available, communications must be handled by one operator, and either type of traffic (fixed-wing on helicopter) may receive less than adequate service. They feel that establishment of a second station where justified • • • "will permit added flexibility in meeting the communications requirements of helicopters and fixed-wing aircraft and will consequently contribute substantially to the efficient operation of landing areas serving both types of traffic." They stressed, however, that adequate need for such a second station must be demonstrated.

7. The ATA agrees with our proposal with reservation. They are quite naturally, concerned with a second Unicom's impact on safety. They point out that separation of the facilities is not the only factor to be considered and that the operational flight paths of the various aircraft are not addressed in the proposal. They further state that they do not agree with the comment in the NPRM that assignment of separate frequencies for fixed- and rotary-wing operations will provide more efficient use of the radio spectrum. Additionally, they recommend that the FAA make the determination as to the safety of establishing a second station.

8. The FAA agreed with the proposal and offered two comments. They feel that (1) information on airport conditions should only be available from one station and (2) that the FAA should have responsibility for determining whether authorization of a second station will introduce a safety hazard and that this be an integral part of the application process.

9. Dr. Jess C. Lester and the Chesapeake and Potomac Airways, Inc. both agreed with the proposal and pointed out congested communications conditions in some areas today. The AOPA also agreed with the proposal but recommended that the FAA determine the safety aspects involved.

10. In the matter of the determination of safety, we fully agree with the commenters who suggest that the FAA make such a determination. As indicated in the NPRM, it is not our intention to authorize a second station per se. We said that any applicant for the additional station must show conclusively that the radio traffic on the existing Unicom station is such that authorization of an additional station will relieve the congestion and, further, that the available facilities serving the two types of aircraft are separated to the point that the proximity of the stations will not present an interference or a safety problem. The burden is on the applicant to adequately show that these conditions are met. The Commission has neither the manpower nor the special expertise necessary to make judgments on safety of flight at airports. For this we must rely on the FAA.

11. The ATA commented that the operational flight paths of the various aircraft must be considered but were not addressed in the proposal. However, we see no need for such a discussion. Since we would require that the applicant show proof to the Commission and the FAA that the helicopter and fixed-wing operations are sufficiently separated, this matter would be addressed in this manner.

12. With regard to ATA's feeling that the assignment of an additional frequency is not efficient use of the spectrum, that is not the subject of the rulemaking. Rule § 87.253 now permits the assignment of a second frequency for separation of helicopter and fixed-wing aircraft *upon showing of need.* In this matter, we are merely discussing the authorization of a second station to use the second frequency already available. There is no intent to change the requirements for assignment of additional frequencies.

13. We have not established any safety criteria which must be met to determine the feasibility of installing a second station. It is safe to say that no two airports are alike in this respect. In addition, any such determination would be beyond the scope of the Commission's authority and expertise. We have discussed this with appropriate offices of the FAA and they feel that the FAA Regional Director of the area in which the airport is located is more qualified to make any such judgment. Accordingly, we will require that any applicant for a second Unicom first clear his proposal with the FAA.

14. The FAA raised the question of aeronautical advisory information being given from two Unicom stations. The information with which they are concerned is that pertaining to the conditions of runways, wind conditions or weather information. We normally only permit this information to be given by the Unicoms at airports not having a control tower or FAA flight service station, or, where these stations exist, only during the hours they are closed down. Although we now permit two frequencies, they are both authorized at one station, so the problem does not exist. However, with two separate installations possible, we can appreciate the FAA's concern. Accordingly we will amend Rule § 87.257 to limit the transmission of this information from one station only. The second station's communications will be limited to those matters concerned with the operations of the aircraft such as fuel, service, dispatching.

15. As discussed and proposed in the NPRM, we are amending Rule § 87.251 to permit the authorization of a second aeronautical advisory station for the specific purpose of separating the helicopter and fixed-wing communications where a need is determined. Applicants for such a second station must demonstrate that (1) a second frequency is necessary for this purpose because of congestion on a one-frequency operation and (2) that installation of a second station will be sufficiently separated from the existing station that a safety hazard will not be introduced. In connection with the safety aspect of the application, we will require that the applicant obtain a letter from the Regional Director of the appropriate FAA Regional Office approving the station from a safety standpoint and submit this with his or her application.

16. As proposed in the NPRM, we will also amend § 87.253(b) to permit the authorization of a second frequency where and in the manner presently permitted when a second physical installation cannot be justified.

17. Additionally, we will amend § 87.257(d) by adding subparagraph (5) limiting the communications permitted on the second station.

18. Regarding questions on matters covered in this document contact J. E. Jacobs, telephone 202-632-7197.

19. *Accordingly, it is ordered,* That Part 87 of the rules is amended as indicated below effective January 8, 1979. Authority for these amendments is contained in Sections 4(i), 303(b), (d), (f) and (r) of the Communications Act of 1934 as amended.

20. *It is further ordered,* That this proceeding is terminated.

(Secs. 4, 303, 48 Stat., as amended, 1066, 1082; (47 U.S.C. 154, 303).)

FEDERAL COMMUNICATIONS COMMISSION,
WILLIAM J. TRICARICO,
Secretary.

Part 87 of Chapter I of Title 47 of the Code of Federal Regulations is amended as follows:

PART 87—AVIATION SERVICES

1. In § 87.251 paragraph (a) is amended, new paragraphs (b) and (c) are added to read as follows: And present paragraphs (b), (c), (d), and (e) are redesignated as paragraphs (d), (e), (f) and (g) to read as follows:

§ 87.251 **Special conditions.**

(a) Except as provided in paragraphs (b) and (c) of this section, only one aeronautical advisory station may be authorized to operate at a landing area.

(b) Where the Commission has good cause to believe that an existing station has been abandoned or ceased operation, another station may be authorized to provide service at the landing area on an interim basis while the original station is not operating and pending final determination of the status of the original station.

(c) Upon showing of need, an additional aeronautical advisory station may be authorized at a landing area for the specific purpose of separating the communications pertaining to helicopters and fixed-wing aircraft. Such showing shall clearly demonstrate to the Commission the need for the additional station and why the anticipated communications cannot be accommodated from one station. Further, it shall be clearly demonstrated that the facilities for helicopters and fixed-wing aircraft are sufficiently separated physically at the landing area that operation of both types of aircraft at the same time will no introduce a safety hazard. Any application for a second station shall be accompanied by a statement from the Regional Director of the FAA Regional Office serving the area certifying that a safety hazard will not exist.

• • • • •

2. In § 87.253 paragraphs (a)(3) and (b) are amended to read as follows:

§ 87.253 **Frequency assignment.**

(a) • • •

• • • • • •

(3) Landing area that is used (i) exclusively as a heliport or (ii) for helicopters when a second station is justified pursuant to § 87.251(c); 123.050 or 123.075 MHz.

(b) Upon a showing of need, and where a second station has not been justified in accordance with § 87.251(c), stations authorized to operate on 123.050 or 123.075 MHz also may be assigned 122.700, 122.800 or 123.000 MHz for communications primarily with fixed-wing aircraft, and stations authorized use of 122.700, 122.800, 122.950 or 123.000 MHz may also be assigned 123.050 or 123.075 MHz for communications primarily with helicopters.

• • • • •

3. In § 87.257 paragraph (d)(5) is added to read as follows:

§ 87.257 **Scope of Service.**

(d) • • •

• • • • • •

(5) Where a second station is authorized in accordance with § 87.251(c), communications from the second station are limited to that purpose for which the application is made (e.g., helicopter or fixed-wing). Communications pertaining to airport conditions (runway, wind, weather), where permitted, will be confined to the first

D E 5 7 8 UMI

(i) The motor carrier will promptly

V 4 3 / 2 3 4 D E 5 7 8 UMI

station authorized at the landing area or as designated on the license.

Title 49—Transportation

CHAPTER III—FEDERAL HIGHWAY ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

SUBCHAPTER B—FEDERAL MOTOR CARRIER SAFETY REGULATIONS

[BMCS Docket No. MC-85, Amdt. No. 78-3]

PART 301—ORGANIZATION AND DELEGATION OF POWERS AND DUTIES OF THE FEDERAL HIGHWAY ADMINISTRATION

PART 391—QUALIFICATION OF DRIVERS

Physical Qualifications and Examination

AGENCY: Federal Highway Administration, DOT.

ACTION: Final rule.

SUMMARY: The purpose of this action is to streamline the processing of applications for waiver of certain physical requirements for drivers in interstate or foreign commerce under § 391.49. By revising § 301.60 to decentralize authority for issuing waivers to Regional Federal Highway Administrators, delays can be eliminated. Other minor procedural changes in § 391.49 simplify the issues and improve the program.

EFFECTIVE DATE: November 30, 1978.

ADDRESSES: BMCS Docket Number MC-85, Bureau of Motor Carrier Safety, Federal Highway Administration, Room 3402, 400 Seventh Street SW., Washington, D.C. 20590.

FOR FURTHER INFORMATION CONTACT:

Mr. Gerald Davis, Chief, Driver Requirements Branch, Bureau of Motor Carrier Safety, 202-426-1700, or Mr. Gerald Tierney, Attorney, Office of the Chief Counsel, 202-426-0346, Federal Highway Administration, 400 Seventh Street SW., Washington, D.C. 20590. Office hours 7:45 a.m. to 4:15 p.m. ET., Monday through Friday.

SUPPLEMENTARY INFORMATION: Issuance of waivers to handicapped drivers from certain physical requirements was established in 1964. The minimum physical requirements for drivers are contained in § 391.41. Procedural requirements to apply for waivers and the criteria for analysis of waiver applications are contained in § 391.49. Authority for issuing waivers is included in § 301.60. The following changes are designed to facilitate processing of applications, clarify the rules and improve the program.

The physical requirements for drivers do not change. However, language is included in § 391.41(b)(2), to assist medical examiners in reviewing and reaching decisions about driver physical qualifications. The medical examiner must determine whether the amputation or other impairment interferes with the task of operating a motor vehicle and whether a waiver is necessary. Section 391.43, Medical Examination; certificate of physical examination, is being amended to require a statement on the medical certificate that the driver is unqualified unless it is accompanied by a waiver.

Section 391.49, Waiver of Certain Physical Defects, is being amended to incorporate formally in the letter of application the needed documentary information. This information had been required at a later stage during the course of review of the application. Introduction of this information at an earlier time, as a formal part of the letter of application, will place no burden on the waiver applicant and will eliminate delays that occurred in the past. These documents are: (1) A description of the type of prosthetic or orthotic device worn, if any; (2) Photographs of the impaired or amputated area with and without the prosthetic or orthotic device; (3) A copy of the waiver of certain physical defects issued by the State in which the driver resides; and (4) A copy of the applicant's State Motor Vehicle Driving Record for the past 3 years in each State where the applicant has obtained a drivers license or permit.

Section 391.49(d)(1) is being amended to reduce the number of medical (physical) examinations required under this section. The applicant will submit with the letter of application only one copy of the examination form and the medical certificate already required by § 391.43, and a medical evaluation summary from a physiatrist or orthopedic surgeon. The requirement for this medical evaluation summary from this medical specialist should add no burden since that specialty is normally already utilized in evaluating amputees and other impairment cases. If the medical specialist elects to perform the required medical (physical) examination, sign the medical certificate and submit the required medical evaluation summary, there is no need for another medical examiner.

Section 391.49(j) is being included to discourage the submission of false information in the letter of application for a waiver. Falsification of information is grounds for waiver denial.

Section 301.60(d)(2) is amended to decentralize authority to issue waivers from the Washington Office to the Regional Administrators of the Federal Highway Administration. This will eliminate most of the paperwork exchange between Regions and the Washington Office associated with the administration of this program.

These amendments concern practice and procedure regarding a program established in 1964 to assist handicapped persons. They transfer administration of the program to the respective regional offices of the Federal Highway Administration. Thus, notice and comment are unnecessary.

The Federal Motor Carrier Safety Regulations are amended as follows:

(1) 49 CFR 391.41(b)(2) is revised as follows:

§ 391.41 Physical qualifications for drivers.

(a) • • •

(b) A person is physically qualified to drive a motor vehicle if that person—

(1) • • •

(2) Has no impairment of:

(i) A hand or finger which interferes with prehension or power grasping; or

(ii) An arm, foot, or leg which interferes with the ability to perform normal tasks associated with operating a motor vehicle; or any other significant limb defect or limitation which interferes with the ability to perform normal tasks associated with operating a motor vehicle; or has been granted a waiver pursuant to § 391.49.

• • • • •

(2) 49 CFR 391.43(e) is revised to add the following at the end of the present rule:

§ 391.43 Medical examination; certificate of physical examination.

• • • If a medical examiner determines a waiver is necessary under § 391.49, the following statement shall appear on the medical examiner's certificate; "medically unqualified unless accompanied by a waiver."

(3) 49 CFR 391.49 is revised to read:

§ 391.49 Waiver of certain physical defects.

(a) A person who is not physically qualified to drive under § 391.41(b) (1) or (2) and who is otherwise qualifed to drive a motor vehicle, may drive a motor vehicle, other than a motor vehicle which transports passengers or a motor vehicle which must be placarded or marked in accordance with

§ 177.823 of this Title 49 (relating to placards or markings upon vehicles which transport hazardous materials), if the Regional Federal Highway Administrator has granted a waiver to that person.

(b) A letter of application for a waiver must be submitted jointly by the person who seeks a waiver of the physical disqualification (driver applicant) and by the motor carrier that will employ the driver applicant if the application is granted. The application must be addressed to the Regional Federal Highway Administrator in the region in which the motor carrier applicant's principal place of business is located. The address for each regional office is listed in Section 390.40.

(c) A letter of application for a waiver shall contain—

(1) Identification of Applicants:

(i) Name of motor carrier applicant;

(ii) Street address of motor carrier applicant (number and street, or rural route, or P.O., City, State, and zip code);

(iii) Name of driver applicant;

(iv) Street address of driver applicant (number and street, or rural route, or P.O., City, State, and zip code); and

(v) Federal Highway Administration Motor Carrier Identification Number, if known.

(2) Description of Type of Operation Driver will be Employed to Perform:

(i) State(s) in which driver will operate for carrier applicant (if more than 10 States, give general area only);

(ii) Average period of time driver will be driving per day, while on duty;

(iii) Type of commodities or cargo to be transported;

(iv) Type of driver operation (sleeper-team, relay, owner operator, etc.); and

(v) Number of years experience in operating the type of vehicle(s) requested in the letter of application and total years of experience driving all types of motor vehicles.

(3) Description of vehicle(s) driver applicant intends to drive:

(i) Truck or truck-tractor make, model, and year (if known);

(ii) Drive train

(A) Transmission type, manual, or automatic, and number of speeds;

(B) Auxiliary transmission (if any), number of speeds;

(C) Variable speed rear axle (if any), number of speeds;

(iii) Type of brake system;

(iv) Steering, manual or power;

(v) Description of type of trailer(s), such as, van, flatbed, tank, drop frame, lowboy, or pole;

(vi) Number of semitrailers or trailers;

(vii) Description of any vehicle modification(s) made for the driver applicant; attach photograph(s) where applicable.

(4) Signature of applicants;

(i) Driver applicant's signature and date signed;

(ii) Motor carrier official's signature, title and date signed. Dependent upon the motor carrier's organizational form (corporation, partnership, or proprietorship) this signator to the application shall be an officer, partner, or proprietor.

(d) The letter of application for a waiver shall be accompanied by—

(1) A copy of the medical examination made pursuant to § 391.43;

(2) A copy of the medical certificate made pursuant to § 391.43(e);

(3) A medical evaluation summary conducted by either a board qualified or board certified physiatrist (doctor of physical medicine) or orthopedic surgeon, selected or agreed to by the motor carrier;

(i) The motor carrier shall provide the physiatrist or orthopedic surgeon a description of the job tasks the driver applicant is required to perform;

(ii) If the medical evaluation summary applies to a driver applicant disqualified under § 391.41(b)(1), the summary shall include an assessment of the driver's functional capabilities as they relate to the driver's ability to perform normal tasks associated with operating a motor vehicle; or

(iii) If the medical evaluation summary applies to a driver applicant disqualified under § 391.41(b)(2), the summary shall include an explanation as to how and why the impaired area interferes with the driver's ability to perform normal tasks associated with operating a motor vehicle;

(4) A description of the driver applicant's prosthetic or orthotic device worn, if any;

(5) Photographs of the driver applicant's impaired or amputated area both with and without the prosthetic or orthotic device worn, if any:

(6) A copy of the driver applicant's road test administered by the motor carrier applicant and the certificate issued pursuant to § 391.31; (b) through (g).

(7) A copy of the driver applicant's application for employment made pursuant to § 391.21;

(8) A copy of the driver applicant's waiver of certain physical defects issued by the individual State(s), where applicable; and

(9) A copy of the driver applicant's State Motor Vehicle Driving Record for the past 3 years in each State where a motor vehicle driver's license or permit has been obtained.

(e) Agreements:

(1) In applying for the waiver the driver and the motor carrier both agree to the following:

(i) The motor carrier will promptly file with the Regional Administrator such documents and information as may be required (within 30 days); about driving activities, accidents, arrests, license suspensions, revocations, or withdrawals, and convictions which involve the driver applicant;

(ii) The waiver only authorizes the driver applicant to operate in interstate or foreign commerce when the driver is employed by the motor carrier that joined in the application and when the driver is in compliance with the conditions specified in the waiver.

(f) The Regional Administrator, may require the driver applicant to demonstrate the driver's ability to safely operate a motor vehicle(s) the driver intends to drive in interstate or foreign commerce.

(g) The Regional Administrator, may deny the application or may grant it in whole or in part and issue a waiver subject to such terms, conditions, and limitations as deemed consistent with safety and the public interest. A waiver is valid for a period not exceeding 2 years, and it may be renewed 30 days prior to the expiration date, upon proper application and approval.

(1) The waiver renewal application shall be submitted to the Regional Administrator and contain the following:

(i) Name and address of carrier;

(ii) Name and address of driver;

(iii) Effective date of current waiver;

(iv) Expiration date of current waiver;

(v) Total miles driven under current waiver agreement;

(vi) Number of accidents under current waiver, including date of accident(s), number of fatalities, number of injuries, and amount of property damage;

(vii) A current medical examination and medical evaluation summary pursuant to § 391.49(d);

(viii) Copy of driver's current State Motor Vehicle Driving Record for the period the current waiver has been in effect;

(ix) Notification of any change in the type of vehicle the driver will operate and/or the scope of operation he/she will perform;

(x) Driver's signature and date signed, and

(xi) Motor carrier official's signature and date signed.

(h) If the Regional Administrator grants a waiver, the applicants will be notified by letter, which sets forth the terms, conditions, and limitations of the waiver. The motor carrier shall retain a copy of the waiver in its files for 3 years from the date it was issued. The driver applicant shall have the waiver (or a ligible copy) in his/her possession whenever on duty.

V 4 3 / 2 3 4

(l) The Regional Administrator may revoke a waiver after the persons to whom it was issued are given notice of the proposed revocation and a reasonable opportunity to be heard.

(j) Falsifying information in the letter of application or the renewal application by the driver applicant or motor carrier applicant is prohibited.

§ 301.60 [Amended]

(4) 49 CFR 301.60(d)(2) is amended to add subdivision

• • • • •

(iv) as follows:

(d) • • •

(2) • • •

(iv) Issue waivers pursuant to 49 CFR 391.49. This authority may be redelegated.

NOTE.—The Federal Highway Administration has determined that this document does not contain a significant proposal according to the criteria established by the Department of Transportation pursuant to Executive Order 12044.

(49 U.S.C. 304: 49 CFR 1.48)

Issued this 28th day of November 1978, in Washington, D.C.

KARL S. BOWERS,
Federal Highway Administrator.

Title 49—Transportation

CHAPTER X—INTERSTATE COMMERCE COMMISSION

SUBCHAPTER A—GENERAL RULES AND REGULATIONS

[Amdt. No. 1; S.O. No. 1333]

PART 1033—CAR SERVICE

Illinois Terminal Railroad Co. Authorized To Operate Over Tracks of Illinois Central Gulf Railroad Co.

AGENCY: Interstate Commerce Commission.

ACTION: Emergency Order Amendment No. 1 to Service Order No. 1333.

SUMMARY: The Illinois Terminal Railroad Company is unable to operate over its line between Lincoln, Illinois, and Allentown, Illinois, because of damage to a bridge at Mackinaw, Illinois. Service Order No. 1333 authorizes the Illinois Terminal to operate over parallel trackage of the Illinois Central Gulf Railroad Company between Lincoln and Pekin, Illinois, in order to provide continued rail service for shipments routed via its line. The order is published in full volume 43 of the FEDERAL REGISTER at page 35317. Amendment No. 1 to Service Order No. 1333 extends the order until January 15, 1979.

DATES: Effective 11:59 p.m., November 30 1978. Expires 11:59 p.m., January 15, 1979.

FOR FURTHER INFORMATION CONTACT:

Charles C. Robinson, Chief, Utilization and Distribution Branch, Interstate Commerce Commission, Washington, D.C., 20423, Telephone 202-275-7840, Telex 89-2742.

NOVEMBER 28, 1978.

Upon further consideration of Service Order No. 1333 (43 F.R. 35317), and good cause appearing therefor:

It is ordered, That:

§ 1033.1333 *Service Order No. 1333*, Illinois Terminal Railroad Company Authorized To Operate Over Tracks of Illinois Central Gulf Railroad Company is amended by substituting the following paragraph (e) for paragraph (e) thereof:

(e) *Expiration date.* The provisions of this order shall expire at 11:59 p.m., January 15, 1979, unless otherwise modified, changed or suspended by order of this Commission.

Effective date. This amendment shall become effective at 11:59 p.m., November 30, 1978.

(49 U.S.C. 1(10-17).)

This amendment shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association. Notice of this amendment shall be given to the general public by depositing a copy in the Office of the Secretary of the Commission, at Washington, D.C., and by filing a copy with the Director, Office of the Federal Register.

By the Commission, Railroad Service Board, members Joel E. Burns, Robert S. Turkington and John R. Michael. Member Joel E. Burns not participating.

H. G. HOMME, Jr.,
Secretary.

Title 16—Commercial Practices

CHAPTER I—FEDERAL TRADE COMMISSION

SUBCHAPTER A—PROCEDURE AND RULES OF PRACTICE

PART 3—RULES OF PRACTICE FOR ADJUDICATIVE PROCEEDINGS

Interlocutory Appeal

AGENCY: Federal Trade Commission.

ACTION: Final Rule.

SUMMARY: Clause (1) of Rule § 3.23(a) is modified to limit the circumstances under which an uncertified interlocutory appeal may be sought from certain rulings of the Administrative Law Judge. This change is intended to expedite discovery in adjudicative proceedings.

This modification does not affect the Commission's general authority under § 3.23(a) to review on its own motion an order issued by an Administrative Law Judge pursuant to § 3.36.

EFFECTIVE DATE: December 5, 1978.

FOR FURTHER INFORMATION CONTACT:

Robert White, Office of the General Counsel, Federal Trade Commission, Washington, D.C. 20580, (202) 523-3865.

Accordingly, 16 CFR Part 3, is amended to read as follows:

§ 3.23 Interlocutory appeals.

(a) *Appeals without a determination by the Administrative Law Judge.* The Commission may, in its discretion, entertain interlocutory appeals where a ruling of the Administrative Law Judge: (1) Requires the disclosure of records of the Commission or another governmental agency or the appearance of an official or employee of the Commission or another governmental agency pursuant to § 3.36, if such appeal is based solely on a claim of privilege: *Provided* The Administrative Law Judge shall stay until further order of the Commission the effctiveness of any ruling, whether or not appeal is sought, that requires the disclosure of nonpublic Commission minutes, Commissioner circulations, or similar documents prepared by the Commission, individual Commissioner, or the Office of the General Counsel; (2) suspends an attorney from participation in a particular proceeding pursuant to § 3.42(d); or (3) grants or denies an application for intervention pursuant to the provisions of § 3.14. Appeal from such rulings may be sought by filing with the Commission an application for review, not to exceed fifteen (15) pages exclusive of those attachments required below, within five (5) days after notice of the Administrative Law Judge's ruling. Answer thereto may be filed within five (5) days after service of the application for review. The application for review should specify the person or party taking the appeal; should attach the ruling or part thereof from which appeal is being taken and any other portions of the record on which the moving party relies and should specify under which provisions hereof review is being sought. The Commission upon its own motion may enter an order staying the return date of an order issued by the Administrative Law Judge pursuant to § 3.36 or placing the matter on the Commission's docket for review. Any order placing the matter on the Commission's docket for review will set forth the scope of the review and the issues which will be considered and will make provision for the filing of briefs if deemed appropriate by the Commission.

• • • • •

(15 U.S.C. 46(g))

By direction of the Commission dated November 9, 1978.

CAROL M. THOMAS,
Secretary.

[FR Doc. 78-34033 Filed 12-4-78; 8:45 am]

[6750-01-M]

PART 4—MISCELLANEOUS RULES

Service of Documents in Commission Proceedings

AGENCY: Federal Trade Commission.

ACTION: Amendment and Correction of Rule.

SUMMARY: The Federal Trade Commission is amending § 4.4 of its rules of practice, 16 CFR 4.4, to provide for service by the Commission of subpoenas, orders to file annual and special reports, and other specified documents, in any manner reasonably certain to inform the affected person. The Commission is also correcting an error in § 4.4(c)(2), 16 CFR 4.4(c)(2).

EFFECTIVE DATE: December 5, 1978.

FOR FURTHER INFORMATION CONTACT:

Arthur W. Adelberg, Esquire, Office of the General Counsel, Federal Trade Commission, 6th Street and Pennsylvania Avenue NW., Washington, D.C. 20580.

SUPPLEMENTARY INFORMATION: Section 4.4 of the Federal Trade Commission's rules of practice currently provides for service by the Commission of subpoenas, orders requiring access, orders requiring the filing of annual or special reports, complaints, initial decisions and final orders of the Commission by three specified methods. The amended rule permits service of orders and notices other than complaints, initial decisions, final orders and other processes of the Commission under Section 5 of the FTC Act, 15 U.S.C. 45, in any manner reasonably certain to inform the affected person, partnership, corporation or unincorporated association, including the three currently specified methods.

Section 4.4(c)(2) incorrectly refers to representatives of parties who have "filed a notice of appearance as required by (16 CFR) § 4.1(c)." The provision for filing a notice of appearance actually is in 16 CFR 4.1(d). Section 4.4(c)(2) is being corrected accordingly.

Accordingly, 16 CFR Part 4 is amended and corrected as follows:

By revising § 4.4(a) to read as follows:

§ 4.4 Service.

(a) *By the Commission.* (1) Service of complaints, initial decisions, final orders, and other processes of the Commission under 15 U.S.C. 45 may be effected as follows:

(i) By registered or certified mail.—A copy of the document shall be addressed to the person; partnership, corporation or unincorporated association to be served at his, her or its residence or principal office or place of business, registered or certified, and mailed; or

(ii) By delivery to an individual.—A copy thereof may be delivered to the person to be served, or to a member of the partnership to be served, or to the president, secretary, or other executive officer or a director of the corporation or unincorporated association to be served; or

(iii) By delivery to an address.—A copy thereof may be left at the principal office or place of business of the person, partnership, corporation or unincorporated association, or it may be left at the residence of the person or of a member of the partnership or of an executive officer or director of the corporation, or incorporated association to be served.

(2) All other orders and notices, including subpoenas, orders requiring access, orders to file annual and special reports, and notices of default, may be served by any method reasonably certain to inform the affected person, partnership, corporation, or unincorporated association including any method specified in paragraph (a)(1) of this section.

(3) All other documents may be served by any method specified in paragraph (a)(1) of this section, or they may be served by ordinary first-class mail.

(4) When a party has appeared in a proceeding by an attorney, service on that individual of any document pertaining to the proceeding other than a complaint shall be deemed service upon the party. However, service of those documents specified in paragraph (a)(1) of this section shall first be attempted in accordance with the provisions of paragraphs (a)(1)(i), (a)(1)(ii), and (a)(1)(iii) of this section.

• • • • •

Section 4.4(c)(2) is corrected by changing the reference to "§ 4.1(c)" to "§ 4.1(d)."

By direction of the Commission dated November 9, 1978.

CAROL M. THOMAS,
Secretary.

proposed rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

[6351-01-M]

COMMODITY FUTURES TRADING COMMISSION

[17 CFR Part 1]

GENERAL REGULATIONS UNDER THE COMMODITY EXCHANGE ACT

Amendment of the Definition of "Proprietary Account"

AGENCY: Commodity Futures Trading Commission.

ACTION: Proposed rule change.

SUMMARY: The Commodity Futures Trading Commission is proposing to amend the definition of the term "proprietary account" contained in Title 17, Chapter I, Part 1, § 1.3, paragraph (y) of the Code of Federal Regulations to provide that a commodity futures account of which ten percent or more is owned by one, or an aggregate of ten percent or more is owned by more than one, of the persons listed in § 1.3(y) is a proprietary account. Under the Commission's present definition certain accounts, such as commodity pool accounts, which are even partly owned by such persons are classified as proprietary rather than customer accounts, and, as a result, such accounts are denied the benefits and protections afforded customer accounts under the Commodity Exchange Act ("Act") and the Commission's regulations under that Act. The effect of the proposed amendment would be to narrow the definition of the term "proprietary account" under § 1.3(y) and thereby increased the number of accounts which are accounts of "customers" as defined in § 1.3(k) (17 CFR 1.3(k)) of the Commission's regulations.

DATES: Comments must be received by January 10, 1979.

ADDRESS: Send comments to the Commodity Futures Trading Commission, 2033 K Street, NW., Washington, D.C. 20581.

ATTENTION: Secretariat.

FOR FURTHER INFORMATION CONTACT:

Frank D. Moore, Esq., Assistant Chief Counsel, Division of Trading and Markets, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, D.C. 20581 (202) 632-5110.

SUPPLEMENTAL INFORMATION:

The definition of the term "proprietary account" was adopted by the Commission's predecessor, the Commodity Exchange Authority (39 FR 28618, August 9, 1974). In view of the changes which have taken place in the industry since that time and its broadened regulatory responsibilities under the Act, the Commission, in addition to requesting comments with respect to the proposed rule change described above, also requests comments concerning the desirability of further amendments to the definitions of this term and of the term "customer."

PURPOSE OF THE PROPOSED RULE

Under § 1.3(k) the terms "customer" or "commodity customer" refer to a customer trading in any commodity (as defined in the Commission's regulations). However, pursuant to this same section, an owner or holder of a proprietary account as defined in § 1.3(y) is not deemed to be a customer within the meaning of section 4d of the Act, the regulations that implement sections 4d and 4f of the Act, and § 1.35 of the Commission's regulations.[1] These provisions relate principally to certain requirements in four areas: (a) Registration; (b) segregation; (c) record keeping; and (d) minimum financial. In each such area (with the exception of the minimum financial requirements), certain benefits and protections are afforded to customer accounts which are not afforded to proprietary accounts. If the definition of proprietary account is narrowed to exclude those commodity accounts not significantly owned by one of the persons listed in § 1.3(y), owners of such accounts would no longer be excluded from the definition of "customer" contained in § 1.3(k) and would receive the benefits and protections which result from this classification.

REGISTRATION

Section 4d of the Act and § 1.17 of the Commission's regulations [2] basically require each person engaged in the solicitation or acceptance of orders for the purchase or sale of any commodity for future delivery, on or subject to the rules of any contract market, to register as a futures commission merchant ("FCM"). However, persons trading solely for a proprietary account within the meaning of § 1.3(y) are excluded from this registration requirement. Thus, if certain proprietary accounts were reclassified as customer accounts, persons engaged in the activities described in § 1.17, with respect to the solicitation or acceptance of orders involving commodity futures transactions for such accounts would be required to register pursuant to that section. This would mean that persons owning such reclassified accounts would benefit from the safeguards of the registration requirements with respect to the qualification and fitness of these individuals and firms.

SEGREGATION

Section 4d(2) of the Act [3] requires FCM's to account separately for money, securities and property of their customers and, among other things, provides that such money, securities and property must not be commingled with the funds of the FCM or be used to margin or guarantee the trades or contracts, or to secure or extend the credit, of any customer other than the one for whom the same are held.

Sections 1.20 through 1.30 [4] of the Commission's regulations establish specific requirements with respect to such customer money, securities and property. On the other hand, money, securities, or property in proprietary accounts need not be treated in accordance with these requirements; therefore, the reclassification of accounts from proprietary accounts to customer accounts, as described above, would have the effect of extending the protections of these requirements to the persons owning such reclassified accounts.

RECORD KEEPING

The Commission's recordkeeping rules, §§ 1.31 through 1.39,[5] require FCM's to maintain certain records with respect to the accounts of their customers which, with some exceptions, FCM's are not required to keep for proprietary accounts. For example,

[1] 7 U.S.C. 6d and 6f (1976) as amended by the Futures Trading Act of 1978, Pub. L. No. 95-405, 92 Stat. 865 *et seq.*, and 17 CFR 1.35.

[2] 7 U.S.C. 6d (1976) as amended by the Futures Trading Act of 1978, Pub. L. No. 95-405, 92 Stat. 865 *et seq.*; and 17 CFR 1.17.

[3] 7 U.S.C. 6d. (1976) as amended by the Futures Trading Act of 1978, Pub. L. No. 95-405, 92 Stat. 865 *et seq.*

[4] 17 CFR 1.20-1.30.

[5] 17 CFR 1.31-1.39.

§ 1.33 requires the FCM, subject to certain qualifications, to send a monthly statement to each of its customers; and § 1.35 relates to the recording and receipt of customer orders. Thus, the owners of accounts reclassified as customer accounts by virtue of the proposed amendment to the definition of "proprietary account," would be afforded the additional protections of the Commission's recordkeeping rules.

MINIMUM FINANCIAL REGULATIONS

Accounts currently classified as proprietary are subject to the requirements of § 1.17(c)(5)(ix) of the Commission's regulations,[6] which, among other things, requires a safety factor charge to the capital of the FCM for non-customer accounts to the extent that such accounts are under-margined in excess of two business days. Accounts reclassified as above, would become subject to the requirements of § 1.17(c)(5)(vii) [7] which requires a safety factor charge for under-margined customer futures accounts to the extent of the amount of funds required in each such account to meet the maintenance margin requirements after application of calls for margin or other required deposits which are outstanding five business days or less until December 31, 1980, four business days or less until December 31, 1982, and three business days or less thereafter. Thus, the proposed rule change and concomitant reclassification of accounts, will permit a somewhat longer time period with the which FCM's may collect amounts due in relasssified, under-margined accounts without incurring a safety factor charge to their capital. Therefore, the proposal has the potential for permitting slightly increased financial risks to firms. The Commission believes, nonetheless, that this factor is outweighed by the benefits of extending the protections described above to an increased number of accounts.

ADDITIONAL QUESTIONS CONCERNING THE DEFINITIONS OF "CUSTOMER" AND "PROPRIETARY ACCOUNT"

In addition to the proposed rule change described above, the Commission is actively considering the need for further changes in the definitions of "customer" and "proprietary account." Further, the Commission is considering the appropriateness of new regulations in certain related areas. The Commission recognizes that there are a substantial number of issues relating to these two areas of consideration. One of the most difficult of these issues is the relationship between two fundamental objectives of the Act, that is, the desirability of, on the one hand, extending customer protections (in the areas described above) to the maximum number of market participants while, on the other hand, maintaining existing levels of protection for those individuals who are presently classified as customers.

An example of the significant interplay between these two objectives is as follows.

The current definition of customer in § 1.3(k) of the Commission's regulations specifically *excludes* for certain purposes, (including the segregation requirements) an owner or joint owner of a proprietary account as defined in § 1.3(y). Pursuant to § 1.3(y) the definition of proprietary account *includes* those accounts which are owned or to any degree partly owned by (among others) an FCM, a general or limited partner or specified employee of an FCM, an owner of ten percent or more of the stock of an incorporated FCM, or a spouse or minor dependent living in the same household of any of the foregoing.[8] If, for example, the two terms were redefined to provide that an account owned to any degree by a customer (as defined in § 1.3(k)) be treated as the account of a customer for all purposes under the Act and regulations, the funds of such account would receive the benefits of the segregation requirements.

While this step would increase the funds in segregation, it could also increase the risk to the presently segregated funds. This could be true because to the extent the reclassified accounts were owned by individuals, such as those listed in § 1.3(y), with an ownership or controlling interest in the FCM ("proprietary persons") or with access to the firm's records and controls of customer accounts, such persons could, in many cases with relative ease, cause the firm not to call for margin when such accounts were under-margined. If this situation is allowed to continue until the account goes into deficit (and the FCM does not place its own funds in the account to cover the deficit), this would mean that the equity of customers would be utilized to "carry" the under-margined joint accounts.[9]

In light of the complexity of these issues, as illustrated by the example above, the Commission invites interested persons to submit any data, views or arguments which they believe would assist the Commission in determining whether to make further proposals in the above areas. In addition, the Commission specifically invites comments in response to the following related questions:

1. Does § 1.3(y) adequately and accurately categorize the types of individuals whose ownership of an account should cause that account to be classified as a proprietary account; and particularly,

a. Should the accounts of certain employees (such as associated persons) with no proprietary interest in the firm be considered proprietary accounts; and

b. Should the Commission retain permanently the numerical criterion (10 per cent ownership by one of the persons listed in § 1.3(y)) as proposed on an interim basis as the sole standard in categorizing a joint account as either customer or proprietary or would a different percentage figure or a combination of some percentage figure and other indicia of ownership be more appropriate in making such determinations? If a different percentage or other standards are suggested, what should they be and why should they be used?

2. Is it appropriate, consistent with section 4d(2) of the Act, to continue to permit any person listed in regulation 1.3(y) to own an account jointly with customers of an FMC or should the use of all such accounts be viewed as commingling (as prohibited by section 4d(2))?

3. Is it appropriate to exclude any customer funds from the benefits afforded such funds by the Act and the regulations even if they are held jointly in an account with a person having a controlling or ownership interest in the FCM? Would the customer funds held in segregation accounts be subjected to significantly greater risk if the funds of such jointly owned accounts were placed in these accounts?

4. As an alternative to placing the funds of jointly owned accounts (as described in questions 2 and 3) in the customer segregated funds account, would it be preferable to place them in a second separate segregated account? This approach could give these jointly-owned accounts the benefit of segregation without jeopardizing the other customers' funds in segregation. (Some of the accounts of those persons currently classified as proprietary, such as associated persons, been employed in the past, and, when it is done, the practice can place an entire firm in financial jeopardy and subject customers to the risk of financial loss.

[6] Reference is to § 1.17 as recently amended by the Commission. *See* the Commission's release dated September 1, 1978 (43 FR 39956, September 8, 1978). The effective date of amended section 1.17 is December 20, 1978, and the Commission does not expect that the amendment to § 1.3(y), which is proposed in the instant release, will become effective prior to that date.

[7] *Id.*

[8] The proposed amendment to § 1.3(y) would, of course, provide for the classification of accounts which are less than ten percent owned by one of these persons as the accounts of customers.

[9] Based upon the experience of the Commission and its predecessor, the Commodity Exchange Authority, this practice, which is prohibited by § 1.22 of the Commission's regulations (17 CFR 1.22), has nonetheless

comments regarding this proposal,

V 4 3 / 2 3 4 D E 5 7 8 UMI

might also be included in this separate segregated account.) What would be the additional costs and benefits of establishing and maintaining such an account—including record keeping, accounting and clearing costs?

5. One of the major reasons for the reluctance to include more accounts within the definition of customer is the fear that the FCM will not collect the proper margin from these accounts; allow them to go into deficit; and use the funds of other customers to "carry" these accounts. Could this probem be ameliorated by requiring all omnibus and clearing house accounts to be margined on a gross basis by the clearing broker?

STATUTORY BASIS FOR THE PROPOSED RULE

In proposing this rule, the Commission is acting pursuant to the authority contained in the Act and particularly sections 4d, 4f, 4g, and 8a of the Act (7 U.S.C. § 6d, 6f, 6g, and 12a (1976) as amended by the Futures Trading Act of 1978, Pub. L. No. 95-405, 92 Stat. 865 *et seq.*).

In consideration of the foregoing, the Commission hereby proposes to amend Title 17, Chapter I, Part 1 of the Code of Federal Regulations, by revising § 1.3(y) as follows (► ◄ arrows indicate additions, [ ] brackets indicate deletions):

§ 1.3 Definitions.

• • • • • •

(y) *Proprietary account.* This term shall mean a commodity futures trading account carried on the books and records of an individual, a partnership, corporation or other type association, (1) for one of the following persons, or (2) [which is partially or jointly] ►of which ten per cent or more◄ is owned by one of the following persons ►or an aggregate of ten per cent or more of which is owned by more than one of the following persons:◄

(i) Such individual himself, or such partnership, corporation or association itself;

(ii) In the case of a partnership, a general partner in such partnership;

(iii) In the case of a limited partnership, a limited or special partner in such partnership whose duties include:

(A) The management of the partnership business or any part thereof,

(B) The handling of trades and/or funds of customers of such partnership,

(C) The keeping of records pertaining to trades and/or funds of customers of such partnership, or

(D) The signing or co-signing of checks or drafts on behalf of such partnership;

(iv) In the case of a corporation or association, an officer, director or owner of ten percent or more of the capital stock, of such organization;

(v) An employee of such individual, partnership, corporation or association whose duties include;

(A) The management of the business of such individual, partnership, corporation or association or any part thereof,

(B) The handling of trades and/or funds of customers of such individual, partnership, corporation or association,

(C) The keeping of records pertaining to trades and/or funds of customers of such individual, partnership, corporation or association, or

(D) The signing or co-signing of checks or drafts on behalf of such individual, partnership, corporation or association:

(vi) A spouse or minor dependent living in the same household of any of the foregoing persons;

(vii) A business affiliate that directly or indirectly controls such individual, partnership, corporation or association;

(viii) A business affiliate that, directly or indirectly is controlled by or is under common control with, such individual, partnership, corporation or association.

Provided, however, That an account owned by any shareholder or member of a cooperative association of producers, within the meaning of Sections 5(e) and 6(a) of the Act, which association is registered as a futures commission merchant and carries such account on its records, shall be deemed to be a customer's account and not a proprietary account of such association, unless the shareholder or member is an officer, director or manager of the association.

Issued in Washington, D.C., on November 29, 1978, by the Commission.

GARY L. SEEVERS,
Acting Chairman, Commodity Futures Trading Commission.

[21 CFR Part 310]

[Docket No. 78N-0383]

ESTROGENS TO TREAT POSTPARTUM BREAST ENGORGEMENT

Proposed Requirements for Patient Labeling

AGENCY: Food and Drug Administration.

ACTION: Proposed rule.

SUMMARY: The Food and Drug Administration (FDA) is proposing to amend the regulation requiring patient labeling for prescription estrogenic drug products to delete provisions pertaining to the use of estrogen for prevention of breast engorgement. This proposal is issued in conjunction with the publication of a notice by the agency proposing to withdraw approval of new drug applications for estrogen-containing drugs that are labeled for use to treat postpartum breast engorgement. The proposed actions are prompted by several studies that indicate an unfavorable benefit-to-risk ratio for estrogen use in the prevention of breast engorgement.

DATES: Comments by January 4, 1979. Proposed effective date of the final rule based on this proposal is 120 days after the date of publication of the final rule in the FEDERAL REGISTER.

ADDRESS: Written comments to the Hearing Clerk (HFA-305), Food and Drug Administration, Rm. 4-65, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT:

Ronald L. Wilson, Bureau of Drugs (HFD-32), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, MD 20857, 301-443-3650.

SUPPLEMENTARY INFORMATION: The final patient labeling regulation for prescription estrogenic drug products (§ 310.515 (21 CFR 310.515)) was published in the FEDERAL REGISTER of July 22, 1977 (42 FR 37636). A guideline patient labeling text deemed to meet the requirements of the regulation was published in the same issue of the FEDERAL REGISTER (42 FR 37645). Section 310.515 (21 CFR 310.515) specifies the kind of information to be contained in the labeling and the manner by which it is to be made available to the patient. Among other requirements, the regulation provides that the labeling for each estrogenic drug product restricted to prescription use must contain a statement regarding the proper uses of estrogens, including their use in the prevention of breast engorgement, and must mention the limited usefulness of estrogen for this purpose.

A recent review of the pertinent scientific literature has called into question both the safety and effectiveness of estrogens used to prevent breast engorgement. The review, which was presented to the Food and Drug Administration (FDA) Obstetrics and Gynecology Advisory Committee on January 31, 1978, suggested that the effectiveness of estrogens in treating breast engorgement was of a limited and short-term nature. Moreover, the review indicated that significant risks of thromboembolism and thrombophlebitis are posed for the patient when estrogens are used for this purpose. Based on the review, the Advisory Committee concluded that available evidence does not support the safety and effectiveness of estrogens for the treatment of postpartum breast engorgement and recommended that the indication be removed from estrogen drug product labeling.

Having considered the evidence presented to the Advisory Committee as well as the Committee's recommendation, the Director of the Bureau of Drugs has proposed, in a notice published in the FEDERAL REGISTER of October 24, 1978 (43 FR 49564), to withdraw approval of new drug applications (NDA's) providing for the use of estrogens in treating postpartum breast engorgement. That notice also announced an opportunity for a hearing regarding the proposed order, and it described in detail the scope and content of the review that has prompted the Director's action. The references supporting this proposal are listed in the Director's notice of opportunity for hearing and are on file with the Hearing Clerk, FDA, under Docket No. 78N-0280.

The Commissioner of Food and Drugs notes that the content of estrogen patient labeling is based wholly on the content of the approved physician labeling for estrogen drug products. To ensure that if and when the physician labeling is modified, the patient labeling can be correspondingly revised, the Commissioner proposes to amend the patient labeling regulation to delete provisions pertaining to the use of estrogens for prevention of breast engorgement. This proposal will, therefore, be finalized only if the physician labeling is ultimately modified as a result of the procedures following the notice of opportunity for hearing on the NDA's for estrogenic products.

In the current estrogen patient labeling text, the use of estrogens for the treatment of breast engorgement is discussed in numbered paragraph 5 under the heading "USES OF ESTROGEN" and in the paragraph under the heading "ESTROGENS TO PREVENT SWELLING OF THE BREASTS AFTER PREGNANCY". If a final regulation is issued with respect to this proposal, these two paragraphs will be deleted from the guideline patient labeling text published in the FEDERAL REGISTER of July 22, 1977.

The Commissioner proposes to make this amendment effective 120 days after it is published as a final regulation in the FEDERAL REGISTER. On and after the effective date, no person would be permitted to initially introduce into interstate commerce or initially deliver for introduction into interstate commerce an estrogen drug product without patient labeling that complies with the requirements of this regulation.

The Commissioner has determined that this document does not contain an agency action covered by § 25.1(b) and therefore, consideration by the agency of the need for preparing an environmental impact statement is not required.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 502, 505, 701(a), 52 Stat. 1050-1053 as amended, 1055 (21 U.S.C. 352, 355, 371(a))) and under authority delegated to him (21 CFR 5.1), the Commissioner proposes that Part 310 be amended by revising § 310.515(b)(3) to read as follows:

§ 310.515 Estrogens; labeling directed to the patient.

• • • • • •

(b) • • •

(3) A statement regarding the proper use of estrogens, particularly short-term use in moderate to severe vasomotor symptoms of the menopause. It is to be stated that estrogens are not indicated for certain conditions, i.e., nervousness, preservation of supple skin, or maintenance of a youthful feeling.

• • • • • •

Interested persons may, on or before January 4, 1979. Submit to the Hearing Clerk (HFA-305), Food and Drug Administration, Room 4-65, 5600 Fishers Lane, Rockville, Md. 20857, written comments regarding this proposal. Four copies of all comments shall be submitted, except that individuals may submit single copies of comments, and shall be identified with the Hearing Clerk docket number found in brackets in the heading of this document. Received comments may be seen in the above office between the hours of 9 a.m. and 4 p.m., Monday through Friday.

In accordance with Executive Order 12044, the major economic effects of this proposal have been carefully analyzed, and it has been determined that the proposed rulemaking does not involve economic consequences as defined by that order. A copy of the regulatory analysis assessment supporting this determination is on file with the Hearing Clerk, Food and Drug Administration.

Dated: November 24, 1978.

WILLIAM F. RANDOLPH,
Acting Associate Commissioner for Regulatory Affairs.

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

[29 CFR Part 1910]

[Docket No. H-100]

OCCUPATIONAL EXPOSURE TO EPICHLOROHYDRIN

Request for Information

AGENCY: Occupational Safety and health Administration, Department of Labor.

ACTION: Request for information on epichlorohydrin.

SUMMARY: This notice requests comments and information on epichlorohydrin (CAS No. 00106898) commercially synthesized from allyl chloride, allyl alcohol, dichlorohydrin-glycerine, or propylene. Epichlorohydrin is used in the manufacture of synthetic glycerine, epoxy resins, surface active agents, pharmaceuticals, insecticides, agricultural chemicals, textile chemicals, coatings, adhesives, ion-exchange resins, solvents, plasticizers, glycidy ethers, ethynyl-ethylenic alcohol and fatty acid derivatives. OSHA has received a criteria document (1) from the National Institute for Occupational Safety and Health that indicates that the present standard of 5 ppm as an 8-hour TWA, Table Z-1, 29 CFR 1910.1000 may not be sufficiently protective of exposed employees. Since then, additional information relating to animal and human carcinogenicity has become available from two separate studies. In light of the potential

V 4 3 / 2 3 4 D E 5 7 8 UMI

cancer hazard involved, OSHA is reviewing alternatives for regulation of epichlorohydrin including the possibility of issuing an Emergency Temporary Standard.

DATE: The information requested in this notice must be submitted on or before January 19, 1979 in quadruplicate. Timely written submissions will be considered in any action taken by this agency.

ADDRESS: The information requested in this notice should be submitted to the Docket Officer, Docket No. H-100, room S6212, U.S. Department of Labor, OSHA, Third Street and Constitution Avenue, N.W., Washington, D.C. 20210. (202-523-7894).

FOR FURTHER INFORMATION CONTACT:

The Office of Carcinogen Standards, Room N3656, OSHA, Third Street and Constitution Avenue, N.W., Washington, D.C. 20210, (202-523-9603 or 202-52-7193).

SUPPLEMENTARY INFORMATION: Epichlorohydrin: Recent Information Received by OSHA.

LABORATORY ANIMAL STUDIES

For over a year, Dr. Norton Nelson of the New York University Institute of Environmental Medicine has been conducting inhalation studies in rats. In a note (2) dated June 23, 1978, he described the most recent results. 140 rats were exposed to 100 ppm epichlorohydrin for 6 hours/day for 30 days with subsequent lifetime observation. Thirteen of the animals have since died of confirmed nasal cancer, as well as two others for which the pathological analysis is not yet complete. A third animal has a nasal tumor. Another group of 100 animals have been exposed to 30 ppm epichlorohydrin for 6 hours/day, 5 days/week. One animal has developed a larynx papilloma, and a nasal carcinoma in another. In contrast, Nelson has not yet observed the development of even one spontaneous nasal carcinoma in the hundreds of Sprague-Dawley rats seen in his laboratory. He concludes: "Our findings strongly suggest a potential risk to workers from exposure to epichlorohydrin."

HUMAN EPIDEMIOLOGICAL STUDIES

The second source of new information is a two-year update (July 31, 1978) of an epidemiologic study of workers exposed to epichlorohydrin at two facilities of the Shell Chemical Company (3). The data were analyzed by Dr. Philip Enterline of the University of Pittsburgh. 864 workers were identified who had been occupationally exposed to epichlorohydrin for 6 months or more, before January 1, 1966. Vital status as of December 31, 1975 was determined for all but 15 of the workers. For men who were followed for 15 years or more, and who had had moderate to heavy exposure, observed deaths were greater than expected for all cancer, respiratory cancer, leukemia and suicide, although the difference was not statistically significant (0.05 level). However, in 1976 there were three more cancer deaths bringing the total to 10. Enterline concludes that results of the two-year update strongly support the findings of the previous report and should be viewed as highly suggestive of a carcinogenic risk of epichlorohydrin for man.

BACKGROUND

Epichlorohydrin (C3 H5 Cl 0; CAS No. 000106898; 1-Chloro-2, 3-epoxy propane) is a colorless liquid at room temperature with a distinctive odor described as "ethereal", "chloroform-like", and "garlic-like". The total U.S. production of epichlorohydrin was about 550 million pounds in 1975. As estimated 58 percent of this was used in the manufacture of synthetic glycerine and 42 percent was processed to refined epichlorohydrin. Refined epichlorohydrin is used in the manufacture of epoxy resins, surface active agents, pharmaceuticals, insecticides, agricultural chemicals, textile chemicals, coatings, adhesive, ion-exchange resins, solvents, plasticizers, glycidyl esters, ethynyl-ethylenic alcohol, and fatty acid derivatives. The National Institute for Occupational Safety and Health estimates that 50,000 employees may be exposed to epichlorohydrin in the United States. Occupational exposure to epichlorohydrin is currently limited by OSHA to an 8-hour time-weighted-average of 5 ppm as found in Table Z-1 of 29 CFR 1910.1000.

INFORMATION REQUESTED ON EPICHLOROHYDRIN

The data recently received by OSHA suggests that current regulation of worker exposure to epichlorohydrin may not be sufficiently protective, and that more information in a mumber of areas is necessary before a reassessment of the hazards of epichlorohydrin exposure can be made. OSHA is therefore requesting information pertaining to epichlorohydrin, as well as any finished product containing epichlorohydrin. The requested information includes but is not limited to the following:

(1) The possibility of sterility, mutagenesis, carcinogenesis, or teratogenesis resulting from exposure to epichlorohydrin, as well as the effects of potential co-factors as related to each of these.

(2) The effects of epichlorohydrin on the skin and the appropriateness of providing complete skin protection.

(3) The effects of epichlorohydrin on the respiratory, hepatic, and renal systems at high concentrations for very short periods of time and the need for a celling value.

(4) The appropriateness of the current permissible exposure limit (5 ppm TWA) in providing adequate employee protection against the toxic effects of epichlorohydrin.

(5) Appropriate engineering controls work practices and personal protective equipment necessary to reduce levels of exposure to those recommended by NIOSH (0.5 parts per million parts of air by volume as a TWA with a ceiling concentration of 5 ppm parts of air by volume as determined by a sampling time of 15 minutes) and to the lowest levels feasible.

(6) Appropriate provisions for employee exposure monitoring, methods of compliance, signs and labels, medical surveillance, training, and record-keeping.

(7) The application of recordkeeping and similar requirements to small businesses and those with highly transient work forces.

(8) The economic and technological feasibility of complying with a complete epichlorohydrin standard at the current, the NIOSH proposed level of exposure, or the lowest levels feasible.

(9) The environmental and economic impact of a complete epichlorohydrin standard at the current, the NIOSH proposed level of exposure, or the lowest levels feasible.

(10) Views on the appropriate regulatory response to the NIOSH recommendations; and

(11) Any other information pertinent in preparing an epichlorohydrin standard.

SUBMITTALS OF INFORMATION REQUESTED

Interested persons are invited to submit written data, views and comments with respect to the foregoing issues. All communications should be submitted in quadruplicate, by *45 days*, to the Docket Officer, Docket H-100, Room S6212, U.S. Department of Labor, Third Street and Constitution Avenue, N.W., Washington, D.C. 20210 (202-523-7894). Timely written submissions will be considered in any action taken by this agency.

[29 CFR Part 1910]

[Docket No. H-069]

OCCUPATIONAL EXPOSURE TO VINYL BROMIDE

Request for Information

AGENCY: Occupational Safety and Health Administration, Department of Labor.

ACTION: Request for information on vinyl bromide.

SUMMARY: This notice requests information on vinyl bromide (CAS 000593602; C2H3Br), a chemical with widespread industrial use, especially in the plastics industry. OSHA has received data which indicates that exposure to vinyl bromide causes cancer in laboratory animals. In light of the potential cancer hazard involved, OSHA is reviewing alternatives for regulation of vinyl bromide including the possibility of issuing an Emergency Temporary Standard. OSHA is therefore seeking information on the manufacture and use of vinyl bromide, employee exposures, health effects, medical surveillance, respiratory protection, and the technological and economic aspects of controlling employee exposures to this substance. OSHA is requesting views on the appropriate regulatory response to the new information received on vinyl bromide.

DATE: The information requested in this notice must be submitted on or before February 5, 1979.

ADDRESS: The information requested in this notice should be submitted to the Docket Officer, Docket H-069, Room S6212, U.S. Department of Labor, OSHA, Third Street and Constitution Avenue, N.W., Washington, D.C. 20210, (202-523-7894).

FOR FURTHER INFORMATION CONTACT:

The Office of Carcinogen Standards, Room N3656, OSHA, Third Street and Constitution Avenue, N.W., Washington, D.C. 20210, (202-523-9603 or 202-523-7193).

SUPPLEMENTARY INFORMATION:

BACKGROUND

In June, 1978 OSHA received information from the Huntington Research Center regarding their investigation of the potential long-term toxic effects of exposure to vinyl bromide. Their interim report of studies indicated that laboratory rats exposed to 50 ppm vinyl bromide developed angiosarcoma of the liver and other tumors (1). At lower levels, exposure to vinyl bromide (10 ppm) induced lymph node angiosarcoma. To date, there have been no reported cases of cancer in humans associated with exposure to vinyl bromide. However, vinyl bromide has been in commercial production in the U.S. only since 1971. Due to the long latency period characteristic of occupationally-induced cancer, typically 15-40 years, no unusual risk of cancer among exposed workers would be expected to be detected at this time. At present, there is no OSHA exposure standard for vinyl bromide.

INFORMATION REQUESTED ON VINYL BROMIDE

The data recently received by OSHA indicate that exposure to vinyl bromide causes cancer in laboratory animals and that more information in a number of areas is necessary before an assessment of the hazards of vinyl bromide exposures in humans can be made. OSHA is therefore requesting information pertaining to vinyl bromide, as well as any finished products containing vinyl bromide. The requested information includes but is not limited to the following:

1. Metabolism, including intermediate as well as final metabolites.
2. Toxicity, tumorigenicity, carcinogenicity, teratogenicity and/or mutagenicity, including the effects of potential co-factors as related to each of these.
3. Human epidemiology (employee populations and those otherwise exposed).
4. Appropriate medical surveillance procedures.
5. Appropriate respiratory protection.
6. Uses and production technologies.
7. Employee exposures (actual or potential) in each use and production facility, including: (a) the levels and specific conditions of such exposures, (b) the numbers of employees involved in each exposure situation.
8. Technological and economic feasibility of reducing employee exposure.
9. Economic and technological feasibility of complying with a complete vinyl bromide standard at the lowest level of exposure feasible.
10. Analytical and sampling methods used and evidence of their precision and accuracy.
11. Whether issuance of an Emergency Temporary Standard is appropriate.

SUBMITTALS OF INFORMATION REQUESTED IN THIS NOTICE

Interested persons are invited to submit written data, views and comments with respect to the foregoing issues. All communications should be submitted in quadruplicate, by February 5, 1979, to the Docket Officer, Docket H-069, Room S6212, U.S. Department of Labor, Third Street and Constitution Avenue NW., Washington, D.C. 20210, (202-523-7894). Timely written submissions will be considered in any action taken by this agency.

OCCUPATIONAL EXPOSURE TO 1,2-DICHLOROETHANE

Request for Information

AGENCY: Occupational Safety and Health Administration, Department of Labor.

ACTION: Request for information on 1,2-dichloroethane.

SUMMARY: This notice requests information on 1,2-dichloroethane (ethylene dichloride, EDC; CAS 000107062), a chlorinated hydrocarbon used in manufacturing vinyl chloride monomer, insecticides, antiknock agents, and metal degreasing compounds. OSHA has recently received data which indicates that the present standard for 1,2-dichloroethane, Table Z-1, 29 CFR 1910. 1000, may not be sufficiently protective of exposed employees. In light of the potential cancer hazard involved, OSHA is reviewing alternatives for regulation of 1,2-dichloroethane, including the possibility of issuing an Emergency Temporary Standard. OSHA is therefore seeking information on the manufacture and use of 1,2-dichloroethane, employee exposures, health effects, medical surveillance, respiratory protection, and the technological and economic aspects of controlling employee exposures to this substance. OSHA is requesting views on the appropriate regulatory response to the new information received on 1,2-dichloroethane.

DATE: The information requested this notice must be submitted on or before February 5, 1979.

ADDRESS: The information requested in this notice should be submitted to the Docket Officer, Docket No. H-079, Room S6212, U.S. Department of Labor, OSHA, Third Street and Constitution Avenue, N.W., Washington, D.C., 20210, (202-523-7894).

FOR FURTHER INFORMATION CONTACT:

The Office of Carcinogen Standards, Room N3656, OSHA, Third Street and Constitution Avenue, N.W., Washington, D.C., 20210, (202-523-9603 or 202-523-7193).

SUPPLEMENTARY INFORMATION: Background. 1,2-dichloroethane (C2 H4 Cl 2) is a colorless, oily liquid with a chloroform-like odor. It is a source chemical from which other chemicals are made. These include vinyl chloride, methyl chloroform, vinylidene chloride, perchloroethylene, trichloroethylene, carbon tetrachloride and the chlorofluorocarbons. In September, 1978, OSHA received information from the National Cancer Institute regarding their investigation of the potential long-term toxic effects of exposure to 1,2-dichloroethane (1). Their report of studies indicate that oral administration of 1,2-dichloroethane produced cancers in rats and mice. In male rats, dosage with 1,2-dichloroethane caused forestomach cancers, hemangiosarcomas (vascularized cancers) of multiple organs, and subcutaneous fibromas (cancer beneath the skin). Female rats exposed to 1,2-dichloroethane developed mammary (breast) cancers, in some animals as early as the 20th week of the study. The chemical also caused breast cancers, as well as uterine cancer in female mice, and respiratory tract cancers in both male and female mice.

Occupational exposure to 1,2-dichloroethane is currently limited by OSHA to an 8-hour time-weighted-average of 50 pm as found in Table Z-2 of 29 CFR 1910.1000.

Information Requested on 1,2-dichloroethane

The data recently received by OSHA suggests that current regulation of worker exposure to 1,2-dichloroethan may not be sufficiently protective, and that more information in a number of areas is necessary before a reassessment of the hazards of 1,2-dichloroethan exposure can be made. OSHA is therefore requesting information pertaining to 1,2-dichloroethane, as well as any finished products containing 1,2-dichloroethan. The requested information includes but is not limited to the following:

(1) Metabolism, including intermediate as well as final metabolites.

(2) Toxicity, tumorigenicity, carcinogenicity, teratogenicity and/or mutagenicity, including the effects of potential co-factors as related to each of these.

(3) Human epidemiology (employee populations and those otherwise exposed).

(4) Appropriate medical surveillance procedures.

(5) Appropriate respiratory protection.

(6) Uses and production technologies.

(7) Employee exposures (actual or potential) in each use and production facility, including: (a) the levels and specific conditions of such exposures, (b) the numbers of employees involved in each exposure situation.

(8) Technological and economic feasibility of reducing employee exposure.

(9) Economic and technological feasibility of complying with a complete 1,2-dichloroethane standard at the lowest level of exposure feasible.

(10) Analytical and sampling methods used and evidence of their precision and accuracy.

(11) Whether issuance of an Emergency Temporary Standard is appropriate.

SUBMITTALS OF INFORMATION REQUESTED IN THIS NOTICE: Interested persons are invited to submit written data, views and comments with respect to the foregoing issues. All communications should be submitted in quadruplicate, by February 5, 1979, to the Docket Officer, Docket H-079, Room S6212, U.S. Department of Labor, Third Street and Constitution Avenue NW., Washington, D.C., 20210 (202-523-7894). Timely written submissions will be considered in any action taken by this agency.

ENVIRONMENTAL PROTECTION AGENCY

[40 CFR Part 52]

[FRL 1017-8]

APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

Pennsylvania State Implementation Plan; Proposed Revision

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule.

SUMMARY: The Commonwealth of Pennsylvania has submitted amendments to its air pollution regulations and has requested that they be reviewed and processed as a revision of the Pennsylvania State Implementation Plan (SIP). The purpose of the amendments is to establish a program for more effectively controlling particulate air contaminant emissions from coke ovens. The proposed revisions affect Chapter 121 (relating to general provisions), Chapter 123 (relating to standards for contaminants), Chapter 127 (relating to construction, modification, reactivation, and operation of sources), and Chapter 139 (relating to sampling and testing) of the rules and regulations of the Department of Environmental Resources.

DATE: Comments must be submitted on or before January 4, 1979.

ADDRESSES: Copies of the proposed SIP revision and support documentation are available for public inspection during normal business hours at the following offices:

U.S. Environmental Protection Agency, Region III, Air Programs Branch, Curtis Building, 10th Floor, Sixth and Walnut Streets, Philadelphia, Pennsylvania 19106.

Pennsylvania Department of Environmental Resources, Bureau of Air Quality and Noise Control, P.O. Box 2063, Harrisburg, Pennsylvania 17120. Attn: Mr. James K. Hambright.

Public Information Reference Unit, Room 2922—EPA Library, U.S. Environmental Protection Agency, 401 M Street, S.W., Washington, D.C. 20460.

All comments on the proposed revision submitted on or before January 4, 1979 will be considered and should be directed to: Mr. Howard Heim, Chief, Air Programs Branch (3AH10), Air and Hazardous Materials Division, U.S. Environmental Protection Agency, Region III, 6th and Walnut Streets, Philadelphia, Pennsylvania 19106. Attn: AH018PA.

FOR FURTHER INFORMATION CONTACT:

Mr. Israel Milner (3AH10), Air Programs Branch, U.S. Environmental Protection Agency, Curtis Building, Tenth Floor, Sixth and Walnut Streets, Philadelphia, Pennsylvania 19106; phone 215-597-8174.

SUPPLEMENTARY INFORMATION: On June 30, 1978, the Pennsylvania Department of Environmental Resources submitted to the Regional Administrator, Region III, revisions of Pennsylvania's Air Resources Regulations designed to regulate particulate emissions from coke ovens and requested that they be reviewed and processed as a revision of Pennsylvania's State Implementation Plan (SIP).

Appropriate public hearings on the proposed amendments were held on April 5, 1977 in Norristown, Pennsylvania; on April 7, 1977 in Pittsburgh, Pennsylvania, and April 12, 1977 in Harrisburg, Pennsylvania in accordance with 40 CFR 51.4.

Prior to these amendments, the Department had no regulations pertaining uniquely to emissions from coke ovens. Control of fugitive particulate emissions from coke ovens was based primarily on application of an opacity standard. These proposed regulations establish firm standards to be achieved for individual points of emission from existing coke oven batteries. The new regulations would require the installation of best available control technology (BACT) for pushing emissions, as well as BACT for door leakage and topside emissions. The proposed standard for the charging process is less stringent than the EPA BACT charging standards. However, the overall standards are more stringent than the former requirements. In addition, the new regulations appear to be more easily administered and provide better enforceability than the former requirements.

The following summarizes some of the key provisions of the proposed regulations for the coke oven battery:

(1) Coke pushing operation—Requires that the coke pushing operation must be enclosed and that any air cleaning device is designed to reduce fugitive emissions to the minimum attainable through the use of the best available technology.

(2) Charging operation—

a. Open charging—At no time shall the aggregated time of visible open charging emissions during any four consecutive charges equal more than 75 seconds.

b. Closed charging—At no time shall there be closed charging emissions during more than one charge out of any ten consecutive charges.

(3) Door emissions and leakages—

a. At no time shall door area emissions from any coke oven exceed 40 percent opacity, 15 minutes or longer after the last charge to that oven.

b. At no time shall there be any visible door arca emissions from more than 10 percent of the door areas of operating coke ovens, excluding the two door areas representing the last oven charged on any battery and any door areas obstructed from view.

(4) Topside emissions—

a. At no time shall there be visible topside emissions from more than 2.0 percent of the charging port seals on operating coke ovens in any battery, excluding visible emissions from no more than three ovens which may be dampered off.

b. At no time shall there be topside emissions from more than 5.0 percent of the offtake piping on operating coke ovens in any battery, excluding visible emissions from open standpipe caps on no more than three ovens which may be dampered off.

c. At no time shall there be any topside emissions from any point on the topside other than allowed emissions from charging port seals and offtake piping pursuant to items a. and b. above.

d. At no time shall there be any visible emissions from the coke oven gas collector main.

The revised regulations also establish measuring and recording techniques, equations for determining compliance, and self-monitoring and reporting requirements for coke oven operators. The proposed regulations also provide a mechanism for sources to petition for a deferred compliance schedule to achieve compliance with the proposed emission limitations. Compliance with the emission limitations must be achieved as expeditiously as possible, but in no event later than December 31, 1979.

After preliminary review of the proposed amendments, some questions of interpretation have arisen concerning the language of some of the provisions. The primary provisions of concern are the following:

1. *Section 127.42—Deferred compliance with revised emission limitations for coke oven batteries.* This section authorizes the Department of Environmental Resources to establish a deferred compliance schedule for coke oven batteries, provided certain requirements are met. The issue raised by this section is whether or not a deferred compliance schedule must be submitted to EPA as a variance requiring a SIP revision prior to taking effect as a matter of Federal law. If the establishment of a deferred compliance schedule would in effect be the same as the granting of a variance, the source must demonstrate that the approved SIP control strategy as modified by the variance would provide sufficient emission reduction to insure the attainment and maintenance of national ambient air quality standards. However, the requirements for obtaining a deferred compliance schedule under § 127.42 do not specify that this demonstration must be made.

Another issue raised by this provision is whether or not EPA has the legal authorityg to establish a deferred compliance schedule upon application by a source to EPA.

2. *Section 129.15(c)—Coke pushing operations.* This provision refers to determinations of minor significance to be made by the Department of Environmental Resources. The issue raised by this provision is whether or not EPA has the legal authority to make this determination.

V 4 3 / 2 3 4 D E 5 7 8 UMI

Another issue raised by this section is whether or not this determination must be submitted to EPA as a variance requiring a SIP revision prior to taking effect as a matter of Federal law. The same consideration noted in the discussion of § 127.42 would apply to § 129.15(c).

3. *Section 129.15—Coke pushing operations.* It is not clear how long pushing emissions must be contained. Although subsection (e) of this regulation seems to permit transport of hot coke in the open atmosphere if visible fugitive air contaminants do not exceed 10% opacity, no reference to subsection (e) is made in subsection (a). Therefore, it is not clear how these two subsections should be interpreted.

The public is invited to submit, to the address stated above, comments on whether the amendments to Pennsylvania's coke oven air pollution regulations should be approved as a revision of the Pennsylvania SIP.

Comments addressing the above three provisions are particularly solicited.

The Administrator's decision to approve or disapprove the proposed revisions will be based on the comments received and on a determination whether the amendments meet the requirements of Section 110(a)(2) of the Clean Air Act and 40 CFR Part 51, Requirements of Preparation, Adoption, and Submittal of Implementation Plans.

[42 U.S.C. 7401.]

Dated: October 31, 1978.

JACK J. SCHRAMM,
Regional Administrator.

[FRL 1020-3]

DELAYED COMPLIANCE ORDERS

Notice of Proposed Approval of an Administrative Order Issued by the Louisiana Air Control Commission to Boise Southern Co.

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule.

SUMMARY: EPA proposes to approve an administrative order issued by the Louisiana Air Control Commission to Boise Southern Company. The order requires the company to bring air emissions from its recovery boiler in Elizabeth, Louisiana, into compliance with certain regulations contained in the federally-approved Louisiana State Implementation Plan (SIP) by January 1, 1979. Because the order has been issued to a major source and permits a delay in compliance with provisions of the SIP, it must be approved by EPA before it becomes effective as a delayed compliance order under the Clean Air Act (the Act). If approved by EPA, the order will constitute an addition to the SIP. In addition, a source in compliance with an approved order may not be sued under the federal enforcement or citizen suit provisions of the Act for violations of the SIP regulations covered by the Order. The purpose of this notice is to invite public comment on EPA's proposed approval of the order as a delayed compliance order.

DATE: Written comments must be received on or before January 4, 1979.

ADDRESSES: Comments should be submitted to Howard Bergman, Director, Enforcement Division, EPA, Region 6, First International Building, 1201 Elm Street, Dallas, Texas 75270. The State order, supporting material, and public comments received in response to this notice may be inspected and copied (for appropriate charges) at this address during normal business hours.

FOR FURTHER INFORMATION CONTACT:

Mr. James Veach, Legal Branch, Enforcement Division, U.S. Environmental Protection Agency, Region 6, First International Building, 1201 Elm Street, Dallas, Texas 75270, 214-767-2760.

SUPPLEMENTARY INFORMATION: Boise Southern Company operates a paper mill at Elizabeth, Louisiana. The order under consideration addresses emissions from the recovery boiler at the facility, which are subject to Section 23.4(1) of the Louisiana Air Control Commission Regulations. The regulation limits the emissions of particulate matter, and is part of the federally approved Louisiana State Implementation Plan. The order requires final compliance with the regulation by January 1, 1979 through installation of appropriate equipment and control apparatus. Boise Southern Company has consented to the terms of the order and has already awarded contracts for the purchase of the control equipment on January 15, 1978.

Because this order has been issued to a major source of particulate matter emissions and permits a delay in compliance with the applicable regulation, it must be approved by EPA before it becomes effective as a delayed compliance order under Section 113(d) of the Clean Air Act (the Act). EPA may approve the order only if it satisfies the appropriate requirements of this subsection. The necessary elements of subsection 113(d) have been met: the order contains a schedule and timetable for compliance; the order provides for final compliance with the Louisiana Implementation Plan as expeditiously as practical and prior to July 1, 1979; the order requires compliance with the best practicable system of interim emission reduction; the order finds that no interim emission monitoring is reasonable or practicable; the order notifies the source that it will be required to pay a noncompliance penalty in the event it fails to achieve final compliance by July 1, 1979; and the order will be issued only after notice to the public and opportunity for public hearing.

If the order is approved by EPA, source compliance with its terms would preclude federal inforcement action under section 113 of the Act against the source for violations of the regulation covered by the order during the period the order is in effect. Enforcement against the source under the citizen suit provision of the Act (section 304) would be similarly precluded. If approved, the order would also constitute an addition to the Louisiana SIP.

All interested persons are invited to submit written comments on the proposed order. Written comments received by the date specified above will be considered in determining whether EPA may approve the order. After the public comment period, the Administrator of EPA will publish in the FEDERAL REGISTER the Agency's final action on the order in 40 CFR Part 65.

Dated: November 27, 1978.

ADLENE HARRISON,
Regional Administrator,
Region 6.

DELAYED COMPLIANCE ORDERS

Notice of Proposed Approval of Delayed Compliance Orders Issued by the Department of Air Pollution Control, Knox County, Tenn. to Knoxville Iron, Knoxville, Tenn.

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule.

SUMMARY: EPA proposes to approve a delayed compliance order issued by the Department of Air Pollution Control, Knox County, Tenn., to Knoxville Iron, Knoxville, Tenn. The delayed compliance order requires the company to bring air emissions from its grey iron foundry in Knoxville, Tenn., into compliance with an applicable regulation contained in the Tennessee State Implementation Plan (SIP) by May 1, 1979. Because the order has been issued to a major source and permits a delay in compliance with the provisions of the SIP, it must be approved by EPA before it becomes effective as a delayed compliance order under the Clean Air Act (the Act). If approved by EPA, the order will constitute an addition to the SIP. In addition, a source in compliance with an approved order may not be sued under the Federal enforcement or citizen suit provisions of the Act for violations of the SIP regulations covered by the order. The purpose of this notice is to invite public comment on EPA's proposed approval of the order as a delayed compliance order.

DATE: Written comments must be received on or before January 4, 1979.

ADDRESSES: Comments should be submitted to Director, Enforcement Division, EPA, Region IV, 345 Courtland Street NE., Atlanta, Georgia 30308. The State order, supporting material, and public comments received in response to this notice may be inspected and copied (for appropriate charges) at this address during normal business hours.

FOR FURTHER INFORMATION CONTACT:

Mr. Bert Cole, U.S. Environmental Protection Agency, Region IV, 345 Courtland Street NE., Atlanta, Ga. 30308, Telephone No. 404-881-4253.

SUPPLEMENTARY INFORMATION Knoxville Iron Co. operates a grey iron foundry at Knoxville, Tenn. The order under consideration addresses emissions from the roof vents, baghouses, duct storage bins, and conveyors which are subject to §§ 17.0, 19.0, and 22.0 of the Knox Company Air Pollution Control Regulations. These regulations limit visible emissions, process emissions and fugitive dust emissions and are part of the federally-approved Tennessee State Implementation Plan. The order requires final compliance with the regulation by May 1, 1979, through the implementation of the following schedule for the construction or installation of control equipment:

(1) October 15, 1978—Issue purchase orders for control equipment.
(2) July 1, 1978—Initiate on-site construction or installation of emission control equipment.
(3) April 1, 1979—Complete on-site construction and installation.
(4) May 1, 1979—Complete performance testing and achieve compliance with all applicable particulate and visible emission limiting regulations, and certify such compliance to Knox County Department of Air Pollution Control and EPA.

The source has consented to the terms of the order and has agreed to meet the order's increments during the period of this informal rulemaking. As interim limits, Knoxville Iron is required to comply with the following conditions prior to the attainment of the last milestone:

(1) Emission from any roof vent not to exceed 20 percent opacity except due to furnace charging, furance tapping or tundish lancing.
(2) Amount of time consumed by furance charging, furance tapping and tundish lancing not to exceed 10 percent of total production time.
(3) Emissions from any baghouse exhaust opening not to exceed 30 percent opacity during furance charging, furance tapping, or tundish lancing.
(4) Emissions from storage bins and conveyors to be reduced to maximum extent practicable during repair and construction phases by methods including, but not limited to, those of § 22.0 of the Knox County Air Pollution Control Regulations.

If this order is approved by EPA, source compliance with its terms would preclude Federal enforcement action under Section 113 of the Act against the source for violations of the regulation covered by the order during the period the order is in effect. Enforcement against the source under the citizen suit provision of the Act (Section 304) would be similarly precluded. If approved, the order would also constitute an addition to the Tennessee SIP. Compliance with the proposed order will not exempt the company from the requirements contained in any subsequent revisions to the SIP which are approved by EPA.

All interested persons are invited to submit written comments on the proposed order. Written coments received by the date specified above will be considered in determining whether EPA may approve the order. After the public comment period, the Administrator of EPA will publish in the FEDERAL REGISTER the Agency's final action on the order in 40 CFR Part 65.

(42 U.S.C. 7413, 7601.)

Dated: November 27, 1978.

JOHN C. WHITE,
Regional Administrator
Region IV.

KNOX COUNTY DEPARTMENT OF AIR POLLUTION CONTROL, KNOX COUNTY, TENN.

In the matter of Knoxville Iron Company (Division of Azcon Corp.), Docket No. ——.

DELAYED COMPLIANCE ORDER

This Delayed Compliance Order is issued this date pursuant to Section 28.0 ("Variances") of the Knox County Air Pollution Control Regulations and Section 113(d) of the Clean Air Act, as amended, 42 U.S.C. 7413(d). This Delayed Compliance Order contains a schedule and timetable for compliance, interim requirements, and emission monitoring and reporting requirements. Public notice and opportunity for a public hearing have been provided pursuant to Section 28.0 of the Knox County Air Pollution Control Regulations and Section 113(d)(1) of the Clean Air Act.

FINDINGS

WHEREAS, the Knox County Department of Air Pollution Control finds that the Knoxville Iron Company has operated a steel manufacturing facility in Knoxville, Tennessee in violation of Sections 17.0, 19.0 and 22.0 of the Knox County Air Pollution Control Regulations dealing with visible emissions, process emissions and fugitive dust at the Company's manufacturing facility, and

WHEREAS, the Knox County Department of Air Pollution Control finds that the Company is unable to comply with said regulations, it is hereby:

ORDERED

I

ABATEMENT PROGRAM

That the attached Appendices governing an abatement program are incorporated into and made a part of this Delayed Compliance Order for the control of the specified pollutants at Knoxville Iron Company located in Knoxville, Tenn.

The Appendices are designated as follows:
Appendix A: Control of Particulate Matter and Visible Emissions From Knoxville Iron Company Manufacturing Facility

II

REPORTING—ADDRESSES

That all submissions of source performance test results, reports and other items required by this Delayed Compliance Order be made to the Knox Company Department of Air Pollution Control, Knoxville, Tenn. with copies to the Director, Enforcement Division, United States Environmental Protection Agency, 345 Courtland Street, Atlanta, Ga. 30308 (hereinafter referred to as the "Director").

APPENDIX A—KNOX COUNTY DEPARTMENT OF

[6560-01-M]

V 4 3 / 2 3 4 D E 5 7 8 UMI

III

PROGRESS REPORTS AND MILESTONE CERTIFICATION

That the Company submit, no later than five (5) days after the end of each month, commencing with September 1, 1978, a monthly progress report for the emission point specified in part I. These reports shall contain specific information on the progress toward each milestone in part I. If any delay is anticipated in meeting said milestones, the Company shall immediately notify the Knox County Department of Air Pollution Control and the Director in writing of the anticipated delay and reasons therefore. Notification of any anticipated delay shall not excuse the delay. In addition, the Company shall submit, no later than five (5) days after the deadline for completing each milestone required by part I, certification to the Knox County Department of Air Pollution Control and the Director whether such milestone has been met.

IV

NOTICE OF TESTS

That the Company provide the Knox County Department of Air Pollution Control and the Director with (20) days notice prior to the conducting of any performance tests as required by part I in order to afford an opportunity to evaluate the test procedure and to have an observer present at such testing.

V

MALFUNCTIONS AND BREAKDOWNS

That the Company shall perform operation and maintenance practices on all sources as necessary to prevent malfunctions or breakdowns and to reduce emissions in excess of regulations to the maximum extent practicable. When emissions due to sudden and unforeseen malfunction of the affected facility are or may be in excess of the maximum allowable as set forth in this Delayed Compliance Order, for greater than four (4) hours, the owner or operator shall notify the Knox County Department of Air Pollution Control and EPA by telephone or telegrams as promptly as possible, and in no event later than twelve (12) hours following the start of such malfunction, and shall cause written notice to be sent to the Knox County Department of Air Pollution Control and the Director no later than the end of the next working day following the start of such malfunction. Such notices shall specify the name of the affected facility, its location, the address and telephone number of the person responsible for the affected facility, the nature and cause of the malfunction, the date and time when such malfunction was first observed, the expected duration, and an estimate of the physical and chemical composition, rate, and concentration of the emission. The Company shall remedy the malfunction or breakdown as soon as possible thereafter and shall take reasonable steps to reduce emissions in excess of the interim emission limits during the malfunction or breakdown.

The Knox County Department of Air Pollution Control and/or the Regional Administrator of EPA shall have the authority during a malfunction or breakdown to require the Company to take specific steps to reduce emissions, including process equipment modifications and/or reductions, or termination if necessary. Within ten (10) days after the termination of a malfunction or breakdown requiring the above notification, the owner shall submit:

(1) The time the excess emission began and ended;

(2) The time of the beginning and end of the breakdown or malfunction which is asserted to be the cause of the excess emission;

(3) An estimate of the physical and chemical composition, rate, and concentration of emissions which occurred, and where continuous monitoring is required or is in effect (including visible emission detector), the strip charts with plots of all emissions monitored versus time, including a summary of the monitoring instruments' written record expressed in units of the applicable standard;

(4) An explanation and, where appropriate, an engineering analysis of the cause of the malfunction or breakdown;

(5) A description of those operating and/or maintenance procedures and practices in use prior to and during the occurrence, which were designed to prevent or minimize the extent and duration of the malfunction or breakdown;

(6) Any other steps taken to minimize the extent or duration of the malfunction or breakdown;

(7) An analysis of what steps will be taken to prevent or minimize similar occurrences in the future; and

(8) Such additional information as the Knox County Department of Air Pollution Control or the Director may require.

VI

INTERIM REQUIREMENTS

A. For the period during which this Order is in effect, the Company shall at all times comply with the following interim emission limitations which represent the best practicable system or systems of emission reduction:

1. Emissions from any roof vent not to exceed 20 percent opacity except due to furnace charging, furnace tapping, or tundish lancing.

2. Amount of time consumed by furnace charging, furnace tapping and tundish lancing not to exceed 10 percent of total production time.

3. Emissions from any baghouse exhaust opening not to exceed 30 percent opacity during furnace charging, furnace tapping or tundish lancing.

4. Emissions from storage bins and conveyors to be reduced to maximum extent practicable during repair and construction phases by methods including, but not limited to, those of Section 22.0 of the Knox County Air Pollution Control Regulations.

If, at any time during the pendency of this order, the applicable interim visible or particulate emission limitations are exceeded, the Company shall immediately take all actions necessary to minimize and/or abate such excess emissions and to prevent their recurrence; the Company shall notify the Knox County Department of Air Pollution Control and EPA of the occurrence as soon as possible, but no later than forty-eight hours after the start of the occurrence; and the Company shall, within 10 days after the termination of each such occurrence, submit to the Knox County Department of Air Pollution Control and EPA a written report regarding the occurrence, which shall address the cause(s) of the occurrence and all the efforts the Company has taken to date concerning it.

B. In addition to the foregoing interim emission limitations, for the period during which this order is in effect, the Company shall take all necessary steps to comply with the applicable emission limitations contained in the State Implementation Plan insofar as the Company is able, and shall take all necessary precautions to ensure that its emissions will not cause or contribute to a violation or violations of National Ambient Air Quality Standards.

C. Furthermore, the Company shall comply with any emergency requirements specified by the Knox County Department of Air Pollution Control Regulations, Section 36.0, and/or by EPA pursuant to Section 303 of the Clean Air Act, 42 U.S.C. § 7603, to prevent an imminent and substantial endangerment to human health.

VII

CONTINUOUS MONITORING

Due to the large number of emission points (e.g., baghouses, roof vents, storage bins, conveyors) installation of continuous monitoring equipment at such points is not deemed to be a reasonable means of demonstrating compliance with terms under this Order. In lieu of continuous monitoring instrumentation at all emission points, the Company agrees to continuously record electric current (amperes) to blowers serving the Company's two baghouse collector units.

VIII

VIOLATION OF REQUIREMENTS

Violation of any requirement of this Order shall result in immediate enforcement action by the Knox County Department of Air Pollution Control pursuant to Knox County Air Pollution Control Regulations, Section 30.0 and/or by EPA pursuant to Sections 113(d)(9), 113(b), and 113(c) of the Clean Air Act.

IX

COMPLIANCE RESPONSIBILITY

Nothing herein shall relieve the source from complying with all other applicable Federal, State or local law.

X

NON-COMPLIANCE PENALTY

Failure of the Company to achieve compliance with any emission limitation, emission standard, or compliance schedule under the State Implementation Plan by July 1, 1979, or such later date as is provided in accordance with Section 120(b)(3) of the Act shall subject the Company to an administratively assessed non-compliance penalty pursuant to the requirements of Section 120 of the Act and any rules and regulations promulgated pursuant thereto, unless the Company is exempted by Section 120(a)(2) (B) or (C) of the Act. In the event of such non-compliance, the Company will be formally notified of its non-compliance pursuant to Section 120(b)(3) of the Act.

Dated: August 30, 1978.

JOHN R. McDOWELL,
Director, Knox County
Dept. of Air Pollution Control.

APPENDIX A—KNOX COUNTY DEPARTMENT OF AIR POLLUTION CONTROL

DELAYED COMPLIANCE ORDER*

The Company shall complete the following acts with respect to the control of visible and particulate emissions from Knoxville Iron Company located in Knoxville, Tennessee, on or before the dates specified:

1. October 15, 1979: Issue purchase orders for control equipment.

2. July 1, 1978: Initiate on-site construction or installation of emission control equipment.

3. April 1, 1979: Complete on-site construction and installation.

4. May 1, 1979: Complete performance testing and achieve compliance with all applicable particulate and visible emission limiting regulations, and certify such compliance to Knox County Department of Air Pollution Control and EPA.

CONSENT**

Knoxville Iron Company acknowledges that visible emissions and particulate emissions from its steel manufacturing facility in Knoxville, Tennessee, are in violation of the applicable emission limitations contained in the federally-approved State Implementation Plan. The Company has reviewed this Delayed Compliance Order, believes it to be a reasonable and expeditious means to achieve compliance with the applicable particulate emissions limiting regulations as contained in the federally-approved State Implementation Plan, and consents to all of the requirements and terms of this Delayed Compliance Order.

Furthermore, the Company acknowledges the necessity of complying with the interim emission limitations and abatement procedures contained herein which are designed to ensure the attainment and maintenance of National Ambient Air Quality Standards for the specified pollutants and consents to said interim emission limitations and abatement procedures in order to protect the public health and welfare.

The Company hereby represents that it has full corporate authority and the necessary corporate approval to enter into and perform in accordance with the terms and provisions of this Delayed Compliance Order. The signatory below represents that he has the requisite corporate authority to execute this Consent on behalf of the Company.

Dated: August 30, 1978.

DONALD BAKER,
Knoxville Iron Company,
Division of Axcon Corporation.

[FRL 1021-1; Docket No. III-78-1-A]

[40 CFR Part 65]

DELAYED COMPLIANCE ORDERS

Proposed Delayed Compliance Order for Potomac Electric Power Company, Dickerson, Md.

AGENCY: U.S. Environmental Protection Agency.

ACTION: Proposed rule.

SUMMARY: EPA proposes to issue an administrative order to the Potomac Electric Power Company (PEPCO). The order requires PEPCO to bring air emissions from its fossil-fueled electric generating station in Dickerson, Maryland into compliance with certain regulations contained in the federally approved Maryland State Implementation Plan (SIP). Because PEPCO is unable to comply with these regulations at this time, the proposed order would establish an expeditious schedule requiring final compliance by February 28, 1979. Source compliance with the order would preclude suits under the federal enforcement and citizen suit provisions of the Clean Air Act for violation of the SIP regulations covered by the order. The purpose of this notice is to invite public comment and to offer an opportunity to request a public hearing on EPA's proposed issuance of the order.

DATES: Written comments must be received on or before January 4, 1979, and requests for a public hearing must be received on or before December 20, 1978. All requests for a public hearing should be accompanied by a statement of why the hearing would be beneficial and a text or summary of any proposed testimony to be offered at the hearing. If there is significant public interest in a hearing, it will be held after twenty-one days prior notice of the date, time, and place of the hearing has been given in this publication.

ADDRESSES: Comments and requests for a public hearing should be submitted to Director, Enforcement Division, EPA, Region III, 6th & Walnut Streets, Curtis Building, Philadelphia, Pennsylvania 19106. Material supporting the order and public comments received in response to this notice may be inspected and copied (for appropriate charges) at this address during normal business hours.

FOR FURTHER INFORMATION CONTACT:

Thomas Shiland, Air Compliance Branch, Enforcement Division, EPA, Region III, 6th & Walnut Streets, Curtis Building, Philadelphia, Pennsylvania 19106 (215) 597-7915.

SUPPLEMENTARY INFORMATION:

Potomac Electric Power Company operates a fossil-fueled electric generating station at Dickerson, Maryland. The proposed order addresses emissions at this facility from three boilers that are subject to Maryland Regulation 10.03.39.04B(1), which requires the use of fuel which has a sulfur content equal to or less than one percent (1%) sulfur by weight. The regulation limits the emissions of sulfur oxides and is part of the federally approved Maryland State Implementation Plan. The order requires final compliance with the regulation by February 28, 1979, and the source has consented to its terms. The source has also consented to meet the order's increments during this period of informal rulemaking. The source submitted by December 31, 1977, a fuel availability study. The source also submitted on May 31, 1978, a study of the characteristics of the one percent sulfur fuel that must be burned by February 28, 1979, at the Dickerson location. The source has agreed to place purchase orders for this fuel by July 31, 1978.

The proposed order satisfies the applicable requirements of section 113(d) of the Clean Air Act (the Act). If the order is issued, source compliance with its terms would preclude further EPA enforcement action under section 113 of the Act against the source for violations of the regulation covered by the order during the period the order is in effect. Enforcement against the source under the citizen suit provisions of the Act (Section 304) would be similarly precluded.

Comments received by the date specified above will be considered in determining whether EPA should issue the order. Testimony given at any public hearing concerning the order will also be considered. After the public comment period and any public hearing, the Administrator of EPA will publish in the FEDERAL REGISTER the Agency's final action on the order in 40 CFR part 65.

(42 U.S.C. 7413, 7601.)

Dated: November 8, 1978.

JACK J. SCHRAMM,
Regional Administrator
Region III.

In consideration of the foregoing, it is proposed to amend 40 CFR Chapter 1, as follows:

PART 65—DELAYED COMPLIANCE ORDERS

1. By adding an entry to the table in § 65.250, *Federal delayed compliance orders issued under Section 113(d)(1), (3), and (4) of the Act,* to reflect approval of the following order:

[6560-01-M]

with resulting residues expected to be

V 4 3 / 2 3 4 D E 5 7 8 UMI

(Order No. III-78-1-A)

BEFORE THE UNITED STATES ENVIRONMENTAL PROTECTION AGENCY—REGION III

In the matter of: Potomac Company, Dickerson Generating Station, Dickerson, Maryland; Proceedings under section 113 of the Clean Air Act, as amended 42 U.S.C. § 1857c-8, CDS No. 21 1300 00015, Docket No. III-78-1-A.

FINDINGS OF VIOLATION AND ORDER FOR COMPLIANCE

FINDINGS OF FACT

1. The Potomac Electric Power Company ("PEPCO") owns and operates a fossil-fueled electric generating plant located at Dickerson, Maryland ("Dickerson Plant"). This plant consists of three boilers which use coal as a fuel supply.

2. Maryland Regulation 10.03.39.04 B(1), which requires the use of fuel which has a sulfur content equal to or less than one percent (1%) sulfur by weight, is contained in the Maryland State Implementation Plan and was approved by the Administrator of the U.S. Environmental Protection Agency ("EPA") on May 31, 1972, pursuant to Section 110 of the Clean Air Act, as amended ("Act") (42 U.S.C. § 1857c-5, 37 Fed. Reg. 10870).

On August 18, 1977, EPA, pursuant to Section 113(a)(1) of the Act, issued a Notice of Violation to PEPCO for violations of Md. Reg. 10.03.39.04 B(1) at PEPCO's Dickerson Plant.

4. PEPCO continues to cause, suffer, allow or permit the use of fuel at this plant which has a sulfur content which is greater than one percent (1%) sulfur by weight in contravention of the Maryland State Implementation Plan.

CONCLUSION OF LAW

1. PEPCO's use at Dickerson Plant of fuel which has a sulfur content which is greater than one percent (1%) sulfur by weight is in violation of Md. Reg. 10.03.39.04 B(1) as approved by the Administrator as part of the Maryland State Implementation Plan.

COMPLIANCE PROGRAM

And now therefore, This ———— day of ————, 1978, EPA issues this ORDER pursuant to Section 113(d) of the Clean Air Act, as amended, and POTOMAC ELECTRIC POWER COMPANY, its successors and assigns are hereby ORDERED to do the following:

A. (1) During the period beginning September 30, 1977, and ending October 31, 1978, the calculated average sulfur dioxide emissions from each unit at the Dickerson Plant shall not exceed 3.0 lbs. per million BTU's of heat input where the sulfur dioxide emissions shall be calculated by the following formula:

$$SO_2 = 20{,}000 \times S \times .97/BTU$$

where

SO_2 = pounds of sulfur dioxide per million BTU
S = percent sulfur by weight
BTU = BTU per pound of coal burned

For the purpose of monitoring whether or not PEPCO complies with this interim emission limitation weighted average fuel analyses shall be determined monthly by weighting the analyses of weekly composite samples of coal burned at each respective unit each week. For any calendar month in which the average sulfur dioxide emissions from a unit exceed 3.0 lbs. per million BTU's of heat input, a daily violation of this sub-paragraph shall be presumed for each week in which the sulfur content of the weekly composite sample of coal burned at that unit exceeds 1.8 percent sulfur by weight.

Weekly composite samples of the coal burned at each unit shall be taken. These samples shall be taken in accordance with the methods specified in ASTM D-2234-72. If, on occasion, it is not possible to take the samples in accordance with the above-cited method, the samples shall be taken in accordance with a method which resembles this method to the maximum extent possible. No later than twenty (20) days following the end of each calender quarter, PEPCO shall report the average sulfur dioxide emissions for each unit for each month in the calendar quarter, including weekly composite analyses, quantities of fuel burned, and the calculations of sulfur dioxide emissions for each unit. The inclusion of this monitoring requirement in this ORDER shall not be construed to either limit the authority of EPA under Section 114 of the Clean Air Act, as amended, or prescribe the proper monitoring methods for determining compliance with the final requirements in this ORDER and the emission limitations in the applicable implementation plan.

(2) During the period beginning October 31, 1978, and ending February 28, 1979, the emissions of sulfur dioxide from each unit shall not exceed 3.0 lbs. per million BTU's of heat input averaged over a two hour period. On and after October 31, 1978, PEPCO shall use in-stack monitoring equipment to continuously monitor sulfur dioxide emissions from the plant. In addition, PEPCO shall keep appropriate fuel records necessary to determine whether compliance with this emission limitation has been achieved. No later than twenty (20) days following the end of each calendar quarter, PEPCO shall report the actual dates and times (if any) when the sulfur dioxide emissions from any Dickerson unit exceeded 3.0 lbs. per million BTU's of heat input averaged over a two hour period. In addition, PEPCO shall retain for a period of six (6) months and make available for inspection and copying upon request all data pertaining to the monitoring of sulfur dioxide emissions from, and heat input to, each unit at the Dickerson Plant. The inclusion of this monitoring requirement in this ORDER shall not be construed to either limit the authority of EPA under Section 114 of the Clean Air Act as amended or prescribe the proper monitoring methods for determining compliance with the final requirements in this ORDER and the emission limitation in the applicable implementation plan.

(3) For a period or periods not to exceed a total of 120 days during the period beginning September 30, 1977 and ending February 28, 1979, PEPCO may burn coal from its existing coal pile at this plant which consisted of approximately 454,000 tons of coal on October 12, 1977, and during such period or periods not to exceed a total of 120 calendar days, an interim emission limitation of 3.9 lbs. of sulfur dioxide per million BTU's of heat input shall be substituted for the 3.0 lbs. value in the interim emission limitation set forth in paragraph A. (1) or A. (2) above, (whichever is applicable at such time or times) provided that PEPCO can establish that all of the following conditions are satisfied:

(a) PEPCO provides at least five (5) days written notice to EPA of its intention to (i) burn coal from its existing stockpile at the plant beginning on a specified day and (ii) be subject to the interim emission limitation and the other provisions of this paragraph (A. (3)). (This notice shall include PEPCO's best judgment as to the number of days during which it will burn coal from the stockpile during this period.);

(b) PEPCO burns coal (for puposes of this paragraph) from this stockpile on the days set forth in this notice(s);

(c) PEPCO provides immediate notice to EPA in writing on the day it ceases (for purposes of this paragraph) to burn coal from this stockpile for each such period;

(d) For each day of this 120 days during which PEPCO burns coal from this stockpile prior to October 31, 1978, the deadline for final compliance set forth in paragraph G. below shall be accelerated one (1) day.

(4) Nothing in paragraph A. (3) shall prohibit PEPCO from burning coal from its existing coal pile at any time without notice to EPA. However, if the conditions referred to in paragraph A. (3) have not been established or have been terminated by virtue of a notice under paragraph A. (3)(c), then (a) such operations shall be subject to the interim emission limitation set forth in paragraphs A. (1) or A. (2) above, (whichever is applicable at such time or times), and (b) the provisions of paragraph A. (3)(d) shall not apply.

B. On or before September 30, 1977, PEPCO shall have commenced studies on the availability of low sulfur coal and any preliminary actions necessarily associated with switching coal supplies at Dickerson units, 1, 2, and 3.

C. On or before December 31, 1977, PEPCO shall submit to EPA its final report on the availability of coal which has a sulfur content equal to or less than one percent (1%) sulfur by weight.

D. On or before May 31, 1978, PEPCO shall inform EPA in writing of the characteristics of the sulfur-in-fuel coal that will be ordered on or before July 31, 1978, for use in Dickerson Units 1, 2, and 3, and any actions which must be completed prior to converting to and using coal at Dickerson Units 1, 2, and 3 which has a sulfur content equal to or less than one percent (1%) sulfur by weight.

E. On or before July 31, 1978, PEPCO shall let purchase orders for complying coal for Dickerson Units 1, 2 and 3, and submit copies of all such coal contracts to EPA on or before August 5, 1978.

F. On or before October 31, 1978, PEPCO shall begin to receive, at its Dickerson Plant, coal which has a sulfur content equal to or less than one percent (1%) sulfur by weight for use in Dickerson Units 1, 2 and 3 as necessary to comply with paragraph G. below, on or before February 28, 1978.

G. On or before February 28, 1979, PEPCO shall be in full and continuous compliance at Dickerson Units 1, 2 and 3 with Regulations 10.03.39.04 as approved by the Administrator in the applicable implementation plan as that term is defined in Section 110(d) of the Clean Air Act, as amended.

H. No later than five (5) days after the deadline for completing each increment established in paragraphs A. through G. herein, PEPCO shall submit progress reports to EPA indicating whether the Compliance Schedule is being followed, and whether or not each required increment has been met. If an increment has not been met, PEPCO shall indicate the reasons for the failure to meet the increment, and the probable effect that the failure will have on subsequent increments.

I. In addition to the above reporting requirement, PEPCO shall submit quarterly progress reports outlining PEPCO's program in complying with this ORDER and indicating whether any requirement herein has been violated. These reports shall be submitted within twenty (20) days following the end of each calendar quarter, beginning with the quarter ending December 31, 1977 and continuing through the quarter in which final compliance is achieved.

J. All reports and other information shall be submitted to:

U.S. Environmental Protection Agency, Region III, Air Compliance Branch (3 EN12), Enforcement Division, 6th and Walnut Streets, Philadelphia, Pennsylvania 19106.

K. Nothing contained in this ORDER shall be construed to prevent or limit the application of the provisions of Section 303 of the Clean Air Act, as amended.

L. Compliance with one or more of the requirements, paragraphs or subparagraphs of this ORDER shall not relieve PEPCO of its obligations to comply with all other requirements, paragraphs and sub-paragraphs of this ORDER.

M. Nothing contained in this ORDER shall be so construed as to relieve PEPCO from meeting the requirements of any other applicable Maryland Regulation or Federally approved regulation at the facility.

N. PEPCO is hereby notified that it will be required to pay a noncompliance penalty under Section 120 of the Clean Air Act, as amended in the event that the Dickerson plant fails to achieve final compliance by July 1, 1979, and that such noncompliance penalty will be independent of, and in addition to, any liability which attaches pursuant to Section 113 for violation of any of the terms of this ORDER.

O. This ORDER shall become effective immediately upon the approval and signature of the Administrator of the EPA.

AND NOW, this ———— day of ————, 1978, the United States Environmental Protection Agency issues this Order.

CONSENT

AND NOW, this ———— day of ————, 197—, Potomac Electric Power Company by its duly authorized officer acknowledges that it does not contest the Findings of Fact and Conclusion of Law, consents to the Compliance Program, agrees that the ORDER is valid and enforceable under Section 113 of the Clean Air Act, as amended, and agrees that it will not appeal therefrom.

.....

By: Potomac Electric Power Company

[40 CFR Part 180]

PESTICIDE PROGRAMS; TOLERANCES AND EXEMPTIONS FROM TOLERANCES FOR PESTICIDE CHEMICALS IN OR ON RAW AGRICULTURAL COMMODITIES

Proposed Exemption From the Requirement of a Tolerance for the Pesticide Chemical Ammonia

AGENCY: Office of Pesticide Programs, Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: This notice proposes that the chemical ammonia used as a preservative in high moisture corn be exempted from the requirement of a tolerance. The proposal was submitted by the U.S. Department of Agriculture. This use of ammonia on corn as a preservative would permit farmers to store and dry the corn without resorting to propane or natural gas to quickly reduce moisture levels. The "trickle ammonia process" for corn preservation would contribute significant savings to growers in energy consumption and costs.

DATE: Comments must be received on or before January 4, 1979.

ADDRESS COMMENTS TO: Federal Register Section, Program Support Division (TS-757), Office of Pesticide Programs, EPA, Rm. 401, East Tower, 401 M Street, SW, Washington DC 20460.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Mountfort, Product Manager (PM) 21, Registration Division (TS-767), Office of Pesticide Programs, EPA, 202-426-2454.

SUPPLEMENTARY INFORMATION: The U.S. Department of Agriculture, Science and Education Administration, Washington, DC 20250, has submitted a pesticide petition (PP 8E2120) to the EPA. This petition requests that the Administrator propose that 40 CFR 180.1003 be amended by extending the present exemption from requirement of tolerance for residues of ammonia on citrus to include residues on corn grain. Such residues would result from application of the ammonia in the "trickle ammonia process" on stored corn. Commercial bulk ammonia, commonly used in agriculture as fertilizer, would also be used for the corn preservation without further manufacture or alteration chemically. Application of ammonia to corn would be at a rate of 0.5% (dry basis) with resulting residues expected to be negligible and not of toxicological concern.

The data submitted in the petition and all other relevant material have been evaluated. There is no reasonable expectation of residues in eggs, meat, milk, or poultry.

The pesticide is considered useful for the purpose for which exemption from the requirement of a tolerance is sought, and it is concluded that the exemption from the requirement of a tolerance established by amending 40 CFR 180.1003 will protect the public health. It is proposed, therefore, that the exemption from the requirement of a tolerance be established as set forth below.

Any person who has registered, or submitted an application for the registration of a pesticide under the Federal Insecticide, Fungicide, and Rodenticide Act which contains any of the ingredients listed herein may request, on or before January 4, 1979, that this rulemaking proposal be referred to an advisory committee in accordance with section 408(e) of the Federal Food, Drug, and Cosmetic Act.

Interested persons are invited to submit written comments on the proposed regulation. The comments must bear a notation indicating both the subject and the petition/document control number, "PP8E2120/P96". All written comments filed in response to this notice of proposed rulemaking will be available for public inspection in the Office of the Federal Register Section from 8:30 a.m. to 4 p.m. Monday through Friday.

(Section 408(e) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 346(e)).)

Dated: November 27, 1978.

DOUGLAS D. CAMPT,
Acting Director,
Registration Division.

It is proposed that Part 180, Subpart D, Section 180.1003 be amended by ading corn grain to read as follows:

§ 180.1003 **Ammonia; exemption from the requirement of a tolerance.**

The fungicide ammonia is exempted from the requirement of a tolerance when used after harvest on the raw agricultural commodities grapefruit, lemons, oranges, and corn grain.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Public Health Service

[42 CFR Parts, 55, 85, and 85a]

FEDERAL MINE SAFETY AND HEALTH ACT OF 1977

Proposed Implementation

AGENCY: National Institute for Occupational Safety and Health (NIOSH), Center for Disease Control, PHS, HEW.

ACTION: Proposed rules.

SUMMARY: This notice proposes to amend several existing regulations which govern NIOSH research activities. Under provisions of the Federal Mine Safety and Health Act of 1977, the National Institute for Occupational Safety and Health was given the responsibility to carry out mine health research activities. This document proposes regulations to reflect this new function. The regulations to be amended are: 42 CFR Part 55—Grants for Advancement of Health in Coal Mining; 42 CFR Part 85—Requests for Health Hazard Evaluations; and 42 CFR Part 85a—Occupational Safety and Health Investigations of Places of Employment.

DATES: Comments on the proposed rule must be received on or before January 4, 1979.

ADDRESSES: Comments and inquiries may be submitted to: Ms. Mary L. Flint, Regulations Specialist, National Institute for Occupational Safety and Health, 5600 Fishers Lane, Room 8-11, Rockville, MD 20857, Phone: (301) 443-3745.

Comments will be available for public inspection at this address during regular business hours.

FOR FURTHER INFORMATION CONTACT:

Ms. Mary L. Flint, Regulations Specialist, Phone: (301) 443-3745, or Mr. Edward J. Baier, Deputy Director, National Institute for Occupational Safety and Health, 5600 Fishers Lane, Room 8-05, Rockville, MD 20857, Phone: (301) 443-1530.

SUPPLEMENTARY INFORMATION: The Federal Mine Safety and Health Amendments Act of 1977 (Pub. L. 95-164) amended the Federal Coal Mine Health and Safety Act of 1969 (Pub. L. 91-173) and redesignated it the Federal Mine Safety and Health Act of 1977 (referred to as the Act). The Act also repealed the Federal Metal and Nonmetallic Mine Safety Act (Pub. L. 89-577), thereby bringing all mining operations under a single law. The Act grants responsibility for mine health research to NIOSH and responsibility for mine safety research to the Secretary of the Interior who has delegated this responsibility to the Bureau of Mines. To coordinate the Federal research effort for the protection of the safety and health of the Nation's miners, NIOSH and the Bureau of Mines have entered into Memorandum of Understanding. The NIOSH health research responsibilities for the mining industry are similar to those already carried out by NIOSH under the Occupational Safety and Health Act. To implement its new responsibilities, NIOSH proposes to amend several existing regulations which govern NIOSH research activities. NIOSH has been conducting its occupational research activities under these regulations for several years.

Part 55, "Grants for Advancement of health in Coal Mining," would be amended to reflect the expansion of the research authority in 30 U.S.C. 951 from "coal" to "coal and other mining." Since the Memorandum of Understanding provides that the Bureau of Mines will have the responsibility to fund the development of new methods of reducing concentrations of respirable dust in the mine atmosphere, that activity would be deleted from the purposes for which NIOSH project grants may be made under § 55.3.

Part 85, "Requests for Health Hazard Evaluations," would be amended in view of the Act's extension of the NIOSH health hazard evaluation authority to the mining industry. Section 951(a)(11) of Title 30 U.S.C. now directs the Secretary, on proper request, to determine whether substances used in mines are potentially toxic or whether physical agents or equipment in the mines have potentially hazardous effects. The proposed amendments to Part 85 do not expressly refer to evaluations of equipment because the hazardous effects of equipment usually relate to safety. Section 951(b) of Title 30 U.S.C. provides that mining safety activities under Section 951 shall be carried out by the Secretary of the Interior. However where mining equipment is alleged to have an effect on health by emitting a substance or producing a physical agent, the proposed amendments will authorize NIOSH participation in the evaluation. The Memorandum of Understanding provides for a coordinated response and designation of a lead organization for health hazard evaluations in mines where the evaluation contains aspects of health and safety.

Finally, Part 85a, "Occupational Safety and Health Investigations of Places of Employment," would be amended pursuant to the NIOSH authority under the Act in 30 U.S.C. 813(a) to apply to the conduct of NIOSH inspections and investigations in coal or other mines for research purposes.

It is, therefore, proposed to amend Parts 55, 85, and 85a of Title 42, Code of Federal Regulations, as set forth below.

Dated: October 3, 1978.

JULIUS B. RICHMOND,
Assistant Secretary for Health.

Approved: November 28, 1978.

JOSEPH A. CALIFANO, JR.,
Secretary.

PART 55—GRANTS FOR ADVANCEMENT OF HEALTH IN COAL AND OTHER MINING

It is proposed to amend Part 55 as follows:

1. The title of Part 55 is revised to read as set forth above.

2. In the Table of Sections, the title of § 55.5 is revised to read:

Sec.
55.5 Nondiscrimination.

§ 55.1 [Amended]

3. In § 55.1, the words "coal mine" are deleted and the words "in coal and other mining" are inserted between the words "health" and "as".

4. In § 55.2, paragraphs (a) and (c) are revised to read as follows:

§ 55.2 Definitions.

(a) "Act" means the Federal Mine Safety and Health Act of 1977 (30 U.S.C. 801 et seq.).

(b) • • •

(c) "Fiscal year" means the 12-month period beginning October 1 and ending on September 30 following.

• • • • •

5. Section 55.3 is revised to read as follows:

§ 55.3 Purpose of project grant.

The Secretary is authorized under section 501 of the Act (30 U.S.C. 951) to make grants for studies, research, experiments, and demonstrations designed to:

(a) Improve working conditions and practices in coal or other mines, and to prevent occupational diseases originating in the coal or other mining industry;

(b) Develop epidemiological information to (1) identify and define positive factors involved in occupational diseases of miners, (2) provide information on the incidence and prevalence of pneumoconiosis and other respiratory ailments of miners, and (3) improve mandatory health standards;

(c) Develop techniques for the prevention and control of occupational diseases of miners, including tests for hypersusceptibility and early detection;

(d) Evaluate the effect on bodily impairment and occupational disability of miners afflicted with an occupational disease;

(e) Prepare and publish, from time to time, reports on all significant aspects of occupational diseases of miners, as well as on the medical aspects of injuries, other than disease, which are revealed by the research carried out under the Act;

(f) Study the relationship between coal or other mine environments and occupational diseases of miners;

(g) Explore the protection of life and prevention of diseases in connection with persons who, although not miners, work with or around the products of coal or other mines in areas outside of such mines and under conditions which may adversely affect the health and well-being of those persons;

(h) Develop effective respiratory equipment; and

(i) Carry out the purposes of the Act as considered necessary by the Secretary.

6. Section 55.5 is deleted and a new § 55.5 is added which reads as follows:

§ 55.5 Nondiscrimination.

Recipients of grants under this Part are advised that in addition to complying with the terms and conditions of these regulations, the following laws and regulations are applicable:

(a) Title VI of the Civil Rights Act of 1964 (42 U.S.C. 2000d et seq.) and its implementing regulation, 45 CFR Part 80 (prohibiting discrimination in Federally assisted programs on the basis of race, color, or national origin.

(b) Section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) and its implementing regulation, 45 CFR Part 84 (prohibiting discrimination in Federally assisted programs on the basis of Handicap).

§ 55.10 [Amended]

7. In § 55.10(b), delete the words "Advisory Council on Coal Mine Health Research" and substitute the words "Coal Mine Health Research Advisory Committee".

§ 55.11 [Amended]

8. In § 55.11, at the end of the third sentence, delete the words "the reason it has been disapproved." and substitute the words "shall be provided with a copy of the reviewers' comments."

PART 85—REQUESTS FOR HEALTH HAZARD EVALUATIONS

It is proposed to amend Part 85 as follows:

1. The authority is revised to read:

AUTHORITY: Sec. 8(g), 84 Stat. 1600; (29 U.S.C. 657(g); sec. 508, 83 Stat. 803; 30 U.S.C. 957.)

2. Sections 85.1, 85.2, 85.3, 85.4, and 85.5 are revised and a new § 85.3-1 is added. The revised and added provisions read as follows:

§ 85.1 Applicability.

This Part 85 applies to health hazard evaluations requested by any employer or authorized representative of employees under section 20(a)(6) of the Occupational Safety and Health Act of 1970 or section 501(a)(11) of the Federal Mine Safety and Health Act of 1977. This part is not intended to preclude the use of other channels of communication with the National Institute for Occupational Safety and Health to obtain information and technical assistance concerning toxic substances or physical agents.

§ 85.2 Definitions.

Any term defined in the Occupational Safety and Health Act of 1970 or the Federal Mine Safety and Health Act of 1977 and not defined below shall have the meaning given it in the respective Acts. As used in this part:

"OSH Act" means the Occupational Safety and Health Act of 1970 (29 U.S.C. 651, et seq.).

"FMSH Act" means the Federal Mine Safety and Health Act of 1977 (30 U.S.C. 801, et seq.).

"Authorized representative of employees" means any person or organization meeting the conditions specified in § 85.3-1(e) (1), (2), or (3).

"Employee" is given the meaning stated in the OSH Act and includes miners as defined in the FMSH Act.

"Employer" is given the meaning stated in the OSH Act and includes operators as defined in the FMSH Act.

"Health hazard evaluation" means the investigation and the determination of potentially toxic or hazardous effects of: (1) Any substance normally used or found in any place of employment to which the OSH Act is applicable, or (2) any substance or physical agent normally used or found in any place of employment to which the FMSH Act is applicable.

"Investigation" means a physical inspection of the place of employment under section 8 of the OSH Act or section 103 of the FMSH Act and includes inspection, sampling, observations, review of pertinent records, and other measurements reasonably necessary to determine whether any substance or physical agent found in the place of employment has potentially toxic or hazardous effects in the concentrations or levels used or found.

"NIOSH" means the National Institute for Occupational Safety and Health, Center for Disease Control, Public Health Service, Department of Health, Education, and Welfare.

"NIOSH officer" means a NIOSH employee who has been authorized by the Director, NIOSH, to conduct investigations according to this part.

"Physical agent" means any condition produced by the environment and/or work processes that can result in hazardous effects as defined in this section. Examples of physical agents are noise, temperature, illumination, vibration, radiation, and pressure.

"Place of Employment" means any coal or other mine, factory, plant, establishment, construction site, or other area, workplace, or environment where work is performed by any employee of an employer.

"Substance" means any chemical or biological agent which has the potential to produce toxic effects.

"Toxic effects" or "hazardous effects" are those effects which result in short- or long-term disease, bodily injury, affect health adversely, or endanger the life of man.

§ 85.3 Procedures for requesting health hazard evaluations.

(a) Requests for health hazard evaluations should be addressed to the National Institute for Occupational Safety and Health as follows:

(1) *Requests from general industry.* Hazard Evaluations and Technical Assistance Branch, Division of Surveillance, Hazard Evaluations, and Field Studies, NIOSH, 4676 Columbia Parkway, Cincinnati, OH 45226.

(2) *Requests from mining industry.* Enviromental Investigations Branch, Division of Respiratory Disease Studies, NIOSH, 944 Chestnut Ridge Road, Morgantown, WV 26505.

(b) Requests for health hazard evaluations shall be submitted in writing and signed by either (1) the employer in whose place of employment the substance or physical agent is normally found, or (2) an authorized representative of employees (see § 85.3-1(e)) in the place of employment where the substance or physical agent is normally found.

§ 85.3-1 Contents of a request for health hazard evaluation.

Each request for health hazard evaluation shall contain:

(a) The requester's name, address, and telephone number, if any.

(b) The address of the place of employment where the substance or physical agent is normally found.

(c) The specific process or type of work which is the source of the substance or physical agent, or in which the substance or physical agent is used.

(d) Details of the conditions or circumstances which prompted the request.

(e) A statement, if the requester is not the employer, that the requester is—

Safety and Health Act of 1970 and sec-

(a) • • • (1) The appropriate State

named in the petition, referral to a

V 4 3 / 2 3 4 D E 5 7 8 UMI

(1) an authorized representative or an officer of the organization representing the employees for purposes of collective bargaining or

(2) an employee of the employer and is authorized by two or more employees employed in the same place of employment to represent them for purposes of these Acts (each such authorization shall be in writing and a copy submitted with the request for health hazard evaluation); or

(3) one of three or less employees employed in the place of employment where the substance or physical agent is normally found.

(f) A statement indicating whether or not the name(s) of the requester or those persons who have authorized the requester to represent them may be revealed to the employer by NIOSH.

(g) The following supplementary information if known to the requester:

(1) Identity of each substance or physical agent involved;

(2) The trade name, chemical name, and manufacturer of each substance involved;

(3) Whether the substance or its container or the source of the physical agent has a warning label; and

(4) The physical form of the substance or physical agent, number of people exposed, length of exposure (hours per day), and occupations of exposed employees.

NOTE: NIOSH has developed two forms entitled "Request for Health Hazard Evaluation" and "Request for Mining Health Hazard Evaluation" to assist persons in requesting evaluations. The forms are available upon request from the offices listed in § 85.3(a)(1) and (2) or from the regional Consultant for Occupational Safety and Health in any Regional Office of the Department of Health, Education, and Welfare.

§ 85.4 Acting on requests.

(a) Upon receipt of a request for health hazard evaluation submitted under this part, NIOSH will determine whether or not there is reasonable cause to justify conducting an investigation.

(b) If NIOSH determines that an investigation is justified, a NIOSH officer will inspect the place of employment, collect samples where appropriate, and perform tests necessary to the conduct of a health hazard evaluation, including medical examinations of employees.

(c) If NIOSH determines that an investigation is not justified, the requester will be notified in writing of the decision.

§ 85.5 Authority for investigations.

(a) NIOSH officers who have been issued official NIOSH credentials (Form No. CDC/NIOSH 2.93A) are authorized by the Director, NIOSH, under sections 20(a)(6) and 8 of the OSH Act and sections 501(a)(11) and 103 of the FMSH Act: To enter without delay any place of employment for the purpose of conducting investigations of all pertinent processes, conditions, structures, machines, apparatus, devices, equipment, records, and materials within the place of employment; and to conduct medical examinations, anthropometric measurements, and functional tests of employees within the place of employment as may be directly related to the specific health hazard evaluation being conducted. Investigations will be conducted in a reasonable manner, during regular working hours or at other reasonable times and within reasonable limits. In connection with any investigation, the NIOSH officers may question privately any employer, owner, operator, agent, or employee from the place of employment; and review records required by the Acts and regulations and any other related records.

(b) Areas under investigation which contain information classified by any agency of the United States Government in the interest of national security will be investigated only by NIOSH officers who have obtained the proper security clearance and authorization.

§ 85.7 [Amended]

3. In § 85.7(a), the reference to § 85.3(b)(4)(ii) is deleted and § 85.3-1(e)(2) is substituted therefor.

4. In § 85.7(b), the words "OSH Act or section 501(a)(11) of the "FMSH" are inserted between the words "the" and "Act" in the second sentence.

5. In § 85.7(c), the words "or measurements of physical agents" are inserted between the words "substances" and "to" in the first sentence.

§ 85.10 [Amended]

6. In § 85.10, the acronym "OSH" is inserted between the words "the" and "Act" in the last line of the section.

§ 85.11 [Amended]

7. In § 85.11, paragraph (a) is revised to read as follows:

(a) Upon conclusion of an investigation, NIOSH will make a determination concerning the potentially toxic or hazardous effects of each substance or physical agent specified in the request for health hazard evaluation. At a minimum, the determination will: (1) Identify each substance or physical agent involved and describe the concentrations or levels of the substance or physical agent found in the place of employment and the conditions of use, and (2) state whether each substance or physical agent has potentially toxic or hazardous effects in the concentrations or levels found, as well as the basis for the judgments.

• • • • •

8. In § 85.11(d) the words "or physical agent(s)" are inserted between the words "substance(s)" and "which".

9. In § 85.11, paragraph (e) is revised to read as follows:

• • • • •

(e) Copies of determinations made under the OSH Act will be forwarded to the Department of Labor and the appropriate State agency designated under section 18(b) of the OSH Act. Copies of determinations made under the FMSH Act will be forwarded to the Mine Safety and Health Administration of the Department of Labor, the Bureau of Mines, Department of the Interior, and the State agency which, in the judgment of NIOSH, would benefit the most from the information. If NIOSH determines that any substance or physical agent has potentially toxic or hazardous effects at the concentrations or levels at which it is used or found in a place of employment, and the substance or physical agent is not covered by a safety or health standard established under section 6 of the OSH Act or section 101 of the FMSH Act, NIOSH will immediately submit the determination to the Secretary of Labor, together with all pertinent criteria.

10. Section 85.12 is revised to read as follows:

§ 85.12 Subsequent requests for health hazard evaluations.

If a request is received for a health hazard evaluation in a place of employment in which an evaluation under this part was made previously, NIOSH may make another investigation if, as a result of the passage of time or additional information; another investigation would be consistent with the purposes of the Acts.

PART 85a—OCCUPATIONAL SAFETY AND HEALTH INVESTIGATIONS OF PLACES OF EMPLOYMENT

It is proposed to ament Part 85a as follows:

1. The authority is revised to read:

AUTHORITY: Sec. 8(g), 84 Stat. 1600; (29 U.S.C. 657(g); sec. 508, 83 Stat. 803; 30 U.S.C. 957).

§ 85a.1 [Amended]

2. In § 85a.1, paragraph (a) is revised to read as follows:

(a) Except as otherwise provided in paragraph (b) of this section, the provisions of this part apply to investigations of places of employment which are conducted by NIOSH under sections 20 and 8 of the Occupational

Safety and Health Act of 1970 and sections 501 and 103 of the Federal Mine Safety and Health Act of 1977.

• • • • •

3. In § 85a.2, the introductory text and paragraphs (a), (d), and (i) are revised and new paragraphs (j), (k), (l), and (m) are added. The revised and added provisions read as follows:

§ 85a.2 Definitions.

Any term defined in the Occupational Safety and Health Act of 1970 or the Federal Mine Safety and Health Act of 1977 and not defined below shall have the meaning given it in the Acts. As used in this part:

(a) "OSH Act" means the Occupational Safety and Health Act of 1970 (29 U.S.C. 651 et seq.) and "FMSH Act" means the Federal Mine Safety and Health Act of 1977 (30 U.S.C. et seq.).

• • • • •

(d) "Investigation" means research projects, experiments, demonstrations, studies, and similar activities of NIOSH which are conducted under section 20 of the OSH Act and section 501 of the FMSH Act.

• • • • •

(i) "Place of employment" means any coal or other mine, factory, plant, establishment, construction site, or other area, workplace or environment where work is performed by any employee of an employer.

(j) "MSHA District Office" means any one of the Mine Safety and Health Administration's District Offices.

(k) "BOM" means the Bureau of Mines, Department of the Interior.

(l) "Employee" is given the meaning stated in the OSH Act and includes miners as defined in the FMSH Act.

(m) "Employer" is given the meaning stated in the OSH Act and includes operators as defined in the FMSH Act.

§ 85a.3 [Amended]

4. In § 85a.3, paragraph (a) is revised by deleting the words "for the purpose of section 20 of the Act and this part and pursuant to section 8 of the Act" and substituting the words "under sections 20 and 8 of the OSH Act, sections 501 and 103 of the FMSH Act, and this part".

§ 85a.4 [Amended]

5. In § 85a.4, paragraphs (a)(1) and (a)(3) are revised, the "and" at the end of paragraph (a)(2) is deleted, and a new paragraph (a)(4) is added. The revised and added provisions read as follows:

(a) • • • (1) The appropriate State agency designated under section 18(b) of the OSH Act, or if the State has been preempted as provided under the OSH Act and in the case of the FMSH Act, the State agency which, in the judgment of NIOSH, would benefit the most from the investigation's findings;

(2) • • •individual;

(3) The appropriate Assistant Regional Director, when investigations are conducted under the OSH Act;

(4) The appropriate MSHA District Office; the Director, BOM, and the Assistant Director for Mining, BOM, when investigations are conducted under the FMSH Act.

• • • • •

§ 85a.4 [Amended]

6. In § 85a.4, paragraph (b) is revised by deleting the words "in § 85a.4(a)(1) and (3)" and substituting the words "in § 85a.4(a)(1), (a)(3), and (a)(4)".

7. In § § 85a.4, paragraph (c) is revised by deleting the words "and (a)(3)" and substituting the words "(a)(3) and (a)(4)".

85a.5 [Amended]

8. In § 85a.5, paragraph (b)(1) is revised by inserting the acronym "OSH" between the words "the" and "Act" at the end of the second sentence.

9. In § 85a.5, paragraph (e) is revised by deleting the words "NIOSH and Occupational Safety and Health Administration" and substituting the words "NIOSH, Occupational Safety and Health Administration, and Mine Safety and Health Administration".

§ 85a.7 [Amended]

10. Section 85a.7 is revised by deleting the remainder of the section beginning with the words "appropriate Regional Director • • •" and substituting the words "agencies identified in § 85a.4(a)(1), (a)(3), and (a)(4)."

[6730-01-M]

FEDERAL MARITIME COMMISSION

[46 CFR Part 502]

[Docket No. 78-50]

PETITIONS FOR DECLARATORY ORDER

Proposed Rulemaking

AGENCY: Federal Maritime Commission.

ACTION: Proposed Rule.

SUMMARY: The Commission's rule governing issuance of declaratory orders is proposed to be revised to define the limits of applicability of the rule and to adopt procedures governing notice, participation of persons not named in the petition, referral to a formal docket, availability of discovery and evidentiary hearing, and timing and limits of submissions in declaratory order proceedings. These proposed changes are necessary because of problems encountered in the above specified areas due to lack of guidance in the current rule. The amendments will serve to provide uniform guidelines and elimate current confusion in processing of petitions for declaratory orders.

DATES: Comments on or before December 29, 1978.

ADDRESSES: Comments (original and fifteen copies) to: Secretary, Federal Maritime Commission, Room 11101, 1100 L Street NW., Washington, D.C. 20573.

FOR FURTHER INFORMATION CONTACT:

Francis C. Hurney, Secretary, Federal Maritime Commission, Room 11101, 1100 L Street NW., Washington, D.C. 20573, 202-523-5725.

SUPPLEMENTARY INFORMATION: Rule 68 of the Commission's rules of practice (46 CFR 502.68) currently provides for issuance of declaratory orders. Experience has shown that the rule is deficient due to its failure to outline procedures governing processing of petitions for declaratory orders and its failure to define limits of matters for which it is appropriate to invoke the declaratory order procedures. Specific areas of confusion under the current rule include whether to notice the filing of the petition, whether and to what extent participation by persons not named in the petition (including Hearing Counsel) will be permitted, when referral to a formal docket is appropriate, to what extent discovery and evidentiary procedures should be available, and whether the parties' submissions on the merits must accompany the petition and reply.

The legislative history of the Administrative Procedure Act indicates that Congress recognized that a necessary condition of the ready use of a declaratory order is that it be employed only in situations where the critical facts can be explicitly stated, without the possibility that subsequent events will alter them.[1] In its recent order denying a petition for declaratory order in Docket 76-60, served August 9, 1978, the Commission also recognized that declaratory orders are not suited to dispose of contested factual issues. Accordingly, it will usually not be necessary to resort to discovery procedures or evidentiary hearing in declaratory order proceedings. For this

economic information regarding petitioner) wishing to participate in

V 4 3 / 2 3 4

D E 5

7 8

UMI

reason we are proposing a filing schedule limited to petitions and replies with such filings to be accompanied by the party's complete legal and factual presentation as to its desired disposition of the merits of the petition. Relief from this schedule would be available only if the party could clearly substantiate its need for discovery or evidentiary hearing.

Under this proposal all petitions meeting the requirements of the rules will be referred to a formal docket and notice of filing thereof will be published in the FEDERAL REGISTER. The notice will indicate to what extent replies are permitted. In the case of petitions which are not of general public interest, but which involve matters limited to specifically named parties, replies by persons other than those named in the petition will be permitted only upon grant of intervention by the Commission under Rule 72 (46 CFR 502.72). Participation by the Commission's Bureau of Hearing Counsel will be governed by the same standards as other persons.

In an effort to clarify the circumstances under which petitions for declaratory order are not appropriate, the proposed rule recites the recognized limited purpose of declaratory orders viz. to allow persons to act without peril upon their own view.[2] The rule further distinguishes between declaratory orders and coercive orders and refers to the appropriate sections of the rules under which the latter are to be sought. Finally, the proposed rule makes it clear that declaratory orders are to be limited to matters involving conduct or activity regulated by the Commission under statutes adminstered by the Commission.

Pursuant to section 4 of the Administrative Procedure Act (5 U.S.C. 553) and section 43 of the Shipping Act, 1916 (46 U.S.C. 841(a)), § 502.68 of Title 46 CFR is proposed to be revised to read as follows:

§ 502.68 Declaratory orders.

(a) The Commission may, in its sound discretion, issue a declaratory order to terminate a controversy or to remove uncertainty. Petitions for the issuance thereof shall state clearly and concisely the controversy or uncertainty, shall name the persons and cite the statutory authority involved, shall include a complete statement of the facts and grounds prompting the petition, together with full disclosure of petitioner's interest, shall be served upon all parties named therein, and shall conform to the requirements of Subpart H of this part.

(b) Petitions under this section shall be limited to matters involving conduct or activity regulated by the Commission under statutes administered by the Commission. The procedures of this section shall be invoked solely for the purpose of obtaining declaratory rulings which will allow persons to act without peril upon their own view. Controversies involving an allegation of violation by another person of statutes administered by the Commission, for which coercive rulings such as payment of reparation or cease and desist orders are sought, are not proper subjects of petitions under this section. Such matters must be adjudicated either by filing of a complaint under section 22 of the Shipping Act, 1916 and § 502.62, or by filing of a petition for investigation under § 502.69.

(c) Petitions under this section shall be accompanied by the complete factual and legal presentation of petitioner as to the desired resolution of the controversy or uncertainty, or a detailed explanation why such can only be developed through discovery or evidentiary hearing.

(d) Replies to the petition shall contain the complete factual and legal presentation of the replying party as to the desired resolution, or an explanation why such is not possible. Replies shall conform to the requirements of § 502.74.

(e) No additional submissions will be permitted unless requested by the Commission or the presiding officer. If discovery or evidentiary hearing on the petition is deemed necessary by the parties, such must be requested in the petition or replies. Requests shall state in detail the facts to be developed their relevance to the issues, and why discovery or hearing procedures are necessary to develop such facts.

(f) A notice of filing of any petition which meets the requirements of this section shall be published in the FEDERAL REGISTER. The notice will indicate the time for filing of replies to the petition. If the controversy or uncertainty is one of general pubic interest, and not limited to specifically named persons, opportunity for reply will be given to all interested persons including the Commission's Bureau of Hearing Counsel. In the case of petitions involving a matter limited to specifically named persons, participation by persons not named therein will be permitted only upon grant of intervention by the Commission pursuant to § 502.72. Petitions to intervene shall be submitted on or before the reply date and shall be accompanied by intervener's complete reply including its factual and legal presentation in the matter.

(g) Petitions for declaratory order which conform to the requirements of this section will be referred to a formal docket. Referral to a formal docket is not to be construed as the exercise by the Commission of its discretion to issue an order on the merits, of the petition.

By the Commission.

FRANCIS C. HURNEY,
Secretary.

[7035-01-M]

INTERSTATE COMMERCE COMMISSION

[49 CFR Part 1048]

[Ex Parte No. MC-37 (Sub-No. 30)]

COMMERCIAL ZONES AND TERMINAL AREAS

Washington, D.C., Commercial Zone

AGENCY: Interstate Commerce Commission.

ACTION: Notice of Proposed Rulemaking.

SUMMARY: In response to a petition filed by the Loudon County, VA, Chamber of Commerce, the Commission is opening a proceeding to consider whether to amend its existing regulations set forth in 49 CFR 1048.10 so as to expand the Washington, D.C., commercial zone to include all or a portion of Loudon County.

DATES: Comments should be filed by January 4, 1979.

ADDRESSES: Send comments to: Office of Proceedings Interstate Commerce Commission, Washington, D.C. 20423.

FOR FURTHER INFORMATION CONTACT:

Michael Erenberg Phone: 202-275-7292.

PETITIONER'S PROPOSALS: The Washington, D.C., commercial zone as defined in 49 CFR 1048.10 includes that part of Dulles International Airport which lies within Loudon County, VA, and a very small portion of Loudon County which is within 15 miles of the municipal limits of Washington, D.C. The Loudon County Chamber of Commerce seeks expansion of this commercial zone to include a specified section of eastern Loudon County.

This section can be described as follows:

That portion of Loudon County, VA, not already included in the Washington, D.C., commercial zone, which lies on and east of a line beginning at the junction of U.S. Hwy 15 and the Loudon-Prince William County line and extending along U. S. Hwy 15 to the municipal limits of Leesbury, VA, then along the southern, western, and northern municipal limits of Leesbury, VA, to U.S. Hwy 15, and then along U.S. Hwy 15 to the Potomac River.

The Chamber of Commerce presents various geographic, demographic, and economic information regarding Loudon County in support of its proposal.

The Loudon County Board of Supervisors joins in the Chamber of Commerce's request for expansion of the Washington, D.C., commercial zone. The Board, however, believes that all of Loudon County should be included in this commercial zone. It submits the results of a recent survey of country residents which its believes support this position. The County Board also submits eight letters from representatives of governmental and commercial groups and individual businesses which favor expansion of the Washington commercial zone to include all or part of Loudon County.

COMMENTS AND PROCEDURAL MATTERS

No oral hearing in this proceeding is contemplated. Any person (including petitioner) wishing to participate in the proceeding, in support of or in opposition to the proposals, shall file an original and 11 copies (wherever possible) of written representations, views, and arguments.

Written material or suggestions submitted will be available for public inspection at the office of the Interstate Commerce Commission, 12th and Constitution Ave., Washington, D.C. during regular business hours.

Notice to the general public of the matters under consideration will be given by depositing a copy of this notice in the Office of the Secretary of the Commission for public inspection and by filing a copy with the Director, Office of the Federal Register.

By the Commission.

H. G. HOMME, Jr.,
Secretary.

ACTION

PRIVACY ACT OF 1974

Change of Systems of Records

AGENCY: ACTION.

ACTION: Notice of change in Systems of Records.

SUMMARY: This notice is issued to inform the public that we are combining previously published notices of systems of records and to include mention of records which were in effect prior to September 27, 1975 and were not included in our previous notices. The two systems of records published in this notice covers our general personnel records and our general volunteer records. There is no change in the physical location or in the responsibility for the records. Individuals wishing to gain access to their records may request them from the office identified in the notice or from the Director of our Administrative Services Division.

DATE: This notice is effective December 5, 1978.

ADDRESS: ACTION, 806 Connecticut Avenue, N.W., Washington, D.C. 20525.

FOR FURTHER INFORMATION CONTACT:

Mr. John F. Nolan, Director, Administrative Services Division, phone number 202-254-8105.

SUPPLEMENTARY INFORMATION: This notice combines notices which were published in the FEDERAL REGISTER on September 20, 1977. We initially published notices for each segment of records established for staff and volunteers. We have consolidated those notices to two major systems with subsystems. One system is entitled, "ACTION Staff Applicant and Employee Records" (ASAER), and the other is "ACTION Volunteer Applicant and Service Records System" (AVASR). This change in our method of notification will not affect or impede an individual's access to his or her records.

Our prior notices for the "Peace Corps Trainee and Volunteer Personnel and Pay Records" and the "Employee Pay and Leave Records" did not mention the computer record for the two subsystems. Also, the "Overseas Peace Corps Post Volunteer Service Folder", "Personnel Management Information System" and the "Inactive Employee Service Record Card File" systems were not included in our earlier notices. These were in effect prior to September 27, 1975. Our general routine uses are incorporated by reference and were last published in the FEDERAL REGISTER, Volume 42 on September 20, 1977, at page 47349.

System name:

ACTION Staff Applicant and Employee Records, ACTION/1

System location:

ACTION, Personnel Management Division, 806 Connecticut Avenue, N.W., Washington, D.C. 20525.

Categories of individuals covered by the system:

Current and former employees, applicants; any individual involved in a grievance or grievance appeal or who has filed a complaint with the Department of Labor, Federal Labor Relations Council, Federal Mediation and Conciliation Service, or similar organization; and individuals considered for access to classified information or restricted areas and/or security determinations as contractors, employees of contractors, experts, instructors, and consultants to Federal programs.

Categories of records in the system:

(1) The staff security files contain investigative information regarding an individual's character, conduct, behavior in the community where he or she lives; loyalty to the U.S. Government; arrests and convictions for any violations against the law; reports or interviews with former supervisors; coworkers, associates, educators, etc., reports about the qualifications of an individual for a specific position; reports of inquiries with law enforcement agencies; former employers, educational institutions attended; and other similar information developed from the above. (2) The Grievance, Appeal and Arbitration files contain copies of petitions, complaints, charges, responses, rebuttals, evidentiary material, briefs, affidavits, statements, records of hearings and decisions or findings of fact with respect thereto and incidental correspondence regarding complaints and appeals with respect to grievances and arbitration matters. (3) The Employees Indebtedness files contain records which are primarily correspondence regarding alleged indebtedness of ACTION employees, including employees' responses, the agency's response to the employee and/or creditor and administrative correspondence and records relating to agency assistance to the employee in resolving the indebtedness, if appropriate. (4) The Employee Reemployment and Repromotion Priority Consideration files contain a listing on a person's name and the positions he or she was considered for, dates of consideration and a copy of the individual's latest Standard Form 171 and performance evaluation. (5) The Performance Evaluation files consist of the annual performance evaluations of employee performance prepared by supervisors and reviewed by supervisory reviewing officials, together with comments, if any, by the employees evaluated. (6) The Management-Union Records system consists of automated data printouts showing an employee's name, grade, series, title, organizational entity and other associated data which determines his or her inclusion or exclusion from the bargaining unit under the existing union contract. The record also contains a printout showing the amount of dues withheld from each employee who has authorized such withholding, and other related data. (7) The Personnel Management Information system is a computer-based record which includes data relating to tenure, benefits eligibility, whether former volunteer, end of tour dates, awards, etc., and other data needed by Personnel and agency managers which is used for management purposes. (8) The Inactive Service Record Card contains a record of personnel actions made during employment, forwarding address, reason for leaving, social security number, date of birth, tenure, information and disposition of the official personnel folder.

Authority for maintenance of the system:

The Peace Corps Act, 22 U.S.C 2501 Et Seq., the Domestic Volunteer Service Act of 1973, 42 U.S.C. 4951 Et Seq., provisions of the Federal Personnel Manual, the Foreign Affairs Manual, Executive Orders concerning management relations with employment organizations and Executive Order 10450 and various acts of Congress relating

to personnel investigations authorizing the same by the Civil Service Commission which responsibility can, under Civil Service regulations and law, be delegated in whole or in part to agencies.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

As indicated below the subsystems incorporate all or some of our published routine uses. (1) Staff Security files—in addition to our general routine uses may be disclosed to the CSC as part of the central personnel investigation records system. (2) Grievance, Appeal and Arbitration Records and Files—in addition to our general routine uses may be disclosed and used: (a) To the CSC on request in conjunction with any appeal or in conjunction with its official duties with regard to personnel matters and investigation regarding complaints of Federal employees and applicants. (b) To designate hearing examiners, arbitrators and third-part appellate authorities involved in the hearing or appeal processes. (3) Employees Indebtedness Records and files—may be released under our routine uses numbers 1, 2 and 3 except that under routine use number 1 records may be released only to an appropriate Federal agency and the records may also be referred to a court of law and before an administrative board of hearing to matters related to probation and parole. (4) Employee Reemployment and Repromotion Priority Consideration Records and Files—in addition to our general routine uses may be disclosed to (a) the CSC as part of the CSC personnel management evaluation system and (b) to the CSC for information concerning the reemployment and repromotion rights of individuals covered under the CSC system. (5) Performance Evaluation files—in addition to our general routine uses may be disclosed to the CSC in connection with any request for information or inquiry as to Federal personnel regulations. (6) Management-Union Records—in addition to the general routine uses may be disclosed and used for the following (a) to the ACTION employees union for maintenance of its records with respect to dues and inclusion in the bargaining, (b) to the Treasury Department for preparation of payroll checks with appropriate withholding of dues, (c) to the CSC for union related reporting in the area of management/labor relations. (7) Personnel Management Information System—is used by agency officials for day to day work processing; statistical reports without personal identifiers and for in-house reports relating to personnel management. Information contained in this record is reflected in the individual's official personnel folder. (8) Inactive Service Record Card File—is used by personnel staff to verify service and for day to day work information.

Policies and pratices for storing, retrieving, accessing, retaining and disposing of records in the system: Storage:

Records are maintained in file folders, magnetic tape, lists or looseleaf binders and are stored in metal file cabinets with a three-way combination lock and/or secured rooms with access limited to those employees whose official duties require access.

Retrievability:

Records are indexed by name, social security number or employee number.

Safeguards:

Records are generally available only to ACTION employees having a need for such records in the performance of their duties. Generally the security files are available only to personnel of the Security office or to agency office heads or other agency security personnel and such personnel must have an appropriate security clearance.

Retention and disposal:

After termination, death or retirement or consideration of an applicant the Staff Security files are kept in the security office three years and then retired to a Federal Records Center for 27 years and then destroyed. The Grievance, Appeals and Arbitration files are retained indefinitely in the Personnel Management Division. The Employee Indebtedness files are destroyed on a bi-annual basis or when the problem is resolved. The Employee Reemployment and Repromotion Priority Consideration files are retained according to length of reemployment or repromotion eligibility. The Performance Evaluation files are retained one year or until superseded. The Personnel Management Information system records and the Inactive Employee Service Record Cards are kept indefinitely in the Personnel Management Division. The Management-Union Lists are retained until superseded by a corrected or updated list.

System manager(s) and address:

The Director of Personnel has overall responsibility for records covered by this system. Personnel branch chiefs are responsible for the subsystems as follows: (a) Staff Security Files—Chief, Employee Security Branch; (b) Grievance, Appeal and Arbitration; Employee Indebtedness Files; and Management-Union Records—Chief, Labor and Employee Relations Branch; (c) Performance Evaluation File; Employee Reemployment and Repromotion Priority Consideration File; Personnel Management Information System and the Inactive Employee Service Record File—Chief, Personnel Staffing Branch.

The address for all systems is ACTION, Personnel Management Division, 806 Connecticut Avenue NW., Washington, D.C. 20525.

Record source categories:

From the individual, the official personnel folder, statistical and other information developed by the Personnel Management Division staff, such as end of tour dates, arrival at post dates and within class increase due dates; agency supervisors and reviewing officials, individual employee fiscal and payroll records, alleged creditors of employees, witnesses to any occurrence giving rise to a grievance, appeal or other action, hearing records and affidavits and other documents used or usable in connection with grievance, appeal and arbitration hearings, and information contained in the Staff Security files was obtained from (a) applications and other personnel and security forms furnished by the individual, (b) investigative material furnished by other Federal agencies, (c) by personal investigation or written inquiry from such associates, police departments, courts, credit bureaus, medical records, probation officials, prison officials, and other such sources as may be developed from the above, and (e) from the individual.

Notification procedure:

Individuals wishing to see information in their records, inquire if this system of records contains information about them, or contest/correct information should provide their name, any former name, date of birth, social security number, dates of service, if known, location of service and type of service. Individuals may address their inquiries to the Personnel Management Branch System Manager, the Director of Personnel or to the Director of the Administrative Services Division. All requests should be addressed to ACTION, 806 Connecticut Avenue NW., Washington, D.C. 20525, and should have "Privacy Act Request" noted on the envelope.

Record access procedures:

See "Notification" above.

Contesting record procedures:

See "Notification" above.

System name:

ACTION Volunteer Applicant and Service Records System, ACTION/2.

System location:

This system is made up of subsystems which are located agencywide at

D E 5 7 8 UMI

(d) To the trainee/volunteer's family ... *tents* may be disclosed to designated ...

System manager(s) and address:

V 4 3 / 2 3 4

ACTION offices. These locations are (a) ACTION Headquarters, (b) all ten Domestic Regional and State Offices; (c) all five Service Center offices, area and sub-area Recruitment offices; and (d) each Peace Corps overseas program office. There is at present an excess of 60 such overseas offices and this number fluctuates as programs are added or withdrawn. Specific addresses will be provided upon request to the Director of the Administrative Services Division. Any particular country in which Peace Corps maintains a program may be addressed by writting to the Country Director, Peace Corps, c/o The American Embassy in the country.

Categories of individuals covered by the system:

Current and former ACTION full-time volunteers, trainees and applicants for volunteer service in the Peace Corps, including Peace Corps United Nations Volunteers, or in one of ACTION's full-time Domestic Operations programs including Volunteers in Service to America (VISTA), University Year for ACTION (UYA), ACTION Cooperative Volunteers ACV), Program for Local Service (PLS), and Volunteers in Justice (VIJ). A Record may exist in a subsystem depending on whether a record was established as part of the application, placement, selection and services process. Normally, an applicant record will exist for all applicants and a service record will exist for all trainees and volunteers.

Categories of records in the system:

This major system covers a number of temporary and permanent records established during the applicant, placement, selection and service stages. Most information maintained in this system is furnished by the individual. Generally, the individual is also aware of any necessary investigations being conducted and is either counselled or authorizes such investigations. As the record progresses through the subsystems an applicant, medical, volunteer service, legal or special services file may be established. These records are explained in detail in the following paragraphs. At the processing and program support desk levels temporary day to day sets of records may be used or set up to speed up work processes. The information used at the desk level is usually information extracted from the main file or is a duplicate of information contained in the main file and is utilized only as long as needed for a particular decision, project or period of services. Upon completion of the use of such records they are destroyed or, if a permanent document or record, are forwarded to the ACTION Records Center for consolidation, retirement and ultimate destruction.

(1) *Volunteer Application Folder and Computer Based Record:* This record contains forms related to the application process such as the application, references, invitation to training and other trainee enrollment forms, correspondence relating to the application, copies of other application documents, such as Peace Corps background investigation form, evaluator-recruiter interview forms. Information is extracted from the hard copy to create a computer record which is used to track progress, issue labels for correspondence to the applicant and account for the establishment, retirement and ultimate destruction of the individual record. Statistical information, without personal identifiers, is issued from the computer record.

(2) *Trainee and Volunteer Service and Pay Folder and Computer based record:* This record contains correspondence, forms related to pay allowances, travel and service such as, the Oath, designation of beneficiary, address, social security number, duty station, next of kin, trainee registration form, service and termination documents. Information is coded from hard copy documents to create a record for pay and verfication of service purposes.

(3) *Medical Folder:* The medical record contains medical examination forms and fitness for duty reports, medical claims, correspondence and cables, medical histories, payment records, record of the consulting physician, treatment, hospitalization and disposition of the case. History of psychiatric or psychological treatment.

(4) *Legal Folder:* These records contain a record of any legal matter affecting volunteers or applicants. Includes grievances, appeals, claims litigation, legal queries from volunteers/applicants and answers, and any other matter involving contact between a volunteer/applicant and the Office of the General Counsel.

(5) *Special Services Folder:* This record in set up to cover any unusual or extraordinary action or circumstance happening during service or causing the termination of the volunteer or trainee. These records contain details of extensions, transfers, reenrollments, reinstatements, death or terminations. Details include name, country of assignment, program number, dates of the action, supportive documentation. Supportive documentation would include termination reports, staff recommendations, cables, financial information, travel arrangements and medical clearance. Death cases may also include autopsy report, documentation of account of the death, designation of beneficiary, police report, death certificate, correspondence related to final arrangements, money payments and other financial matters.

(6) *Overseas Post Service and Medical Records:* Contain correspondence and forms relating to in country service such as, records of all payments or accrued credit to volunteers and trainees, advances or other items due to the government from volunteers or trainees, monthly living allowances, leave allowances, settling in allowance, property assignments. The medical record is maintained at post by the Peace Corps Health official. It contains the entrance physical and dental examination records and record of treatment received while in Peace Corps.

(7) *Headquarters International Operations Region Correspondence Files:* These files contain copies and originals or correspondence to and from the volunteers of trainees regarding project activities.

(8) *United Nations Volunteers Records:* These records contain applications, correspondence related to the applicant/placement process, other records connected with the application, training and placement of persons wishing to serve or serving as United Nations Volunteers. For short periods of time references furnished by the applicant may be kept in the file but they are transferred to the ACTION Office of Recruitment which has the responsibility for the selection process. Similarly, medical history forms are collected but are immediately forwarded to the United Nations or the Health Services Division of ACTION. Upon the end of service or inactivation of the record they are forwarded to the ACTION Records Center for combining and retirement as regular Peace Corps records.

Authority for maintenance of the system:

The Domestic Volunteer Service Act of 1973, 42 U.S.C. 4951 et seq., The Peace Corps Act, 22 U.S.C. 2501 et seq., and The Budget and Accounting Act of 1950.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

The contents of these files and records may be disclosed and used as follows:

(a) A stated in our general routine uses unless specifically stated otherwise under this heading.

(b) To the Domestic Volunteer's sponsor concerning placement, performance, support and related matters.

(c) To Peace Corps Volunteer host country officials to obtain visas, inform of pending arrival of the trainee/volunteer and for review of their qualifications for the program.

(d) To the trainee/volunteer's family or next of kin so that he or she may be located in case of emergency.

(e) To the Social Security Administration for crediting of social security accounts and reporting withholdings.

(f) To the Internal Revenue Service to report on taxes paid and for income tax purposes.

(g) To Federal agencies having a need to verify volunteer eligibility for Federal employment under provisions of Executive Order 11103.

(h) To the Treasury Department for purposes of issuing payroll checks, readjustment allowance checks or to report overpayments.

(i) For Peace Corps volunteers, to appropriate overseas U.S. Government agencies for monthly payroll preparation.

(j) To verify active or former volunteer service.

(k) Regarding the legal record: Information contained in the legal file is not routinely disclosed outside the agency except in the following circumstances: 1. To the Department of Justice in conjunction with litigation or potential litigation in situations which the Department may be called upon to provide representation to the Agency. 2. In circumstances set forth in paragraphs 1, 2, 7 and 10 of our general routine uses.

(l) Regarding the United Nations Volunteer records: In addition to our general routine uses the contents of these records and files may be disclosed and used as follows: 1. To designated officers and employees of the United Nations having a responsibility for the selection and placement of U.N. Volunteers. 2. To officials of a proposed host country desiring the assignment or placement of U.N. Volunteers.

(m) Regarding Medical records: In addition to our general routine uses the medical records and files may be disclosed or used as follows: 1. To the contractor under the ACTION Health Policy, for purposes of adjudication of volunteer claims. 2. To the Office of Workers Compensation, U.S. Department of Labor in connection with claims under the Federal Employee's Compensation Act. 3. To a physician or other medical personnel treating or involved in the medical treatment and/or care of an applicant, trainee or volunteer and having a need for such records for the provision of the medical treatment or care. In situations where it is practicable the individual's consent will be obtained before releasing such information. 4. To psychiatrists or clinical psychologists when necessary for treatment. To the extent practicable disclosure will not be made without approval of the individual. The existence of psychiatric or psychological records *but not their contents* may be disclosed to designated officers and employees of other agencies and departments of the Federal government and the District of Columbia government having an interest in an individual for employment purposes including a security clearance or access determination. 5. In death cases to notify designated life and/or personal property insurance companies to obtain payment of insurance benefits; to notify the Office of the Vice-President for the preparation of condolence letters; to the Department of Labor, Office of Federal Employee's Compensation; to the family and next of kin; and for Peace Corps Volunteers, the Department of State.

Policies and practices for storing, retrieving, accessing, retaining and disposing of records in the system: Storage:

Files or records are maintained in folders, log books, cards, magnetic tape or disc packs with tape backup and are filed in metal filing cabinets with a manipulation proof combination lock or in a room with a combination lock in the door, or in a locked room when not in use.

Retrievability:

The majority of the subsystem records are retrievable alphabetically by the last name. A few are retrievable by the social security number; by subject headings but access may be gained by reference to an alphabetical name index; or by alphabetical order by country of assignment.

Safeguards:

Records are generally available only to ACTION employees with specifically assigned duties which requires working with the records on a day to day basis. They are available to other ACTION employees having the need for such records in the performance of their official duties. Personnel screening is employed to prevent unauthorized disclosure.

Retention and disposal:

Most volunteer records are kept no longer than seven years. The Domestic Operations Full-Time Volunteer Census Master File, the Domestic Operations Volunteer Status Change Card and the Peace Corps Personnel and Payroll Computer Record and the Peace Corps Description of Service records are kept permanently. The legal files are kept 27 years. The medical records are kept for 25 years. Applications rejected immediately are destroyed in six months. Applications, including any medical records, rejected before enrollment as a volunteer are destroyed in one year.

System manager(s) and address:

As the record flows from one state to another, or if a record is established for a specific purpose, the system manager is the agency official responsible for the particular function. If an individual is in doubt as to whom to contact he or she should contact the Director, Administrative Services Division.

The subsystem managers are:

a. The five ACTION Service Center Managers located as the New York Service Center; Atlanta Service Center; Chicago Service Center; Dallas Service Center and the San Francisco Service Center.

b. The Administrative Officers for the ten Domestic Operations Regional offices.

The following officers are located at ACTION, 806 Connecticut Avenue, NW., Washington, D.C. 20525:

c. The Chief, International Operations Peace Corps Placement Branch.

d. The Chief, Health Benefits and Analysis Branch.

e. The Chief, Medical Screening and Services Branch.

f. The Chief, Medical Operations Branch.

g. The Chief, Domestic Volunteer Payroll Section.

h. The Director, Planning and Evaluation Division.

i. The General Counsel.

j. The Chief, International Volunteer Support Services Branch.

k. The Chief, ACTION Records Center.

l. The Chief, Special Services Branch.

m. The Director, Office of Multilateral and Special Programs.

n. Peace Corps Country Desk Officers.

The Following officers can be contacted at the post of assignment:

o. Peace Corps Country Directors Overseas.

p. Peace Corps Medical Officers Overseas.

Notification procedure:

Individuals wishing to see information in their records, inquire if this system or records contains information about them, or contest/correct information should provide their name, any former name, date of birth, social security number, dates of service if known, location of service and type of volunteer (Peace Corps or VISTA). Individuals should address their inquiries to the subsystem manager or the Director, Administrative Services Division, Office of Administrative Services Division, Office of Administration and Finance, ACTION, 806 Connecticut Avenue, NW., Washington, D.C. 20525. All inquiries should have "Privacy Act Request" noted on the envelope.

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

CERTAIN STOCKYARDS AND LIVESTOCK MARKETS

Approval

The regulations in 9 CFR Part 76, as amended, contain restrictions on the interstate movement of swine and swine products to prevent the spread of hog cholera and other swine diseases. This document adds certain livestock markets to the list of livestock markets approved for purposes of the regulations on the basis of a determination of their eligibility for such approval under § 76.18 of the regulations and removed from the list certain other livestock markets which have been found no longer to qualify for such approval.

The following livestock markets preceded by an asterisk are specifically approved to handle any class of swine and those livestock markets *not* preceded by an asterisk are specifically approved to handle slaughter swine only:

ALABAMA

Capital Stockyard, Montgomery.
*Louisville Auction Company, Louisville.
*Pickens County Livestock Commission Company, Aliceville.

ARKANSAS

*Lafayette County Livestock Co., Lewisville.
*Magnolia Livestock Auction, Magnolia.

CALIFORNIA

*Dixon Livestock Auction Company, Dixon.

COLORADO

*High Plains Marketing Assn., Inc., Burlington.

IOWA

*Story City Auction Sales, Inc., Story City.

KANSAS

Ogle Hog Company, Emmett.
Stafford Brothers Hog Market, Fort Scott.
*The Stockmans Livestock Exchange, Belleville.
*Fort Scott Sale Company, Inc., Fort Scott.

KENTUCKY

*Clay-Wachs Stockyard, Lexington.

MASSACHUSETTS

J. P. Hass & Sons, Rehoboth.

MINNESOTA

*Minnesota Feeder Pig Market, Windom.
Smith Livestock Market, Granada.
*Sleepy Eye Auction Market, Sleepy Eye.

MISSISSIPPI

W. N. Heidel, Jr. Assembly Point, Vaughn.
Mattox Livestock Dealer, Inc., Belden.
*Southwest Stockyard, Port Gibson.

MISSOURI

County Line Hog Market, Cainsville.
Five County Collection Center, Mountain Grove.
*Fruitland Livestock Market, Inc., Jackson.
*Donald Ghere Marketing Facility, Butler.
Heinold Hog Market, Trenton.
George A. Hormel & Co., Princeton.
*Interstate Producers Livestock Assn., Deepwater.
*Kingsville Livestock Auction, Kingsville.
*Midstates Livestock Market, Inc., Maryville.
*Olean Livestock Market, Inc., Eldon.
*Tina Feeder Pig Auction, Tina.
*West Plains MFA Feeder Pig Yards, West Plains.

NEBRASKA

*Humboldt Sale Barn & Humboldt Hog Market, Humboldt.
*Lexington Livestock Market, Lexington.
*Pender Livestock, Inc., Pender.
Weichman Pig Company, Inc., Fremont.

NEW MEXICO

B & D Hog Company, Clovis.
Clovis Hog Market, Clovis.
Portales Livestock Commission Company, Portales.

NORTH CAROLINA

M & R Livestock Co., Inc., Dunn.
Norwood Stockyard at Charlotte, Charlotte.
Tommie Turner Livestock Market, Pink Hill.
Trenton Livestock, Inc., Richlands.
R. O. Whitley, Inc., Buying Station, Como.

NORTH DAKOTA

*Tri-State Auction Market, Inc., Hettinger.

OHIO

*Middendorf Stockyards Company, d.b.a. Kenton Farmers Market, Kenton.

OKLAHOMA

*Antlers Livestock Auction, Inc., Antlers.
*Comanche Hog Sale, Ardmore.
*Comanche Hog Sale, Comanche.
*Delaware County Livesock Auction, Inc., Grove.
*Tonkawa Livestock Exchange, Tonkawa.
*Welch Livestock Auction, Welch.

PENNSYLVANIA

*Perkiomenville Livestock & Sales, Inc., Perkiomenville.
*Wayne County Auction Barn, Inc., Honesdale.

WISCONSIN

Peshtigo Livestock Sales, Peshtigo.
*Ray Wolosek, Sr., Wisconsin Rapids.

(Sec. 2, 32 Stat. 792, as amended; secs. 4 and 5, 23 Stat. 32, as amended; sec. 1, 75 Stat. 481; sec. 1, 32 Stat. 791, as amended; secs. 3 and 4, 33 Stat. 1265, as amended; secs. 3 and 11, 76 Stat. 130, 132 (21 U.S.C. 111-113, 114g 120, 125, 126, 134b, 134f; 37 F.R. 28464, 28477; 38 F.R. 1914)).

Effective date. The foregoing notice shall become effective non December 5, 1978.

This action imposes certain restrictions necessary to prevent the spread of hog cholera and relieves certain restrictions presently imposed. It should become effective promptly to accomplish its purpose in the public interest and to be of maximum benefit to persons subject to the restrictions which are relieved. Accordingly, under the administrative procedure provisions of 5 U.S.C. 553, it is found upon good cause that notice and other public procedure with respect to this action are impracticable and contrary to the public interest, and good cause is found for making this notice effective less than 30 days after publication in the FEDERAL REGISTER

Done at Washington, D.C., this 29th day of November 1978.

NOTE. This "Notice of Approval" has been reviewed under the USDA criteria established to implement Executive Order 12044, "Improving Government Regulations" and has not been designated to be "significant" under these criteria.

PIERRE A. CHALOUX,
Deputy Administrator,
Veterinary Services.

NOVEMBER 29, 1978.

APPLICATION FOR AN ALL-CARGO AIR SERVICE CERTIFICATE

In accordance with Part 291 (14 CFR Part 291) of the Board's Economic Regulations (effective November 9, 1978), notice is hereby given that the Civil Aeronautics Board has received an application, Docket 33977, from Pacific Alaska Airlines, Inc., of Paine Field, Everett, Washington, 98304, for an all-cargo air service certificate to provide domestic cargo transportation.

Under the provisions of § 291.12(c) of Part 291, any interested person may file an answer in opposition to this application on or before December 26, 1978. An executed original and six copies of such answer shall be addressed to the Docket Section, Civil Aeronautics Board, Washington, D.C. 20428. It shall set forth in detail the reasons for the position taken and must relate to the fitness, willingness, or ability of the applicant to provide all-cargo air service or to comply with the Act or the Board's orders and regulations. The answer shall be served upon the applicant and state the date of such service.

PHYLLIS T. KAYLOR,
Secretary.

[Docket No. 33363]

FORMER LARGE IRREGULAR AIR SERVICE INVESTIGATION

Postponement of Hearing

The hearing on the application of Land-Air Corp., heretofore set for 21 November 1978 (43 FR 53784, November 17, 1978) and postponed to 28 November 1978 (43 FR 55271, November 27, 1978) is for good cause shown postponed to 6 December 1978 at 9:00 a.m. at the address heretofore set, hearing Room B.

Dated at Washington, D.C., 28 November 1978.

RUDOLF SOBERNHEIM,
Administrative Law Judge.

[Docket No. 28298, et al.]

TRANS WORLD AIRLINES, INC., RESPONDENT

Postponement of Hearing on Enforcement Proceeding

By motion dated November 22, 1978, respondent Trans World Airlines, Inc. (TWA) has requested the deferral of the hearing in this matter from December 6 and 7, 1978 until final action by the Board in Docket 29044. In the alternative, TWA requests a 31 day postponement to allow the parties one last opportunity to settle the matter amicably. The Bureau of Consumer Protection and three complainants (Gordon, Goland, and Health Research Group) do not oppose either part of TWA's motion. Action on Smoking and Health (ASH), which represents the majority of the complainants, opposes the deferral of the hearing until the Board has acted in Docket 29044, but does not oppose the 31 day postponement.

I am not persuaded that the hearing in the present matter should be deferred pending the outcome in Docket 29044. The rulemaking proceeding in that matter has been pending for some time and may not be concluded for a substantial additional time period. Meanwhile, the evidence in this proceeding could grow stale. The Board has taken no action, either in instituting Docket 29044 or in holding in abeyance the Eastern Air Lines enforcement case (Docket 26363, *et al.*), which is inconsistent with proceeding immediately to hear the present case.

However, I am convinced that a short postponement might serve a useful purpose. In addition to the possibility that such a postponement might facilitate a settlement, it would appear that the month of January would be more convenient for some of the witnesses to be called in this proceeding. (See Answer of the Bureau of Consumer Protection, dated November 28, 1978).

Accordingly, *It is ordered* That: The hearing in the above-entitled proceeding, which was assigned to be held on December 6 and 7, 1978 (43 FR 51435, November 3, 1978), is postponed to January 16 through 18, 1979, beginning at 10:00 a.m. (local time) on January 16, and will be held in Room C, Hearing Room 1003, Universal North

COMMISSION ON CIVIL RIGHTS

VERMONT ADVISORY COMMITTEE

Amendment

Notice is hereby given, pursuant to the provisions of the Rules and Regulations of the U.S. Commission on Civil Rights, that a planning meeting of the Vermont Advisory Committee (SAC) of the Commission originally scheduled for November 28, 1978 (Fr Doc. 78-32490) on page 54115 has been changed to December 12, 1978.

The meeting place and time will remain the same.

Dated at Washington, D.C., November 30, 1978.

JOHN I. BINKLEY,
Advisory Committee Management Officer

CIVIL SERVICE COMMISSION

COMMITTEE ON PRIVATE VOLUNTARY AGENCY ELIGIBILITY

Charter Renewal

Pursuant to Section 14(b) of the Federal Advisory Committee Act, notice is hereby given to the renewal of the charter of the Committee on Private Voluntary Agency Eligibility. The Committee was established under the authority of Executive Order 10927. The objective of the Committee is to insure through prior review of applications and supplementary financial and accounting data that only responsible and worthy national voluntary agencies are authorized to solicit Federal employees and military personnel on the job.

The renewal of this Committee is in the public interest. A new charter for the Committee has been approved and filed as required.

DONALD J. BIGLIN,
Advisory Committee Management Officer.

DEPARTMENT OF ENERGY

NATIONAL PETROLEUM COUNCIL, TASK GROUPS OF THE COMMITTEE ON MATERIALS AND MANPOWER REQUIREMENTS

Meetings

Notice is hereby given that three task groups of the Committee on Materials and Manpower Requirements will meet in December 1978 and January 1979. The National Petroleum Council was established to provide advice, information, and recommendations to the Secretary of Energy on matters relating to oil and natural gas or the oil and natural gas industries. The Committee on Materials and Manpower Requirements will analyze the potential constraints in these areas which may inhibit future production and will report its findings to the National Petroleum Council. Its analysis and findings will be based on information and data to be gathered by the various task groups. The three task groups scheduling meetings are the Task Group on Tubular Steel, the Task Group on Geological and Geophysical Services, and the Task Group on Production Equipment. The time, location and agenda of each task group meeting follows:

The first meeting of the Tubular Steel Task Group will be on Wednesday, December 13, 1978, starting at 9:00 a.m. in the Conference Room of the U.S. Steel offices on the 20th floor of the Tenneco Building, 1010 Milam Street, Houston, Texas.

The tentative agenda for the meeting follows:

1. Introductory remarks by Chairman and Government Cochairman.
2. Discussion of scope of the NPC study on Materials and Manpower Requirements.
3. Discussion of the study methodology to be employed by the Tubular Steel Task Group.
4. Discussion of the timetable of the Tubular Steel Task Group.
5. Discussion of any other matters pertinent to the overall assignment of the Tubular Steel Task Group.

The first meeting of the Geological and Geophysical Task Group will be on Friday, December 15, 1978, starting at 10:00 a.m. in the office of Mr. Grant A. Dove, Marriott Inn North, 7750 LBJ Freeway North, Dallas, Texas.

The tentative agenda for the Chairman and Government Cochairman.

2. Discussion of scope of the NPC study on Materials and Manpower Requirements.
3. Discussion of the study methodology to be employed by the Geological and Geophysical Services Task Group.
4. Discussion of the timetable of the Geological and Geophysical Services Task Group.
5. Discussion of any other matters pertinent to the overall assignment of the Geological and Geophysical Services Task Group.

The first metting of the Production Equipment Task Group will be on Wednesday, January 10, 1979, starting at 10:00 a.m. in Room 1992 on the 19th floor of the Exxon Building, 800 Bell Avenue, Houston, Texas.

The tentative agenda for the meeting follows:

1. Introductory remarks by Chairman and Government Cochairman.
2. Discussion of scope of the NPC study on Materials and Manpower Requirements.
3. Discussion of the study methodology to be employed by the Production Equipment Task Group.
4. Discussion of the timetable of the Production Equipment Task Group.
5. Discussion of any other matters pertinent to the overall assignment of the Production Equipment Task Group.

The meetings are open to the public. The chairmen of the task groups are empowered to conduct the meetings in a fashion that will, in their judgment, facilitate the orderly conduct of business. Any member of the public who wishes to file a written statement with the task groups will be permitted to do so, either before or after the meeting. Members of the public who wish to make oral statements should inform James R. Hemphill, Office of Resource Applications, 202-566-7575, prior to the meeting and reasohable provision will be made for their appearance on the agenda.

Transcripts of the meeting will be available for public review at the Freedom of Information Public Reading Room, Room GA 152, DOE, Forrestal Building, 1000 Independence Avenue, SW., Washington, D.C., between the hours of 8 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays. Any person may purchase a copy of the transcripts from the reporter.

Issued at Washington, D.C., on November 29, 1978.

GEORGE S. MCISAAC,
Assistant Secretary for Resource Applications.

Economic Regulatory Administration

ASSESSMENT OF SHORT-TERM MIDDLE DISTILLATE AND GASOLINE SUPPLY SITUATION AND PRICE TRENDS

Conference

AGENCY: Economic Regulatory Administration, Department of Energy.

ACTION: Notice of conference.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) will conduct a conference on Friday, December 15, 1978, at 9:30 a.m. The purpose of the conference is to obtain an assessment of the short-term middle distillate and gasoline supply situation and price trends. DOE is inviting to participate representatives of the domestic oil companies, terminal operators, and marketers, together with interested states, members of Congress, consumer groups, and other interested Federal Agencies. The public may attend to observe. Written comments on the meeting are invited.

DATES: Conference Date: December 15, 1978, 9:30 a.m. Requests to speak by December 13, 1978, 4:30 p.m. Speakers to bring written statements on day of conference. Comments by December 26, 1978, 4:30 p.m.

ADDRESSES: Written comments and requests to speak to Public Hearing Management, Box WI, Economic Regulatory Administration, 2000 M Street, NW., Room 2313, Washington, D.C. 20461. Telephone requests to speak to 202-254-5201.

CONFERENCE LOCATION: Departmental Auditorium, Conference Room B, between 12th and 14th Streets on Constitution Avenue, NW., Washington, D.C.

FOR FURTHER INFORMATION CONTACT:

Alan T. Lockard (Fuels Regulation), 2000 M Street, NW., Room 6222, Washington, D.C. 20461, 202-254-7422.

Robert Reinstein (Regulations and Emergency Planning), 2000 M Street, NW., Room 6003, Washington, D.C. 20461, 202-254-9766.

Robert C. Gillette (Hearings Procedures) 2000 M Street NW., Room 2214, Washington, D.C. 20461, 202-254-5201

Joel Yudson (Office of the General Counsel), 12th & Pennsylvania Avenue, NW., Room 5119, Washington, D.C. 20461, 202-566-9565.

SUPPLEMENTARY INFORMATION:

I. BACKGROUND

The DOE has recently become aware of increased public concern over the adequacy of supplies for the coming winter of middle distillates. (heating oils and kerosene) and gasoline, and the supply adequacy for next spring and summer of gasoline. Further concern has been expressed over recent price trends for gasoline and middle distillates.

Specifically, motor gasoline stocks are lower than they were last year and below the average level achieved for the same period in 1972-1977. Middle distillate stocks are lower than last year, although about at the average level achieved during the same period in 1972-1977. At the same time, demand for gasoline has exceeded expected levels for the post-summer period. Particularly, there are indications that gasoline demand, which historically has abated following summer peaks, has continued at relatively high levels. Because refiners are unable to maximize both gasoline and middle distillate production simultaneously, the continued level of motor gasoline demand has necessitated many refiners to continue to maximize gasoline production, at the expense of middle distillate production. In addition, it appears that a few refiners are also having difficulties in meeting demand for unleaded gasoline of higher octane than regular grade unleaded gasoline.

In response to these concerns and to assess the situation more accurately, the DOE is convening a conference to receive comments from concerned states, members of Congress, and consumer groups and to gather information on these matters from industry representatives, i.e., oil companies, terminal operators, and marketers. Representatives of other interested Federal agencies may also participate.

II. AGENDA

The conference will begin with an opening statement by the Department and an assessment of the current supply and price situation for middle distillates and gasoline. Following the DOE presentation, we will invite representatives of state governments, members of Congress and representatives of consumer groups to express their concerns and views. We are interested in receiving specific factual assessments as it affects those groups.

DOE will then permit industry representatives to present their analyses and forecasts of the short-term overall supply and demand situations for middle distillates and motor gasoline. Discussions of supply should focus on the adequacy of stocks, production capability, and import availability. A general discussion concerning the factors and pressures causing recent price trends is also requested.

We will prohibit any company-specific discussion of production, marketing or pricing, but specific discussion of aggregate data and information to be supplied by and to participants will be permitted. Any participant who believes that the discussion poses an antitrust risk may leave and ask that the record note that fact. Representatives of the Department of Justice and/or DOE's Office of General Counsel will be in attendance.

III. CONFERENCE PROCEDURES

The conference will be presided over by a senior official of DOE. A transcript of the conference will be prepared and made available for inspection at the ERA's Office of Public Information, Room B110, 2000 M Street, NW., Washington, D.C., between the hours of 8 a.m. and 4:30 p.m., Monday through Friday. Anyone may purchase a copy of the transcript of the conference from the reporter.

Written and telephonic requests to speak should be submitted by December 13, 1978, as set forth in the "Addresses" section. Each participant who requests to speak at the conference is requested to provide on the day of the conference at the location of the conference one hundred copies of his or her prepared statement.

Time constraints may limit the times for actual oral presentation depending on the number of speakers requesting to be heard. In this connection, DOE reserves the right to select the speakers to be heard to receive the broad range of views offered. The conference will be non-evidentiary and of a non-adversary nature. There will be no cross-examination of the participants. Questions of participants may only be asked by DOE officials. The presiding official will announce any additional procedures necessary at the conference.

IV. FURTHER DATA SUBMISSIONS

To augment the information received at the conference, we intend to seek written data separately from relevant segments of the petroleum industry. A questionnaire is being prepared by ERA and will be distributed shortly. The information obtained therefrom will be aggregated and made publicly available.

V. WRITTEN COMMENTS

Anyone may comment on the subject of this conference in writing. Identify comments on the outside envelope and on documents you submit with the description "Motor Gasoline and Middle Distillate Conference", Box WI, at the address noted in the "Addresses" section of this notice. Submit fifteen copies of your com-

D E 5 7 8 UMI

ments by December 26, 1978, 4:30 p.m. All comments received will be available for public inspection in the ERA Official Public Inspection Room, Room B110, 2000 M Street, NW., Washington, D.C., between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday. Any information or data considered by the person furnishing it to be confidential must be so identified and submitted in writing, in one copy only, in accordance with procedures set forth in 10 CFR 205.9(f). Any material not accompanied by a statement of confidentiality will be considered to be nonconfidential. The Economic Regulatory Administration reserves the right to determine the confidential status of the information or data and to treat it according to its determination.

Issued in Washington, D.C., November 30, 1978.

HAZEL R. ROLLINS,
Acting Administrator, Economic Regulatory Administration.

Office of Hearings and Appeals

CASES FILED

Week of November 10, 1978 Through November 17, 1978

Notice is hereby given that during the week of November 10, through November 17, 1978, the appeals and applications for exception or other relief listed in the Appendix to this Notice were filed with the Office of Hearings and Appeals of the Department of Energy.

Under the DOE's procedural regulations, 10 CFR, Part 205, any person who will be aggrieved by the DOE action sought in this case may file with the DOE written comments on the application within ten days of service of notice, as prescribed in the procedural regulations. For purposes of those regulations, the date of service of notice shall be deemed to be the date of publication of this Notice or the date of receipt by an aggrieved person of actual notice, whichever occurs first. All such comments shall be filed with the Office of Hearings and Appeals, Department of Energy Washington, D.C. 20461.

MELVIN GOLDSTEIN,
Director, Office of Hearings and Appeals.

NOVEMBER 29, 1978.

List of Cases Received by the Office of Hearings and Appeals

[Week of Nov. 10 through 17, 1978]

Date	Name and location of applicant	Case No.	Type of submission
Nov. 10, 1978	Anadarko Production Co., Washington, D.C.	DSG-0038 and DES-0121.	Petition for special redress and stay request. If granted: The Office of Hearings and Appeals would review the Oct. 27, 1978, denial of the application to quash a supbena submitted by Anadarko Production Co. and the firm's compliance with the subpena would be stayed pending a determination of the petition for special redress.
Nov. 13, 1978	Bob Adams (St. Louis Post), Washington, D.C.	DFA-0247	Appeal of an information request denial. If granted: The DOE's Aug. 23, 1978, information request denial would be rescinded and Bob Adams would receive access to EEO-1 forms and other data on hiring practices.
Do	Continental Oil Co., Houston, Tex	DES-1979	Stay request. If granted: Continental Oil Co.'s base period suply obligations to certain refiners would be stayed pending a final decision on the application for exception which the firm has filed.
Do	Gasoline Merchants Inc., Whaltam, Mass	DEE-2003	Exception to change suppliers. If granted: Gasoline Merchants would be assigned a new base period supplier of motor gasoline to replace Litchfield Oil Co.
Do	Gulf Oil Corp., Houston, Tex	DFA-0248	Appeal of an information request denial. If granted: The Sept. 26, 1978, information request denial would be rescinded and Gulf Oil Corp. would receive access to certain DOE materials relating to Advance Sales Corp.
Do	Piedmont Natural Gas Co., Inc., Greensboro, N.C.	DES-0122 and DST-0122.	Stay request and request for temporary stay. If granted: Piedmont Natural Gas Co., Inc., would receive a stay of the provisions of 10 CFR Part 211, pending a final determination on its application for adjustment to its base period use of propane.
Nov. 14, 1978	Belcher Oil Co., Washington, D.C	DFA-0249	Appeal of an information request denial. If granted: The DOE's Oct. 11, 1978, information request denial would be rescinded Belcher Oil Co. would receive access to DOE materials regarding Florida Power & Light.
Do	Champlin Petroleum Co., Corpus Christi, Tex.	DEN-1309	Interim order. If granted: Champlin Petroleum Co. would be permitted to sell certain quantities of crude oil produced from the State 18 lease at upper tier ceiling prices pending the issuance of a decision and order in final form in connection with an application for exception which the firm has filed.
Do	Chevron U.S.A., Inc., San Francisco, Calif	DEE-2004	Price exception (sec. 212.73). If granted: Chevron U.S.A., Inc., would be permitted to sell crude oil produced from the Vickers Rindge located in the Inglewood field, Los Angeles County, Calif., at upper tier ceiling prices.
Do	Crown Central Petroleum Corp., Baltimore, Md.	DRD-0013	Motion for discovery. If granted: Discovery would be granted to Crown Central Petroleum Corp. in connection with its challenge to a proposed remedial order, Case No. DRO-0111.
Do	Energy Cooperatives, Inc., Washington, D.C.	DEA-0252	Appeal of the entitlements notice. If granted: The DOE's August 1978, entitlements notice would be amended and the entitlement sales obligations of Energy Cooperatives, Inc., would be recomputed to elminate the $0.21/bbl. factor set forth in sec. 211.67(f)(4).
Do	McAlester Fuel Oil Co., Houston, Tex	DEE-2010	Price exception (sec. 212.73). If granted: McAlester Fuel Oil Co. would be permitted to sell the crude oil produced from its Kelly Field Tyler Sand Unit located in Musselshell County, Mont., at upper tier ceiling prices.
Do	R. W. Tyson Producing Co., Jackson, Miss	DXE-2005	Extension of relief granted in *R. W. Tyson Producing Co.*, 2 DOE Par. —— (July 26, 1978). If granted: R. W. Tyson Producing Co. would continue to sell crude oil produced from its Glazier field located in Perry County, Miss., at upper tier ceiling prices.
Nov. 15, 1978	A.H. Todd & Sons, Inc., Fleischmanns, N.Y	DEE-2009	Exception to the reporting requirements. If granted: A. H. Todd & Sons, Inc., would no longer be required to submit reports concerning No. 2 fuel oil to the Department of Energy.
Do	Champlin Petrolem Co., Fort Worth, Tex	DEE-2011	Price exception (sec. 212.73). If granted: Champlin Petroleum Co. would be permitted to sell the crude oil produced from its Mary Ellen O'Connor field located in Refugio County, Tex., at upper tier ceiling prices.

List of Cases Received by the Office of Hearings and Appeals—Continued

[Week of Nov. 10 through 17, 1978]

Date	Name and location of applicant	Case No.	Type of submission
Do	Columbia Gas System, Inc., Wilmington, Del.	DEE-2006 and DEE-2017.	Price exception (sec. 212.165(a)). If granted: Columbia Gas System, Inc., would be permitted to increase its first sale prices of natural gas liquids and natural gas liquid products to reflect on a dollar-for-dollar basis increased processing costs which it has incurred since the firm's first quarter of 1973 at the Kenova and Siloan plants.
Do	Data Technology Industries, Riverdale, Md	DFA-0250	Appeal of an information request denial. If granted: The DOE's Nov. 2, 1978, information request denial would be rescinded and Data Technology Industries would receive access to information pertaining to the technical proposal submitted by Sterling Systems, Inc.
Do	Lago Petroleum Co., Houston, Tex	DEE-2008	Price exception (sec. 212.73). If granted: Lago Petroleum Co. would be permitted to sell the crude oil produced from its Wharton South field located in Wharton County, Tex., at upper tier ceiling prices.
Do	Mobil Oil Corp., New York, N.Y	DXE-2007	Extension of relief granted in *Mobil Oil Corporation*, 2 DOE Par. —— (Sept. 28, 1978). If granted: Mobil Oil Corp. would be permitted to sell the crude oil produced from the North Russell Devonian field, located in Gaines County, Tex., at upper tier ceiling prices.
Do	O'Meara Bros., New Orleans, La	DXE-2013	Extension of relief granted in *O'Meara Brothers*, 1 DOE Par. 81,089 (Mar. 8, 1978). If granted: O'Meara Bros. would continue to sell the crude oil produced from the Louisiana State Lease 2192, at upper tier ceiling prices.
Do	Pennzoil Producing Co., Houston, Tex	DXE-2012	Extension of relief granted in *Pennzoil Producing Company*, 2 DOE Par. —— (Aug. 7, 1978). If granted: Pennzoil Producing Co. could continue to sell crude oil produced from the Woodruff Unit at market prices.
Do	Phillips Petroleum Co., Bartlesville, Okla	DFA-0251	Appeal of an information request denial. If granted: The DOE's Oct. 17, 1978, information request denial would be rescinded and Phillips Petroleum Co. would receive access to certain DOE documents.
Nov. 16, 1978	Guam Oil & Refining Co., Inc., Washington, D.C.	DEE-2015	Exception from the entitlements program. If granted: Guam Oil & Refining Co. would be granted an exception from the provisions of 10 CFR 211.67 so as to relieve the firm from the $0.21/bbl. entitlements penalty which is imposed upon the use of foreign crude oil.
Do	Shell Oil Co., Washington, D.C.	DEE-2014, DES-2014, and DST-2014.	Exception to base period supply obligations, request for stay, request for temporary stay. If granted: Shell Oil Co. would be granted a temporary exception from the allocation regulations which would permit the firm to determine its motor gasoline supply obligations on the basis of its customers' levels of purchases in the corresponding month of 1977 or the 1972 base period, whichever is greater.
Do	Union Oil Co. of California, Los Angeles, Calif.	DXE-2016	Extension of relief granted in *Union Oil Co. of California*, 2 DOE Par.—(Sept. 29, 1978). If granted: Union Oil Co. of California could continue to sell crude oil produced from the West Richfield Chapman Zone Unit, located in the Richfield Field, California, at upper tier ceiling prices.
Nov. 17, 1978	Supreme Petroleum Co. of New Jersey, Inc., Washington, D.C.	DRD-0014	Motion for Discovery. If granted: Supreme Petroleum Co. of New Jersey, Inc., would be granted discovery with respect to a remedial order issued to Champlin Petroleum Co. on Sept. 19, 1977, by region VI.

DIESEL EMISSION HEALTH EFFECTS RESEARCH

Notice of Open Meeting

NOVEMBER 27, 1978.

To be held on December 12 and 13, 1978 at 8:00 a.m. at the Quality Inn, Pentagon City, 300 Army Navy Drive, Arlington, Virginia 22020, 703-892-4100.

Action—Open Scientific Review Meeting, December 12 and 13, 1978.

Contact: Mr. Brent Norton, GEOMET, Inc., Gaithersburg, Maryland, 301-948-0755.

Purpose: Present the EPA diesel emission health effects research plan to a scientific panel for review and scientific evaluation.

Agenda:

DECEMBER 12, 8:00 A.M. TO 5:30 P.M.

Introductory Overview of EPA Health Effects Research Plan.
In Vitro Studies.
Skin Painting Studies.
Intraperitoneal Injection Studies.
Inhalation Studies: cancer, noncancer.
Intratracheal Instillation and Injection Studies.
Epidemiology Studies.

DECEMBER 13, 8:00 A.M. TO 2:00 P.M.

Open Question and Comment Session.
Panel Deliberations and Report Writing.

Comments: Written comments may be filed during or after the meeting until December 27 for inclusion in the proceedings.

Proceedings: Summary proceedings will be published and made available.

FEDERAL INSECTICIDE, FUNGICIDE, AND RODENTICIDE ACT SCIENTIFIC ADVISORY PANEL

Open Meeting

AGENCY: Office of Pesticide Programs, Environmental Protection Agency (EPA).

ACTION: Notice of open meeting.

SUMMARY: There will be a two-day meeting of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) Scientific Advisory Panel from 9:30 a.m. to 4:30 p.m. daily on Thursday and Friday, December 14 and 15, 1978. The meeting will be held in Room 1112A, Crystal Mall, Building No. 2, 1921 Jefferson Davis Highway, Arlington, Va., and will be open to the public.

FOR FURTHER INFORMATION CONTACT:

Dr. H. Wade Fowler, Jr., Executive Secretary, FIFRA Scientific Advisory Panel, Office of Pesticide Programs (TS-766), Room 803, Crystal Mall, Building No. 2, at the above address, telephone 703-557-7560.

SUPPLEMENTARY INFORMATION: Notice of this meeting is published late because it was hoped that a discussion regarding amitraz (BAAM) could be added to the agenda; however, more time was needed to prepare a final cancer risk assessment. the Panel will comment on the impact on health and the environment of regulatory actions under section 6(b) and 25(a) of the amended FIFRA prior to implementation.

The purpose of this meeting is to discuss the following topics:

1. Completion of Panel review of topics continued from previous meetings;

2. Review of FIFRE Section 3(c)(7) interim-final regulations for conditional registration of pesticides;

3. A briefing will be given to the Panel by EPA on decision options under consideration by the Agency to conclude RPAR (Rebuttable Presumption Against Registration) action on Pronamide products; or

4. If the interim-final regulations referred to in item 2 above are not ready for review, the Panel will consider in an informal session the following subparts of the Guidelines for Registering Pesticides in the United States: Subpart H: Label Development; Subpart I: Experimental Use Permits; and Subpart J: Hazard Evaluation: Non-target Plants. These subparts are in preparation for proposal in the FEDERAL REGISTER.

Any member of the public wishing to attend or submit a paper should contact Dr. H. Wade Fowler, Jr., at the address or phone listed above to be sure that the meeting is still scheduled. Interested persons are permitted to file written statements before or after the meeting and may upon advance notice to the Executive Secretary, present oral statements to the extent that time permits. Written or oral statements will be taken into consideration by the Panel in formulating comments or in deciding to waive comments. Persons desirous of making oral statements must notify the Executive Secretary and submit copies of a summary no later than December 8, 1978.

Individuals who wish to file written statements are advised to submit copies of statements to the Executive Secretary in a timely manner to ensure appropriate consideration by the Panel.

STATUTORY AUTHORITY: Section 25(d) of FIFRA, as amended in 1972, 1975, and 1978 (92 Stat. 819; 7 U.S.C. 136) and Sec. 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463; 86 Stat. 770).

Dated: November 30, 1978.

EDWIN L. JOHNSON,
Deputy Assistant Administrator for Pesticide Programs.

ISSUANCE OF EXPERIMENTAL USE PERMITS

The Environmental Protection Agency (EPA) has issued experimental use permits to the following applicants. Such permits are in accordance with, and subject to, the provisions of 40 CFR Part 172, which defines EPA procedures with respect to the use of pesticides for experimental purposes.

No. 2224-EUP-4. Mobil Chemical Company, Richmond, Virginia 23261. This experimental use permit allows the use of the remaining supply of approximately 3,265 pounds of the herbicide bifenox on corn, barley, oats, rice, wheat, and sorghum to evaluate control of weeds; this use was authorized in a previous experimental use permit. A total of 340 acres is involved; the program is authorized only in the States of Arizona, Arkansas, California, Colorado, Georgia, Idaho, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Michigan, Minnesota, Mississippi, Missouri, Montana, Nebraska, New Jersey, New York, North Carolina, North Dakota, Oklahoma, South Dakota, Tennessee, Texas, Virginia, and Wisconsin. The experimental use permit is effective from November 9, 1978 to March 31, 1980. Permanent tolerances for residues of the active ingredient in or on corn, grain and straw of barley, oats, rice, wheat, and sorghum grain and forage have been established (40 CFR 180.351). (PM-25, Room: E-301, Telephone: 202-755-2196).

No. 524-EUP-46. Monsanto Company, St. Louis, Missouri 63166. This experimental use permit allows the use of 3,930 pounds of the herbicide glyphosate on forage grasses and legumes to evaluate control of weeds. A total of 2,620 acres is involved; the program is authorized only in the States of Alabama, Arkansas, California, Colorado, Connecticut, Florida, Georgia, Idaho, Illinois, Indiana, Iowa, Kansas, Kentucky, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Montana, Nebraska, New Hampshire, New Jersey, New York, North Carolina, North Dakota, Ohio, Oklahoma, Oregon, Pennsylvania, South Dakota, Tennessee, Texas, Utah, Vermont, Virginia, Washington, Wisconsin, and Wyoming. The experimental use permit is effective from November 14, 1978 to November 14, 1980. Temporary tolerances for residues of the active ingredient in or on forage legumes, liver and kidney of cattle, goats, hogs, horses, poultry, and sheep have been established. A permanent tolerance for residues of the active ingredient in or on forage grasses has been established (40 CFR 180.364). (PM-25, Room: E-310, Telephone: 202-755-2196).

No. 4581-EUP-30. Pennwalt Corporation, Monrovia, California 91016. This experimental use permit allows the use of 662 pounds of the plant growth regulator CIPC on stored potatoes to evaluate sprout inhibition in potatoes during the storage period. The program is authorized only in the States of Idaho, Minnesota, North Dakota, Oregon, and Washington. The experimental use permit is effective from November 4, 1978 to November 4, 1979. A permanent tolerance for residues of the active ingredient in or on potatoes has been established (40 CFR 180.181). (PM-25, Room: E-301, Telephone: 202-755-2196.)

Interested parties wishing to review the experimental use permits are referred to the designated Product Manager (PM), Registration Division (TS-767), Office of Pesticide Programs, EPA, 401 M Street SW., Washington, D.C. 20460. The descriptive paragraph for each permit contains a telephone number and room number for information purposes. It is suggested that interested persons call before visiting the EPA Headquarters Office, so that the appropriate permits may be made conveniently available for review purposes. The files will be available for inspection from 8:30 a.m. to 4:00 p.m. Monday through Friday.

Section 5 of the Federal Insecticide, Fungicide, and Rodenticide Act, as amended in 1972, 1975, and 1978 (92 Stat. 819; 7 U.S.C. 136).

Dated: November 27, 1978.

DOUGLAS D. CAMPT,
Acting Director, Registration Division.

Establishment of Temporary Tolerances for Glyphosate; Correction

In FR Doc. 78-29974 appearing at page 49846 in the issue of Wednesday, October 25, 1978, an incorrect statement was made in the third paragraph, to wit, "A nitrosamine compound, which is a suspect carcinogen, appears in the formulations as an impurity." The impurity is not a nitrosamine compound. Thus, the second sentence, third paragraph, should have read "*N*-nitrosoglyphosate appears in the formulations as a contaminant." the next sentence remains unchanged: "However, no residues of the compound are present at detectable levels in the raw agricultural commodities."

Dated: November 27, 1978.

DOUGLAS D. CAMPT,
Acting Director Registration Division.

PESTICIDE PROGRAMS

Establishment of Temporary Tolerances for Glyphosphate; Correction

In FR Doc. 78-29108 appearing at page 47606 in the issue of Monday, October 16, 1978, an incorrect statement was made in the second paragraph, to wit, "A nitrosamine compound, which is a suspect carcinogen, appears in the formulations as an impurity." The impurity is not a nitrosamine compound. Thus, the second sentence, second paragraph, should have read "*N*-nitrosoglyphosate appears in the formulations as a contaminant." The next sentence remains unchanged: "However, no detectable residues of the compound are present in the raw agricultural commodities."

Dated: November 27, 1978.

PESTICIDE PROGRAMS

Notice of Filing of Pesticide Petition

E. I. duPont de Nemours & Co., Wilmington, DE 19898, has submitted a petition (PP 8F2119) which proposes that 40 CFR Part 180 be amended by establishing a tolerance for residues of the herbicide hexazinone [3-cyclohexyl - 6 - (dimethylamino) - 1 methyl-1,3,5-triazine-2,4,(1*H*)-dione] and its metabolites (calculated as the parent compound) in or on sugarcane with a tolerance limitation of 0.2 part per million (ppm). The proposed analytical method for determining residues is by nitrogen selective gas chromatography. Notice of this submission is given pursuant to the provisions of section 408(d)(1) of the Federal Food, Drug, and Cosmetic Act.

Interested persons are invited to submit written comments on this petition to the Federal Register Section, Program Support Division (TS-757), Office of Pesticide Programs, EPA, Rm. 401, East Tower, 401 M St., SW., Washington, D.C. 20460. Inquiries concerning this petition may be directed to Product Manager (PM) 23, Registration Division (TS-767), Office of Pesticide Programs, at the above address, or by telephone at 202/755-1397. Written comments should bear a notation indicating the petition number.

Comments may be made at any time while a petition is pending before the Agency. All written comments filed pursuant to this notice will be available for public inspection in the office of the Federal Register Section from 8:30 a.m. to 4 p.m. Monday through Friday.

Dated: November 27, 1978.

DOUGLAS D. CAMPT,
Acting Director, Registration Division.

FEDERAL COMMUNICATIONS COMMISSION

FM BROADCAST APPLICATIONS READY AND AVAILABLE FOR PROCESSING

Adopted: November 21, 1978.

Released: November 29, 1978.

By the Acting Chief, Broadcast Facilities Division.

CUT-OFF DATE: January 17, 1979.

Notice is hereby given, pursuant to § 1.573(d) of the Commission's rules, that on January 18, 1979, the FM broadcast applications listed in the attached Appendix below will be considered as ready and available for processing. Pursuant to § 1.227(b)(1) and § 1.591(b) of the Commission's rules,

D E 5 7 8 UMI

V 43/234 DEC 5 78 UMI

an application, in order to be considered with any application appearing on the attached list or with any other application on file by the close of business on January 17, 1979, which involves a conflict necessitating a hearing with any application on this list, must be substantially complete and tendered for filing at the offices of the Commission in Washington, D.C., by the close of business on January 17, 1979. The attention of prospective applicants is directed to the fact that some contemplated proposals may not be eligible for consideration with an application appearing in the attached Appendix by reason of conflicts between the listed applications and applications appearing in previous notices published pursuant to §1.573(d) of the Commission's rules.

The attention of any party in interest desiring to file pleadings concerning any pending FM broadcast applications, pursuant to Section 309(d)(1) of the Communications Act of 1934, as amended, is directed to §1.580(i) of the Commission's rules for provisions governing the time for filing and other requirements relating to such pleadings.

FEDERAL COMMUNICATIONS COMMISSION,
WILLIAM J. TRICARICO,
Secretary.

FM BROADCAST APPLICATION READY AND AVAILABLE FOR PROCESSING

Adopted: November 28, 1978.

Released: November 28, 1978.

By the Chief, Broadcast Facilities Division.

CUT-OFF DATE: January 2, 1979.

Notice is hereby given that the FM broadcast application listed below will be considered as ready and available for processing on January 3, 1979. Since the listed application is timely filed and mutually exclusive with the earlier-filed and cut-off application of Bermey E. Stevens (File No. BPH-10,775), no other applications which involve conflict with these applications may be filed. Rather, the purpose of this Notice is to establish a date by which the parties to the forthcoming comparative hearing may compute the deadlines for filing amendments as a matter of right under § 1.522(a)(2) of the rules and pleadings to specify issues pursuant to Section 1.584.

BPH-11,004 (new), Windsor, N.C. Cashie Valley Broadcasters, Inc. Req: 97.7 MHz, 249; 3 kW; 300 feet.

FEDERAL COMMUNICATIONS COMMISSION,
WILLIAM J. TRICARICO,
Secretary.

FEDERAL MARITIME COMMISSION

AGREEMENTS FILED

The Federal Maritime Commission hereby gives notice that the following agreements have been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of each of the agreements and the justifications offered therefor at the Washington Office of the Federal Maritime Commission, 1100 L Street, NW., Room 10218; or may inspect the agreements at the Field Offices located at New York, N.Y.; New Orleans, Louisiana; San Francisco, California; Chicago, Illinois; and San Juan, Puerto Rico. Interested parties may submit comments on each agreement, including requests for hearing, to the Secretary, Federal Maritime Commission, Washington, D.C. 20573, on or before December 26, 1978. Comments should include facts and arguments concerning the approval, modification, or disapproval of the proposed agreement. Comments shall discuss with particularity allegations that the agreement is unjustly discriminatory or unfair as between carriers, shippers, exporters, importers, or ports, or between exporters from the United States and their foreign competitors, or operates to the detriment of the commerce of the United States, or is contrary to the public interest, or is in violation of the Act.

A copy of any comments should also be forwarded to the party filing the agreements and the statement should indicate that this has been done.

Agreement No. 5200-33.

Filing Party: David C. Nolan, Esq., Graham & James, One Maritime Plaza, San Francisco, California 94111.

Summary: Agreement No. 5200-33, among the members of the Pacific Coast European Conference, modifies the self-policing procedures of the basic conference agreement to comply with the recent revision of Federal Maritime Commission General Order No. 7 set forth in Docket No. 73-64.

Agreement No. 8682-17.

Filing Party: Elkan Turk, Jr., Esq., Burlingham Underwood & Lord, One Battery Park Plaza, New York, New York 10004.

Summary: Agreement No. 8682-17 would amend various articles of the U.S. Gulf/Japan Cotton Pool Agreement for the purpose of (1) reducing the minimum sailing requirements for American and Japanese carriers, and (2) revising the shares of percentage participation of the American and Japanese groups from 50 percent each to, respectively, 40 percent and 60 percent.

Agreement No. 9891-7.

Filing Party: Edwin Longcope, Esq., Hill, Betts & Nash, Suite 5215, One World Trade Center, New York, New York 10048.

Summary: Agreement No. 9891-7, between Armement Deppe, S.A. and Ozean/Stinnes-Lines Joint Service. changes the expiration date of the basic agreement from January 1, 1979 to January 1, 1982.

Agreement No. 10045-3.

Filing Party: Donald J. Brunner, Esquire, Ragan & Mason, 900 Seventeenth Street, N.W., Washington, D.C. 20006.

Summary: Agreement No. 10045-3, between Coordinated Caribbean Transport, Inc., Linea Naviera Pan Atlantica, S.A., d/b/a Pan Atlantic Lines, Inc., and Sea-Land Service, Inc., modifies the parties' basic forty-eight hour rate agreement in the trade between Florida ports and ports in the Republic of Panama and the Republic of Costa Rica by (1) providing for the admission of Sea-Land Service, Inc. as a party to the agreement; (2) expanding the geographic scope of the agreement to also include U.S. Atlantic and Gulf ports and to include inland points; (3) including demurrage charges as an item on which the parties may agree; and (4) incorporating neutral body self-policing provisions.

Agreement No. 10105-1.

Filing Party: Donald J. Brunner, Esquire, Ragan & Mason, 900 Seventeenth Street, N.W., Washington, D.C. 20006.

Summary: Agreement No. 10105-1, between Coordinated Caribbean Transport, Inc., Pan American Mail Lines, Inc., d/b/a Pan Atlantic Lines, Inc., and Sea-Land Service, Inc., modifies the parties' basic forty-eight hour rate agreement in the trade between Florida ports and Caribbean ports of Guatemala and Honduras, and via the latter, to and from inland ports in Guatemala, Honduras and El Salvador by (1) providing for the admission of Sea-Land Service as a party to the agreement; (2) expanding the geographic scope of the agreement to also include U.S. Atlantic and Gulf ports; (3) including demurrage charges as an item on which the parties may agree; and (4) incorporating neutral body self-policing provisions.

Dated: November 29, 1978.

By order of the Federal Maritime Commission.

FRANCIS C. HURNEY,
Secretary.

Agreement No.: T-182-3.

Filing Party: David D. Pollack, Assistant General Counsel and Assistant Secretary, Youngstown Sheet and Tube Company, P.O. Box 900, Youngstown, Ohio 44501.

Summary: Agreement No. T-182-3, between Transoceanic Terminal Corporation and South Chicago Dock Leasing Company, Division of Youngstown Sheet and Tube Company, modifies the parties' basic agreement providing for the lease of certain property at Chicago, Illinois. The purpose of the modification is to terminate the agreement, effective upon the date (required by Order of the Court to be within 14 days after November 16, 1978) that possession of the property is awarded (pursuant to Order in a condemnation proceeding) to the Chicago Regional Port District.

Dated: November 29, 1978.

By order of the Federal Maritime Commission.

FRANCIS C. HURNEY,
Secretary.

[Independent Ocean Freight Forwarder License No. 1903]

E.A.M. INTERNATIONAL, ERIC A. MARANDOLA D/B/A

Order of Revocation

On November 20, 1978, E.A.M. International, Eric A. Marandola d/b/a, 1529 W. 14th Street, Long Beach, California 90813, requested the Commissioner to revoke its Independent Ocean Freight Forwarder License No. 1903, effective November 30, 1978.

Therefore, by virtue of authority vested in me by the Federal Maritime Commission as set forth in Manual of Orders, Commission Order No. 201.1 (Revised), section 5.01(c), dated August 8, 1977;

It is ordered, That Independent Ocean Freight Forwarder License No. 1903 issued to E.A.M. International, Eric A. Marandola d/b/a be and is hereby revoked effective November 30, 1978 without prejudice to reapplication for a license in the future.

It is further ordered, That a copy of this Order be published in the FEDERAL REGISTER and served upon E.A.M. International, Eric A. Marandola d/b/a.

ROBERT G. DREW,
Director, Bureau of Certification and Licensing.

[Docket No. 72-35]

PACIFIC WESTBOUND CONFERENCE

Investigation of Rates, Rules and Practices Pertaining to the Movement of Wastepaper and Woodpulp From U.S. West Coast Ports to Ports in Japan; Availability of Final Environmental Impact Statement

Upon completion of a Final Environmental Impact Statement ("FEIS"), the Federal Maritime Commission's Office of Environmental Analysis ("OEA") has identified the energy and environmental consequences of the Commission's final resolution in this proceeding. the FEIS indicates that if the Commission decides PWC's rates on wastepaper violate the Shipping Act, 1916 and orders them reduced, there may be lower U.S. solid waste management costs, less fuel consumed in the U.S., less landfill and process water used, as well as, fewer air and water pollutants produced in the U.S. The assessment of energy use is required under section 382(b) of the Energy Policy and Conservation Act of 1975, and an environmental assessment is required under section 4332(2)(c) of the National Environmental Policy Act of 1969.

Docket No. 72-35 was instituted by Order of Investigation served on July 20, 1972, and is to determine whether the Pacific Westbound Conference's rates, rules and practices for moving wastepaper and woodpulp from United States West Coast ports to ports in Japan, South Korea, South Vietnam, Taiwan, the Philippines and Thailand violate sections 15, 16, 17, 18(b)(5) and 22 of the Shipping Act, 1916.

The OEA's conclusions are contained in the FEIS which is available on request from the Office of the Secretary, Room 11101, Federal Maritime Commission, Washington, D.C. 20573, telephone 202-523-5725.

FRANCIS C. HURNEY,
Secretary.

FEDERAL RESERVE SYSTEM

BOWMAN CAPITAL CO.

Formation of Bank Holding Company

Bowman Capital Co., Omaha, Nebraska, has applied for the Board's approval under section 3(a) (1) of the Bank Holding Company Act (12 U.S.C.) 1842 (a)(1)) to become a bank holding company by acquiring 100 percent (less directors' qualifying shares) of the voting shares of The First National Bank of Bowman, Bowman, North Dakota. The factors that are considered in acting on the Application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The Application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Minneapolis. Any person wishing to comment on the application should submit views in writing to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551 to be received no later than December 28, 1978. Any comment on an application that requests a hearing must be sent to the Secretary's office within 30 days of the date of this notice and must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Board of Governors of the Federal Reserve System, November 28, 1978.

GRIFFITH L. GARWOOD,
Deputy Secretary of the Board.

[6210-01-M]

FIRST HAWAIIAN, INC.

Proposed Continuation of Insurance Agency Activities

First Hawaiian, Inc., Honolulu, Hawaii, has applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(2) of the Board's Regulation Y (12 CFR 225.4(b)(2)), for permission to continue to engage in the sale of credit related life, accident, and health insurance in connection with loans or extensions of credit made by its wholly owned subsidiary, Hawaii Thrift & Loan, Incorporated, Honolulu, Hawaii. Notice of the application was published on September 29, 1978 in *The Honolulu Advertiser*, a newspaper circulated in Honolulu, Hawaii. The activities proposed have been specified by the Board in § 225.4(a) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of § 225.4(b).

Interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question should be accompanied by a statement summarizing the evidence the person requesting the hearing proposes to submit or to elicit at the hearing and a statement of the reasons why this matter should not be resolved without a hearing.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of San Francisco.

Any views or requests for hearing should be submitted in writing and received by the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, not later than December 28, 1978.

Board of Governors of the Federal Reserve System, November 28, 1978.

THEODORE E. ALLISON,
Secretary of the Board.

GENERAL SERVICES ADMINISTRATION

Federal Property Resources Service

ORDER TRANSFERRING TO THE TENNESSEE VALLEY AUTHORITY THE USE, POSSESSION, AND CONTROL OF CERTAIN LAND IN ANDERSON COUNTY, TENNESSEE, FROM THE DEPARTMENT OF ENERGY

By virtue of the authority vested in the President of the United States by Section 7(b) of the Tennessee Valley Authority Act of 1933 (16 U.S.C. 831f(b) (1970)), and delegated to the Administrator of General Services by Section 1 (17) of Executive Order No 11609 of July 22, 1971, and further delegated to the Commissioner, Federal Property Resources Service, by GSA Order ADM 5450.49 of July 20, 1978, it is hereby ordered that the use, possession, and control of the land hereinafter described be, and it is hereby transferred to the Tennessee Valley Authority from the Department of Energy, successor to the Energy Research and Development Aministration, such transfer being deemed necessary and proper for the purposes of

D E 5 7 8 UMI

ing initial denials, by the individual posed contract not later than 30 days

V 4 3 / 2 3 4

the Tennessee Valley Authority as stated in the Tennessee Valley Authority Act of 1933, as amended, said transfer to be effective as of the date hereof:

TRACT NO. MHR-8

A portion of a tract of land lying in the Eighth Civil District of Anderson County, State of Tennessee, on the original right bank of the Clinch River at Solway Bridge, the said portion being more particularly described as follows:

Beginning at a point where the centerline of the westbound lane of the relocated State Highway 62 crosses the west end of the new Solway Bridge, said point also being in the easterly extension of the centerline of partially completed exit ramp "D" (as identified on Sheet 7 of State of Tennessee Department of Highways Plan and Profile of State Highway Project 01008-2211-04); thence with a severance line and a line that extends with the centerline of the ramp extension in a westerly direction and subsequently with the centerline of the said ramp as it curves to the right in a general northerly direction for a total distance of approximately 1,100 feet to a point 60 feet southeast of and radially opposite a point on the centerline of the old location of Bethel Valley Road and in the city of Oak Ridge's line; thence with the city of Oak Ridge's line, with a line 60 feet southeast of and parallel to the centerline of the said old road location and with a curve having a radius of 16,371.53 feet as it curves to the left in a northeasterly direction 445 feet to the tangent point of the curve; thence N. 57° 36' E., 230 feet to a point, a corner of the land of the city of Oak Ridge and the land of the United States of America in the custody of the Tennessee Valley Authority; thence with the line of the land in the custody of the Tennessee Valley Authority S. 55° E., 515 feet to the Clinch River as it was prior to the impoundment of Melton Hill Lake; thence with the said original Clinch River as it meanders downstream approximately 985 feet to a point in the centerline of the new Solway Bridge (State Highway 62); thence with the centerline of the new bridge N. 75° 35' W., 200 feet to the point of beginning, and containing 18.5 acres, more or less.

Furthermore, such appurtenant right, title, and interest as may attach to the title of the above-described land in and to that portion of the right-of-way of Bethel Valley Road which abuts the described land on the northwest.

Furthermore, such appurtenant right, title, and interest as may attach to the title of the above-described land in and to the bed of the original Clinch River.

The positions of corners and directions of lines are referred to the Tennessee Coordinate System.

The above-described land is subject to the following:

1. Such rights as may be vested in the state and county to rights-of-way for roads.

2. Such rights as may be vested in third parties to rights-of-way for telephone lines and electric power distribution lines.

This 17th day of November, 1978.

ROY MARKON,
Commissioner, Federal Property Resources Service.

METHODS OF COLLECTION, MEASUREMENT, AND VALUATION OF SELECTED WEALTH COMPONENTS

Notice of Program Results

Pursuant to Section 606 of the Community Services Act of 1974, (Pub. L. 93-644) 42 U.S.C. 2946, this agency announces the results, findings, data, or recommendations reported as a result of activities associated with an HEW project entitled, "Methods of Collection, Measurement, and Valuation of Selected Wealth Components."

This project, part of the development program for the new Survey of Income and Program Participation reviewed methods employed in prior field surveys of collection, measurement, and valuation of selected wealth components. The product of this research project consisted of four reports, each on a component of an individual's personal wealth. The four components were: owner-occupied housing; insurance holdings; savings; and individually owned farms or businesses. Each report presents a clear and relevant analysis of problems associated with the collection and measurement of these data which have been encountered in previous studies collecting data through field survey methodology. In addition, the contractor evaluated the results of the different survey methods that might be useful in the development of the Survey of Income and Program Participation.

To obtain information or copies of the reports, please contact the Office of the Assistant Secretary for Planning and Evaluation, Income Survey Development Staff, Room 3627, 330 Independence Aveune, SW., Washington, D.C. 20201.

HENRY AARON,
Assistant Secretary for Planning and Evaluation.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Secretary

[Docket No. N-78-900]

PRIVACY ACT OF 1974

Proposed New System of Records

AGENCY: Department of Housing and Urban Development.

ACTION: Notice of proposed new system of records.

SUMMARY: The Department is giving notice of a new system of records it intends to maintain that is subject to the provisions of the Privacy Act of 1974.

EFFECTIVE DATE: The system of records shall become effective without further notice January 4, 1979 unless comments are received on or before January 4, 1979, which would result in a contrary determination.

ADDRESS: Rules Docket Clerk, Room 5218, Department of Housing and Urban Development, 451 Seventh Street, S.W., Washington, D.C. 20410.

FOR FURTHER INFORMATION CONTACT:

Mr. Harold Rosenthal, Departmental Privacy Act Officer, telephone 202-755-5192.

SUPPLEMENTARY INFORMATION: The new system identified as Mortgagee Activities Review System will consist of name, address, social security account number, educational achievement, professional and employment histories and references of individuals designated as directors, officers and managers of firms applying to become HUD-approved mortgagees.

A new system report was filed with the Speaker of the House, the President of the Senate and the Office of Management and Budget on August 16, 1978. The prefatory statement containing General Rountine Uses applicable to all of the Department's systems of records was published at 42 FR 54765 (October 7, 1977) Appendix A, which lists the addresses of HUD's field offices, was published at 42 FR 54777 (October 7, 1977).

HUD/H-4

System name:

Mortgagee Activities Review System

System location:

Headquarters and most field offices. For a complete listing of these offices, with addresses, see Appendix A.

Categories of individuals covered by the system:

Individuals designated as directors, officers and managers and listed in a firm's application filed with HUD for the purpose of becoming a HUD-approved mortgagee.

Categories of records in the system:

Applications and resumes containing name; address, social security account number; educational, and professional and employment history; and personal references.

Routine uses of records maintined in the system including categories of users and the purposes of such uses:

See Routine Uses Paragraphs in prefatory statement. Other routine uses: none.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

In file folders and on magnetic tape/disc/drum.

Retrievability:

Name, social security account number.

Safeguards:

Manual files are kept in lockable cabinets; computer records are maintained in secured areas. Access to either type of record is limited to authorized personnel.

Retention and disposal:

Records are maintained in perpetuity.

System manager and address:

Director, Office of Organization and Management Information, Department of Housing and Urban Development, 451 Seventh Street, S.W., Washington, D.C. 20410.

Notification procedure:

For information, assistance, or inquiry about existence of records, contact the Privacy Act Officer at the appropriate location in accordance with 24 CFR Part 16. A list of all locations is given in Appendix A.

Record access procedures:

The Department's rules for providing access to records to the individual concerned appear in 24 CFR Part 16. If additional information or assistance is required, contact the Privacy Act Officer at the appropriate location. A list of all locations is given in Appendix A.

Contesting record procedures:

The Department's rules for contesting the contents of records and appealing initial denials, by the individual concerned, appear in 24 CFR Part 16. If additional information or assistance is needed, it may be obtained by contacting: (i) in relation to contesting contents of records, the Privacy Act Officer at the appropriate location. A list of all locations is given in Appendix A; (ii) in relation to appeals of initial denials, the HUD Departmental Privacy Appeals Officer, Officer of General Counsel, Department of Housing and Urban Development, 451 Seventh Street, S.W., Washington, D.C. 20410.

Record source categories:

Subject, previous and current employers, and business and character references.

AUTHORITY: 5 U.S.C. 552a, 88 Stat. 1896; Sec. 7(d) Department of HUD Act (42 U.S.C. 3535(d)).

Issued at Washington, D.C., November 28, 1978.

WILLIAM A. MEDINA,
Assistant Secretary for Administration.

DEPARTMENT OF THE INTERIOR

Bureau of Reclamation

CONTRACT NEGOTIATIONS WITH SNIPES MOUNTAIN IRRIGATION DISTRICT, YAKIMA PROJECT, WASHINGTON

Intent To Begin Contract Negotiations for Repayment of Emergency Loan Funds

Although the Department of the Interior has not formally adopted procedures for public participation in contract negotiations, we believe that it is in the interests of the Department to advise the public that a contract is being considered.

The Department of the Interior, through the Bureau of Reclamation, intends to open negotiations with the Snipes Mountain Irrigation District leading to a contract pursuant to the Act of June 26, 1948 (62 Stat. 1052), to return the costs of replacing the discharge manifold of the South Branch (Main) Pumping Plant, Snipes Mountain Irrigation District. The discharge manifold failed near the end of the 1977 irrigation season. Replacement of this key facility, through which water is supplied to nearly all of the lands within the Snipes Mountain Irrigation District, was required prior to commencing irrigation in 1978. The manifold has been replaced with Federal emergency funds at a cost of approximately $130,000.

The public is invited to observe the negotiating sessions and to submit written comments on the form of proposed contract not later than 30 days after the completed contract draft is declared to be available to the public.

For further information on scheduled negotiating sessions and copies of the proposed contract form, please contact: Mr. Richard M. Rigby, Contract and Repayment Specialist, Division of Water, Power and Lands, Bureau of Reclamation, Box 043, 550 West Fort Street, Boise, Idaho 83724, telephone 208-384-1163.

Dated: November 29, 1978.

R. KEITH HIGGINSON,
Commissioner of Reclamation.

ISSUANCE OF PERMIT FOR MARINE MAMMALS

On August 23, 1978, a Notice was published in the FEDERAL REGISTER (Vol. 43, No. 164), that an application had been filed with the Fish and Wildlife Service by the Director, National Fish and Wildlife Laboratory, National Museum of Natural History, Washington, D.C. 20560, for a permit to mark with paintsticks 10 West Indian manatees (*Trichecus manatus*) in the Crystal River, Citrus County, Florida for the purpose of scientific research.

Notice is hereby given that on November 15, 1978, as authorized by the provisions of the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361-1407), and the Endangered Species Act of 1973 (16 U.S.C. 1539), the Fish and Wildlife Service issued a permit (PRT 2-3093) to the Director, National Fish and Wildlife Laboratory, subject to certain conditions set forth therein.

The permit is available for public inspection during normal business hours at the Fish and Wildlife Service's office in room 601, 1000 N. Glebe Road, Arlington, Virginia.

Dated November 30, 1978.

DONALD G. DONAHOO,
Chief, Permit Branch, Federal Wildlife Permit Office.

Geological Survey

OIL AND GAS AND SULPHUR OPERATIONS IN THE OUTER CONTINENTAL SHELF (OCS)

Proposed Requirements for Verifying the Structural Integrity of OCS Platforms

AGENCY: Geological Survey, U.S. Department of the Interior.

ACTION: Proposed Geological Survey Standard.

SUMMARY: The Geological Survey has developed and is soliciting comments on the contents of a draft document entitled "Requirements for Verifying the Structural Integrity of OCS Platforms." This document contains detailed state-of-the-art performance standards which must be met or exceeded in the course of designing, fabricating, and installing new (fixed and/or bottom founded) oil and gas platforms. The primary thrust is aimed at platforms to be installed in frontier areas, in deep water, or those of unique design. Platforms directly associated with oil and gas leasehold production activities, including those structures that support processing, compression, pumping, and storage facilities, are addressed. Platforms that support main-line compressor or pumping stations are not addressed nor are structures that are located within the confines of a Deepwater Port.

These OCS platform requirements represent one part of the Platform Structural Verification Program. The program objective is to provide maximum assurance of the structural integrity of fixed and/or bottom founded oil and gas platforms on the OCS. The Platform Structural Verification Program will integrate two major elements: one substantive and one procedural.

The substantive elements of the program are contained in the main body of the draft requirements document. Permissible alternative procedures are contained in the associated appendices. In addition, an explanation of the basic intention underlying the requirements is provided in the associated commentary.

The procedural elements of the Program will be described in OCS Order No. 8.

DATE: Comments must be received on or before January 30, 1979.

ADDRESS: Comments should be mailed to: Acting Chief, Conservation Division, U.S. Geological Survey, National Center, Mail Stop 600, Reston, Virginia 22092.

FOR FURTHER INFORMATION CONTACT:

Richard J. Giangerelli, Branch of Marine Oil and Gas Operations, Conservation Division, U.S. Geological Survey, National Center, Mail Stop 620, Reston, Virginia 22092, (703) 860-6822.

AUTHOR: Richard J. Giangerelli, Geological Survey, Department of the Interior.

SUPPLEMENTARY INFORMATION: Because of the volume of the document entitled "Requirements for Verifying the Structural Integrity of OCS Platforms" and its associated appendices and commentary, they are not being published in the FEDERAL REGISTER. Copies of these documents may be obtained from the Acting Chief, Conservation Division.

The submission procedures and other requirements for the Platform Structural Verification Program will be included in OCS Order No. 8.

ENVIRONMENTAL IMPACT AND REGULATORY ANALYSIS STATEMENTS: The Department of the Interior has determined that the publication of this notice of a proposed Geological Survey standard will not have a significant impact on the quality of the human environment and, therefore, will not require preparation of an Environmental Impact Statement. The Department has also determined that this notice of a proposed Geological Survey standard does not require preparation of a regulatory analysis under Executive Order 12044.

Dated: November 28, 1978.

W. A. RADLINSKI,
Acting Director.

Heritage Conservation and Recreation Service

NATIONAL REGISTER OF HISTORIC PLACES

Additions, Deletions, and Corrections

By notice in the FEDERAL REGISTER of February 7, 1978, Part II, there was published a list of the properties included in the National Register of Historic Places. Further notice is hereby given that certain amendments or revisions in the nature of additions, deletions, or corrections to the previously published list are adopted as set out below.

It is the responsibility of all Federal agencies to take cognizance of the properties included in the National Register as herein amended and revised in accordance with section 106 of the National Historic Preservation Act of 1966, 80 Stat. 16 U.S.C. 470 et seq. (1970 ed.), and the procedures of the Advisory Council on Historic Preservation, 36 CFR Part 800.

WILLIAM J. MURTAGH,
Keeper of the National Register.
